Before granting a loan, the lending agency and/or the authorized lending institution will be able to interrogate the CAIVRS debtor file which contains the Social Security Numbers (SSNs) of HUD's delinquent debtors and defaulters and defaulted debtor records of the ED and verify that the loan applicant is not in default or delinquent on direct or guaranteed loans of participating Federal programs of either agency. Authorized users place a telephone call to the system. The system provides a recorded message followed by a series of instructions, one of which is a requirement for the SSN of the loan applicant. The system then reports audibly whether the SSN is related to delinquent or defaulted Federal obligations for HUD or ED direct or guaranteed loans. As a result of the information produced by this match, the authorized users may not deny, terminate, or make a final decision of any loan assistance to an applicant or take other adverse action against such applicant, until an officer or employee of such agency has independently verified such information.

DATES: Effective Date: Computer matching is expected to begin October 26, 1992, and unless comments are received which will result in a contrary determination, will be accomplished 18 months from the beginning date.

COMMENTS DUE DATE: October 26, 1992.

ADDRESSES: Interested persons are invited to submit comments regarding this rule to the Rules Docket Clerk, Office of General Counsel, room 10276, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410. Communications should refer to the above docket number and title. A copy of each communication submitted will be available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays at the above address.

FOR PRIVACY ACT INFORMATION CONTACT: Jeanette Smith, Departmental Privacy Act Officer, telephone number (202) 708–2374. [This is not a toll-free telephone number.]

FOR FURTHER INFORMATION FROM RECIPIENT AGENCY CONTACT: Joseph McCloskey, Director, Control and Analysis Division, Department of Housing and Urban Development, 451 Seventh St., SW, Washington, DC 20410, telephone number (202) 708–4256.

FOR FURTHER INFORMATION FROM SOURCE AGENCY CONTACT: Rosemary Beavers, Chief, Administrative and Institutional Management Section, Division of Credit Management and Debt Collection, Department of Education, 400 Maryland Avenue, SW, Washington, DC 20202, telephone number (202) 708–4766. [These are not toll-free numbers.]

REPORTING:

In accordance with Public Law 100–503, the Computer Matching and Privacy Protection Act of 1988, as amended, and Office of Management and Budget Bulletin 89–22, "Instructions on Reporting Computer Matching Programs to the Office of Management and Budget (OMB), Congress and the Public;" copies of this Notice and a report, in duplicate, are being provided to the Committee on

Government Operations of the House of Representatives, the Committee on Governmental Affairs of the Senate, and the Office of Management and Budget.

AUTHORITY:

The matching program may be conducted pursuant to Public Law 100–503, "The Computer Matching and Privacy Protection Act of 1988," as amended, and Office of Management and Budget (OMB) Circulars A–129 (Managing Federal Credit Programs) and A–70 (Policies and Guidelines for Federal Credit Programs). One of the purpose of all Executive departments and agencies—including HUD—is to implement efficient management practices for Federal credit programs. OMB Circulars A–129 and A–70 were issued under the authority of the Budget and Accounting Act of 1921, as amended; the Budget and Accounting Act of 1950, as amended; the Debt Collection Act of 1982, as amended; and, the Deficit Reduction Act of 1984, as amended.

OBJECTIVES TO BE MET BY THE MATCHING PROGRAM:

By identifying those individuals who have defaulted on a student loan, the Federal Government can expand their prescreening search of their loan applicants to further avoid lending to applicants who are credit risks. This matching program will also encourage ED defaulters to contact ED to establish repayment arrangements.

RECORDS TO BE MATCHED:

HUD will utilize its system of records entitled HUD/DEPT–2, *Accounting Records*. The debtor files for HUD programs involved are included in this system of records. HUD's debtor files contain information on borrowers and co-borrowers who are currently in default (at least 90 days delinquent on their loans); or who have any outstanding claims paid during the last three years on title II insured or guaranteed home mortgage loans; or individuals who have defaulted on section 312 rehabilitation loans; or individuals who have had a claim paid in the last three years on a title I loan. For the CAIVRS match, HUD/DEPT–2, System of Records, receives its program inputs from HUD/DEPT–28, Property Improvement and Manufactured (Mobile) Home Loans—Default; HUD/DEPT–32, Delinquent/Default/Assigned Temporary Mortgage Assistance Payments (TMAP) Program; and HUD/CPD–1, Rehabilitation Loans Delinquent/Default.

The ED will provide HUD with debtor files contained in its system of records identified as 18–40–0025, entitled "NDSL Student Loan Files—ED/OPE/OSFA," and its system of records identified as 18–40–0026, entitled "Guaranteed Loan Program-Paid Claims File ED/OPE/OSFA." HUD is maintaining ED's records only as a ministerial action on behalf of ED, not as a part of HUD's HUD/DEPT–2 system of records. ED's data contain information on individuals who have defaulted on their guaranteed loans. The ED will retain ownership and responsibility for their systems of records that they place with HUD. HUD serves only as a record location and routine use recipient for ED's data.

NOTICE PROCEDURES:

HUD and the ED will notify individuals at the time of application (ensuring that routine use appears on the application form) for guaranteed for direct loans that their records will be matched to determine whether they are delinquent or in default on a Federal debt. HUD and the ED will also publish notices concerning routine use disclosures in the **Federal Register** to inform individuals that a computer match may be performed to determine a loan applicant's credit status with the Federal Government.

CATEGORIES OF RECORDS/INDIVIDUALS INVOLVED:

The debtor records include these data elements: SSN, claim number, program code, ED Regional Office code, collection agency code, and indication of indebtedness. Categories of records include: records of claims and defaults, repayment agreements, credit reports, financial statements, and records of foreclosures.

Categories of individuals include: Former mortgagors and purchasers of HUD-owned properties, manufactured (mobile) home and home improvement loan debtors who are delinquent or in default on their loans, rehabilitation loan debtors who are delinquent or in default on their loans, and student loan defaulters.

PERIOD OF THE MATCH:

Matching will begin at least 30 days from the date copies of the signed (by both Data Integrity Boards) computer matching agreement are sent to both Houses of Congress or at least 30 days from the date this notice is published in the **Federal Register**, whichever is later, providing no comments are received which would result in a contrary determination.

Issued at Washington, DC, September 18, 1992.

Jim E. Tarro,

Assistant Secretary for Administration.

DEPARMENT OF THE INTERIOR

Bureau of Land Management

[AZ–040–02–4333–10]

Change of Meeting Date for the Gila Box Advisory Committee

AGENCY: Bureau of Land Management, Interior.

ACTION: Change of Meeting date.

SUMMARY: Notice is hereby given in accordance with 43 CFR part 1780 that the meeting of the Gila Box Riparian National Conservation Area (NCA) Advisory Committee on October 29, 1992, published in the August 24, 1992, Federal Register has been changed to November 5, 1992.

DATES: November 5, 1992 10 a.m.–4 p.m.

ADDRESSES: BLM Safford District Office, 425 E. 4th., Safford, Arizona.

SUPPLEMENTARY INFORMATION: The NCA Advisory Committee was established by the Arizona Desert Wilderness Act of 1990 to provide input to the Safford District on management of the Gila Box Riparian National Conservation Area (NCA). The Committee is continuing work on the Gila Box Interdisciplinary Activity Plan, which must be completed by November 28, 1992. The plan is being written using the Limits of Acceptable Change (LAC) planning process.

The draft document will be reviewed at the November 5, 1992 meeting. All meetings are open to the public. Interested persons may make oral statements to the Committee between 10:30 and 11 a.m., or may file written statements for consideration by the Committee. Anyone wishing to make an oral statement must contact the BLM Gila Resource Area Manager at least two working days prior to the meeting. Written statements are also accepted at any time during preparation of the draft plan, and will be reviewed by the Committee.

Statements should be mailed to Jonathan Collins, Team Leader, Gila Resource Area, 425 E. 4th St., Safford, Arizona 85546.

Summary minutes of the meeting will be maintained in the Safford District Office and will be available for public inspection (during regular business

hours) within 30 days after each meeting.

FOR FURTHER INFORMATION CONTACT: Meg Jensen, Gila Resource Area Manager, or Jonathan Collins, Team Leader, 425 E. 4th St., Safford, Arizona 85546, Telephone (602) 428–4040.

Dated: September 18, 1992.

William T. Civish,

District Manager.

Conveyance and Order Providing for Opening of Public Land in Chouteau County; Montana

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: This order will open land reconveyed to the United States in an exchange under the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1701 et seq (FLPMA), to the operation of the public land laws. It also informs the public and interested state and local governmental officials of the issuance of the conveyance document.

The land acquired in the exchange provides habitat for upland game and deer and is part of a wildlife recreation management area. No minerals were exchanged by either party. The public was well served through completion of this land exchange.

EFFECTIVE DATE: November 9, 1992.

FOR FURTHER INFORMATION CONTACT: James Binando, BLM Montana State Office, P.O. Box 36800, Billings, Montana 59107, 406–255–2935.

SUPPLEMENTARY INFORMATION:

1. Notice is hereby given that pursuant to sec. 206 of FLPMA, the following described land was transferred to James and Norma C. Wood:

Principal Meridian, Montana

T. 25 N., R. 9 E.,

Sec. 11, SE¼NW¼.
containing 40.00 acres.

2. In exchange for the above-selected land, the United States acquired the following-described land from James and Norma C. Wood:

Principal Meridian, Montana

T. 25 N., R. 9 E.,
Sec. 13, SW¼SW¼.
containing 40.00 acres.

3. The values of the Federal public land and private land were appraised at $2,000.

4. At 9 a.m. on November 9, 1992, the lands described in paragraph 2 above that were conveyed to the United States will be opened to the operation of the public land laws generally, subject to valid existing rights and the requirements of applicable law. All valid applications received at or prior to 9 a.m. on November 9, 1992, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

Dated: September 16, 1992.

John E. Moorhouse,

Acting Deputy State Director, Division of Lands and Renewable Resources.

Realty Action; Exchange of Public and Private Lands in Kern and San Luis Obispo Counties, California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The following described public land is being considered for exchange under section 206 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1716):

Mt. Diablo Meridian

T.32S., R.23E.
Tract #1: Sec. 28 All
containing 640 acres.
T.32S., R.24E.
Tract #2: Sec. 28 N½N½SE¼NW¼
containing 10 acres.
Tract #3: Sec. 28 W½SE¼NE¼, W½NE¼SE¼, S½NW¼SE¼
containing 60 acres.
Total: 710 acres of public land in Kern County, CA.

The surface estate and all mineral rights, except for the oil and gas rights, on the above public land will be exchanged. In exchange for this public land, the Bureau of Land Management (BLM) will acquire an equal value of lands from The Nature Conservancy (TNC) in the Carrizo Plain Natural Area or the Kelso Valley—Onyx area. The legal descriptions of the Carrizo Plain lands were published in the **Federal Register** on June 25, 1992, Vol. 57, No. 123, pg. 28534. The Kelso Valley—Onyx lands are as follows:

Mt. Diablo Meridian, California

T.25S., R.36E.
Sec. 20 E½SE¼SE¼
Sec. 21 W½2SW¼SW¼
T.27S., R.35E.
Sec. 8 SW¼SW¼
Sec. 17 W½NW¼NW¼
Sec. 18 SW¼, W½SE¼

SUPPLEMENTARY INFORMATION: The purpose of the exchange is to acquire some of the private inholdings within the BLM lands in the Carrizo Plain Natural Area (in Kern and S.L.O. Counties) and the Kelso Valley—Onyx area (in Kern County). The public interest will be well served by completing the exchange. Publication of this notice in the **Federal Register** segregates the above public lands from settlement, location, and entry under the public land laws, right-of-way laws, permit laws, and mining laws, but not exchange under section 206 of the Federal Land Policy and Management Act of 1976. The segregative effect will end upon issuance of patent or two years from the date of publication in the **Federal Register**, whichever occurs first. The exchange will be on an equal value basis, not an acre-for-acre basis. An independent appraisal will establish the fair market value of the public and private lands. On public land transferred to TNC, the Bureau will reserve to the United States a right-of-way reservation for ditches or canals constructed by the authority of the United States, under the Act of August 30, 1890 (43 U.S.C. 945). Public land transferred to TNC will also be subject to the following:

S 060146; powerline right-of-way; affects Tract #1.
CA 6839; powerline right-of-way; affects Tract #1.
LA 0154858; road right-of-way; affects Tract #1.
CA 27971; road right-of-way reservation to BLM; affects Tract #1.
S 5505; oil & gas lease; affects Tract #1.
CA 20580; oil & gas lease; affects Tract #1.
SAC 019364a; oil & gas lease; affects Tract #1.
LA 01340; railroad right-of-way; affects Tract #2.
SAC 019395; oil & gas lease; affects Tracts #2 and #3.
S 4558; gas pipeline right-of-way; affects Tract #3.
S 033318; oil pipeline and telephone line right-of-way; affects Tract #3.
CA 26807; gas pipeline right-of-way; affects Tract #3.
CA 18066; powerline right-of-way; affects Tract #3.

Interested parties may submit comments to the BLM Area Manager at the following address until November 9, 1992. For further information contact: Bureau of Land Management, Caliente Resource Area Office, Attn: Dan Vaughn, 4301 Rosedale Highway, Bakersfield, California 93308; (805) 861-4236.

Dated: September 1, 1992.

James Wesley Abbott,

Area Manager.

BILLING CODE 4310-40-M

[CA-060-7122-08-1016; CACA 28227]

Issuance of Land Exchange Conveyance Document; California

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The purpose of this exchange was to achieve more efficient management of the public lands through consolidation of ownership. The public interest was well served through completion of this exchange.

FOR FURTHER INFORMATION CONTACT: Viola Andrade, BLM California State Office, 916-978-4820.

1. The United States issued an exchange conveyance document to Bryon L. Rafnson on September 15, 1992, under sec. 206 of the Act of October 21, 1976, 43 U.S.C. 1716 (1988), for the following described land:

San Bernardino Meridian

T. 7 N., R. 5 W.,
Sec. 19, SE¼;
Sec. 20, S½NW¼SW¼NW¼, SW¼SW¼NW¼, SW¼SE¼SW¼NW¼, and W½SW¼.

The area described contains 257.50 acres of Federal land in San Bernardino County.

2. In exchange for these lands, the United States acquired the following described lands from Byron L. Rafnson:

Mount Diablo Meridian

T. 32 S., R. 44 E.
Sec. 7, all;
Sec. 9, all;
Sec. 16, all;
Sec. 17, all.

The areas described above aggregate 2,579.24 acres of non-Federal land in San Bernardino County.

The values of the Federal land and the non-Federal land in the exchange were appraised at $1,287,500 and $1,290,000, respectively. The equalization payment required of the United States in the amount of $2,500 was waived by Mr. Rafnson.

Dated: September 17, 1992.

Nancy J. Alex,

Chief, Lands Section.

[FR Doc. 92-23204 Filed 9-23-92; 8:45 am]

BILLING CODE 4310-40-M

[ID-010-02-4212-13; IDI-27372]

Realty Action; Exchange of Public and Private Lands in Elmore County, ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action, IDI-27372, Exchange of public and private lands in Elmore County, Idaho.

SUMMARY: The following described public lands have been determined to be suitable for disposal by exchange under sec. 206 of the Federal Land Policy and Management Act of October 21, 1976 (43 U.S.C. 1716):

Boise Meridian, Idaho

T. 4 S., R. 7 E.,
Sec. 11: Lot 2;
Sec. 12: Lots 2, 4, and 6;
Sec. 13: Lot 2, NW¼NE¼, N½NW¼, SE¼NW¼, S½NE¼;
Sec. 14: NE¼NE¼;
T. 4 S., R. 8 E.,
Sec. 18: Lots 2 and 6;

containing 433.30 acres, more or less, in Elmore County.

In exchange for the above described public lands, the BLM proposes to acquire the following described private lands from Elmore County:

Boise Meridian, Idaho

T. 4 S., R. 7 E.,
Sec. 13: Lot S½SW¼;
Sec. 14: Lot SE¼SE¼;
Sec. 23: Portion of E½ lying northeast of I-84;

containing 412.51 acres, more or less, in Elmore County.

The purpose of this exchange is to block up public and private ownership in the area of the new Elmore County landfill. The resulting land pattern makes the management of both the public and private lands more efficient and cost effective, while reducing the potential for indiscriminate dumping of trash on public land. The public interest will be well served by the completion of this exchange. The values of the lands to be exchanged are approximately equal. Full equalization of values will be accomplished prior to closing through either acreage adjustment or cash payment in an amount not to exceed 25 percent of the value of the lands to be transferred out of Federal ownership.

DATES: On or before November 9, 1992, interested parties may submit comments to the District Manager, at the address shown below.

ADDRESSES: Comments should be sent to the District Manager, Bureau of Land Management, Boise District, 3948 Development Avenue, Boise, Idaho 83750. Objections to this proposal will be reviewed by the State Director, who may sustain, modify, or vacate this realty action. In the absence of any adverse comments, this reality action will become the final determination of the Department of the Interior.

FOR FURTHER INFORMATION CONTACT: John Sullivan, Bruneau Resource Area Realty Specialist at (208) 384-3338. The Environmental Assessment is available for review at the above address.

SUPPLEMENTARY INFORMATION: Publication of this notice in the **Federal Register** segregates the public lands from operation of the public land laws and mining laws, but not the mineral leasing laws. The segregative effect will end upon issuance of patent or two (2) years from the date of this publication, whichever occurs first.

Lands to be transferred from the United States will be subject to the following reservations, terms, and conditions.

Excepting and Reserving to the United States

1. A right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890 (43 U.S.C. 945).

Subject To

1. Those rights for electric transmission line purposes granted to Idaho Power Company, its successors or assigns, by Right-of-Way No. IDI-27349, pursuant to the Act of October 21, 1976 (43 U.S.C. 1761).

2. Those rights for buried telephone line purposes granted to American Telephone and Telegraph Company, its successors or assigns, by Right-of-Way No. IDI-26291, pursuant to the Act of October 21, 1976 (43 U.S.C. 1761).

3. Those rights for road purposes held by Mountain Home Highway District, its successors or assigns, pursuant to the Act of July 26, 1866, Revised Statute 2477 (43 U.S.C. 932). Serial No. IDI-21406.

4. Those rights for road purposes held by Glenns Ferry Highway District, its successors or assigns, pursuant to the Act of July 26, 1866, Revised Statute 2477 (43 U.S.C. 932). Serial No. IDI-20029.

5. Those rights for road purposes granted to Elmore County, its successors or assigns, by Right-of-Way No. IDI-25751, pursuant to the Act of October 21, 1976, (43 U.S.C. 1761),

Dated: September 11, 1992.

J. David Brunner,

District Manager.

BILLING CODE 4310-GG-M

[G-010-G2-0091-3110-10-G202; NMNM 87010]

Realty Action; Exchange, Federal Surface in Santa Fe County, NM for private Surface Within El Malpais National Conservation Area and National Monument, Albuquerque District, NM

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action on proposed land exchange.

SUMMARY: The following described Federal surface estate in Santa Fe County has been determined to be suitable for disposal by exchange under section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716.

New Mexico Principal Meridian

T. 12 N., R. 9 E.,
Sec. 3, W½ lot 2 within N½NW¼;
Sec. 4, lot 2 within N½NE¼, SE¼NE¼, SW¼NW¼, and SE¼SW¼;
Sec. 10, W½SW¼;
Sec. 11, lots 1 to 4;
Sec. 13, lots 1, 2, and SE¼SE¼;
Sec. 14, lots 1 to 4, inclusive, and W½E½;
Sec. 24, NE¼;
T. 12 N., R. 10 E.,
Sec. 18, lots 1, 2;
Sec. 19, lots 1, 6;
Sec. 20, lots 1, 2;
Sec. 29, lots 1, 3.

Containing 1,180.44 acres.

In exchange for this Federal surface estate, the United States has selected approximately 3,407.53 acres of private surface within Cibola County adjacent to the El Malpais National Conservation Area near Grants, New Mexico as listed below:

New Mexico Principal Meridian

T. 4 N., R. 11 W.,
Sec. 4, lots 3-6, inclusive, lots 11, 12, and SW¼;
Sec. 5, lots 1 to 12, inclusive, and S½;
Sec. 6, lots 2 to 14, inclusive, E½SW¼ and SE¼;
Sec. 7, lots 1 to 4, inclusive, E½ and E½W½;
Sec. 8, N½ and SE¼;
Sec. 9, all.

Upon completion of the final appraisal, the actual acreage exchanged will be adjusted to reflect equal values as much as possible. The purpose of the exchange is to consolidate Federal surface ownership for the Federal government adjacent to El Malpais National Conservation Area (NCA). This action is consistent with land ownership adjustments as set forth in the Record of Decision for the Rio Puerco Resource Management Plan (RMP) approved November 1986 and the Toas RMP approved October 1988. The purpose of this Notice of Realty Action is twofold. First, this notice will provide a response period of forty-five (45) days during which public comments will be accepted regarding this exchange proposal. Secondly, this action as provided in 43 CFR 2201.1 (b), shall segregate the public lands from all appropriation under the public land laws, including the mining laws, but not the mineral leasing laws, subject to any prior valid rights. The segregative effect shall terminate either upon publication in the **Federal Register** of a termination of the segregation or two years from the date of this publication, whichever occurs first.

DATES: On or before November 9, 1992, interested parties may submit comments to the District Manager at the address below.

ADDRESSES: Detailed information concerning the exchange is available at the Albuquerque District, 435 Montano NE, Albuquerque, New Mexico 87107.

FOR FURTHER INFORMATION CONTACT: Debby Lucero at the Rio Puerco Resource Area Office, Albuquerque District, 435 Montano NE., Albuquerque, New Mexico 87107.

SUPPLEMENTARY INFORMATION: The exchange will be subject to:

1. A reservation to the United States of a right-of-way for ditches or canals constructed by the authority of the United States in accordance with the Act of August 30, 1890 (43 U.S.C. 945).

2. All valid existing rights and reservations of records.

3. All mineral deposits shall be reserved to the United States along with the right to prospect for, mine and remove such deposits under applicable law.

Dated: September 10, 1992.

Robert T. Dale,

District Manager.

Realty Action; Exchange; Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Realty Action, Exchange of Public Lands in Park County, Wyoming.

SUMMARY: The surface estate of the following described lands has been determined, through the Bureau of Land Management's planning process, to be suitable for disposal by exchange pursuant to section 206 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1716:

Sixth Principal Meridian

T. 50 N., R. 99 W.,
Sec. 33, tract 41.
T. 50 N., R. 101 W.,
Sec. 6, lots 3–7;
Sec. 10, NE¼, E½NW¼, NE¼SW¼, N½SE¼;
Sec. 16, lot 1.
T. 51 N., R. 101 W.,
Sec. 18, lot 12;
Sec. 19, lot 5, NW¼NE¼, S½NE¼, SE¼;
Sec. 20, lots 7–9;
Sec. 30, lot 1, lot 2;
Sec. 31, lots 1–5, W½NE¼, SE¼NE¼, E½NW¼, E½SW¼, NW¼SE¼;
Sec. 32, lots 2–4;
Sec. 34, lot 1, lot 2;
Tracts 38 A, B and C.
T. 50 N., R. 102 W.,
Sec. 1, lot 1, SE¼NE¼;
Sec. 12, lot 1, lot 2, lot 5.
T. 51 N., R. 102 W.,
Sec. 36, lots 1 and 6, SE¼NE¼, E½SE¼.
T. 51 N., R. 103 W.,
Sec. 14, lot 6, SW¼SW¼;
Sec. 15, lot 5, SE¼SW¼, SE¼;
Sec. 21, lots 1–4;
Sec. 22, N½, N½SW¼, SE¼;
Sec. 23, SW¼;
Sec. 27, N½NE¼.

The above aggregates 3583.07 acres of public lands, more or less. Some of the lands described above may be deleted from consideration to achieve equal values between the offered and selected lands in the exchange.

In exchange for these lands, the HooDoo Ranch has offered the surface estate of the following described lands:

Sixth Principal Meridian

T. 53 N., R. 98 W.,
Sec. 18, lot 1, lot 2, E½NW¼;
T. 53 N., R. 99 W.,
Sec. 17, lots 1–3, NW¼, N½SW¼;
Sec. 18, NE¼NE¼, SE¼NE¼;
Sec. 21, NE¼SE¼NE¼;
Sec. 22, SW¼NW¼, E½NW¼SW¼;
Sec. 27, N½NE¼, SE¼NE¼.
T. 53 N., R. 100 W.,
Sec. 12, NE¼SE¼;
Sec. 22, SE¼SE¼;
Sec. 33, SE¼NE¼;
T. 49 N., R. 103 W.,
Sec. 4, lots 1–5, SW¼NE¼, SE¼NW¼, SW¼, ½SE¼, SE¼SE¼.
Secs. 4 and 5, Lot 44A;
Sec. 6, SE¼NE¼, SE¼SW¼;
Sec. 7, NE¼, NE¼NW¼;
Sec. 8, W½NE¼, SE¼NE¼, NW¼;
Sec. 9, N½;
Secs. 9 and 16, Lot 43.

The above aggregate approximately 3251.18 acres of land.

FOR FURTHER INFORMATION CONTACT: Duane Whitmer, Area Manager, Cody Resource Area, (307) 587–2216. Information relating to the exchange is available for review at the Cody Resource Area Office, 1002 Blackburn Avenue, P.O. box 518, Cody, Wyoming 82414.

SUPPLEMENTARY INFORMATION: The purpose of this exchange is to acquire non-federal lands which have high public values for wildlife habitat (specifically elk crucial winter range and bighorn sheep), rare plants, fragile soils and watershed. The exchange would also provide legal access to the McCullough Peak designated communication site, and to the southern boundary of the McCullough Peaks Wilderness Study Area. The public interest would be served by the completion of this exchange.

The exchange will be for equal appraised values. Any differences in value between the offered and selected lands will be equalized through adjustments in public land acreage or through a cash payment from the proponent. Any monetary payment shall not exceed 25 percent of the value of the public lands and interests being conveyed. Lands to be transferred from the United States will be subject to the following:

1. Reservation of a right-of-way for ditches and canals pursuant to the Act of August 30, 1890, 43 U.S.C. 945.

2. Reservation of all minerals along with the right of ingress and egress for exploration and development.

3. The Memorandum of Agreement between The Bureau of Land Management, Cody Resource Area, the Wyoming State Historic Preservation Officer, and the Advisory Council on Historic Preservation, dated August 13, 1992, for the purpose of protecting of archeological sites.

4. Oil and Gas leases, BLM serial numbers WYW 125623, WYW# 104122, WYW 125624, WYW 114805, WYW 113953, WYW 97228, WYW 125658, WYW 123575, WYW 105450, WYW 123504, WYW 82209, WYW 91704, WYW 125715, WYW 123469, and WYW 111509.

5. Any other valid existing rights that are identified during the evaluation process.

The following grazing privileges will be canceled due to this exchange: 266 Animal Unit Months (AUMs) in the HooDoo Base Allotment #03043, 7 AUMs in the Sleeper Allotment #03080, 113 AUMs in the Marlow Basin Allotment #03095. Signed waivers of the two-year notice required by 43 CFR 4110.4–2(b) are on file.

Publication of the notice of proposed exchange in the July 28, 1992, issue of the **Federal Register** segregated the selected public lands from the operation of all other public land laws, including the general mining laws, for a period of two (2) years from the date of first publication.

For a period of forty-five (45) days from the date of this publication, interested parties may submit comments to the Cody Resource Area Office, P.O. Box 518, Cody, Wyoming, 82414. Any abverse comments will be evaluated by the Wyoming State Director who may sustain, vacate, or modify this proposed realty action. In the absence of any objections, this proposed realty action will become final.

Dated: September 18, 1992.

Duane Whitmer,

Area Manager.

BILLING CODE 4310–22–M

[AZ–050–02–4380–11]

Arizona: Long-Term Visitor Area Program for 1992–1993 and Subsequent Use Seasons; Revision to Existing Supplementary Rules, Yuma District, AZ, and California Desert District, CA

AGENCY: Bureau of Land Management, Interior.

ACTION: Publication of supplementary rules.

SUMMARY: The Bureau of Land Management (BLM) Yuma District and California Desert District announce revisions to the Long-Term Visitor Area Program. The program, which was instituted in 1983, established designated long-term visitor areas and identified an annual long-term use season from September 15 to April 15. During the long-term use season, visitors who wish to camp on public lands in one location for extended periods must stay in the designated long-term visitor areas and purchase a long-term visitor area permit.

In past years the long-term visitor area supplemental rules have been modified on an annual basis. For clarification purposes, they are listed in their entirety under the "Supplementary Information" heading of this notice. The listing includes all 1992–1993 supplementary rule changes from those established on September 12, 1991.

EFFECTIVE DATE: September 15, 1992.

FOR FURTHER INFORMATION CONTACT: Don Applegate, Outdoor Recreation Planner, Yuma District, 3150 Winsor Avenue, Yuma, Arizona 85365, telephone (602) 726–6300; or Chris Roholt, Outdoor Recreation Planner, California Desert District, 6221 Box Springs Boulevard, Riverside, California 92507, telephone (714) 697–5200.

SUPPLEMENTARY INFORMATION: The purpose of the Long-Term Visitor Area Program is to provide areas for long-term winter camping use. The sites designated as long-term visitor areas are, in most cases, the traditional use areas of long-term visitors. Designated sites were selected using criteria developed during the land management planning process, and environmental assessments were completed for each site location.

The program was established to safely and properly accommodate the increasing demand for long-term winter visitation and to provide natural resource protection through improved management of this use. The designation of long-term visitor areas assures that specific locations are available for long-term use year after year and that inappropriate areas are not used for extended periods.

Visitors may camp without a long-term visitor area permit outside of long-term visitor areas, on public lands not otherwise posted or closed to camping, for up to 14 days in any 28-day period. The Mule Mountain Long-Term Visitor Area is also open to short-term camping without a long-term visitor area permit for a period not to exceed 14 days.

Authority for the designation of long-term visitor areas is contained in title 43, Code of Federal Regulations, subpart 8372, sections 0–3 and 0–5(g). Authority for the establishment of a Long-Term Visitor Area Program is contained in title 43, Code of Federal Regulations, subpart 8372, section 1, and for the payment of fees in title 36, Code of Federal Regulations, subpart 71.

The authority for establishing supplementary rules is contained in title 43, subpart 8365, section 1–6. The long-term visitor area supplementary rules have been developed to meet the goals of individual resource management plans. These rules will be available in each local office having jurisdiction over the lands, sites, or facilities affected and will be posted near and/or within the lands, sites, or facilities affected. Violations of supplementary rules are punishable by a fine not to exceed $1,000 and/or imprisonment not to exceed 12 months.

In past years the supplementary rules have been modified on an annual basis. For clarification purposes, they are listed in their entirety in this Notice. The listing includes all 1992–1993 supplementary rule changes from those established on September 12, 1991.

The following supplementary rules apply to designated long-term visitor areas and are in addition to rules of conduct set forth in title 43, Code of Federal Regulations, subpart 8365, section 1–6.

A. Long-Term Permit

The special stipulations and supplemental rules for the Long-Term Permit are as follows:

1. *The Long-Term Permit.* A permit is required to occupy a campsite in a designated long-term visitor area between September 15 to April 15. The Long-Term Permit authorizes the permittee to occupy a campsite within any designated long-term visitor area, using those camping or dwelling unit(s) indicated on the permit between the period September 15 to April 15. The permit fee is $50 regardless of the length of the stay. No refund is made on permit fees. Length of stay in a long-term visitor area between April 16 and September 14 is limited to 14 days within any 28-day period.

2. *Permit Revocation.* The authorized officer may revoke without reimbursement any long-term visitor area permit issued to any person when the permittee violates any BLM rule or regulation, or when the permittee's, permittee's family's, or guests' conduct is inconsistent with the goals of BLM's Long-Term Visitor Area Program. Failure to return any long-term visitor area permit or decal to any authorized officer upon demand is a violation of this supplemental rule. Any permittee whose permit is revoked must remove all property and leave the long-term visitor area system within 12 hours of notice. The revoked permittee will not be allowed back into any long-term visitor area in Arizona or California for the remainder of the long-term visitor area season.

3. *The Permit Decal.* The permit decal must be affixed at the time of purchase with the adhesive backing to the camping unit; i.e., trailer, camper, or motorhome, in a clearly visible location. The decal must be affixed as designated

to be valid. A maximum of two (2) secondary vehicles is permitted.

4. *Permit Transfers.* If you sell, trade, or otherwise change camping vehicles during the use season, remove the decal from your old vehicle before turning it over to the new owner. Present your permit and decal to any uniformed BLM employee or at the nearest BLM office. The permit will be revised to cover the new camping unit, and you will receive a replacement decal for your new vehicle at no cost. The permit and decal may not be reassigned or transferred by permittee.

5. *Other Laws.* Long-term visitor area permit holders are required to observe all Federal, State, and local laws and regulations applicable to the long-term visitor area and shall keep the long-term visitor area and, specifically, their campsites in a neat, orderly, and sanitary condition.

6. *Unoccupied Camping Units.* Camping sites or dwelling unit(s) must not be left unoccupied within any long-term visitor area for periods of greater than 5 days unless approved in advance by the authorized officer.

7. *Access.* Do not block roads or trails commonly in public use with your parked vehicles, stones, wooden barricades, or by any other means.

8. *Cultural resources.* Do not disturb any archaeological or historical values including, but not limited to, petroglyphs, ruins, historic buildings, and artifacts that may occur on public lands.

9. *Trash.* Pack out your own trash. Public trash dump sites are shown in the long-term visitor area brochure. Depositing trash or holding tank sewage in vault toilets is prohibited. Permits are required for trash disposal within the La Posa Long-Term Visitor Area.

10. *Dumping.* Absolutely no dumping of sewage or garbage on the ground. This includes motor oil and any other substances. State sanitation laws and county ordinances specifically forbid these practices. sanitary dump station locations are shown in the long-term visitor area brochure. Dumping of gray water is prohibited unless otherwise posted. Permits are required for dumping within the La Posa Long-Term Visitor Area.

11. *Self-Contained Vehicles.* In Pilot Knob, Dunes Vista, Midland, Tamarisk, and Hot Spring Long-Term Visitor Area, camping is restricted to self-contained camping units only. Self-contained units must have a permanently affixed wasterwater holding tank of 10-gallon minimum capacity. Port-a-pottie systems, or systems which utilize portable holding tanks, or permanent holding tanks of less than 10-gallon capacity are not considered to be self-contained. The La Posa and Imperial Dam Long-Term Visitor Areas are restricted to self-contained camping units, except within 500 feet of a vault toilet or restrooms at South Mesa.

12. *Speed Limit.* The speed limit in long-term visitor areas is 15 miles per hour or as otherwise posted.

13. *Off-Highway Vehicle Use.* The speed limit in long-term visitor areas is 15 miles per hour. Motorized vehicle play is prohibited. Motorized vehicles should be used in long-term visitor areas only for access to and from campsites.

14. *Pets.* Pets must be kept on a leash at all times. Keep an eye on your pets. Unwatched pets may fall pery to coyotes or other desert predators. Pet owners are responsible for cleanup and sanitary disposal of pet waste.

15. *Parking.* For your safety and privacy, a minimum of 15 feet of space between dwelling units, vehicles, and campfires is required.

16. *Removal of Wheels and Campers.* Campers, trailers, and other dwellings must remain mobile. Wheels must remain on all wheeled vehicles. Pickup campers may be set on jacks manufactured for that purpose.

17. *Quiet Hours.* Quiet hours are from 10 p.m. to 6 a.m. in accordance with applicable State time zone standards.

18. *Noise.* Operation of audio devices or motorized equipment, including generators, in a manner that makes unreasonable noise that disturbs other visitors is prohibited. Within the La Posa and Imperial Dam Long-Term Visitor Areas, amplified music is allowed only in locations designated by BLM or when approved in advance by the authorized officer.

19. *Firearms.* The discharge or use of firearms or weapons is prohibited inside or within 1/2 mile of the long-term visitor areas.

20. *Vending Permits.* The long-term visitor area permit is not a vending permit. Please contact the nearest BLM office for information on vending or concession permits.

21. *Campfires.* Campfires are permitted in long-term visitor areas, subject to local laws and State and Federal regulations. Comply with posted rules.

22. *Wood Collection.* No wood collection is permitted within the boundaries of the Mule Mountain, Imperial Dam, and La Posa Long-Term Visitor Areas. Outside these long-term visitor areas and in all other long-term visitor areas, only dead and down wood may be collected for firewood or hobby purposes. Collection of ironwood is regulated. Please contact the BLM for current regulations concerning collection.

23. *Livestock.* Boarding of livestock (horses, cattle, sheep, goats, etc.) within long-term visitor areas is permitted only when approved in advance by the authorized officer.

24. *Aircraft Use.* Landing or taking off of aircraft, including ultralights, is prohibited in long-term visitor areas.

25. *Hot Spring Long-Term Visitor Area.* Overnight occupancy is prohibited between old Highway 80 and Interstate 8.

26. *Hot Spring Long-Term Visitor area.* Food, beverages, and glass containers are prohibited within 50 feet of the hot spring facility in the Hot Spring Long-Term Visitor Area.

27. *Mule Mountain Long-Term Visitor Area.* All camping within Wiley's Well and Coon Hollow campgrounds is restricted to designated sites only.

28. *Imperial Dam and La Posa Long-Term Visitor Areas.* Overnight occupancy is prohibited in desert washes in the Imperial Dam and La Posa Long-Term Visitor Areas.

29. *La Posa Long-Term Visitor Area.* Access to the La Posa Long-Term Visitor Area is restricted to legal access roads along U.S. Highway 95. Construction and use of other access points are prohibited. This includes removal and modification of barricades such as fences, ditches, and berms.

30. *Vehicle Use.* It is prohibited to operate any vehicle in violation of State or local laws and regulations relating to use, standards, registration, operation, and inspection.

31. *Structures and Landscaping.* Fixed structures of any type are restricted and must conform to posted policies. This includes, but is not limited to, fences, dog runs, storage units, and windbreaks. Alterations to the natural landscape are not allowed. Painting rocks or defacing or damaging any natural or archaeological feature is prohibited.

32. *Posted Rules.* Observe all posted rules in addition to these permit stipulations. If posted rules differ from these stipulations, the posted rules take precedence.

Violation of these supplementary rules/permit stipulations may result in revocation of the long-term visitor area permit, issuance of a citation, and/or arrest which may require appearance before a U.S. Magistrate or penalties up $1,000 and/or 1-year imprisonment.

You are responsible for knowing and obeying all rules and regulations.

Authority: Title 43, United States Code, section 1201; title 43, United States Code, section 1701; and title 43, Code of Federal Regulations, group 8300.

The Privacy Act of 1974 and the regulations in title 43, Code of Federal Regulations, part 2, section 48(d), provide that you be furnished the following information in connection with information required by this application for a Special Recreation Permit.

Authority: Title 43, United States Code, section 1201; title 43, Code of Federal Regulations, group 8300.

Principal Purpose: The information is to be used to process your application.

Routine Uses: (1) The adjudication of the applicant's request for a Special Recreation Permit, (2) Documentation for public information, (3) (4) Information from the record and/or the record will be transferred to appropriate Federal, State, local, or foreign agencies, when relevant to civil, criminal, or regulatory investigations or prosecutions.

Effect of Not Providing Information: Disclosure of the information is voluntary. If all the information is not provided, the application may be rejected.

B. Short-Visit Permit

The special stipulations and supplemental rules for the Short-Visit Permit are as follows:

1. *The Short-Visit Permit.* A permit is required to occupy a campsite in a designated long-term visitor area between September 15 and April 15. The Short-Visit Permit authorizes the permittee to occupy a campsite within any designated long-term visitor area for 7 days, using those camping or dwelling unit(s) indicated on the permit between the period September 15 to April 15. The permit fee is $10 for 7 days. A one-time, 7-day Short-Visit Permit extension is allowed for the full cost of a second Short-Visit Permit. No refund is made on permit fees. Length of stay in a long-term visitor area between April 16 and September 14 is limited to 14 days within any 28-day period.

2. *Permit Revocation.* The authorized officer may revoke without reimbursement any long-term visitor area permit issued to any person when the permittee violates any BLM rule or regulation, or when the permittee's, permittee's family's, or guests' conduct is inconsistent with the goals of the BLM's Long-Term Visitor Area Program. Failure to return any long-term visitor area permit to any authorized officer upon demand is a violation of this supplemental rule. Any permittee whose permit is revoked must remove all property and leave the long-term visitor area system within 12 hours of notice. The revoked permittee will not be allowed back into any long-term visitor area in Arizona or California for the remainder of the long-term visitor area season.

3. *The Permit.* The permit must be affixed at the time of purchase with the adhesive backing to the camping unit; i.e., trailer, camper, or motorhome, in a clearly visible location. The permit must be affixed as designated to be valid. A maximum of two (2) secondary vehicles is permitted.

4. *Permit Transfers.* If you sell, trade, or otherwise change camping vehicles during the use season, remove the permit from your old vehicle before turning it over to the new owner. Present your permit to any uniformed BLM employee or at the nearest BLM office. The permit will be revised to cover the new camping unit, and you will receive a replacement permit for your new vehicle at no cost. The permit may not be reassigned or transferred by permittee.

5. *Other Laws.* Long-term visitor area permit holders are required to observe all Federal, State, and local laws and regulations applicable to the long-term visitor area and shall keep the long-term visitor area and, specifically, their campsites in a neat, orderly, and sanitary condition.

6. *Unoccupied Camping Units.* Camping sites or dwelling unit(s) must not be left unoccupied within any long-term visitor area for periods of greater than 5 days unless approved in advance by the authorized officer.

7. *Access.* Do not block roads or trails commonly in public use with your parked vehicles, stones, wooden barricades, or by any other means.

8. *Cultural Resources.* Do not disturb any archaeological or historical values including, but not limited to, petroglyphs, ruins, historic buildings, and artifacts that may occur on public lands.

9. *Trash.* Pack out your own trash. Public trash dump sites are shown in the long-term visitor area brochure. Depositing trash or holding tank sewage in vault toilets is prohibited. Permits are required for trash disposal within the La Posa Long-Term Visitor Area.

10. *Dumping.* Absolutely no dumping of sewage or garbage on the ground. This includes motor oil and any other substances. State sanitation laws and county ordinances specifically forbid these practices. Sanitary dump station locations are shown in the long-term visitor area brochure. Dumping of gray water is prohibited unless otherwise posted. Permits are required for dumping within the La Posa Long-Term Visitor Area.

11. *Self-Contained Vehicles.* In Pilot Knob, Dunes Vista, Midland, Tamarisk, and Hot Spring Long-Term Visitor Areas, camping is restricted to self-contained camping units only. Self-contained units must have a permanently affixed wastewater holding tank of 10-gallon minimum capacity. Port-a-pottie systems, or systems which utilize portable holding tanks, or permanent holding tanks of less than 10-gallon capacity are not considered to be self-contained. The La Posa and Imperial Dam Long-Term Visitor Areas are restricted to self-contained camping units, except within 500 feet of a vault toilet or restrooms at South Mesa.

12. *Speed Limit.* The speed limit in long-term visitor areas is 15 miles per hour or as otherwise posted.

13. *Off-Highway Vehicle Use.* The speed limit in long-term visitor areas is 15 miles per hour. Motorized vehicle play is prohibited. Motorized vehicles should be used in long-term visitor areas only for access to and from campsites.

14. *Pets.* Pets must be kept on a leash at all times. Keep an eye on your pets. Unwatched pets may fall prey to coyotes or other desert predators. Pet owners are responsible for cleanup and sanitary disposal of pet waste.

15. *Parking.* For your safety and privacy, a minimum of 15 feet of space between dwelling units, vehicles, and campfires is required.

16. *Removal of Wheels and Campers.* Campers, trailers, and other dwelling units must remain mobile. Wheels must remain on all wheeled vehicles. Pickup campers may be set on jacks manufactured for that purpose.

17. *Quiet Hours.* Quiet hours are from 10 p.m. to 6 a.m. in accordance with applicable State time zone standards.

18. *Noise.* Operation of audio devices or motorized equipment, including generators, in a manner that makes unreasonable noise that disturbs other visitors is prohibited. Within the La Posa and Imperial Dam Long-Term Visitor Areas, amplified music is allowed only in locations designated by BLM or when approved in advance by the authorized officer.

19. *Firearms.* The discharge or use of firearms or weapons is prohibited inside or within ½ mile of the long-term visitor areas.

20. *Vending Permits.* The long-term visitor area permit is not a vending permit. Please contact the nearest BLM office for information on vending or concession permits.

21. *Campfires.* Campfires are permitted in long-term visitor areas, subject to local laws and State and

Federal regulations. Comply with posted rules.

22. *Wood Collection.* No wood collection is permitted within the boundaries of the Mule Mountain, Imperial Dam, and La Posa Long-Term Visitor Areas. Outside these long-term visitor areas and in all other long-term visitor areas, only dead and down wood may be collected for firewood or hobby purposes. Collection of ironwood is regulated. Please contact the BLM for current regulations concerning collection.

23. *Livestock.* Boarding of livestock (horses, cattle, sheep, goats, etc.) within long-term visitor areas is permitted only when approved in advance by the authorized officer.

24. *Aircraft Use.* Landing or taking off of aircraft, including ultralights, is prohibited in long-term visitor areas.

25. *Hot Spring Long-Term Visitor Area.* Overnight occupancy is prohibited between old Highway 80 and Interstate 8.

26. *Hot Spring Long-Term Visitor Area.* Food, beverages, and glass containers are prohibited within 50 feet of the hot spring facility in the Hot Spring Long-Term Visitor Area.

27. *Mule Mountain Long-Term Visitor Area.* All camping within Wiley's Well and Coon Hollow campgrounds is restricted to designated sites only.

28. *Imperial Dam and La Posa Long-Term Visitor Area.* Overnight occupancy is prohibited in desert washes in the Imperial Dam and La Posa Long-Term Visitor Area.

29. *La Posa Long-Term Visitor Area.* Access to the La Posa Long-Term Visitor Area is restricted to legal access roads along U.S. Highway 95. Construction and use of other access points are prohibited. This includes removal and modification of barricades such as fences, ditches, and berms.

30. *Vehicle Use.* It is prohibited to operate any vehicle in violation of State and local laws and regulations relating to use, standards, registration, operation, and inspection.

31. *Structures and Landscaping.* Fixed structures of any type are restricted and must conform to posted policies. This includes, but is not limited to, fences, do runs, storage units, and windbreaks. Alterations to the natural landscape are not allowed. Painting rocks or defacing or damaging any natural or archaeological feature is prohibited.

32. *Posted Rules.* Observe all posted rules in addition to these permit stipulations. If posted rules differ from these stipulations, the posted rules take precedence.

Violation of these supplementary rules/permit stipulations may result in revocation of the long-term visitor area permit, issuance of a citation, and/or arrest which may require appearance before a U.S. Magistrate or penalties up to $1,000 and/or 1-year imprisonment.

You are responsible for knowing and obeying all rules and regulations.

Coordinated Resource Management Plan Development and Wilderness Inventory

September 11, 1992.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of intent to prepare a Coordinated Resource Management Plan and an inventory of newly acquired public land for wilderness characteristics.

SUMMARY: Coordinated Resource Management Plan (CRMP) A planning process to develop the Sutton Mountain CRMP for 62,000 acres of public land in the Prineville, Oregon, BLM District, will begin September 18, 1992. The land is located between Mitchell, Oregon and the John Day River to the north. The land encompasses a variety of valuable resources such as 12 miles of critical steelhead spawning and rearing habitat on Bridge Creek, three miles of proposed John Day River Wild and Scenic Corridor, and Sutton Mountain which has populations of threatened and endangered plants. The area has eight grazing allotments.

The planning area originally contained approximately 14,000 acres of scattered public land. As a result of the Sutton Mountain Land Exchange, 48,000 additional acres of private land are now public land. This has formed 62,000 acres of well blocked public land.

A scoping document will be mailed September 18 which contains a list of issues and various alternatives for the issues. At the end of the 45-day review period, a preferred management alternative will be determined. The preferred alternative will determine how the management objectives are written for the CRMP. A draft CRMP will be distributed for review in the first half of 1993 and a final completed in the second half.

Wilderness Inventory. Two roadless areas, one consisting of 12,800 acres and the other 26,550 acres, have been identified since the Sutton Mountain Land Exchange was completed. The Prineville District is initiating an intensive inventory of the roadless areas for wilderness potential and is seeking public comment along with the CRMP.

FOR FURTHER INFORMATION CONTACT: Harry Cosgriffe, Area Manager, Central Oregon Resource Area, 2321 E. Third Street, Prineville, Oregon 97754 (telephone 503–447–8731).

James L. Hancock,

District Manager, Prineville District Office.

[AZ–050–02–4410–02; 1617]

Arizona; Availability of the Record of Decision for the Yuma District Resource Management Plan Amendment

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Arizona Bureau of Land Management announces the availability of the Record of Decision for the Yuma District Resource Management Plan Amendment. The Record of Decision announces the Bureau of Land Management's decision to approve the Proposed Action Alternative, which resolves a variety of issues in the Yuma District's Wildlife, Lands, and Recreation Programs.

FOR FURTHER INFORMATION CONTACT: Dave Curtis, Environmental Protection Specialist, Bureau of Land Management, 3150 Winsor Avenue, Yuma, Arizona 85365, telephone (602) 726–6300.

SUPPLEMENTARY INFORMATION: A limited number of copies of the Record of Decision are available upon request to the Yuma District Manager, Bureau of Land Management, 3150 Winsor Avenue, Yuma, Arizona 85365. There are also copies available for review at the above location.

This notice is published in the **Federal Register** in accordance with title 43, Code of Federal Regulations, subpart 1610, section 5–5.

Dated: September 15, 1992.

Herman L. Kast,

District Manager.

Proposed Withdrawal and Opportunity for Public Meeting; Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The Bureau of Land Management proposes to withdraw 593.06 acres of public lands to protect the natural and recreational values on seven tracts of land located in the San Juan Archipelago. This notice closes the lands for up to two years from surface entry and mining. The lands will remain open to mineral leasing.

DATES: Comments and requests for a public meeting must be received by December 23, 1992.

ADDRESSES: Comments and meeting requests should be sent to the Oregon/Washington State Director, BLM, P.O. Box 2965, Portland, Oregon 97208-2965.

FOR FURTHER INFORMATION CONTACT: Donna Kauffman, BLM, Oregon State Office, 503-280-7162.

SUPPLEMENTARY INFORMATION: On August 28, 1992, a petition was approved allowing the Bureau of Land Management to file an application to withdraw the following described lands from settlement, sale, location, or entry under the general lands laws, including the United States mining laws (30 U.S.C. ch. 2), subject to valid existing rights:

Willamette Meridian

Tract A, Patos and Little Patos Islands

T. 38 N., R. 2 W., unsurveyed,
Secs. 15, 16, and 17, Little Patos Island and that portion of Patos Island lying outside the Patos Island Light Station as more particularly identified and described in the official records of the Bureau of Land Management, Oregon State Office.

Tract B, Turn Point on Stuart Island

T. 37 N., R. 4 W.,
Sec. 20, lots 5 and 6, and that portion of lot 7 lying outside the Turn Point Light Station as more particularly identified and described in the official records of the Bureau of Land Management, Oregon State Office.

Tract C, Kellet Bluff on Henry Island

T. 36 N., R. 3 W.,
Sec. 28, lot 4 and that portion of lot 3 lying outside the Kellet Bluff Light Station as more particularly identified and described in the official records of the Bureau of Land Management, Oregon State Office.

Tract D, Iceberg Point on Lopez Island

T. 34 N., R. 2 W.,
Sec. 23, lot 4;
Sec. 24, lots 6 and 7.

Tract E, Point Colville on Lopez Island

T. 34 N., R. 1 W.,
Sec. 21, lot 6.

Tract F, Iceberg South on Lopez Island

T. 34 N., R. 2 W.,
Sec. 25, lots 1 and 2.

Tract G, Chadwick Hill on Lopez Island

T. 34 N., R. 1 W.,
Sec. 16, NE¼SW¼ and S½SW¼.

The areas described aggregate approximately 593.06 acres in San Juan County, Washington.

The purpose of the proposed withdrawal is to protect the unique natural and recreational values and improvements as to seven tracts of public lands located in the San Juan Islands.

For a period of 90 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the State Director at the address indicated above.

Notice is hereby given that an opportunity for a public meeting is afforded in connection with the proposed withdrawal. All interested parties who desire a public meeting for the purpose of being heard on the proposed withdrawal must submit a written request to the State Director at the address indicated above within 90 days from the date of publication of this notice. Upon determination by the authorized officer that a public meeting will be held, a notice of the time and place will be published in the **Federal Register** at least 30 days before the scheduled date of the meeting.

The application will be processed in accordance with the regulations set forth in 43 CFR Part 2300.

For a period of two years from the date of publication of this notice in the **Federal Register**, the lands will be segregated as specified above unless the application is denied or canceled or the withdrawal is approved prior to that date. The temporary uses which may be permitted during this segregative period are leases, licenses, permits, rights-of-way, and disposal of mineral or vegetative resources other than under the mining laws.

Dated: September 8, 1992.

Catherine H. Crawford,
Acting Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-33-M

Fish and Wildlife Service

Availability of a Technical/Agency Draft Recovery Plan for the Waccamaw Silverside for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and public comment period.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces that availability for public review of a technical/agency recovery plan for the Waccamaw silverside. This freshwater fish is endemic to, and occurs only in, Lake Waccamaw and the Waccamaw River, immediately below the lake, in Columbus County, North Carolina. The Service solicits review and comments from the public on this draft plan.

DATES: Comments on the technical/agency draft recovery plan must be received on or before November 23, 1992 to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Field Supervisor, Asheville Field Office, U.S. Fish and Wildlife Service, 330 Ridgefield Court, Asheville, North Carolina 28806, telephone 704/665-1195. Written comments and materials regarding the plan should be addressed to the Field Supervisor at the above address. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. John A. Fridell at the address and telephone number shown above.

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals or plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for recognizing the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. 1531 *et seq.*), requires the development of

recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

Based upon available information concerning the range, biology, and threats to its continued survival, full recovery of the Wacamaw silverside does not appear feasible. Accordingly, this draft recovery plan outlines a mechanism that provides for the protection and maintenance of a self-sustaining population of the species in Lake Waccamaw. The Waccamaw silverside was officially listed as a threatened species on April 8, 1987, primarily because of the potential for habitat and water quality degradation of Lake Waccamaw resulting from water pollution and sedimentation. The major objectives of the plan are protection of Lake Waccamaw's water/habitat quality and development of a source (captive population(s) and preservation of genetic material) for reestablishment or augmentation of the existing population of the Waccamaw silverside, if needed. Comments and information provided during this review will be used in preparing the final recovery plan.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: September 15, 1992.

Robert R. Currie,

Acting Field Supervisor.

BILLING CODE 4310-55-M

Aquatic Nuisance Species Task Force Ruffe Control Committee Meeting

AGENCY: Department of the Interior, Fish and Wildlife Service.

ACTION: Notice of meeting.

SUMMARY: This notice announces a meeting of the Ruffe Control Committee, a committee of the Aquatic Nuisance Species Task Force. The Committee will meet to develop and initiate procedures for proposing, authorizing and conducting control of aquatic nuisance species as described in the draft proposed Aquatic Nuisance Species Program.

TIME AND DATE: The Ruffe Control Committee will meet from 1 p.m. on Wednesday, September 30, 1992, to 12 p.m. on Friday, October 2, 1992. The meeting will be held at the Barkers Island Inn, 300 Marina Drive, Superior, Wisconsin 54880.

STATUS: The meeting is open to the public. Interested persons may make oral statements to the Committee or may file written statements for consideration.

CONTACT PERSON FOR MORE INFORMATION: Tom Busiahn, Ruffe Control Committee Chairperson, U.S. Fish and Wildlife Service, Fishery Resources Office, 2800 Lake Shore Drive East, Ashland, Wisconsin 54806 at (715) 682-6185.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App. I), this notice announces a meeting of the Ruffe Control Committee, a committee of the Aquatic Nuisance Species Task Force established under the authority of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (Pub. L. 101-646, 104 Stat. 4761, 16 U.S.C. 4701 *et seq.*, November 29, 1990). Minutes of this meeting will be maintained by Coordinator, Aquatic Nuisance Species Task Force, room 840, 4401 North Fairfax Drive, Arlington, Virginia 22203 and the Chairperson, Ruffe Control Committee, U.S. Fish and Wildlife Service, Fishery Resources Office, 2800 Lake Shore Drive East, Ashland, Wisconsin 54806, and will be available for public inspection during regular business hours, Monday through Friday within 30 days following the meeting.

Dated: September 18, 1992.

Gary Edwards,

Co-Chair, Aquatic Nuisance Species Task Force, Assistant Director—Fisheries.

[FR Doc. 92-23131 Filed 9-23-92; 8:45 am]

BILLING CODE 4310-55-M

Fish and Wildlife Services

Availability of Proposed Protocol for Evaluating Research Proposals Concerning Nonindigenous Aquatic Species

AGENCY: Department of the Interior, Fish and Wildlife Service.

ACTION: Document Availability; request for comments.

SUMMARY: This notice announces the availability of a proposed Protocol for Evaluating Research Proposals Concerning Nonindigenous Aquatic Species (Research Protocol) developed by the Research Protocol Committee, a committee of the Aquatic Nuisance Species (ANS) Task Force established under the authority of the Nonindigenous Aquatic Nuisance Prevention and Control Act of 1990 (Nonindigenous Act) (16 U.S.C. 4701 *et seq.*). Comment period on the proposed Research Protocol extends 45 days from the date of publication of this announcement in the **Federal Register**. Comments received will be considered before a decision is made and will become part of an Environmental Assessment as required for compliance with the National Environmental Protection Act of 1969 (NEPA, 42 U.S.C. 4321 *et seq.*).

ADDRESSES: Requests for copies of the proposed Research Protocol and written responses should be mailed to Sharon Gross, U.S. Fish and Wildlife Service (820 ARLSQ), U.S. Department of Interior, 1849 C Street, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Sharon Gross at (703) 358-1718 or Dr. James McCann at (904) 378-8181.

SUPPLEMENTARY INFORMATION: The ANS Task Force was established to coordinate implementation of the Nonindigenous Act. Task Force membership includes seven Federal agencies and eight *ex officio* members. The ANS Task Force is co-chaired by the U.S. Fish and Wildlife Service and the National Oceanic and Atmospheric Administration: The Research Protocol Committee is composed of representatives of these agencies and other ANS Task Force members. The proposed Research Protocol was developed in response to section 1202(f)(2) of the Nonindigenous Act which requires the ANS Task Force to develop and follow a protocol to ensure that research carried out under Subtitle C of the Nonindigenous Act does not result in the introduction or dispersal of aquatic nuisance species to the waters of the United States. At its April 1992 meeting, the ANS Task Force approved the proposed Research Protocol. The proposed Research Protocol consists of two parts: a risk assessment and a set of guidelines outlining required preventative containment and confinement procedures.

Dated: September 11, 1992.

Gary Edwards,

Co-Chair, Aquatic Nuisance Species Task Force Assistant Director—Fisheries.

[FR Doc. 92-23132 Filed 9-23-92; 8:45 am]

BILLING CODE 4310-55-M

Minerals Management Service

Payor, Reporter, and Other Instructional Handbooks

AGENCY: Minerals Management Service, Interior.

ACTION: Notice.

SUMMARY: The Royalty Management Program (RMP) of Minerals Management Service (MMS) provides instructional handbooks for royalty payors and reporters to report and pay royalties on Federal and Indian mineral leases. The handbooks are also provided to other interested parties such as lawyers, accountants, reporting services, state agencies, Indian representatives, and special interest groups. The RMP hereby gives notice pursuant to 43 U.S.C. 1460 that it will begin charging a fee to recover the cost of publication and distribution of the handbooks. One copy of the appropriate handbook will be provided to each payor, reporter, Government and Indian representative, at no cost; however, copies to interested parties and multiple copies will be provided for a fee to cover the cost of printing and mailing.

EFFECTIVE DATE: October 1, 1992.

FOR FURTHER INFORMATION CONTACT: Dennis C. Whitcomb, Chief, Rules and Procedures Branch, MS 3910, Minerals Management Service, P.O. Box 25165, Denver, Colorado 80225-0165, at (303) 231-3432.

SUPPLEMENTARY INFORMATION: The RMP has numerous instructional handbooks, such as Oil and Gas Payor Handbook, AFS Payor Handbook—Solid Minerals, and Production Accounting and Auditing System Reporter Handbook, that are used to report and pay royalties and report production on Federal and Indian mineral leases. A copy of the handbooks have been provided to payors, reporters, and interested parties upon request at no cost. Even when multiple copies were requested, RMP provided copies free of charge. The handbook distribution involves several thousand copies that must be printed, assembled, and mailed at substantial cost to the agency. In view of increasing concerns over unnecessary spending and more prudent financial management, RMP plans to charge a fee for instructional handbooks requested by interested parties. The fee would cover the cost of printing, assembly, and mailing. Pursuant to 43 U.S.C. 1460, the Department of the Interior has statutory authority for recoupment of printing costs. The money received for printing will be deposited in the Treasury.

This new procedure will authorize one copy for each active payor code, reporter code, Government office, and Indian representative at no charge. Companies with multiple payor/reporter codes that have the same name and address will receive only one copy free of charge. However, copies requested by interest parties or multiple copies requested by payors and reporters will be provided for a fee to cover the cost of printing and mailing. The copies provided for a fee will be furnished with a bill for payment to the MMS finance office.

The effective date for the new procedures is October 1, 1992, in order to coincide with the start of the agency's fiscal year (FY 1993).

Dated: September 17, 1992.

James W. Shaw,

Associate Director for Royalty Management.

BILLING CODE 4310-MR-M

National Park Service

Cape Cod National Seashore; South Wellfleet, MA, Cape Cod National Seashore Advisory Commission; Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770, 5 U.S.C. App 1 sec. 10), that meetings of the Cape Cod National Seashore Advisory Commission will be held on Tuesday, October 20, 1992.

The Commission was reestablished pursuant to Public Law 99-349, Amendment 24. The purpose of the Commission is to consult with the Secretary of the Interior, or his designee, with respect to matters relating to the development of the Cape Cod National Seashore, and with respect to carrying out the provisions of sections 4 and 5 of the Act establishing the Seashore.

The commission members will meet at 1 p.m. on Tuesday, October 20, 1992, for a regular business meeting which will convene at Park Headquarters for the following reasons:

1. Adoption of Agenda
2. Approval of Minutes of Previous Meeting
3. Reports of Officers
4. Superintendent's Report
5. Human Dimensions Subcommittee Report
6. Highland Light Update
7. Hatches Harbor Project
8. New Business
9. Agenda for Next Meeting
10. Date for Next Meeting
11. Communications/public comment
12. Adjournment

The business meetings are open to the public. It is expected that 15 persons will be able to attend each meeting in addition to the Commission members.

Interested persons may make oral/written presentations to the Commission during the business meetings or file written statements. Such requests should be made to the park superintendent at least seven days prior to the meeting. Further information concerning these meetings may be obtained from the Superintendent, Cape Cod National Seashore, South Wellfleet, MA 02663.

Dated: September 17, 1992.

John J. Burchill,

Acting Regional Director.

BILLING CODE 4310-70-M

INTERSTATE COMMERCE COMMISSION

[Section 5a Application No. 23]

Middle Atlantic Conference—Agreement (Amendment No. 12)

AGENCY: Interstate Commerce Commission.

ACTION: Notice of decision and opportunity for comment.

SUMMARY: The Middle Atlantic Conference (MAC or applicant), has filed a petition seeking approval of a minor amendment to its ratemaking agreement approved under 49 U.S.C. 10706(b). The amendment would modify Articles I, II, and III of MCA's bylaws and sections 1 and 2 of its Code of Rate Procedures to: (a) Reduce the number of members on its Board of Directors from 60 to 24 (Article I) and the number of board members annually elected from 14 to 6 (Article II); (b) remove any requirement that directors must represent specific states (Articles II and III); and (c) reduce from three to one the number of rate committees (Section I) and reduce the size of the general rate committee and the threshold number for triggering the general rate committee selection process from 100 to 50 members (Section 2). As a consequence of these changes, the quorum requirement for the transaction of official business by the Board of Directors is reduced from 18 to 7 members, and the general rate committee is reduced from 30 to 15 members. The Commission has issued a decision approving the amendment, subject to the filing of adverse comments.

Copies of MAC's approved agreement and the amendment are available for public inspection and copying at the Public Docket Room (room 1227) of the Commission in Washington, DC, and from MAC's representative: J. A. Royal, 6410 Kenilworth Avenue, Riverdale, MD 20737.

DATES: Comments from interested persons are due by October 26, 1992. Replies are due November 9, 1992. If no timely filed adverse comments are received, this amendment may become effective immediately. If timely adverse comments are filed, the Commission will issue a final decision.

ADDRESSES: An original and 10 copies, if possible, of comments referring to Section 5a Application No. 23 should be sent to: Office of the Secretary, Case Control Branch, Interstate Commerce Commission, Washington, DC 20423. A copy of any comments filed with the Commission must also be served on applicant's representative.

FOR FURTHER INFORMATION CONTACT: Richard Felder (202) 927–5610. (TDD for hearing impaired: (202) 927–5721)

SUPPLEMENTARY INFORMATION: Additional information is contained in the Commission's decision. To purchase a copy of the full decision, write to, call, or pick up in person from: Dynamic Concepts, Inc., Room 2229, Interstate Commerce Commission Building, Washington, DC 20423. Telephone: (202) 289–4357/4359. [Assistance for the hearing impaired is available through TDD services (202) 927–5721.]

Authority: 49 U.S.C. 10321 and 10706 and 5 U.S.C. 553.

Decided: September 15, 1992.

By the Commission, Chairman, Philbin, Vice Chairman McDonald, Commissioners Simmons, Phillips, and Emmett.

Sidney L. Strickland, Jr.

Secretary

[FR Doc. 92–23244 Filed 9–23–92; 8:45 am]

BILLING CODE 7035–01–M

[Finance Docket No. 32148]

Allegheny & Eastern Railroad, Inc.—Acquisition and Operation Exemption—Line of Allegheny Railroad Company

Allegheny & Eastern Railroad, Inc. (AER), a noncarrier, has filed a notice of exemption to acquire and operate 147.1 miles of rail line owned by Allegheny Railroad Company (ALY). AER will conduct the rail operations on the line, which runs between milepost 2.8 located at Mill Creek Township, Erie County, PA and milepost 149.9 located at Emporium, Cameron County, PA. The proposed transaction is expected to be consummated on or before December 31, 1992.

AER's corporate parent, Genesee & Wyoming Industries, Inc. (GWI), an entity that currently controls a number of rail carriers, has concurrently filed a related petition for exemption in Finance Docket No. 32149, *Genesee & Wyoming Industries, Inc.—Continuance in Control Exemption—Allegheny & Eastern Railroad, Inc.* In that proceeding GWI seeks an exemption under 49 U.S.C. 10505 from the prior review and approval requirements under 49 U.S.C. 11343 for its continuance in control of AER upon the latter becoming a rail carrier.

Any comments must be filed with the Commission and served on: Charles D. Cramton, 700 Midtown Tower, Rochester, NY 14604.

This notice is filed under 49 CFR 1150.31 If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10505(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

Decided: September 18, 1992.

By the Commission, David M. Konschnik, Director, Office of Proceedings.

Sidney L. Strickland, Jr.,

Secretary.

BILLING CODE 7035–01–M

DEPARTMENT OF JUSTICE

[AAG/A Order No. 71–92]

Privacy Act of 1974 as Amended by Computer Matching and Privacy Protection Act of 1988

This notice is published in the **Federal Register** in accordance with the requirements of 5 U.S.C. 552a(e)(12). The Immigration and Naturalization Service (INS), Department of Justice (the source agency), is participating with the Department of Education (DED) (the recipient agency) in a computer matching program. The matching program entitled "Systematic Alien Verification for Entitlements (SAVE) INS/DED" will permit DED to confirm the immigration status of alien applicants for, or recipients of, assistance as authorized by Title IV, Section 484(a)(5), of the Higher Education Act of 1965, as amended. The Title IV program includes: the Pell Grant, Supplemental Educational Opportunity Grant, State Student Incentive Grant, Stafford Loan, PLUS (Parent Loan Program), Supplemental Loans for Students, College Work-Study, Income Contingent Loan Program, and the Perkins Loan Program.

Notice of the matching program was originally published in the **Federal Register** on February 20, 1990 (55 FR 5904); the program became effective on April 18, 1990. Duration was 18 months plus a one-year extension permitted by the Privacy Act of 1974, as amended by the Computer Matching and Privacy Protection Act of 1988, (5 U.S.C. 552a(o)(2)(O) and (D)). The one-year extension will expire October 18, 1992. Thus, the following notice represents the approval of a new agreement by the Department of Justice and Department of Education Data Integrity Boards to continue the matching program (on the effective date as indicated below).

INS will assist DED in its efforts to confirm immigration status under the authority of Section 103 of the

Immigration and Nationality Act. The records to be used in the match and the roles of the matching participants are described as follows:

Through the use of user identification codes and passwords, authorized persons from DED will transmit electronically to INS data from its Privacy Act system of records entitled, "Federal Student Aid Application File (18–40–0014)." The data will include the alien registration number, the first name (initial letter only) and date of birth of the alien applicant for, or recipient of, Title IV assistance. This action will initiate a search for corresponding data elements in an INS Privacy Act system of records entitled "Alien Status Verification Index (JUSTICE/INS–009)." Where there is a match of records, the system will provide to DED the immigration status code and employment eligibility code of the alien applicant or recipient. In accordance with 5 U.S.C. 552a(p), DED will verify any adverse finding (independently or through the alien applicant or recipient) and provide the alien applicant or recipient with 30 days notice and opportunity to contest such finding.

Matching activity will be effective October 26, 1992, and will continue for a period of 18 months from the effective date unless, within 3 months prior to the expiration of the agreement, the Data Integrity Boards approve a one-year extension pursuant to 5 U.S.C. 552a(o)(2)(O) and (D).

The matching agreement and the required report have been provided to the Office of Management and Budget and the Congress in accordance with 5 U.S.C. 552a(o)(2)(A) and (r). Inquiries may be submitted to Patricia E. Neely, Staff Assistant, Systems Policy Staff, Justice Management Division, Department of Justice, Washington, DC 20530 (Room 5031, CAB Building).

Dated: September 18, 1992.

Harry H. Flickinger,

Assistant Attorney General for Administration.

BILLING CODE 4410–10–M

Lodging of Agreed Order Modifying Consent Decree

A proposed Consent Decree in *United States* v. *American Seating Co., et al.*, No. 91–C–0835–S, was lodged with the United States District Court for the Western District of Wisconsin on September 15, 1992. The Consent Decree is a cost recovery decree under the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), and resolves claims of the United States under section 107 of CERCLA, 42 U.S.C. 9607, against four potentially responsible parties that arranged for treatment or disposal of hazardous substances at the Mid-State Disposal Landfill Site in Marathon County, Wisconsin. Under the terms of this Consent Decree, the defendants will pay the United States $1,578,958 of its unreimbursed response costs incurred at the Site.

The Department of Justice will receive comments relating to the proposed Agreed Order Modifying Consent Decree for 30 days following the publication of this Notice. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *American Seating Co., et al.*, D.J. Ref. No. 90–11–3–392A.

The proposed Consent Decree may be examined at the Office of the United States Attorney for the Western District of Wisconsin, Office of the United States Environmental Protection Agency, 111 West Jackson Boulevard, Chicago, Illinois 60604, and at the Consent Decree Library, 601 Pennsylvania Avenue Building, NW., Washington, DC 20004 (202–347–2072). A copy of the Consent Decree may be obtained in person or by mail from the Consent Decree Library, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $20.00 (25 cents per page) for reproduction costs, payable to the Consent Decree Library.

Vicki A. O'Meara,

Acting Assistant Attorney General, Environment and Natural Resources Division.

[FR Doc. 92–23118 Filed 9–23–92; 8:45 am]

BILLING CODE 4410–01–M

Lodging of Agreed Order Modifying Consent Decree

An agreed order modifying the RD/RA Consent Decree entered by the Court on March 28, 1990, in *United States* v. *Mid-State Disposal, Inc., et al.*, No. 89–C–1017S, 89–C–1023S, was lodged with the United States District Court for the Western District of Wisconsin on September 11, 1992. The Consent Decree resolved claims under sections 106 and 107 of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), 42 U.S.C. 9606 and 9607, against four potentially responsible parties that arranged for treatment or disposal of hazardous substances at the Mid-State Disposal Landfill Site in Marathon County, Wisconsin. Under the terms of this Agreed Order Modifying Consent Decree, sixteen municipal generators of municipal solid waste would be added to the Consent Decree and be bound by the same terms as the original settlers.

The Department of Justice will receive comments relating to the proposed Agreed Order Modifying Consent Decree for 30 days following the publication of this Notice. Comments should be addressed to the Assistant Attorney General of the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *Mid-State Disposal, Inc., et al.*, D.J. Ref. No. 90–11–3–392.

The proposed Agreed Order Modifying Consent Decree may be examined at the Office of the United States Attorney for the Western District of Wisconsin; Office of the United States Environmental Protection Agency, 111 West Jackson Boulevard, Chicago, Illinois 60604, and at the Consent Decree library, 601 Pennsylvania Avenue Building, NW., Washington, DC 20004 (202–347–2072). A copy of the Agreed Order Modifying Consent Decree may be obtained in person or by mail from the Consent Decree Library, 601 Pennsylvania Avenue, NW., Box 1097, Washington, DC 20004. In requesting a copy, please enclose a check in the amount of $1.50 (25 cents per page) for reproduction costs, payable to the Consent Decree Library.

Vicki A. O'Meara,

Acting Assistant Attorney General, Environmental and Natural Resources Division.

BILLING CODE 4410–01–M

Lodging of Final Judgment by Consent Pursuant to the Clean Water Act

Pursuant to 28 CFR 50.7, notice is hereby given that on September 10, 1992, a proposed consent decree in *Natural Resources Defense Council, Inc.* versus *Wheeling-Pittsburgh Steel Corporation* and *United States* versus *Wheeling-Pittsburgh Steel Corporation*, Civil Action No. 89–2375, was lodged with the United States District Court for the Western District of Pennsylvania. The decree pertains to the Wheeling-Pittsburgh Steel Corporation Allenport facility in Allenport, Pennsylvania.

The proposed consent decree requires the payment of civil penalties in the amount of $2,000,000.00 and injunctive

relief to prevent future violations of the Clean Water Act.

The Department of Justice will receive comments relating to the proposed consent decree for a period of thirty days from the date of publication of this notice. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to Natural Resources Defense Council, Inc. versus *Wheeling-Pittsburgh Steel Corporation* and *United States* versus *Wheeling-Pittsburgh Steel Corporation* (W.D. Pa.) and DOJ Ref. No. 90-5-1-1-3552. The proposed consent decree may be examined at the office of the United States Attorney, Western District of Pennsylvania, 633 U.S. Post Office and Courthouse, 7th Avenue and Grant Street, Pittsburgh, PA 15219, or at the office of the Environmental Protection Agency, Region III, 841 Chestnut Building, Philadelphia, Pennsylvania 19107. A copy of the proposed consent decree may also be examined at the Consent Decree Library, 601 Pennsylvania Avenue Building, NW. Box 1097, Washington, DC 20004, (202) 347-2072. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library. In requesting a copy please enclose a check in the amount of $17.25 (25 cents per page reproduction costs) payable to "Consent Decree Library."

Vicki A. O'Meara,

Acting Assistant Attorney General, Environment and Natural Resources Division.

BILLING CODE 4410-01-M

Drug Enforcement Administration

[Docket No. 91-28]

Barton Drug, Inc.; Revocation of Registration

On July 26, 1991, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) issued an Order to Show Cause to Barton Drug, Inc. (Respondent), 18910 West Seven Mile Road, Detroit, Michigan 48219, proposing to revoke its DEA Certificate of Registration, AB5087449, and deny any pending applications for renewal of such registration. The statutory basis for the proposed action was that the continued registration of Barton Drug, Inc. would be inconsistent with the public interest as that term is used in 21 U.S.C. 823(f) and 21 U.S.C. 824(a)(4).

By letter dated August 7, 1991, Respondent requested a hearing on the issues raised by the Order to Show Cause, and the matter was docketed before Administrative Law Judge Mary Ellen Bittner. Following prehearing procedures, a hearing was held in Ann Arbor, Michigan On January 7, 1992.

On June 10, 1992, the administrative law judge issued her opinion and recommended ruling, findings of fact, conclusions of law and decision. No exceptions to the administrative law judge's ruling were filed. On July 10, 1992, Judge Bittner transmitted the record of these proceedings to the Administrator. The Administrator has considered the record in its entirety and pursuant to 21 CFR 1316.67 hereby issues his final order in this matter, adopting the opinion and recommended ruling of the administrative law judge in its entirety.

Respondent is located in Detroit, Michigan, and, during 1990, Respondent was found by DEA to have made excessive purchases of Schedule V cough syrups, purchasing 12,071 four-ounce bottles of Schedule V cough syrups between October 3, 1988 and October 2, 1990, and 3,407 four-ounce bottles of Schedule V cough syrups from January 1, 1990 through October 2, 1990. The evidence demonstrated that data produced to DEA by the Michigan Board of Pharmacy placed average pharmacy purchases of Schedule V cough syrups at less than six gallons, or 768 ounces, per year.

The evidence before the administrative law judge showed that a DEA inspection of Respondent and the collating of information obtained during that inspection, combined with interviews of patients/customers who were receiving Schedule V cough syrups from Respondent, clearly demonstrated that Respondent and its owner/managing pharmacist, Alvin I. Tendler, R. Ph., dispensed Schedule V cough syrups on a regular basis with the knowledge that customers were maintaining addictions to the cough syrups or were using the cough syrups for no legitimate medical purpose. This action on the part of Respondent and Mr. Tendler is an unequivocal violation of both State and Federal laws and regulations regarding the dispensing of controlled substances.

In evaluating whether Respondent's continued registration by the Drug Enforcement Administration would be inconsistent with the public interest, as that term is used in 21 U.S.C. 824(a)(4), the Administrator considers the factors enumerated in 21 U.S.C. 823(f). They are as follows:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant's experience in dispensing, or conducting research with respect to controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety.

In determining whether a registrant's continued registration is inconsistent with the public interest, the Administrator is not required to make findings with respect to each of the factors listed above. Instead, the Administrator has the discretion to give each factor the weight he deems appropriate, depending upon the facts and circumstances of each case. See David E. Trawick, D.D.S., Docket No. 88-69, 53 FR 5326 (1988).

The administrative law judge found that the Government made a prima facie showing of the factors found in 21 U.S.C. 823(f) (2), (4) and (5), as referenced by 21 U.S.C. 824(a)(4). In so finding, the administrative law judge found that Respondent's experience in dispensing with respect to controlled substances, and the pharmacy's compliance with applicable State, Federal, or local laws relating to controlled substances posed a danger to which the public should not be exposed.

Specific reference is made to the pharmacy's failure to comply with 21 CFR 1306.32 regarding the dispensing of nonprescription Schedule V substances, such as the cough syrups in question herein. A clear finding was made that Respondent dispensed customers Schedule V cough syrups without a legitimate medical need for the substances, with such legitimate medical need for the controlled substance required by 21 CFR 1306.04(a). See Liberty Discount Drugs, Inc., Docket No. 88-73, 54 FR 30116 (1989). The administrative law judge also accurately notes that the State of Michigan requires that codeine cough syrups be dispensed only for a medical purpose, such regulation found in Rule 338.3167(a)(1) of the General Rules of the Michigan board of Pharmacy.

With regard to behavior by Respondent and/or Mr. Tendler which might threaten the public health and safety, the record reflects that Mr. Tendler had little or no regard for the established fact that codeine cough syrups have addictive potential and that their dispensing should be carefully monitored due to that potential. Mr. Tendler's cavalier attitude toward the

plight of his customers who admitted that they were addicted to codeine cough syrups is unpardonable. A pharmacist has an indisputable responsibility to monitor the dispensing of all controlled substances and that responsibility rests squarely on the dispensing party's shoulders in the case of Schedule V cough syrups.

The Administrator finds that Mr. Tendler's behavior was clearly violative of the Controlled Substance Act, and that the substantial weight of the evidence justifies revocation of Respondent's Certificate of Registration. Mr. Tendler not only has refused to discharge his statutory duties, but has shown no regret for his behavior, never seemingly believing that he acted illegally or even irresponsibly. Mr. Tendler was, in practical effect, maintaining the addiction of customers by refusing to monitor their receipt of codeine cough syrups from his pharmacy. Clearly, the Respondent was either unaware of or unconcerned with the laws and regulations under which he is governed. That lack of awareness or lack of concern is not tolerable.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AB5087449, issued to Barton Drug, Inc., be, and it hereby is, revoked, and any pending applications for renewal of such registration, be, and they hereby are, denied. This order is effective October 26, 1992.

Dated: September 17, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

[FR Doc. 92-23168 Filed 9-23-92; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 91-33]

William D. Caso, M.D.; Revocation of Registration

On July 23, 1992, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA) issued an Order to Show Cause to William D. Caso, M.D., (Respondent), proposing to revoke his DEA Certificate of Registration, AC3019052, as a practitioner under 21 U.S.C. 824(a)(4), and deny any pending applications for renewal of registration as a practitioner under 21 U.S.C. 823(f). The Order to Show Cause was issued alleging that Respondent's continued registration would be inconsistent with the public interest.

By letter dated August 8, 1991, Respondent, through counsel, requested a hearing on the issues raised by the Order to Show Cause and the matter was docketed before Administrative Law Judge Paul A. Tenney. Following prehearing procedures, a hearing was held before Judge Tenney in Louisville, Kentucky, on January 15 and 16, 1992, and continued on February 19, 1992, in Washington, DC. On May 26, 1992, the administrative law judge issued his opinion and recommended decision. No exceptions to the recommendation of the administrative law judge were filed. On July 13, 1992, the administrative law judge transmitted the record of these proceedings to the Administrator. The Administrator has considered the record in its entirety and pursuant to 21 CFR 1316.67 hereby adopts the findings, conclusions and recommendations of the administrative law judge and issues his final order in this matter.

The administrative law judge found, first, that the Respondent was without State authority to handle controlled substances in the Commonwealth of Kentucky. Therefore, the administrative law judge correctly applied the mandate of 21 U.S.C. 824(a), which provides that registration pursuant to section 823 of this title to manufacture, distribute, or dispense a controlled substance may be suspended or revoked by the Attorney General upon a finding that the Registrant (3) has had his State license or registration suspended, revoked, or denied by competent State authority and is no longer authorized by State law to engage in the manufacturing, distribution, or dispensing of controlled substances. Such mandate acts as an independent ground for revocation of a DEA registration.

The administrative law judge further found that the Respondent prescribed and dispensed controlled substances to patients for no legitimate medical purpose, specifically noting the case of one individual, whose patient profile and corresponding patient chart demonstrates a clear abuse by the Respondent of the privilege of handling controlled substances. The administrative law judge paid particular attention to undercover visits paid to Respondent by a DEA Special Agent and a confidential informant. The tape recordings made of these visits showed quite clearly that the Respondent issued prescriptions to the Special Agent and the confidential informant without performing physical examinations, without providing the service of psychiatric counselling, and without knowledge of any other substances which the two individuals might be taking.

The administrative law judge adequately addressed the expert opinions presented by both sides, finding the hearsay statements of the Government's experts more persuasive than the live testimony of Respondent's expert. The administrative law judge noted that the reports of the Government's experts are highly detailed and that the Kentucky Board of Medical Licensure relied almost exclusively upon those reports in suspending the Respondent's privilege to handle controlled substances.

In evaluating whether Respondent's continued registration by the Drug Enforcement Administration would be inconsistent with the public interest, as that term is used in 21 U.S.C. 824(a)(4), the Administrator considers the factors enumerated in 21 U.S.C. 823(f). They are as follows:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant's experience in dispensing, or conducting research with respect to controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety.

In determining whether a registrant's continued registration is inconsistent with the public interest, the Administrator is not required to make findings with respect to each of the factors listed above. Instead, the Administrator has the discretion to give each factor the weight he deems appropriate, depending upon the facts and circumstances of each case. See David E. Trawick, D.D.S., Docket No. 88-69, 53 FR 5326 (1988).

The administrative law judge found that the Government made a prima facie showing of the factors found in 21 U.S.C. 823(f) (1), (2), and (4) and (5), as referenced by 21 U.S.C. 824(a)(4). In so finding, the administrative law judge found that the Commonwealth of Kentucky had suspended the Respondent's privilege to handle controlled substances. The administrative law judge further found that the Respondent's experience in dispensing with respect to controlled substances was clearly outside the scope of legitimate medical practice and posed a danger to which the public should not be exposed.

The Respondent has ignored State and Federal laws and regulations regarding

the prescribing of controlled substances for a legitimate medical need. The Respondent did not attempt to determine the medical need of the undercover Special Agent and the confidential informant, yet prescribed almost all of the controlled substances to them which they, themselves, requested by name. The Respondent placed the life of the previously mentioned individual in danger by prescribing multiple controlled substances to him, some of which interacted in an extremely dangerous manner. Indeed, the testimony of both the individual and his wife indicated that the individual was required to be resuscitated on at least two occasions due to his intake of the controlled substances prescribed to him by the Respondent.

Quite obviously, the Respondent's behavior poses a threat to the public health and safety. Despite the Respondent's testimony regarding his attempts to merge physical, mental and spiritual therapy, the fact remains that he mishandled and overprescribed controlled substances on numerous occasions. Good intentions do not negate the dangerous effects of the controlled substances which were regularly and indiscriminately prescribed and dispensed to patients of the Respondent. Therefore, clear grounds exist to revoke the Respondent's DEA Certificate of Registration.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vest in him under the provisions of 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AC3019052, previously issued to William D. Caso, M.D., be and it is hereby, revoked. It is further ordered that any pending applications for renewal of that registration be, and they are hereby, denied. This order is effective on October 26, 1992.

Dated: September 17, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

[FR Doc. 92-23139 Filed 9-23-92; 8:45 am]

BILLING CODE 4410-09-M

[Docket No. 91-39]

Walter S. Gresham, M.D., Modification of Registration

On August 27, 1991, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Walter S. Gresham, M.D., (Respondent) of 425 West College Street, Bowdon, Georgia 30108, proposing to revoke his DEA Certificate of Registration, AG1179111, and to deny any pending applications for registration as a practitioner under 21 U.S.C. 823(f). The Order to Show Cause alleged that Respondent's continued registration is inconsistent with the public interest, as that term is used in 21 U.S.C. 823(f) and 824(a)(4).

Respondent, through counsel, timely filed a request for a hearing on the issues raised in the Order to Show Cause and the matter was docketed before Administrative Law Judge Paul A. Tenney. Following prehearing procedures, a hearing was held commencing on January 28, 1992, in Atlanta, Georgia.

On May 4, 1992, Judge Tenney issued his opinion and recommended decision, recommending that Respondent's DEA Certificate of Registration not be revoked nor suspended but that Respondent's current DEA Certificate of Registration be modified to comply with the probation requirements imposed upon Respondent by the Composite State Board of Medical Examiners of the State of Georgia (Georgia Medical Board) on June 5, 1991, pursuant to a consent decree. The probation terms were to last three years beginning on June 5, 1991, but the administrative law judge further recommended that if the Georgia Medical Board lifted all terms of probation before the three-year period expired, then at that point the Administrator should allow Respondent's DEA Certificate of Registration to continue unrestricted. The administrative law judge also recommended that if the Georgia Medical Board alters or adds probation terms, the Administrator should conform his order to such alterations or additions. Subsequently, pursuant to 21 CFR 1316.66, Government counsel filed exceptions to the administrative law judge's opinion and recommended decision. Respondent's counsel filed a response to the Government's exceptions.

On June 4, 1992, Judge Tenney transmitted the record of the proceedings, including the Government's exceptions and Respondent's response thereto, to the Administrator. The Administrator has considered the record in its entirety and adopts the findings of fact and the conclusions of law, in part, recommended by the administrative law judge, and makes independent conclusions of his own. In so doing, the Administrator modifies the recommended ruling of the administrative law judge. Pursuant to 21 CFR 1316.67, the Administrator issues his final order in the matter based upon findings of fact and conclusions of law as set forth below.

The Administrator finds that Respondent overprescribed and overadministered several Schedule II controlled substance analgesics to a patient. This treatment commenced in 1979 and continued until October of 1989. Although Respondent's initial diagnosis of renal colic may have been justified, numerous tests performed by various hospitals as well as by Respondent consistently indicated that such a diagnosis was incorrect. Moreover, Respondent was informed as early as 1982 that the individual was abusing these medications. Therefore, the Administrator finds that the prescribing of these Schedule II controlled substances was not justified in light of the long duration and frequency that they were prescribed.

Based upon a series of six undercover visits conducted by an agent of the Georgia Medical Board who posed as a patient and based upon Respondent's admission, the Administrator finds that it was Respondent's practice to sign blank prescriptions. Respondent then gave these prescriptions with his signature to his wife, who was not a practitioner and who issued such prescriptions without having the patient examined by Respondent.

The Administrator also finds that the Georgia Medical Board, based upon a consent decree reached with Respondent, found that Respondent had engaged in the practice of presigning prescriptions from 1985 until August of 1989 when a search warrant was issued based upon the aforementioned undercover visits. The Georgia Medical Board did not revoke or suspend Respondent's medical license but placed Respondent on probation for a period of three years. The principal terms included that Respondent perform community service; pay a $2,000 fine; complete a pharmacology course; not prescribe, administer, or dispense Schedule II controlled substances except in a hospital setting or in a bona fide, life-threatening situation and notify the Georgia Medical Board within ten days of such hospitalization or emergency action; and keep all controlled substances that he issues in triplicate and send copies of such prescriptions to the Georgia Medical Board on a quarterly basis.

In evaluating whether Respondent's continued registration by the Drug Enforcement Administration would be inconsistent with the public interest, as that term is used in 21 U.S.C. 824(a)(4), the Administrator considers the factors enumerated in 21 U.S.C. 823(f):

(1) The recommendation of the appropriate state licensing board or professional disciplinary authority.

(2) The applicant's experience in dispensing, or conducting research with respect to controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety.

In determining whether a registrant's continued registration is inconsistent with the public interest, the Administrator is not required to make findings with respect to each of the factors listed above. Instead, Administrator has the discretion to give each factor the weight he deems appropriate, depending upon the facts and circumstances of each case. See *David E. Trowick, D.D.S.*, Docket No. 88–69, 53 FR 5326 (1988).

The administrative law judge concluded that Respondent's continued registration would not be inconsistent with the public interest as that term is used pursuant to 21 U.S.C. 823(f). The administrative law judge based this conclusion particularly upon the findings and recommendation of the Georgia Medical Board which placed Respondent's medical license on probation for three years as noted above. The Georgia Medical Board's Consent Order included a finding of fact that Respondent presigned prescriptions. These findings of fact also expressed "concerns" about Respondent's office policies "with respect to controlled substances and non-controlled prescription analgesics" without giving any more detail.

The administrative law judge made findings that Respondent was not in compliance with applicable Federal and State law based upon Respondent's overprescribing controlled substances to the individual and his practice of allowing his wife to issue his presigned prescriptions for controlled substances. The administrative law judge concluded, however, that both findings had mitigating circumstances: Respondent's overprescribing of controlled substances to the individual was based upon a legitimate diagnosis of renal colic and the individual's apparent intractable pain and Respondent issued presigned prescriptions under the belief that such a practice was lawful.

The Administrator has carefully reviewed the entire record and finds that three of the five public-interest factors apply. Respondent's experience in dispensing controlled substances is poor based upon his excessive prescribing of Schedule II controlled substances to the individual over a ten-year period under the second factor.

Pursuant to the fourth factor, the Administrator concludes that Respondent violated applicable State and Federal law by his practice of giving presigned prescriptions to a non-practitioner who in turn issued such prescriptions for controlled substances to patients who were not examined by Respondent. Although the administrative law judge found the Government did not prove that Respondent actually knew that such a practice was illegal when he issued such prescriptions, the Administrator concludes that Respondent's subjective knowledge is irrelevant. The danger in such a practice is allowing unauthorized persons to dispense controlled substances. In addition, the practice of having presigned prescriptions in and around the office invites diversion. Even if Respondent did not know that such a practice was unlawful he should have known. Respondent, as a registered physician has a duty to be informed of the laws governing controlled substances. *Yvon DeSamos, M.D.*, 49 FR 28779 (1984).

The Administrator disagrees with the administrative law judge's conclusion that the recommendation and probation terms imposed by the Georgia Medical Board should, in effect, govern the remedy imposed by the Administrator under the first public-interest factor. Although the recommendation of the appropriate state licensing board is a significant factor, it should not necessarily be given any greater weight than the other four factors under 21 U.S.C. 823(f). Indeed, the Administrator may revoke or suspend a registration based upon one or a combination of the other four factors, despite a recommendation of leniency or no recommendation at all by the appropriate state licensing authority. The Administrator concludes that the administrative law judge put too much emphasis on the Consent Order of the Georgia Medical Board.

The Administrator adopts the administrative law judge's recommendation but with modifications based upon the above findings of fact and conclusions. In light of the findings that Respondent overprescribed Schedule II controlled substances to an individual for a ten year-period and that he had an unauthorized person issue prescriptions presigned by Respondent, the Administrator concludes that the restrictions imposed upon Respondent by the Georgia Medical Board must also be imposed on Respondent's DEA Certificate of Registration. These restrictions include, but are not limited to: (1) Respondent is prohibited from prescribing, administering, or dispensing any Schedule II or IIN controlled substances except in a hospital setting or except in a bona fide, life-threatening emergency, in which case such emergency prescription shall be reported within ten days to the Medical Coordinator of the Georgia Medical Board; and (2) Respondent must keep all prescriptions, administrations, or dispensations of Schedule III, IIIN, and IV controlled substances in triplicate and give one copy to the patient, place one copy in the patient file, and send one copy to the Georgia Medical Board every quarter. These restrictions on Respondent's DEA Certificate of Registration, however, will not be terminated earlier than June 4, 1994, which is the date that the probation term was to expire under the Consent Order of the Georgia Medical Board, notwithstanding that the Georgia Medical Board sees fit to terminate Respondent's probation at an earlier date. Should the Georgia Medical Board order that Respondent's probation be extended beyond June 4, 1994, then such extension shall be imposed on Respondent's DEA Certificate of Registration. In the event that the Georgia Medical Board does terminate any or all of the restrictions prior to June 4, 1994, any reports or records that Respondent was required to send to the Georgia Medical Board in the above enumerated conditions shall be sent to the Drug Enforcement Administration, Atlanta Field Division, Office of Diversion.

Accordingly, the Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824 and 28 CFR 0.100(b), hereby orders that DEA Certificate of Registration, AG1179111, previously issued to Walter S. Gresham, M.D., be, and it hereby is, continued provided that Walter S. Gresham, M.D., complies with the conditions imposed in the Consent Order of June 5, 1991, by the Composite State Board of Medical Examiners, State of Georgia. The Administrator further orders that such conditions shall continue until June 4, 1994, or until such time as the Composite State Board of Medical Examiners, State of Georgia, relieves Respondent from such conditions, whichever is later. The Administrator further orders that if the Composite State Board of Medical Examiners terminates Respondent's conditions before June 4, 1994, Respondent shall commence at that time

to send any reports of emergency Schedule II and IIN prescriptions, administrations, or dispensations within ten days of such prescribing, administering, or dispensing and copies of any Schedule III, IIIN, and IV prescriptions to the Drug Enforcement Administration. The Administrator further orders that any pending applications for the renewal of such registration, be, and they hereby are, granted subject to the limitations expressed herein. This order is effective on September 24, 1992.

Dated: September 18, 1992.

Robert C. Bonner,

Administrator of Drug Enforcement.

BILLING CODE 4410-09-M

NATIONAL SCIENCE FOUNDATION

Advisory Panel for Cell Biology; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting:

Date and Time: Oct. 19, 20, and 21, 1992; 8:30 a.m. to 6 p.m.

Place: St. James Hotel, 950 24th Street, NW., Washington, DC 20037.

Type of Meeting: Closed.

Contact Person: Dr. Eve Ida Barak, Program Director for Cell Biology Program (Cellular Organization), Room 325, National Science Foundation, 1800 G St. NW., Washington, DC 20550. Telephone: (202) 357-7474.

Purpose of Meeting: To provide advice and recommendations concerning support for research proposals submitted to the Cell Biology Program of the Division of Molecular & Cellular Biosciences at NSF for financial support.

Agenda: To review and evaluate research proposals in the area of Call Biology (Cellular Organization) as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act.

Dated: September 21, 1992.

M. Rebecca Winkler,

Committee Management Officer.

Advisory Committee for Chemical and Thermal Systems; Notice of Meetings

In accordance with the Federal Advisory Committee Act (Pub. L. 92-463, as amended), the National Science Foundation announces the following meeting.

Date and Time: October 20, 1992; 12 p.m. to 5 p.m. October 21, 1992; 8:30 a.m. to 5 p.m.

Place: Frank Lloyd Wright Room, The American Institute of Architects, 1735 New York Avenue, NW., Washington, DC 20006.

Type of Meeting: Open.

Contact Person: Dr. Henry A. McGee, Jr., Division Director, Chemical and Thermal System, Room 1110, National Science Foundation, 1800 G St., NW., Washington, DC 20550. Telephone: (202) 357-9606.

Minutes: May by obtained from the contact person listed above.

Purpose of meeting: To provide advice and recommendations concerning the chemical and thermal fluid sciences components of the engineering community.

Agenda: The meeting will be focusing on the implications of the work of the new Commission on the Future of the NSF and on the management of the several initiatives that are underway in the Chemical and Thermal Systems Division.

Dated: September 21, 1992.

M. Rebecca Winkler,

Committee Management Officer.

Notice of Workshop

The National Science Foundation (NSF) will hold a two day meeting on research in the VLSI CAD field on October 15 and 16, 1992 at the NSF in room 500C, 1110 Vermont Ave., NW., Washington, DC.

The objective is to derive from this workshop information that will aid the MIPS Division in assessing the state of research in the field, and to obtain clear notions about promising new directions in the field for the next five years. Issues to be considered include: new design styles, new technologies, and productive research areas. Sub-fields to be discussed include: theory & algorithms, synthesis tools, CAD frameworks, simulation & verification of designs, manufacturing test of digital and mixed signal products.

Although the workshop will not operate as an advisory committee, the public is invited to attend. Participants will include individuals from the VLSI CAD research community who are innovative leaders in various sub-fields, and other leaders who have had wide experience in VLSI CAD research.

For additional information, contact Dr. Robert B. Grafton, Program Director, MIPS Division, room 414, National Science Foundation, 1800 G St. NW., Washington, DC 20550. Telephone: (202) 357–7853.

Dated: September 15, 1992.

Bernard Chern,

Division Director, Microelectronic Information Processing Systems Division.

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; An Hoc Subcommittee on Design Acceptance Criteria; Meeting

The ACRS Ad Hoc Subcommittee on Design Acceptance Criteria will hold a meeting on October 7, 1992, in room P–110, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Wednesday, October 7, 1992—8:30 a.m. until the conclusion of business.

The Ad Hoc Subcommittee will review SECY–92–299, "Development of Design Acceptance Criteria (DAC) for the Advanced Boiling Water Reactor (ABWR) in the areas of Instrumentation and Controls (I&C) and Control Room

Design." The purpose of this meeting is to gather information, analyze relevant issues and facts, and to formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC staff, its consultants, nuclear industry, and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been canceled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefore can be obtained by a prepaid telephone call to the cognizant ACRS staff engineer, Mr. Elpidio Igne (telephone 301/492–8192) between 7:30 a.m. and 4:15 p.m. (e.s.t.). Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: September 17, 1992.

Sam Duraiswamy,

Chief, Nuclear Reactors Branch.

[FR Doc. 92–23107 Filed 9–23–92; 8:45 am]

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards; Subcommittee on Planning and Procedures; Meeting

The ACRS Subcommittee on Planning and Procedures will hold a meeting on October 7, 1992, room P–422, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance, with the exception of a portion that will be closed to discuss the qualifications of candidates nominated for appointment to the ACRS. This session will be closed to discuss information the release of which would represent a clearly unwarranted invasion of personal privacy per 5 U.S.C. 552b(c)(6). The purpose of this meeting will be to gather information, analyze relevant issues and facts, and to formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

The agenda for the subject meeting shall be as follows:

Wednesday, October 7, 1992—3:00 p.m. until 5:30 p.m.

The Subcommittee will discuss proposed ACRS activities, practices and procedures for conduct of Committee business, and related matters. Qualifications of candidates nominated for appointment to the ACRS will also be discussed.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call to the cognizant ACRS staff engineer, Mr. Raymond F. Fraley (telephone 301/492–4516) between 7:30 a.m. and 4:15 p.m., EST. Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: September 17, 1992.

Sam Duraiswamy,

Chief, Nuclear Reactors Branch.

[FR Doc. 92–23108 Filed 9–23–92; 8:45 am]

BILLING CODE 7590–01–M

Advisory Committee on Reactor Safeguards; Subcommittee on Maintenance Practices and Procedures; Meeting

The ACRS Subcommittee on Maintenance Practices and Procedures will hold a meeting on October 6, 1992, in Room P–110, 7920 Norfolk Avenue, Bethesda, MD.

The entire meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows:

Tuesday, October 6, 1992—8:30 a.m. until 1:00 p.m.

The Subcommittee will review the draft Regulatory Analysis and draft Regulatory Guide, "Monitoring the Effectiveness of Maintenance at Nuclear Power Plants," for implementation of the Maintenance Rule (10 CFR 50.65). Also, it will review the NUMARC document 93–01, Revision 2A, "Industry Guideline for Monitoring the Effectiveness of Maintenance at Nuclear Power Plants," which is endorsed by the NRC staff in the draft Regulatory Guide. The purpose of this meeting is to gather information, analyze relevant issues and facts, and to formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Recordings will be permitted only during those portions of the meeting when a transcript is being kept, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the ACRS staff member named below as far in advance as is practicable so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC staff, its consultants, nuclear industry, and other interested persons regarding this review.

Further information regarding topics to be discussed, the scheduling of sessions open to the public, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid

telephone call to the cognizant ACRS staff engineer, Mr. Herman Alderman (telephone 301/492–7750) between 7:30 a.m. and 4:15 p.m. (EST). Persons planning to attend this meeting are urged to contact the above named individual one or two days before the scheduled meeting to be advised of any changes in schedule, etc., that may have occurred.

Dated: September 17, 1992.

OFFICE OF PERSONNEL MANAGEMENT

Request for Clearance of a Revised Information Collection, Form RI 34–1

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces a request for a revised clearance of an information collection. Form RI 34–1, Financial Resources Questionnaire, collects detailed financial information for use by OPM in determining whether to agree to waiver, compromise, or adjustment of the collection of erroneous payments from the Civil Service Retirement and Disability Fund.

Approximately 8,200 forms are completed annually. The form requires approximately 60 minutes to complete. The annual burden is 8,200 hours.

For copies of this proposal, contact C. Ronald Trueworthy on (703) 908–8550.

DATES: Comments on this proposal should be received on or before October 26, 1992.

ADDRESSES: Send or deliver comments to—

Lorraine E. Dettman, Retirement and Insurance Group, Operations Support Division, U.S. Office of Personnel Management, 1900 E Street, NW., room 3349, Washington, DC 20415.

and

Joseph Lackey, OPM Desk Officer, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, NW., Room 3002, Washington, DC 20503.

FOR INFORMATION REGARDING ADMINISTRATIVE COORDINATION—CONTACT: Mary Beth Smith-Toomey, Chief, Administrative Management Branch (202) 606–0623.

U.S. Office of Personnel Management.

Douglas A. Brook,

Acting Director.

BILLING CODE 6325–01–M

Request for Reclearance of Form RI 20–1

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1980 (title 44, U.S. Code, chapter 35), this notice announces a request for reclearance of an information collection. Form RI 20–1, Application for Minimum Annuity, is used to determine if an annuitant qualifies for the minimum annuity, repealed under section 305 of Public Law 99–251 (Federal Employees Benefits Improvement Act of 1986). Annuitants who were entitled to the minimum annuity prior to the repeal date of February 27, 1986 continue to receive the minimum annuity in accordance with section 305.

Approximately 200 RI 20–1 forms are completed annually. The form requires approximately 15 minutes to complete. The annual burden is 50 hours.

For copies of this proposal, contact C. Ronald Trueworthy on (703) 908–8550.

DATES: Comments on this proposal should be received by October 26, 1992.

ADDRESS: Send or deliver comments to—

Lorraine E. Dettman, Retirement and Insurance Group, Operations Support Division, U.S. Office of Personnel Management, 1900 E Street, NW., room 3349, Washington, DC 20415.

and

BILLING CODE 6325–01–M

Excepted Service

AGENCY: Office of Personnel Management.

ACTION: Notice.

SUMMARY: This gives notice of positions placed or revoked under Schedules A and B, and positions placed under Schedule C in the excepted service, as required by civil service rule VI, Exceptions from the Competitive Service.

FOR FURTHER INFORMATION CONTACT: Sherry Turnpenoff, (202) 606–0950.

SUPPLEMENTARY INFORMATION: The Office of Personnel Management published its last monthly notice updating appointing authorities established or revoked under the Excepted Service provisions of 5 CFR 213 on August 14, 1992, (57 FR 36681). Individual authorities established or revoked under Schedules A and B and established under Schedule C between August 1 and August 31, 1992, appear in the listing below. Future notices will be published on the fourth Tuesday of each month, or as soon as possible thereafter. A consolidated listing of all authorities as of June 30, 1992, will also be published.

Schedule A

The following exception was revoked:

Department of Defense

Not exceed 30 positions at grades 6/15 in the Office of emergency Operations (OEO). No new appointments may be made under this authority after March 31, 1993. Effective August 13, 1992.

Schedule B

The following exception was established:

Federal Deposit Insurance Corporation

Temporary positions in the Washington, DC, headquarters, offices in the Resolution Trust Corporation when filled by individuals whose specialized experience in field and regional offices performing the work of the Resolution Trust Corporation under Schedule A authorities 5 CFR § 231.3133(a) or (b) immediately prior to their appointment under this authority is needed by the Resolution Trust Corporation for more efficient administration of its programs. Effective July 10, 1992.

Schedule C

Arms Control and Disarmament Agency

One policy Analyst to the Senior Policy Advisor. Effective July 9, 1992.

One congressional Affairs Specialist to the Director of Congressional Affairs. Effective July 17, 1992.

Department of Agriculture

One Director, Intergovernmental Affairs, to the Director, Office of Public Affairs/Press Secretary. Effective July 9, 1992.

One Regional Director (Klamath Falls, Oregon) to the Administrator, Rural Development Administration. Effective July 9, 1992.

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC-18962; 811-5223]

Calamos Investment Trust; Application

September 18, 1992.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Deregistration under the Investment Company Act of 1940 (the "Act").

APPLICANT: Calamos Investment Trust.

RELEVANT ACT SECTION: Section 8(f).

SUMMARY OF APPLICATION: Applicant seeks an order declaring that it has ceased to be an investment company.

FILING DATE: The application was filed on August 12, 1992.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on October 13, 1992 and should be accompanied by proof of service on the applicant, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons may request notification of a hearing by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, NW., Washington, DC 20549. Applicant, 2001 Spring Road, suite 750, Oak Brook, Illinois 60521.

FOR FURTHER INFORMATION CONTACT: James M. Curtis, Staff Attorney, at (202) 504-2406, or Barry D. Miller, Senior Special Counsel, at (202) 272-3018 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee at the SEC's Public Reference Branch.

Applicant's Representations

1. Applicant is a Massachusetts business trust and an open-end diversified management investment company registered under the Act. On June 30, 1987, applicant filed a notification of registration on Form N-8A pursuant to section 8(a) of the Act. On the same date, applicant filed a registration statement on Form N-1A under the Securities Act of 1933. The registration statement became effective on September 1, 1987. Applicant's initial public offering commenced shortly thereafter.

2. On January 13, 1992, applicant's board of trustees unanimously approved the Agreement and Plan of Reorganization (the "Plan") providing for the transfer on April 30, 1992 for all the assets and liabilities of Calamos Convertible Income Fund, the sole series of applicant (the "Fund"), to the Calamos Convertible Fund (the "Successor Fund"), a newly formed series of CFS Investment Trust, a registered open-end management investment company ("CFS Trust"), in exchange for shares of the Successor Fund (the "Reorganization").[1] Applicant's shareholders approved the Plan at a special meeting of shareholders held on April 21, 1992.

3. Pursuant to the Plan, on April 30, 1992, CFS Trust issued directly to each shareholder of the Fund shares of the Successor Fund in a number equal to the number of shares (including any fractional share) of the Fund then owned

[1] According to the Minutes of Meetings of Boards of Trustees dated January 13, 1992, the trustees unanimously determined in accordance with rule 17a-8 of the Act that the Reorganization would be in the best interests of the investment companies, and the interests of the shareholders would not be diluted by the Reorganization.

by such shareholder, in exchange for and in cancellation of the shareholder's shares of the Fund (the "Exchange"). Each shareholder of the Fund acquired the same proportionate interest in the Successor Fund as of the effective time of the Exchange as the shareholder had in the Fund immediately prior to the Exchange. The Fund's statement of assets and liabilities immediately before the Exchange is identical to that of the Successor Fund immediately after the Exchange.

4. The expenses applicable to the Exchange, consisting of accounting, printing, administrative, and certain legal expenses, equaled $21,866. These expenses were borne by applicant, Calamos Asset Management, Inc., applicant's investment advisor, and CFS Trust, acting for the Successor Fund in the amounts of $5,368, $10,250, and $6,248, respectively.

5. As of the time of filing the application, applicant had no securityholders, assets, or liabilities. Applicant is not a party to any litigation or administrative proceeding. Applicant is not presently engaged in, nor does it propose to engage in, any business activities other than those necessary for the winding up of its affairs.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF STATE

[Public Notice 1704]

Office of the Legal Adviser; Submission of Claims to the United Nations Compensation Commission

This notice concerns the procedures for filing a claim against Iraq with the United Nations Compensation Commission for losses, damage or inquiry suffered as a result of Iraq's illegal invasion and occupation of Kuwait. It supplements Public Notice 148 (56 FR 47979, September 23, 1991), Public Notice 1545 (57 FR 421, January 6, 1992), Public Notice 1642 (57 FR 28897, June 29, 1992), and Public Notice 1655 (57 FR 31396, July 15, 1992). For further information, and to obtain claim forms, contact the Office of the Assistant Legal Adviser for International Claims and Investment Disputes, 2100 K Street, NW., suite 402, Washington, DC 20037–7180. Telephone (202) 653–2412.

The United Nations Compensation Commission has circulated "Form F" to be used in filing claims of governments and international organizations for losses sustained as a result of Iraq's illegal invasion and occupation of Kuwait. "Governments" include any federal or state political subdivision, agency, ministry, instrumentality or controlled entity.

The Office of the Assistant Legal Adviser for International Claims and Investment Disputes will work with each government agency wishing to file a claim to prepare its claims for submission to the Compensation Commission. Each agency must provide a detailed memorandum outlining the facts and legal basis for each claim. The Office of the Assistant Legal Adviser will then fill out the claim form and prepare a statement of the claim.

Government and international organization claims will be accepted by the Commission after February 1, 1993. Processing priority will be given to those claims received by August 1, 1993. The final deadline for the submission of these claims by Governments is February 1, 1994. In order to allow enough time for preparation of each claim, the Assistant Legal Adviser's Office is requesting detailed memoranda and supporting documentation by March 1, 1993 if possible, and requiring its submission no later than September 1, 1993.

Dated: September 16, 1992.

Ronald J. Bettauer,

Assistant Legal Adviser for International Claims and Investment Disputes.

[GD 92-048]

New York Harbor Traffic Management Advisory Committee; Meeting

AGENCY: Coast Guard, DOT.

ACTION: Notice of meeting.

SUMMARY: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463; 5 U.S.C. app. I), notice is hereby given of a meeting of the New York Harbor Traffic Management Advisory Committee to be held on October 14, 1992, in South Conference Room "B", 34th floor, One World Trade Center, New York, New York, beginning at 10 a.m.

The agenda for this meeting of the New York Harbor Traffic Management Advisory Committee is as follows:

1. Introductions.
2. Update of Marine Events.
3. Update of dredging operations in New York harbor.
4. Update on Vessel Traffic Service.
5. Update on Coast Guard regulatory initiatives: Bridge-to-Bridge Act.
6. Bayonne Bridge lighting/clearances.
7. 40 foot channel through the Kill Van Kull and Newark Bay.
8. "P.O.R.T.S." update.
9. Topics from the floor.
10. Review of agenda topics and selection of date for next meeting.

The New York Harbor Traffic Management Advisory Committee has been established by Commander, First Coast Guard District to provide information, consultation, and advice with regard to port development, maritime trade, port traffic, and other maritime interests in the harbor. Members of the Committee serve voluntarily without compensation from the Federal Government.

Attendance is open to the interested public. With advance notice to the Chairperson, members of the public may make oral statements at the meeting. Persons wishing to present oral statements should notify the Executive Director no later than one day before the meeting. Any member of the public may present a written statement to the Committee at any time.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander J.P. Benvenuto, USCG, Executive Secretary, NY Harbor Traffic Management Advisory Committee, Vessel Traffic Service, Building 108, Governors Island, New York, NY 10004-5070; or by calling (212) 668-7429.

Dated: September 9, 1992.

R.M. Larrabee,

Captain, U.S. Coast Guard, Captain of the Port New York, NYHTMAC Executive Director.

BILLING CODE 4910-14-M

Federal Aviation Administration

Federal Interagency Committee on Noise (FICON): Report and Recommendations

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of availability of FICON report and recommendations.

SUMMARY: At the direction of the Environmental Protection Agency and the Federal Aviation Administration, the FICON was formed in December 1990 with a basic charter to review specific elements of the assessment of airport noise impacts contained in documents prepared pursuant to the National Environmental Policy Act (NEPA); to review the relationship of Federal Aviation Regulation (FAR) part 150 to NEPA; and to make recommendations regarding potential improvements. The FICON is composed of representatives from the Departments of Transportation (Office of the Secretary and the Federal Aviation Administration), Defense, Justice, Veterans Affairs, Housing and Urban Development; the Environmental Protection Agency; and the Council on Environmental Quality. The FICON has completed its charter and has issued its report, which contains technical findings and conclusions, and policy recommendations. This notice of the availability of the FICON report is being published separately by all FICON member agencies.

FOR FURTHER INFORMATION CONTACT: Federal Aviation Administration, Office of Environment and Energy, Policy and Regulatory Division (AEE-300), 800 Independence Avenue, SW., Washington, DC 20591, (202) 267-7203.

SUPPLEMENTARY INFORMATION:

Availability of FICON Report

Any person may obtain a copy of the FICON report by submitting a written request to Spectrum Sciences and Software, Inc., Code FAA, 242 Vicki Leigh Road, Fort Walton Beach, FL 32547.

Background

The FICON was formed to review Federal policies which are used in the assessment of airport noise impacts. The FICON review focused primarily on:

- The manner in which noise impacts are determined, including whether aircraft noise impacts are fundamentally different from other transportation noise impacts;
- The manner in which noise impacts are described;
- The extent of impacts outside of Day-Night Average A-Weighted Sound Level (DNL) 65 decibels (dB) that should be reviewed in a National Environmental Policy Act (NEPA) document;
- The range of the Federal Aviation Administration (FAA)-controlled mitigation options (e.g., noise abatement and flight track procedures) analyzed; and,
- The relationship of the Federal Aviation Regulation (FAR) part 150 process to the NEPA process; including ramifications to the NEPA process if they are separate, and exploration of the means by which the two processes can be handled to maximize benefits.

The FICON was organized into three subgroups to appropriately focus on the technical, legal, and policy issues associated with the assessment of airport noise impacts. The Technical Subgroup was tasked to review the body of science associated with methodologies and metrics for assessing airport noise impacts which have

evolved since the 1980 meetings of the Federal Interagency Committee on Urban Noise (FICUN). The Policy Subgroup was tasked to review Federal policies which are used in the assessment of airport noise impacts. The Legal Subgroup reviewed the legal aspects of current and proposed Federal policies for assessing airport noise impacts. The Technical Subgroup's products were used as a basis for the policy findings, conclusions, and recommendations in the report.

FICON Report Conclusions

General

- There are no new descriptors or metrics of sufficient scientific standing to substitute for the present DNL cumulative noise exposure metric.
- The methodology employing DNL as the noise exposure metric and appropriate dose-relationships (primarily the Schultz curve for Percent Highly Annoyed, expressed as %HA) to determine noise impact is considered the proper one for civil and military aviation scenarios in the general vicinity of airports.
- Federal agencies generally conduct noise assessments at DNL levels of 65 dB. For a variety of reasons, noise predictions and interpretations are frequently less reliable below DNL 65 dB. DNL prediction models tend to degrade in accuracy at large distances from the airport. Therefore, predictions of noise exposure and impact below DNL 65 dB should take the possibility of such inaccuracy into account.
- On a case-by-case basis, DNL is supplemented with other metrics.
- Noise analysis is used to address impacts in the following areas: (1) Health and welfare, (2) environmental degradation/impact and (3) land use planning.
- Complaints are an inadequate indicator of the full extent of noise effects on a population.

Health and Welfare

- The dose-effect relationship, as represented by DNL and %HA, remains the best available approach for analyzing overall health and welfare impacts for the vast majority of transportation noise analysis situations.
- The 10 dB nighttime penalty levied against noise during the 10 p.m. to 7 a.m. period is specifically designed to account for the intrusiveness of noise during this period and its potential impact on sleep. There are no new hard data which would justify a change in this penalty.
- If supplemental analysis for sleep disturbance is desired, use may be made of an interim dose-response model developed by the AF Armstrong Laboratories. Although this relationship is described in terms of Sound Exposure Level (SEL), single event metrics are of limited use in predicting and interpreting cumulative noise exposure impacts.
- Annoyance is a summary measure of the general adverse reaction of people to noise that causes speech interference; sleep disturbance; desire for a tranquil environment; and the inability to use the telephone, radio or television satisfactorily.
- No definitive evidence of non-auditory health effects from aircraft noise exist, particularly below DNL 70 dB.
- For supplemental analysis, Long-Term Equivalent Sound Level or Time Above may be used for analysis of school and communications requirements indoors during specific hours.
- Public health and welfare effects below DNL 60 dB have not been established, but are assumed to decrease according to the decrease in percent of people highly annoyed.

Environmental Degradation/Impact

- Under NEPA, environmental degradation might have to be assessed around airports even if there is no clear effect on public health and welfare. Other criteria might be appropriate.
- A 3 dB increase in the DNL environment represents a doubling of sound energy and clearly is an indicator of the need for further analysis, although smaller increases may indicate similar need. In other words, the impact of a given incremental amount of change in noise levels depends, in part, upon the existing level of the noise environment.
- Recent technology and software advances in geographic information systems, noise methodology and Census data present an enhanced potential for detailed analysis of sound impacts on population and noise-sensitive areas. These technologies should be considered for use to determine noise impacts of present and proposed actions.

Land Use Planning

- DNL represents the accepted noise methodology for input to compatible land use planning.
- For cumulative speech interference, Table 3–2 "Effects of Noise on People" contained in the FICON report, Volume II (Technical Report), provides a rough approximation of both outdoor and indoor predicted speech interference parameters for various levels of noise exposure as measured in DNL for residential land use only.
- There is a need for selective updating of land-use compatibility guidelines and for enhancing public understanding of them through incentives and other programs.

Education of the Public

- Education of the public should concentrate on the following frequently misunderstood issues:
- Environmental noise exposure is measured and described most generally by Day-Night Average A-Weighted Sound Level (DNL). DNL should be defined clearly and its significance and use explained clearly.
- Relation of DNL to Percent Highly Annoyed describes long-term community response to the overall sound environment (indices of health and welfare effects).
- Although the A-weighted Maximum Sound Level for a single flyover is easily understood, it is useful only for analyzing short-term responses.
- Every change in the noise environment does not necessarily impact public health and welfare.
- Aircraft noise predictions below DNL 65dB can be less accurate and should be interpreted with caution.

FICON Report Recommendations

- Continue use of the DNL metric as the principal means for describing long term noise exposure of civil and military aircraft operations.
- Continue agency discretion in the use of supplemental noise analysis.
- Improve public understanding of the DNL, supplemental methodologies and aircraft noise impacts.
- If screening analysis shows that noise-sensitive areas that will be at or above DNL 65 dB would have an increase of DN: 1.5 dB or more, further analysis should be conducted of noise sensitive areas between DNL 60–65 dB having an increase of DNL 3 dB or more due to the proposed airport noise exposure.
- If the DNL 65 dB screening test calls for further analysis between DNL 60–65 dB, agency mitigation options should include noise sensitive areas between DNL 60–65 dB that are projected to have an increase of 3 db or more as a result of the proposed airport noise exposure.
- If an FAA Part 150 program is included by the FAA as a NEPA mitigation measure, the FAA and the airport operator are responsible for ensuring the commitment is carried out and the part 150 study scope conforms to the NEPA scope of noise analysis.
- Increase research (R&D) on methodology development and on the impact of aircraft noise. To foster this, a

standing Federal interagency committee should be established to assist agencies in providing adequate forums for discussions of public and private sector proposals identifying needed research and in encouraging R&D in these areas. The following initial R&D issues are recommended:

- Evaluate potential modifications to the 1980 FICON land use compatibility table to improve its usefulness for both routine land use planning and planning for noise-sensitive land uses.
- Continue research into community reaction to aircraft noise, including sleep disturbance, speech interference, and non-auditory health effects of noise.
- Investigate differences in perceptions of aircraft noise, ground transportation noise (highways and railroads), and general background noise.
- Continue and expand research on the airport noise impacts of rotary-wing operations.

It is the FICON's belief that these recommendations will provide both immediate and long-term improvements in airport noise analysis. Federal interagency encouragement of a continuing review of airport noise analysis will provide a forum to address related public concerns.

While the FICON is seeking to achieve improved uniformity among Federal agencies in airport noise analysis, it must also recognize that agencies have differing legislative mandates and operating environments. These recommendations should be viewed as general guidance. Each Federal agency must determine how it can best use this guidance, supplementing it as appropriate to meet agency needs, within the framework of the NEPA requirements. The FICON report neither addresses the adequacy of compliance with NEPA to date by the participating agencies, attempts to redefine thresholds of significance of impact under NEPA, nor modifies the NEPA regulations or procedures of those agencies.

Public Review and Comment

Any person may express his or her views on the FICON report by submitting written comments to the Federal Aviation Administration, Office of Environment and Energy, AEE–300, 800 Independence Avenue, SW., Washington, DC 20591. Since the primary impact of the report's recommendations will be on the assessment of civil airport noise impacts for which the FAA is responsible, the FAA is serving as the focal point for the receipt of public comments. Copies of such written responses will be provided to all agencies participating in FICON. All public comments will be fully considered and used to facilitate the future interagency activities recommended in this report.

The Federal Aviation Administration is reviewing its procedures for evaluating airport noise impacts based on the report findings, conclusions, and recommendations; and will also consider the comments to this report in conducting this review. Any resulting change in procedures will be published for public comment prior to adoption.

Issued in Washington, DC, on September 18, 1992.

Louise E. Maillett,

Director, Office of Environment and Energy.

BILLING CODE 4910–13–M

Federal Highway Administration

Environmental Impact Statement: King County, WA

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement (EIS) will be prepared for a proposed highway project in King County, Washington.

FOR FURTHER INFORMATION CONTACT: Barry F. Morehead, Federal Highway Administration, Evergreen Plaza Building, 711 South Capitol Way, Suite 501, Olympia, Washington, 98501, Telephone: (202) 753–2120; E.R. Burch, State Design Engineer, Washington State Department of Transportation, Transportation Building, Olympia, Washington, 98504, Telephone: (206) 753–6141; or Ronald Q. Anderson, District Administrator, Washington State Department of Transportation, District 1, 15700 Dayton Avenue North, Seattle, Washington, 98133–9710, Telephone (206) 440–4691.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Washington State Department of Transportation (WSDOT), King County, Port of Seattle, Municipality of Metropolitan Seattle (METRO), City of SeaTac, and City of Des Moines, will prepare an EIS on a proposal to extend State Route 509 (SR 509) to the south, and to improve southerly access to Seattle-Tacoma International Airport (South Access Road). The proposed improvement would include construction of a new highway from SR 509 at South 188th Street, southerly to a connection with Interstate 5(I–5), and a new South Access Road. Improvements to the corridor are considered necessary to provide for the existing and projected traffic demand. Alternatives under consideration include: (1) Taking no action; (2) Alternative D–2, which would extend SR 509 southward from South 188th Street, on existing WSDOT right-of-way, to approximately South 210th Street, and then eastward connecting to I–5 with a new interchange at South 210th Street. An expressway connecting SR 509 with the airport would provide direct access to and from the south on I–5; (3) Alternative F–2, which would extend SR 509 southward from South 188th Street, on existing WSDOT right-of-way, to approximately South 216th Street, and then southeasterly, connecting to I–5 at a reconstructed SR 516 interchange. An expressway connecting SR 509 with the airport would provide direct access to and from the south on I–5; and (4) Alternative I–2, which would extend SR 509 southward from South 188th Street, on existing WSDOT right-of-way to SR 516, then southerly on new right-of-way, connecting to I–5 at a reconstructed South 272nd Street interchange. Also included in this alternative is a roadway connecting SR 509 with I–5 at a new interchange at approximately South 210th Street, together with an expressway connecting with the airport, providing direct access to and from the south on I–5. Letters describing the proposed action and soliciting comments will be sent to the appropriate federal, state, and local agencies as well as citizens and organizations that have previously expressed or are known to have an interest in this proposal. A public scoping meeting will be held between September and October 1992. In addition, a public hearing will be held. Public notice will be given of the time and place of the meeting and the hearing. The draft EIS will be available for public and agency review and comment prior to the public hearing. To ensure that the full range of issues related to this proposed project are addressed and all significant issues identified, comments and suggestions are invited from all interested parties. Comments or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Research, Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation of federal programs and activities apply to this program.)

Issued on: September 11, 1992.

Richard C. Kay,

Area Engineer, Olympia, Washington.

[FR Doc. 92-23205 Filed 9-23-92; 8:45 am]

BILLING CODE 4910-22-M

Federal Railroad Administration

Petition for a Waiver of Compliance

In accordance with 49 CFR 211.9 and 211.41, notice is hereby given that the Federal Railroad Administration (FRA) has received a request for a waiver of compliance with certain requirements of federal railroad safety regulations. The individual petition is described below, including the party seeking relief, the regulatory provisions involved, the nature of the relief being requested and the petitioner's arguments in favor of relief.

The individual waiver petition is as follows:

Kiamichi Railroad Company, Incorporated (Waiver Petition Docket No. RST-91-2)

The Kiamichi Railroad Company, Inc. (KRR), of Hugo, Oklahoma, requests a waiver of compliance with § 213.237(a) of FRA's Track Safety Standards (49 CFR part 213). Section 213.237(a) requires that an annual continuous search for internal rail defects be made on Class 3 track over which passenger trains operate. The maximum operating speed for passenger trains on Class 3 track is 60 mph. KRR operates its occasional excursion trains at a maximum 25 mph over certain Class 3 tracks. KRR is therefore requesting a waiver from the requirements of § 213.237(a). KRR claims that the cost to meet this requirement would be prohibitive for what is essentially a public service operation.

Interested parties are invited to participate in this proceeding by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning this proceeding should identify the appropriate docket number (e.g., Waiver Petition Docket No. RST-91-2) and must be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Nassif Building, 400 Seventh Street, SW., Washington, DC 20590. Communications received before November 2, 1992 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable. All written communications concerning these proceedings are available for examination during regular business hours (9 a.m.-5 p.m.) in room 8201, Nassif Building, 400 Seventh Street, SW., Washington, DC, 20590.

Issued in Washington, DC, on September 18, 1992.

Phil Olekszyk,

Deputy Associate Administrator for Safety.

BILLING CODE 4910-06-M

Federal Transit Administration

Environmental Impact Statement on the Extension of Light Rail Transit in the South Sacramento Corridor, Sacramento County, CA

AGENCY: Federal Transit Administration, DOT.

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Federal Transit Administration (FTA), and the Sacramento Regional Transit District (RT) hereby give notice that they intend to prepare an Environmental Impact Statement (EIS) in accordance with the National Environmental Policy Act (NEPA), on the proposed extension of light rail transit service from the existing light rail transit system in the central business district of the City of Sacramento to the vicinity of Elk Grove and Laguna in the South Sacramento Corridor (South Corridor). The local lead agency (RT) will ensure that the EIS also satisfies the requirements of the California Environmental Quality Act (CEQA) and serves as the Environmental Impact Report (EIR) required by CEQA. In addition to the Light Rail Transit extension, the EIS/EIR will evaluate the No-Action and Transportation System Management (TSM) alternatives and any new alternatives generated through the scoping process. Scoping will be accomplished through correspondence with interested persons, organizations, and federal, state and local agencies, and through four public meetings.

DATES: Written comments on the scope of alternatives and impacts to be considered must be received by the Sacramento Regional Transit District by October 9, 1992. Public scoping meetings will be held on Wednesday, September 30, 1992 at 7 p.m. at Valley High School; Thursday, October 1, 1992 at 7 p.m. at J.F. Kennedy High School; Monday, October 5, 1992 at 7:30 p.m. at Sierra 2 Community Center; Thursday, October 8, 1992 at 7 p.m. at Kerr Junior High School.

ADDRESSES: Written comments on the project scope should be sent to Ms. Debra Jones, Senior Planner, Sacramento Regional Transit District, 1400 29th Street, P.O. Box 2110, Sacramento, California 95812-2110. Scoping meetings will be held at the following locations:

1. September 30, 1992.
Valley High School, 6300 Ehrhardt Avenue, Sacramento, CA 95823.
2. October 1, 1992.
J.F. Kennedy High School, 6715 Gloria Drive, Sacramento, CA 95831.
3. October 5, 1992.
Sierra 2 Community Center, 2791 24th Street, Sacramento, CA 95818.
4. October 8, 1992.
Kerr Junior High School, Elk Grove at Elk Grove-Florin Rds., Elk Grove, CA 95624.

FOR FURTHER INFORMATION CONTACT: Robert Hom, Office of Program Management, FTA Region IX, 211 Main Street, Suite 1160, San Francisco, CA 94105. Phone: (415) 744-3116.

SUPPLEMENTARY INFORMATION:

Scoping

FTA and the local lead agency invite interested individuals, organizations, and federal, state and local agencies to participate in defining the alternatives to be evaluated in the EIS/SIR and identifying any significant social, economic, or environmental issues related to the alternatives. An information packet describing the purpose of the project, the proposed alternatives, the impact areas to be evaluated, the citizen involvement program, and the preliminary project schedule is being mailed to affected federal, state and local agencies and to interested parties on record. Others may request the scoping materials by contracting Debra Jones at the address above or by calling her at (916) 321-2870. Scoping comments may be made verbally at either of the public scoping meetings or in writing. See the DATES and ADDRESSES sections above for locations and times. During scoping, comments should focus on identifying specific social, economic or environmental impacts to be evaluated and suggesting alternatives which are less costly or less environmentally damaging while achieving similar transit objectives. Scoping is not the appropriate time to indicate a preference for a particular alternative. Comments on preferences should be communicated after the Draft EIS/EIR

has been completed. If you wish to be placed on the mailing list to receive further information as the project develops, contact Debra Jones as previously described.

Description of Study Area and Project Need

The South Sacramento Corridor has been defined as extending from downtown Sacramento south to the vicinity of Elk Grove Boulevard and including the area between the Sacramento River on the west and Stockton Boulevard and the Southern Pacific Railroad on the east. The South corridor is approximately 13 miles in length. The proposed South corridor LRT extension is proposed to provide transit service and improve accessibility between downtown Sacramento and the southern portion of the City of Sacramento and unincorporated areas of Sacramento County. The project should also improve transit accessibility between the study area and areas of northern and eastern Sacramento County served by the existing light rail transit system. The project may assist in alleviating regional air quality problems by providing an alternative to the automobile for many trips.

Alternatives

The alternatives proposed for evaluation include: No Action—defined to include all those transit service and highway and transit facilities that now exist or that are committed and will be operational by 2010; TSM-Low Alternative—defined to include only a modest expansion of transit services in the corridor, planned Caltrans freeway HOV lanes on I–5, and express bus services; TSM-High Alternative—in which the region's bus fleet would be more than doubled over the current fleet of 200 buses, the planned freeway HOV lanes on both I–5 and Highway 99 would be completed, express bus services would be expanded, and other bus service improvements would be implemented and supported by park-and-ride lots, direct access to freeway HOV lanes, transfer stations, and transit centers; Light Rail Transit alternative—involving the development of new LRT service in the South Corridor by extending a line from downtown Sacramento south to a terminal(s) located in the communities of Laguna and/or Elk Grove via one of eight potential alternatives utilizing either the Meadowview/Southern Pacific Railroad alignment or the Union Pacific Railroad alignment. The South Corridor under the Light Rail Transit alternative would also be served by a connecting bus system providing access to the stations along the LRT line and a comprehensive system of local bus routes providing radial and cross-town service for multi-destinational trips.

Probable Effects

FTA and the local lead agency plan to evaluate in the EIS/EIR all significant social, economic, and environmental impacts of the alternatives. Among the primary issues are the expected increase in transit ridership, the capital outlays needed to construct the project, the cost of operating and maintaining the facilities created by the project, and financial impacts on the funding agencies. Environmental and social impacts proposed for analysis include land use and neighborhood impacts, traffic and parking impacts near stations, visual impacts, impacts on cultural resources, and noise and vibration impacts. Impacts on natural areas, rare and endangered species, air and water quality, groundwater, and geologic forms will also be covered. The impacts will be evaluated both for the construction period and for the long-term period of operation. Measures to mitigate significant adverse impacts will be considered.

FTA Procedures

In accordance with the Federal Transit Act and FTA policy, the Draft EIS/EIR will be prepared in conjunction with an Alternatives Analysis, and the Final EIS/EIR in conjunction with Preliminary Engineering. After its publication, the Draft EIS/EIR will be available for public and agency review and comment, and a public hearing will be held. On the basis of the Draft EIS/EIR and the comments received, RT will select a locally preferred alternative and seek approval from FTA to continue with Preliminary Engineering and preparation of the Final EIR/EIS.

Issued on: September 21, 1992.

Louis F. Mraz, Jr.,

Western Area Director.

DEPARTMENT OF THE TREASURY

Public Information Collection Requirements Submitted to OMB for Review

Dated: September 18, 1992.

The Department of Treasury has submitted the following public information collection requirement(s) to OMB for review and clearance under the Paperwork Reduction Act of 1980, Public Law 96–511. Copies of the submission(s) may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding this information collection should be addressed to the OMB reviewer listed and to the Treasury Department Clearance Officer, Department of the Treasury, Room 3171 Treasury Annex, 1500 Pennsylvania Avenue, NW., Washington, DC 20220.

Comptroller of the Currency

OMB Number: 1557–0153
Form Number: None
Type of Review: Reinstatement
Title: Appraisal of Property Upon Transfer to Other Real Estate Owned/ Instructions to Appraiser (12 CFR 7.3025)
Description: This recordkeeping requirement affects any national bank which acquires title to or possession of Other Real Estate Owned. The required records substantiate the carrying value of OREO in conformity with generally accepted accounting principles. This provides for more meaningful bank financial statement depictions and comparisons
Respondents: Businesses or other for-profit, Small businesses or organizations
Estimated Number of Recordkeepers: 2,846
Estimated Burden Hours Per Recordkeeper: 28 hours, 54 minutes
Frequency of Response: Other
Estimated Total Recordkeeping Burden: 82,206 hours
Clearance Officer: John Ference (202) 874–4697, Comptroller of the Currency, 250 E Street, SW., Washington, DC 20219
OMB Reviewer: Gary Waxman (202) 395–7430, Office of Management and Budget, Room 3208, New Executive Office Building, Washington, DC 20503

Dale A. Morgan,

Departmental Reports Management Officer.

Customs Service

Application for Recordation of Trade Name: "Ashley Furniture Industries, Inc."

ACTION: Notice of application for recordation of trade name.

SUMMARY: Application has been filed pursuant to § 133.12, Customs regulations (19 CFR 133.12), for the recordation under section 42 of the Act of July 5, 1946, as amended (15 U.S.C. 1124), of the trade name "Ashley Furniture Industries, Inc." used by Ashley Furniture Industries, Inc., a corporation organized under the laws of the State of California, located at 350 Madison Street, Arcadia, Wisconsin 54612.

The application states that the trade name is used in connection with furniture.

Before final action is taken on the application, consideration will be given to any relevant data, views, or arguments submitted in writing by any person in opposition to the recordation of this trade name. Notice of the action taken on the application for recordation of this trade name will be published in the Federal Register.

DATES: Comments must be received on or before November 23, 1992.

ADDRESSES: Written comments should be addressed to U.S. Customs Service, Attention: Intellectual Property Rights Branch, 1301 Constitution Avenue, NW., (room 2104), Washington, DC 20229.

FOR FURTHER INFORMATION CONTACT: Gina D'Onofrio, Intellectual Property Rights Branch, 1301 Constitution Avenue, NW., Washington, DC 20229 (202–566–6956).

Dated: September 15, 1992.

John F. Atwood,
Chief, Intellectual Property Rights Branch.

BILLING CODE 4820–02–M

Internal Revenue Service

Art Advisory Panel; Closed Meeting

AGENCY: Internal Revenue Service, Treasury.

ACTION: Notice of closed meeting of Art Advisory Panel.

SUMMARY: Closed meeting of the Art Advisory Panel will be held in Washington, DC.

DATES: The meeting will be held October 22 and 23, 1992.

FOR FURTHER INFORMATION CONTACT: Karen Carolan, CC:AP:AS:4 901 D Street, SW., Washington, DC 20024. Telephone No. (202) 401–4128, (not a toll free number).

Notice is hereby given pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. app. (1988), that a closed meeting of the Art Advisory Panel will be held on October 22 and 23, 1992, in room 118 beginning at 9:30 a.m., Aerospace Center Building, 901 D Street, SW., Washington, DC 20024.

The agenda will consist of the review and evaluation of the acceptability of fair market value appraisals of works of art involved in Federal income, estate, or gift tax returns. This will involve the discussion of material in individual tax returns made confidential by the provisions of section 6103 of title 26 of the United States Code.

A determination as required by section 10(d) of the Federal Advisory Committee Act has been made that this meeting is concerned with matters listed in section 552b(c)(3), (4), (6), and (7) of title 5 of the United States Code, and that the meeting will not be open to the public.

The Commissioner of Internal Revenue has determined that this document is not a major rule as defined in Executive Order 12291 and that a regulatory impact analysis therefore is not required. Neither does this document constitute a rule subject to the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Shirley D. Peterson,
Commissioner.

BILLING CODE 4830–01–M

Office of Thrift Supervision

[No. 92–388]

Branch Closings

AGENCY: Office of Thrift Supervision, Treasury.

ACTION: Notice of proposed policy and request for comment.

SUMMARY: The Office of Thrift Supervision (OTS) is today publishing for comment a proposed policy that provides information and guidance with regard to statutory requirements for branch closings. Those requirements are contained in section 39 of the Federal Deposit Insurance Act, as amended by section 228 of the Federal Deposit Insurance Corporation Improvement Act of 1991. The proposed policy also discusses the need for savings associations to develop and implement effective policies to minimize any adverse effect that a branch closing may have on a savings association's community, and remedies the OTS may consider if an association fails to comply with the statutory requirements. The full text of the proposed policy is provided in this notice.

The OTS will consider the comments received from the public in evaluating whether changes to the policies as drafted in the proposed policy are required.

DATES: Comments requested must be received on or before November 23, 1992.

ADDRESSES: Send comments to: Director, Information Services, Office of Public Affairs, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC. 20552, Attention: Docket No. 92–388. These submissions may be hand delivered to 1700 G Street,

NW. from 9 a.m. to 5 p.m. on business days; they may be sent by facsimile transmission to FAX Number (202) 906–7753 or (202) 906–5755. Submissions must be received by 5 p.m. on the day they are due in order to be considered by the OTS. Late-filed, misaddressed, or misidentified submissions will not be considered. Comments will be available for public inspection at 1776 G Street, NW., Street Level.

FOR FURTHER INFORMATION CONTACT: Larry A. Clark, Program Manager, Specialized Programs, (202) 906–5628; Kevin A. Corcoran, Assistant Chief Counsel, Corporate and Securities Division, (202) 906–6962; or Jackie Durham, Project Manager, Corporate Analysis, Office of Thrift Supervision, 1700 G Street, NW., Washington, DC 20552.

SUPPLEMENTARY INFORMATION:

Background

Section 228 of the Federal Deposit Insurance Corporation Improvement Act of 1991 added section 39 (codified at 12 U.S.C. 1831p) to the Federal Deposit Insurance Act (FDI Act), effective December 19, 1991. The law requires an insured depository institution to:

- Submit notice of any proposed branch closing to its appropriate Federal banking agency no later than 90 days prior to the date of the proposed closing. The notice must include a detailed statement of the reasons for the decision to close the branch and statistical or other information in support of those reasons.
- Notify its customers of the proposed closing. This notice must be mailed to the customers of the branch proposed to be closed at least 90 days in advance of the proposed closing. A notice to customers must also be posted in a conspicuous manner on the premises of the branch proposed to be closed at least 30 days prior to the proposed closing.
- Adopt policies for branch closings.

An insured depository institution means any bank or savings association, as defined in section 3 of the FDI Act, the deposits of which are insured by the Federal Deposit Insurance Corporation (FDIC). The term includes state and federal savings associations.

Because the requirements of section 39 apply to all insured depository institutions, and in order to provide a uniform and consistent approach, the Federal banking agencies (Office of the Comptroller of the Currency, Board of Governors of the Federal Reserve System, FDIC, and the OTS) have developed positions substantially similar to those discussed in this proposed policy statement. At the same time, however, each agency also has existing rules, regulations and policies that are affected by section 39; consequently, there may be some procedural differences between the agencies' policies.

The proposed policies provide guidance to address the questions raised in connection with the implementation of section 39, discuss the effect of that section on existing OTS regulations, and remind savings associations of the need to develop and implement effective written policies and procedures for branch closings.

Request for Comment

The OTS invites comments on all aspects of its proposed policies. The implementation of the statutory provisions raises a number of issues that generally involve questions of what constitutes a "branch" and a "closing". Therefore, commenters are specifically requested to address the following issues:

1. What is the appropriate definition of "branch" to apply in connection with a branch closing under section 39?

The law applies to all "branch" closings. OTS regulations (12 CFR 545.92(a)) define a "branch" as any office of a Federal savings association, *other than* its home office, agency office, data processing or administrative office, or a remote service unit. In addition to a traditional brick and mortar branch, OTS believes the law applies to any other type of domestic facility that constitutes a branch, including a drive-in facility and mobile branch. Other definitions could be utilized, *e.g.*, the definition of "domestic branch" contained in section 3(o) of the FDI Act. If this definition were applied, one effect would be to include remote service units (ATMs).

2. Should the proposed policy apply to a branch relocation?

OTS regulations (12 CFR 545.95) require a Federal savings association to file either an application or a notice with the OTS prior to relocating a branch office, depending upon whether it qualifies for expedited or standard treatment based on its financial and managerial strengths, and statutory and regulatory compliance records. An association may, however, relocate a branch without applying for approval if the site is within the market and short-distance relocation area (as defined in 12 CFR 545.95(c)) of the existing branch.

Thus, prior approval is required if the effect of the relocation of a branch from one location to another is to establish a new branch, but no prior approval is required if a branch is relocated in the immediate market area. The primary distinction between the two requirements is the extent to which financial services in the community are, or are not, affected by the relocation.

The OTS believes the notice requirements in section 39 are designed to protect against the adverse effects of sudden or unexpected branch closings, particularly in underserved or lower-income communities. Additionally, if the branch is moved a significant distance from its present location, the effect of the relocation may be considered to be the functional equivalent of a closing. For these reasons and to be consistent with the intent of existing regulations, the OTS therefore proposes to apply section 39 to a branch relocation, unless the relocation satisfies the regulatory criteria for a short-distance relocation in 12 CFR 545.95(c). The OTS does not propose to apply section 39 to closings or consolidations of existing branches that are within the regulatory criteria for a short-distance relocation.

3. Should the proposed policy apply to government-assisted transactions?

The OTS believes that section 39 applies to a branch closing initiated by an institution, not to situations where the institution is failing and the closing is part of the government's resolution process. Interpreting section 39 as applying to branches operated on a temporary basis by an acquiror in a transaction assisted by the FDIC or Resolution Trust Corporation (RTC) would appear to have results that are contrary to the statute's purpose.

In a typical situation, when an acquiror assumes some or all of the assets and liabilities of an institution placed into conservatorship or receivership, it operates one or more branches temporarily until it decides, during an option period (generally 80–180 days), whether to purchase or lease the branch, or transfer it back to the FDIC or RTC. If an acquiror is initially uncertain as to whether the branch will remain open, and if the acquiror is required to operate the branch for 90 days from the time it decides to close the branch, then the acquiror may decide to close the branch immediately, rather than operate it on an interim basis as an accommodation to the branch's customers.

Accordingly, the OTS believes that section 39 does not apply to closings of branches of an institution that has been placed in conservatorship or receivership by the OTS, so long as the branches are closed prior to expiration of an acquiror's branch acquisition option period. Section 39 would apply, however, if the acquiror purchases or

leases a branch, but later decides to close the branch. Section 39 would also apply when an acquiror closes a branch from its pre-acquisition branch network in a consolidation of offices acquired in connection with an RTC acquisition, unless the distance between the two branches is so close that it would satisfy the applicable distance standard for a short-distance relocation pursuant to 12 CFR 545.95(c).

Regardless of the applicability of section 39, a savings association that operates branches transferred from the RTC or the FDIC on an interim basis should, upon deciding not to permanently acquire a branch, use its best efforts to provide advance notice to both its customers and the OTS of the proposed branch closing.

4. How can an association best identify the customers of a branch?

The proposed policy permits each savings association to determine which of its patrons will be identified as customers of a particular branch. The proposed policy requires a good faith determination based on a reasonable method developed by the association to allocate a customer to a branch. One example of a reasonable method that an association could use is to allocate a customer to a branch based on where the customer opened his or her deposit or loan account.

Proposed Policy Statement

Purpose

This policy statement provides guidance to all savings associations with respect to the statutory requirements that each association provide prior notice of branch closings and establish internal policies for branch closings.

Background

The Federal Deposit Insurance Corporation Improvement Act of 1991 was enacted on December 19, 1991. Section 228 adds a new section 39 (codified at 12 U.S.C. 1831p) to the Federal Deposit Insurance Act (FDI Act) and imposes notice requirements on insured depository institutions that propose branch closings. An "insured depository institution" means any bank or savings association, as defined in Section 3 of the FDI Act, the deposits of which are insured by the Federal Deposit Insurance Corporation (FDIC). The term includes state and federal savings associations. Section 39 became effective on December 19, 1991.

The law requires an insured depository institution to submit a notice of any proposed branch closing to the appropriate Federal banking agency no later than 90 days prior to the date of the proposed branch closing. The required notice must include a detailed statement of the reasons for the decision to close the branch and statistical or other information in support of such reasons.

The law also requires an insured depository institution to notify its customers of the proposed closing. The institution must mail the notice to the customers of the branch proposed to be closed at least 90 days prior to the proposed closing. The institution must also post a notice to customers in a conspicuous manner on the premises of the branch proposed to be closed at least 30 days prior to the proposed closing.

Additionally, the law requires each insured depository institution to adopt policies regarding closings of branches of the institution.

As the Federal banking agency that supervises savings associations, the OTS is charged with administering section 39 for those institutions.

Applicability

Under OTS regulations, a "branch" is defined as any office of a Federal savings association, other than its home office, agency office, data processing or administrative office, or a remote service unit (12 CFR 545.92(a)). Thus, in addition to a traditional brick and mortar branch, other types of domestic facilities that constitute a branch, including a drive-in facility or mobile branch, are covered.

A savings association must file a branch closing notice for a branch closing that occurs in the context of a merger, consolidation or other form of acquisition, whether or not such transaction is subject to expedited approval under the Bank Merger Act (12 U.S.C. 1828). The parties to such a transaction should determine which party will give the notice. Thus, for example, the purchaser may give the notice prior to consummation of the transaction where the purchaser intends to close a branch following consummation, or the seller may give the notice because it intends to close a branch at or prior to consummation. In the latter example, if the transaction were to close ahead of schedule, the purchaser, if authorized by the OTS, could operate the branch to complete compliance with the 90-day requirement without the need for an additional notice.

The law does not apply to a temporary interruption of service caused by an "Act of God" (*e.g.*, fire, earthquake) if the savings association plans to restore branching services at the site in a timely manner, as the association would not have closed the branch. The law does apply, however, if the association decided to close or not reopen the branch following the incident. Although prior notice would not be possible in such a case, the association should mail and, if practicable, post the required notices to customers and the OTS as soon as possible after the decision to close the branch has been made.

The law does not apply where a branch undergoes a change in name, location, or services but continues to meet the definition of branch and serve the same customers. Thus, the law does not apply to:

- Mergers, consolidations, or other acquisitions, including branch sales, that will not result in any branch closings;
- A change of services at a branch so long as the remaining facility constitutes a branch, such as where loan services are removed from a branch that will continue to offer deposit services;
- Branches that are closed at one location in connection with a branch relocation that qualifies as a "short-distance" relocation pursuant to 12 CFR 545.95(c), or closings or consolidations of existing branches that satisfy the short-distance criteria; and
- Branch offices temporarily operated in connection with government-assisted transactions that are closed prior to the expiration of a buyer's branch acquisition option period.

Notice of Branch Closing to the OTS

The law requires insured depository institutions to submit notice of any proposed branch closing to the appropriate Federal banking agency no later than 90 days prior to the date of the proposed branch closing. The law requires that the notice to the OTS include the following:

- Identification of the branch to be closed;
- the proposed date of closing;
- a detailed statement of the reasons for the decision to close the branch; and
- statistical or other information in support of such reasons consistent with the association's written policy for branch closings.

If an association believes certain information included in the required notice is confidential in nature, the association should prepare such information separately and request confidential treatment. The OTS will decide whether to treat such information confidentially under the Freedom of Information Act (5 U.S.C. 552).

Notice of Branch Closing to Customers

The law requires an insured depository institution that proposes to close a branch to provide notice of the proposed closing to the customers of the branch. A customer of a branch is a patron of a savings association who has been identified with a particular branch by such institution through use, in good faith, of a reasonable method for allocating customers to specific branches. An association that allocates customers to its branches based on where a customer opened his or her deposit or loan account will be presumed to have reasonably identified each customer of a branch. An association need not change its recordkeeping system in order to make a reasonable determination of who is a customer of a branch. If an association cannot reasonably identify the customers of a particular branch using its current recordkeeping system, it may satisfy the requirements of section 39 by notifying all of its deposit and loan customers.

Under section 39, an association that proposes to close a branch must include a customer notice at least 90 days in advance of the proposed closing in at least one of the regular account statements mailed to customers, or in a separate mailing. If the branch closing occurs after the proposed date of closing, no additional notice is required to be mailed to customers if the association acted in good faith in projecting the date for closing and in subsequently delaying the closing.

To satisfy the mailed customer notice requirements of the law, the mailed notice should include the location of the branch to be closed, the proposed date of closing, and either identify where customers may obtain service following the closing date or provide a telephone number for customers to call to determine such alternative sites.

Under the law, an association also must post notice to branch customers in a conspicuous manner on the branch premises at least 30 days prior to the proposed closing. This notice should state the proposed date of closing, and either identify where customers may obtain service following the closing date or provide a telephone number for customers to call to determine such alternative sites. An association may revise the notice to extend the projected date of closing without triggering a new 30-day notice period.

In some situations, an association, in its discretion and to expedite transactions, may mail and post notices to customers of proposed branch closings that are contingent upon an event. For example, in the case of a proposed merger or acquisition, an association may notify customers of its intent to close a branch upon approval by the appropriate Federal banking agency of the proposed merger or acquisition.

For purposes of examinations, an association must be able to demonstrate compliance with the law.

Policies for Branch closings

The law requires all insured depository institutions to adopt policies for branch closings. Each savings association with one or more branches must adopt such a policy. If an association currently has no branches, it must adopt a policy for branch closings before it establishes its first branch. The policy should be in writing and should meet the size and needs of the association.

Closing a branch may have adverse effects on the community and its residents, particularly low- and moderate-income neighborhoods. A branch closing may also affect local economic development and inconvenience businesses and residents, particularly those residents with limited mobility.

Each branch closing policy adopted pursuant to section 39 should include procedures for determining objectively which branch to close and which customers to notify, and methods for providing the notices required by the statute.

As association may also wish to consider including in its written policy factors such as:

- Profits generated by the association's branch system and the profitability of the targeted branch;
- Actions taken to make the targeted branch viable; for example, adjusting hours, changing services, upgrading facilities, and increasing automation;
- The presence in the neighborhood of other financial institutions, and their accessibility and services;
- Actions to advise the community of the planned branch closing; for example, advance meetings with key neighborhood and political leaders;
- Actions to minimize the impact of a branch closing on the neighborhood; for example, providing special services, check cashing, and night deposits, and providing additional services at other sites;
- A review and approval procedure to arrive at a closing decision, including the standards (*e.g.*, profit and loss, number of customers, amount of deposit or loan accounts) used to make the decision, and appropriate follow-up actions to be taken; and
- Any other considerations the association may wish to include.

Compliance

The OTS will examine for compliance with section 39 to determine whether an association has adopted a branch closing policy and whether the association provided the required notices when it closed a branch. If an association fails to comply with section 39, the OTS may make adverse findings in the CRA portion of an examination or take appropriate enforcement action, including the imposition of civil money penalties where statutory requirements are not satisfied.

During the CRA portion of an examination, the OTS assesses an association's record of helping to meet the credit needs of its community. Factors the OTS considers in making its assessment include the association's record of opening and closing offices and providing services at such offices. The reasons for closing a branch and the statistical or other information included in a branch closing notice submitted to the OTS will be reviewed under these assessment factors in the CRA portion of an examination.

Dated: August 13, 1992.

By the Office of Thrift Supervision.

Timothy Ryan,

Director.

BILLING CODE 6720-01-M

UNITED STATES INFORMATION AGENCY

Parliamentary Exchange Program With Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyzstan, Moldova, Russia, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan

AGENCY: United States Information Agency.

ACTION: Notice—request for proposals.

SUMMARY: The Office of Citizen Exchanges (E/P) announces a request for proposals from not-for-profit organizations to develop two-week exchange programs for parliamentarians from Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgystan, Moldova, Russia, Tadjikistan, Turkemenistan, Ukrainse and Uzbekistan. Delegations of up to ten members of the parliaments of these countries will participate in this program. Interested applicants are urged to read the complete **Federal Register** announcement before addressing

inquiries to the Office or submitting their proposals.

DATES: Deadline for Proposals: All copies must be received at the U.S. Information Agency by 5 p.m. Washington, DC time on Friday, November 20, 1992. Faxed documents will not be accepted, nor will documents postmarked November 20, 1992, but received at a later date. It is the responsibility of each grant applicant to ensure that proposals are received by the above deadline. Grants should begin after April 1, 1993.

ADDRESSES: The original and 14 copies of the completed application, including required forms, should be submitted by the deadline to: U.S. Information Agency, REF: Citizen Exchange: Parliamentary Exchange, Office of Grants Management (E/XE), Room 357, 301 4th Street SW., Washington, DC 20547.

FOR FURTHER INFORMATION CONTACT: Interested organizations/institutions should contact Molly Raymond, Coordinator for Russia/Eurasia Programs, Office of Citizen Exchanges (E/P), room 224, USIA, Washington, DC 20547 Telephone: (202) 619–5326, to request detailed application packets which include award criteria additional to this announcement, all necessary forms, and guidelines for preparing proposals, including specific budget preparation.

Overview

The program is designed to give delegations of parliamentarians of the countries of the former Soviet Union an in-depth exposure to the workings of the United States Congress and to the functioning of state and local governments in the United States. Half the time will be spent in Washington, DC, the other half in other sites around the United States.

Objectives of the Program

(1) To introduce parliamentarians to the U.S. legislative system, by providing them an opportunity to observe the day-to-day work of US Members of Congress in Washington, DC and in their home districts.

(2) To provide an opportunity for Members of Congress and visiting parliamentarians to establish professional and personal relationships.

(3) To demonstrate to visiting parliamentarians how American legislators interact with their constituents, with lobbyists, with the other branches of the government, and with their political party.

(4) To stress the role of government in protecting the rights of individual citizens.

(6) To address such concepts as conflict of interest and political accountability; and to examine American approaches to reaching compromise through bargaining, negotiation and other conflict resolution techniques.

Participants

Projects will be designed for one-country delegations of ten or fewer members of parliament. Parliamentary staff are not eligible for the program. Programs may be organized around a specific theme or may be designed for leadership groups who would use the visit to study the parliamentary process, legislative procedure and leadership issues on Capitol Hill. Program design may include dividing a delegation into subgroups to examine specific thematic issues during part of the US program.

Selection of Participants. US organizations are expected to nominate candidates for delegations, with the understanding that American Embassies retain the final say on the composition of the travelling group. Guidance will also be sought on selection from the joint leadership of Congress and the US Department of State.

Preference will be given to parliamentarians who have not visited the United States before.

English language is not required of participants. The Language Services Division of the Department of State will provide escort/interpreters as necessary.

Program Development Considerations

Institutions are encouraged to develop proposals for more than one delegation.

The US Information Agency will give favorable consideration to proposals that demonstrate two things: (1) In-depth, substantive knowledge of the issues of concern to the parliaments of these countries and first-hand connections with these institutions; and, (2) the capacity to organize and manage the exchange, both the pre-departure requirements in the former Soviet Union and all arrangements in the United States.

U.S. organizers should assume that many parliamentarians have little or no familiarity with American traditions and institutions. The first several days of a program should consist of an introductory overview of the American political process before participants begin substantive meetings with American political figures. Cultural and historical differences must be taken into account in all aspects of program design.

Programs must be balanced and non-partisan and representative of American political, geographic, and economic diversity. A program will generally consist of a week of Washington-based programming and a week of programming outside the capital. This second week offers an opportunity to visit district offices of Members of Congress and to study state legislative systems.

Institutions should present a detailed work plan for each project. work plans should provide a time line and describe the design phase (contact with parliaments and selection of participants, planning of orientation programs and itineraries, materials development, selection of American speakers) and implementation (day-to-day handling of logistics and management of the delegation once they are here).

Project Content

In designing projects, prospective grantee organizations may wish to consider the following ideas:

a. Briefings on the history of the American Constitutional system, the Federalist papers (available in Russian) and the issues that were addressed during the Articles of the Confederation and Constitutional development periods.

b. Separation of powers of the legislative, judicial and executive branches of the U.S. Government and the US system of checks and balances.

c. The relationship, roles and responsibilities of different levels of government (local, state and national) and their interaction with one another.

d. Examination of how the US Congress is organized and operates, with an emphasis on legislative procedure, and methods of drafting and moving legislation through the system.

e. Examination of the Committee and Subcommittee process and their various roles including oversight, legislative development, and budget.

f. Examination of various congressional support services including the Congressional Research Service, the Office of Technology Assessment and the Congressional Budget Office.

g. Briefings and site visits to study the American political party system, election processes, campaigns, opinion polling, campaign financing and fund raising, and the role of the media in the American political process.

h. Observing Members of Congress in their home districts to understand constituent relations and the role of citizen action groups and lobbies.

i. Study of U.S. State legislative systems, committees, legislative

development, civil and political service systems, and information systems.

Additionally, parliaments of Russia/Eurasia have indicated a general interest in the following issues:

(1) economic privatization and the development of market infrastructure and distribution systems, (2) economic development and entrepreneurship, (3) conversion of the military-industrial complex, (4) financial infrastructure development and banking, (5) environmental protection and legislation, (6) public and private provision of social services and health care, (7) agricultural development and food processing, (8) parliamentary oversight of intelligence and internal security organs, (9) the creation of new educational institutions, (10) implementation of legislation once passed. Additional specific subjects have been identified for certain countries of the former Soviet Union:

—Belarus: (1) privatization, (2) economic competition, (3) regulation of business in the context of free market economies, (4) environmental clean up and control, and (5) defense conversion.

—Ukraine: (1) Legislative procedure—an intensive program on how a bill becomes a law, from the initial drafting stage through modification and amendment, approval and passage, (2) the process of policy formulation and coordination between executive and legislative branch positions, (3) accountability in government: an examination of various oversight functions, such as supreme court nominee hearings and oversight of executive branch; likewise, the ways in which the Congress itself is held accountable by agencies of the executive branch; the role of the press (both traditional investigative journalism and C-span) in assisting the voting public in holding government accountable for its actions.

—Russia: (1) relationship of government legislative and regulatory functions to a free press; (2) relationship of legislative initiatives to the work of international financial institutions (World Bank, International Monetary Fund, etc.)

—Tadjikistan: (1) Drafting of anti-narcotics trafficking legislation and laws regarding domestic production/abuse and money laundering, (2) drafting of legislation protecting civil and human rights, (3) creation of an effective election law, to include election monitoring.

Funding

Competition for USIA funding is keen. The selection of grantee institutions will depend on program substance, cross-cultural sensitivity, the applicant's familiarity with the legislative process, both US and foreign, attention to protocol considerations, and ability to carry out the program successfully. Since USIA grant assistance constitutes only a portion of total project funding, proposals should list and provide evidence of other anticipated sources of financial and in-kind support.

A proposal's cost-effectiveness—including in-kind contributions and ability to keep administrative costs low—is a major consideration in the review process.

The Office of Citizen Exchanges will consider geographic distribution in selecting grantee institutions to ensure that the overall program reaches most if not all of the countries of Russia/Eurasia.

Although no set funding limit exists, proposals for less than $225,000 will receive preference. (The $225,000 range is for proposals with multiple projects.) Organizations with less than four years of successful experience in managing international exchange programs are limited to grants of $60,000. Grantee institutions should be aware that many delegations have protocol requirements, including photo-opportunities with Congressional leaders and receptions. USIA funding cannot cover the costs of receptions beyond the per diem expenditures for the foreign participants. Consequently, grantee institutions should make efforts to cost-share these events through other funding sources.

The following program and administrative items are eligible for consideration for funding:

1. International and domestic air fares; transit costs; ground transportation costs;

2. Per diem. Organizations should use the published federal per diem rates for individual American cities for foreign participants and accompanying staff.

3. Escort-Interpreters. Interpretation for delegations is provided by the State Department's Language Services Division. USIA grants do not pay for foreign interpreters to accompany delegations from their home country. Grant proposals budgets should contain a flat $140/day per diem for each State Department interpreter, as well as home-program-home air transportation of $400 per interpreter and any US travel expenses during the program itself. Salary expenses are covered centrally and are not part of a grantee's budget proposal.

4. Book and Cultural allowances. Participants and the escort interpreters are entitled to a one-time book allowance payment of approximately $200 and a cultural allowance of $150 per person. Accompanying staff do not get these benefits.

5. Consultants. Consultants may be used to provide specialized expertise or to make presentations. Daily honoraria generally do not exceed $250/day. Subcontracting organizations may also be used. The written agreement between the prospective grantee and subcontractor must be included in the proposal.

6. Materials development. Proposals may contain costs to purchase, develop and translate materials for participants.

7. Room rental, generally not to exceed $250/day.

8. One working meal per project. Per capita costs may not exceed $15–20 for a lunch and $20–30 for a dinner. Number of invited guests may not exceed number of participants by more than a factor of two. This includes room rental if applicable.

9. Administrative costs. USIA-funded administrative costs are limited to twenty-two (22%) percent of the total funds requested from USIA. Administrative costs are defined as salaries, benefits, other direct and indirect costs incurred in the United States. Overseas administrative costs—such as compensation of an employee in an overseas office—are not counted in this 22% limit. Important note for universities: The U.S. Information Agency's Bureau of Educational and Cultural Affairs defines American faculty salaries as an administrative expenses, regardless of how the faculty time is to used.

Application Requirements

Proposals must be structured in the following way:

1. An executive summary, not to exceed one page single-spaced, describing the goals of the program, the institutions and major personalities involved, an outline of what will take place, and the timing of the program.

2. A narrative section (20 double-spaced pages or less) showing the intellectual rationale of the program, how the program will accomplish its goals and how it relates to USIA's mission to increase mutual understanding between the people of the United States and of other societies. This section should include a concise description of the project's work plan, spelling out program schedules, thematic agenda, and proposed itineraries. Participant selection should be discussed in detail. This section should conclude with a discussion of any follow-up activities planned; how the

organization intends to evaluate the project; and what groups, beyond the direct participants, will benefit from the project.

3. A detailed three-column budget. See application package.

4. Resumes (not to exceed two pages each) for key personnel.

5. Confirmation letters from American and foreign co-sponsors noting their intention to participate in the program will enhance an institution's submission.

6. USIA compliance forms, furnished with the application package, bust be submitted with the proposal.

Review Process

USIA will acknowledge receipt of all proposals and will review them for technical eligibility. Proposals will be deemed ineligible if they do not fully adhere to the guidelines established herein and in the application packet. Eligible proposals will be forwarded to panels of USIA officers for advisory review. Proposals are reviewed by USIS posts and by USIA's Office of European Affairs and the contracts office. Proposals may also be reviewed by the Agency's Office of the General Counsel.

Funding decisions are at the discretion of the Associate Director for Educational and Cultural Affairs. Final technical authority for grant awards resides with USIA's contracting officer. The award of any grant is subject to the availability of funds.

The Government reserves the right to reject any or all applications received. USIA will not pay for design and development costs associated with submitting a proposal. Applications are submitted at the risk of the applicant; should circumstances prevent award of a grant, all preparation and submission costs are at the applicant's expense.

USIA will not award funds for activities conducted prior to the actual grant award.

Review Criteria

USIA will consider proposals based on the following criteria:

1. *Quality of Program Idea:* Proposals should exhibit originality, substance, rigor, and relevance to Agency mission. They should demonstrate the matching of U.S. resources to a clearly defined need.

2. *Institution Reputation/Ability Evaluations:* Institutional grant recipients should demonstrate potential for program excellence and/or track record of successful programs, including responsible fiscal management and full compliance with all reporting requirements for past Agency grants as determined by USIA's Office of Contracts (M/KG). Relevant evaluation results of previous projects are part of this assessment.

3. *Project Personnel:* Personnel's thematic and logistical expertise should be relevant to the proposed program. Resumes should be relevant to the specific proposal and no longer than two pages each.

4. *Program Planning:* Detailed agenda and relevant work plan should demonstrate substance and logistical capacity.

5. *Thematic Expertise:* Proposal should demonstrate expertise in the subject area.

6. *Cross-Cultural Sensitivity/Area Expertise:* Evidence of sensitivity to historical, linguistic, and other cross-cultural factors; relevant knowledge of geographic area.

7. *Ability to Achieve Program Objectives:* Objectives should be reasonable, feasible, and flexible. Proposal should clearly demonstrate how the grantee institution will meet the program's objectives.

8. *Multiplier Effect:* Proposed programs should strengthen long-term mutual understanding, to include maximum sharing of information and establishment of long-term institutional and individual ties.

9. *Cost-Effectiveness:* The overhead and administrative components should be kept as low as possible. All other items should be necessary and appropriate to achieve the program's objectives.

10. *Cost-Sharing:* Proposal should maximize cost-sharing through other private sector support as well as institution direct funding contributions.

11. *Follow-on Activities:* Proposals should provide a plan for continued exchange activity (without USIA support) which ensures that USIA supported programs are not isolated events.

12. *Project Evaluation:* Proposals should include a plan to evaluate the activity's success.

Notice

The terms and conditions published in this RFP are binding and may not be modified by an USIA representative. Explanatory information provided by the Agency that contradicts published language will not be binding. Issuance of the RFP does not constitute an award commitment on the part of the Government. Final award cannot be made until funds have been fully appropriated by Congress, allocated and committed through internal USIA procedures.

Notification

All applicants will be notified of the results of the review process on or about February 1, 1993. Awarded grants will be subject to periodic reporting and evaluation requirements.

Dated: September 17, 1992.

James Hogan,

Acting Associate Director, Bureau of Educational and Cultural Affairs.

BILLING CODE 8230-01-M

OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

Determination Regarding Application of the Agreement on Government Procurement and Waiver of Discriminatory Purchasing Requirements

AGENCY: Office of the United States Trade Representative.

ACTION: Determination of application of the agreement on Government procurement and waiver of discriminatory purchasing requirements.

In conformity with the provisions of Sections 301 and 302 of the Trade Agreements Act of 1979, as amended ("the ACT"), and pursuant to Executive Order 12260, as amended, I hereby determine that Spain, Greece, and Liechtenstein have become Parties to the Agreement on Government Procurement (the "Agreement"), and will provide appropriate reciprocal competitive government procurement opportunities to United States products and suppliers of such products.

Spain and Greece have fully implemented obligations of the Agreement through submission of satisfactory entity lists to the Agreement Committee in Geneva and through their adoption of relevant European Community procurement directives. Liechtenstein had already assumed obligations of the Agreement because it is part of the customs territory of Switzerland, which is already a Party to the Agreement, and Switzerland recently amended its entity list to the Agreement to include the Government of the Principality of Liechtenstein.

In accordance with section 301(b)(1) of the Act, I designate Spain, Greece, and Liechtenstein for purposes of section 301(a) of the Act. With respect to eligible products (as defined in section 308(4) of the Act) of Spain, Greece and Liechtenstein, and suppliers of such products, the application of any law, regulation, procedure, or practice

regarding government procurement that would, if applied to such products and suppliers, result in treatment less favorable than that accorded:

(A) To United States products and suppliers of such products; or

(B) To eligible products of another foreign country or instrumentality which is a Party to the Agreement and suppliers of such products, shall be waived.

This waiver shall be applied by all Executive agencies listed in the Annex to Executive Order 12260, as amended, in consultation with, and, when deemed necessary, at the direction of, the Trade Representative.

I have informed the relevant U.S. procurement authorities of this decision and requested that they make the necessary changes to U.S. procurement regulations as expeditiously as possible in order to implement this decision. This decision shall become effective on the date of amendment of the applicable regulations.

The designations and waiver noted above are subject to modification or withdrawal by the Trade Representative.

Carla A. Hills,

United States Trade Representative.

BILLING CODE 3190-01-M

Sunshine Act Meetings

Federal Register
Vol. 57, No. 186
Thursday, September 24, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

FEDERAL ELECTION COMMISSION

DATE AND TIME: Tuesday, September 29, 1992, 10:00 a.m.

PLACE: 999 E Street, N.W., Washington, D.C.

STATUS: This Meeting Will Be Closed to the Public.

ITEMS TO BE DISCUSSED:

Compliance matters pursuant to 2 U.S.C. § 437g.
Audits conducted pursuant to 2 U.S.C. § 437g, § 438(b), and Title 26, U.S.C.
Matters concerning participation in civil actions or proceedings or arbitration
Internal personnel rules and procedures or matters affecting a particular employee

"FEDERAL REGISTER" NUMBER: 92-22001.

PREVIOUSLY ANNOUNCED DATE AND TIME: Wednesday, September 30, 1992, 10:00 a.m., Meeting Open to the Public.

The Jackson for President '88 Committee—Oral Presentation is being postponed.

DATE AND TIME: Thursday, October 1, 1992, 10:00 a.m.

PLACE: 999 E Street, N.W., Washington, D.C. (Ninth Floor.)

STATUS: This Meeting Will Be Open to the Public.

ITEMS TO BE DISCUSSED:

Correction and Approval of Minutes
Title 26 Certification Matters
Advisory Opinion 1992-33: Carol Darr of the Democratic National Committee and Benjamin Ginsberg of the Republican National Committee
Draft Notice of Proposed Rulemaking on Definition of a "Member" of a Membership Association
Administrative Matters

PERSON TO CONTACT FOR INFORMATION: Mr. Fred Eiland, Press Officer, Telephone: (202) 219-4155.

Delores Harris-Hardy,
Administrative Assistant.

BILLING CODE 6715-01-M

NATIONAL CREDIT UNION ADMINISTRATION

Notice of Meeting

TIME AND DATE: 11:00 a.m., Wednesday, September 30, 1992.

PLACE: Filene Board Room, 7th Floor, 1776 G Street, NW., Washington, DC 20456.

STATUS: Closed.

MATTER TO BE CONSIDERED:

1. Administrative Action under Section 206 of the Federal Credit Union Act. Closed pursuant to exemptions (8), (9)(A)(ii), and (9)(B).

FOR FURTHER INFORMATION CONTACT: Becky Baker, Secretary of the Board, Telephone (202) 682-9600.

Becky Baker,
Secretary of the Board.

Part II

Department of Defense

Department of the Army

32 CFR Part 619

Program for Qualifying DOD Freight Motor Carriers, Exempt Surface Freight Forwarders, and Shipper Agents; Final Rule

DEPARTMENT OF DEFENSE

Department of the Army

32 CFR Part 619

Program for Qualifying DOD Freight Motor Carriers, Exempt Surface Freight Forwarders, and Shipper Agents

AGENCY: Military Traffic Management Command (MTMC), DOD.

ACTION: Final rule.

SUMMARY: This rule establishes changes to 32 CFR part 619 and is necessary to protect the interest of DoD while reducing the financial burden for small established carriers to do business with DoD. Bond requirement will be based on a sliding scale. The submission of financial statements is discontinued. This rule allows for MTMC to approve insurance underwriters on a case-by-case basis and acceptance of self-insurance; adds qualification standards for Surface Freight Forwarders, and shipper agents; adds additional requirements and standards for carriers wishing to handle shipments of hazardous or secret materials, sensitive weapons and munitions; and shipments which require a Transportation Protective Service (TPS); modifies the cargo insurance requirements for carriers of perishable substance and bulk fuel; and establishes a basic agreement between MTMC and motor carriers who handle shipments requiring a TPS, shipments of hazardous materials (other than Classes A and B explosives), and handle shipments of classes A and B explosives.

EFFECTIVE DATE: September 24, 1992.

FOR FURTHER INFORMATION CONTACT:

Ms. Rose Sharpe, Mr. Rick Wirtz, or Ms. Robbie Randolph, at (703) 756–1356; Headquarters, Military Traffic Management Command, ATTN: MTIN, 5611 Columbia Pike, Fall Church, VA 22041–5050.

SUPPLEMENTARY INFORMATION: Basic information on the Carrier Qualification Program was previously published in the **Federal Register**, 53 FR 17970, 54 FR 27687, 55 FR 7361, 55 FR 52976, 56 FR 45895 and 57 FR 11376.

1. Performance Bond. The performance bond is established to protect the interest of the DOD. It provides a source of funds that can be used to pay for reprocurement costs associated with those instances where a carrier frustrates or abandons DOD freight. The amount of the bond a carrier needs to obtain is dependent on the risk associated to the DOD. However, the bond amount will never exceed $100,000. Two different systems are used for risk evaluation. Which system is used will be determined when carrier is asked to qualify for the bond.

a. All carriers. (1) Carriers having done business in their own name with DOD for 3 years or more will be required to submit a performance bond in the amount of 2.5% of their total DOD revenue, taken from the freight Information Systems Report (FINS), for the previous 12 months, not to exceed $100,000 and not less than $25,000.

(2) New carriers and those carriers having done business in their own name with the DOD for less than 3 years will be required to submit a performance bond based on their proposed area of service. Areas of service will be computed as both origins and destinations served, that is, 1 state (including intrastate)—$25,000, to 2 to 3 states—$50,000, and 4 or more states—$100,000.

(3) Once a carrier has been doing business with the DOD for 3 years, their bond requirement will change form area of service to percent of revenue.

The rationale for this risk evaluation is to protect the interest of DOD while reducing the financial burden for small established carriers to do business with DOD.

b. Local drayage and commercial zone carriers are exempt from the bond requirement.

c. Surface Freight Forwarders and Shipper Agents. Due to the volume of traffic handled by these two modes and the area normally serviced the bond amount is set at $100,000.

2. Insurance. Insurance underwriters must be rated in the Best's Insurance Guide, or listed in the Fiscal Service Treasury Department Circular 570, Listing of Surety Companies. Additionally, MTMC will accept self-insured for those carriers who were self-insurance with the Interstate Commerce Commission (ICC) as of January 1, 1991. Self-insurance will be accepted only upon receipt of a Service Order from the ICC granting the self insurance.

3. Requirements and standards are already in place for carriers who wish to handle hazardous or secret materials, and sensitive weapons and munitions; therefore, they were originally exempted from the initial program. However, in order to streamline and standardize procedures, these carriers will now be brought under the basic Carrier Qualification Program, to include additional requirements for consideration to participate in freight shipments which have higher requirements than those for general commodities.

The following amendments and/or additions to appropriate sections of title 32, part 619 establish the applicable unique requirements for all motor programs. Any sections not changed apply to all persons, carriers or companies wishing to participate in the movement of DOD freight.

The Directorate of Personal Property maintains its own separate and unique requirement for carriers wishing to participate in household shipments; therefore, this program is excluded from the freight carrier Qualification Program, further, a carrier who is qualified under one program will not automatically qualify to participate in both programs. Additionally, the requirements of one program may not be used to qualify for another program, e.g., any criteria used to qualify under the freight program cannot be used to qualify under the Personal Property Program.

A carrier who wants to participate in more than one freight program i.e., motor carrier, shipper agent, exempt surface freight forwarder, will be required to meet criteria established for that program. For example, a company who offers service as a motor common carrier and also wants to participate as an exempt surface freight forwarder, will be required to meet criteria established for that program. For example, a company who offers service as a motor common carrier and also wants to participate as an exempt surface freight forwarder will have to meet both programs requirements and execute all applicable agreements. There is one exemption to this policy. Motor carriers wishing to handle various types of commodities which require qualification, i.e., general commodities, hazardous materials, and class A and B explosives need only qualify once. However, they will be required to meet the requirements of the most stringent programs. They will also be required to execute agreements for each program.

Criteria for handling shipments which require a Transportation Protective Service (TPS) and hazardous materials: Carriers must have one year of general experience which demonstrates satisfactory service in the movement of freight shipments. Carrier must submit to MTMC for review, a copy of its security and/or safety procedures and/or guidance which it provides to employees handling a TPS or hazardous shipment. Carriers may also be subject to covert surveillances by a government employee or government contractor employee. Carrier may be required to submit to a corporate and/or terminal inspection.

Executive Order 12291

This rule has been reviewed under Executive Order 12291. This action is classified as nonmajor. The effect of the rule on the economy will be less than $100 million.

Regulatory Flexibility Act

This rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. 601–612). This action does not have a significant impact on a substantial number of small entities. The objective of the program is to ensure that DOD obtains safe, dependable, and reliable transportation services. The requirements are not designed to preclude participation by small businesses. Rather, they are part of a mechanism designed to ensure that traffic offered to small businesses does not exceed their capabilities. The program's reporting and record keeping requirements are essentially administrative in nature and do not demand significant expenditures of resources such as personnel, computer equipment, or software. No professional or technical training is necessary to comply with these requirements. Alternatives to facilitate entry of small businesses have been identified and implemented.

Paperwork Reduction Act

This rule has been approved by the Office of Management and Budget as required under the requirements of the Paperwork Reduction Act of 1980 (4 U.S.C. 3507).

List of Subjects in 32 CFR Part 619

Shipping, Motor vehicle, Safety, Trucks, Common carriers, Freight.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

PART 32—[AMENDED]

Accordingly, title 32 of the Code of Federal Regulations is amended by the following changes:

1. The authority citation for part 619 continues to read as follows:

Authority: 49 U.S.C. 1801–1813, 2503, 2505, 2505 and 2509.

2. In § 619.1, revise the first sentence to read as follows:

§ 619.1 Introduction.

Carriers, surface freight forwarders, and shipper agents interested in qualifying or remaining qualified will submit data described in §§ 619.2 through 619.6 to the appropriate area command (Bayonne, NJ or Oakland, CA) based on the location of the carrier's headquarters. * * *

3. Add paragraph (c) to § 619.2 to read as follows:

§ 619.2 Safety ratings.

* * * * *

(c) Carriers transporting hazardous, secret materials or sensitive weapons and munitions, or any shipment, regardless of commodity, which requires a Transportation Protective Service (TPS) will not be used if the safety rating is less than satisfactory.

4. Section 619.4 is revised to read as follows:

§ 619.4 Insurance-public liability and cargo.

(a) *Public Liability.* Motor carriers, surface freight forwarders, and shipper agents will submit proof of public liability shown on the certificate. The insurance underwriters must be rated in the Best's Insurance Guide, or listed in the Fiscal Service Treasury Department Circular 570, Listing of Surety Companies. MTMC will grant exceptions to carriers with non-rated insurance underwriters on a case-by-case basis but only if insurance is acceptable to the Interstate Commerce Commission. The certificate holder will be notified, in writing, 30 days in advance of any change or cancellation.

(1) The public liability requirements for motor carriers are specified by 49 CFR 387.9.

(2) Surface freight forwarders and shipper agents will submit proof of $1 million public liability (death and bodily injury, property damage, and environmental restoration).

(b) *Cargo.* Motor common carriers, surface freight forwarders, and shipper agents will be required to have their insurance company provide proof of cargo insurance to MTMC on a certificate of insurance form. The deductible portion will be shown on the certificate. The insurance underwriter must have a policyholder's rating in the Best's Insurance Guide, listed in the Fiscal Service Treasury Department Circular 570, Listing of Surety Companies or specifically approved by HQMTMC. DOD's minimum cargo insurance requirements are listed below.

(1) Motor common carriers, including classes A and B explosives, but excluding perishables and bulk fuel—$150,000 per shipment.

(2) Automobile transporters or carriers which move vehicles in haul-away/drive-away service—$20,000 per vehicle transported.

(3) Perishable carriers—$80,000 per shipment.

(4) Bulk fuel—$25,000 per shipment.

(5) Surface freight forwarders and shipper agents—$250,000 per shipment.

5. Section 619.5 is amended by adding paragraph (a)(4) to read as follows:

§ 619.5 Financial Records.

(a) * * *

(4) Financial statements must reflect a 1 to 1 ratio (liquid assets—current liabilities).

* * * * *

6. In § 619.6, the introductory text is revised and paragraph (k) is added to read as follows:

§ 619.6 Information.

Motor carriers, surface freight forwarders and shipper agents will provide HQMTMC the following information.

* * * * *

(k) In addition to information contained in paragraphs (a) through (h) and (j) of this part, exempt surface freight forwarders and shipper agents must furnish a listing of carriers which they have a contract with and intend to use in the movement of government shipments. Information must include the complete company names, company officials to include their position and title, home office addresses, telephone numbers, 24 hour emergency point of contact for shipment status, and ICC operating authority number of each carrier.

7. Section 619.7 is revised to read as follows:

§ 619.7 Performance Bond.

(a) Motor carriers. (1) Carriers having done business in their own name with DOD for 3 years or more will be required to submit a Performance Bond in the amount of 2.5% of their total DOD revenue, taken from the Freight Information System Report (FINS), for the previous 12 months, not to exceed $100,000 and not less than $25,000.

(2) New carriers and those carriers having done business in their own name with the DOD for less than 3 years will be required to submit a Performance Bond based on areas of service they offer (computed as both origins and destinations served), that is, 1 state (including intrastate)—$25,000, 2 to 3 states—$50,000, and 4 or more states—$100,000.

(3) Once a carrier has been doing business with the DOD for 3 years, their bond requirement will change from area of service to percent revenue.

(b) Bulk fuel carriers and perishable carriers will be required to submit a $25,000 Performance Bond.

(c) Local drayage and commercial zone carriers are exempt from the bond requirement.

(d) Surface Freight Forwarders and Shipper Agents. Due to the volume of traffic handled by these two modes and the area normally serviced the bond amount is set at $100,000.

(e) All carriers must submit a letter of intent to file a bond from a surety company with initial application. Upon HQMTMC approval, carriers will provide HQMTMC with a Performance Bond. The bond must be issued by a surety company listed in the Fiscal Service Treasury Department Circular No. 570. The sum of the bond shall be as determined by § 619.7 (a) through (c). Bond must be continuous until cancelled. HQMTMC will be notified, in writing, 30 days in advance of any change or cancellation. The Performance Bond secures performance and fulfillment of carrier obligations to deliver DOD freight. It will cover any instance where a carrier cannot or will not deliver DOD freight tendered to them to final destination. This includes default, abandoned shipments, and bankruptcy by the carrier. The bond will not be utilized for operational problems such as late pick-up or delivery, excessive transmit time, refusals, no shows, improper/inadequate equipment or claims for lost or damaged cargo.

8. Section 619.8 is revised to read as follows:

§ 619.8 Basic Agreement.

Motor carriers, surface freight forwarders and shipper agents meeting the qualification requirements of § 619.1 through § 619.7 will be required to sign the appropriate Basic Agreement in the appendices to this part.

9. Appendix to part 619 is designated as appendix A and revised to read as follows:

Appendix A to Part 619—Basic Agreement Between the Military Traffic Management Command and Motor Common Carriers for Approval to Transport General Commodities for the Department of Defense

1. The undersigned, who is duly authorized and empowered to act on behalf of _____ (Name of Company, Typed or Legibly Printed), hereinafter called the carrier, as a prerequisite for approval to transport general commodities for the account of the Department of Defense (DOD) and the Military Traffic Management Command (MTMC), (hereinafter called the Government), agree to comply with all additional requirements, terms and conditions as set forth in this Agreement. This Agreement governs the transportation of all DOD general commodity freight administered by the Directorate of Inland Traffic, MTMC (except used household goods). Noncompliance by the carrier with any provision of this Agreement may result in MTMC taking action against the carrier under the Carrier Performance Program, governed by MTMC Regulation 15–1, and revoking approval to participate in this traffic. If the carrier's approval is revoked, the carrier may be disqualified from further participation in any DOD freight traffic.

2. Approval and Revocation.

a. Carrier understands that its initial approval and retention of approval are contingent upon establishing and maintaining, to MTMC's satisfaction, sufficient resources to support its proposed scope of operations and services. Sufficient resources include equipment, personnel, facilities, and finances to handle traffic anticipated by DOD/MTMC under the carrier's proposed scope of operations in accordance with the service requirements of the shipper.

b. The carrier understands that MTMC may revoke approval at any time upon discovery of grounds for ineligibility or disqualification. The carrier further understands that it is not authorized to submit tenders for shipments requiring a Transportation Protective Service (TPS) until it has served DOD in an approved status for 12 continuous months. Prior to being allowed to handle shipments which require a TPS or classes A & B explosives, the carrier must first meet any additional requirements in effect at the time.

c. In addition to the initial evaluation, the carrier agrees that it will cooperate with MTMC follow-up evaluations at any time subsequent to signing this Agreement to confirm continued eligibility.

d. The carrier certifies that neither the owners, company, corporate officials, nor any affiliation or subsidiary thereof are currently debarred or suspended, disqualified by a MTMC General Freight Board, or placed in non-use by MTMC from doing business with DOD.

3. Lawful Performance.

a. Carrier agrees to comply with all applicable Federal, State, municipal, and other local laws and regulations governing the safe, proper, and lawful operation of motor vehicles, to include title 49 Code of Federal Regulations (CFR) parts 386–397. Intrastate carriers are required to comply with all applicable state or federal regulations, whichever are more stringent.

b. No fines, charges, or assessments for overload vehicles or other violations of applicable laws and regulations will be passed to or be paid by any agency of the Federal Government.

4. Operating Authority. Carrier agrees to maintain valid motor common carrier operating certificates for its scope of operations. Any carrier found to be involved in brokerage, as defined by the Interstate Commerce Commission (ICC), of DOD freight traffic will have its approval revoked.

5. Insurance.

a. Minimum public liability insurance requirements are prescribed in Title 49 of the Code of Federal Regulations (CFR) § 387.9. Carrier agrees to ensure that the ICC is provided proof of their public liability insurance, in the form of a BMC 91 or 91–X, or MCS 90, in accordance with Sections 29 and 30 of the Motor Carrier Act of 1980. Further, the motor carrier agrees to provide MTMC with a certificate of insurance form. The certificate holder block of the form will indicate that MTMC, 5611 Columbia Pike, Falls Church, Virginia 22041–5050, ATTN: MTIN–FF, will be notified in writing, 30 days in advance of any change or cancellation. The deductible portion will be shown on the certificate. The insurance underwriter must have a policyholder's rating in the Best's Insurance Guide, listed in the Fiscal Service Treasury Department Circular 570, Listing of Surety Companies.

b. The carrier agrees to also file with MTMC proof of:

(1) Public liability insurance Intrastate Carriers—$750,000 per vehicle for property (excluding hazardous) and $1,000,000 per vehicle for oil, hazardous wastes, hazardous materials and hazardous substances defined in 49 Code of Federal Regulations (CFR) § 171.8 and listed in 49 CFR 172.101.

(2) Public liability insurance Interstate Carriers—Public Liability Insurance shall be that as required by the state, except that for deregulated states, public liability shall be the same as that required of interstate carriers.

(3) Cargo insurance. Cargo insurance in the minimum of $150,000 for loss and damage of government freight per vehicle and/or $20,000 per vehicle transported (e.g., automobile transporters or vehicles in haulaway service) must be maintained. Perishable carriers will maintain, as a minimum, cargo insurance in the amount of $80,000 and bulk petroleum carriers will maintain $25,000.

c. The insurance, carried in the name of the carrier, will be in force at all times while this Agreement is in effect or until such time as the carrier cancels all tenders. The carrier agrees to ensure that the policies include a provision requiring the insurer to notify MTMC prior to any performance of service for the carrier. Changes, renewals, and cancellation notices must also be sent to MTMC, 5611 Columbia Pike, Falls Church, Virginia 22041–5050, ATTN: MTIN–FF. This requirement applies to both interstate and intrastate carriers. Carrier's insurance policy(s) must cover all equipment used to transport DOD freight.

6. Performance Bond.

a. Carrier agrees to provide MTMC with a Performance Bond. The bond secures performance and fulfillment of the carrier obligation to deliver DOD freight to destination. It will cover DOD re-procurement costs as a result of carrier default, abandoned shipments, or bankruptcy. The bond will not be utilized for operational problems such as late pick up or delivery, excessive transit time, refusals, no shows, improper/inadequate equipment or claims for lost or damaged cargo. The bond must be issued by a surety company listed in the Fiscal Service Treasury Department Circular No. 570. The bond must be completed on the form provided by MTMC. The bond will be continuous until cancelled. MTMC will be notified in writing, 30 days in advance of any change or cancellation. A letter of intent by the surety company is required with the initial application package. Upon MTMC approval, the carrier agrees to

submit the Performance Bond before the Tender of Service will be accepted.

b. The sum of the bond will be determined as follows.

(1) Carriers having done business in their own name with DOD for 3 years or more will be required to submit a Performance Bond in the amount of 2.5% of their total DOD revenue, taken from the Freight Information Systems Report (FINS), for the previous 12 months, not to exceed $100,000 and not less than $25,000.

(2) New carriers and those carriers having done business in their own name with the DOD for less than 3 years will be required to submit a Performance Bond based on areas of service they offer. Areas of service will be computed as both origins and destinations served.

1 state (including intrastate)—$25,000;
2 to 3 states—$50,000; and
4 or more states—$100,000.

(3) Once a carrier has been doing business with the DOD for 3 years, their bond requirement will change from area of service to percent revenue.

c. Bulk fuel carriers and Perishable carriers will be required to submit a $25,000 Performance Bond.

d. Local drayage and commercial zone carriers are exempt from the bond requirement.

e. If carrier has secured the Performance Bond as a result of qualifying under Ammunition and Explosive, Classes A and B program or hazardous materials (other than ammunition and explosives, classes A and B) program no additional Performance Bond is required.

7. Safety.

a. Carrier will not have an "unsatisfactory" safety rating with the Federal Highway Administration, Department of Transportation, and, if it is an intrastate motor carrier, with the appropriate state agency. The carrier further agrees to permit unannounced safety inspections of its facilities, terminals, equipment, employees, and procedures by DOD civilian, military personnel, or DOD contract employees. The inspection may include in-transit surveillance of vehicles and drivers. The carrier agrees to provide evidence that fulfills the requirement set forth in 49 Code of Federal Regulation parts 390 thru 396. Inspection of carrier equipment, drivers' records, route plans and inspection reports will be permitted during both the pickup and delivery of shipments and in coordination with local police or other authorities while in transit. Carrier also agrees to allow inspection of carrier records and individual driver qualification files. When requested, carrier agrees to provide adequate evidence of an active driver safety, security training and evaluation program. Upon request, the carrier agrees to furnish sufficient information to permit MTMC to verify or inspect carrier and driver records.

b. The carrier agrees to have in place a company-wide safety management program. Carrier safety program will comply with applicable Federal, State and local statutes or requirements. Safety programs at the company-wide or terminal level may be subject to evaluation by DOD representatives.

c. The carrier agrees to notify, within 24 hours, the consignor and consignee named by the Government Bill of Lading (GBL) or Commercial Bill of Lading (CBL) of cargo loss, damage, or unusual delay. Information reported will include origin/destination, GBL/CBL number, shipping paper information, time and place of occurrence, and other pertinent accident details. When requested, carrier agrees to furnish MTMC a copy of accident reports submitted to the Department of Transportation on Form MCS 50–T (Property).

8. Drivers Requirement.

a. The carrier agrees to ensure that any driver used by the carrier to transport DOD freight possesses a valid commercial driver's license (in compliance with Federal Commercial Motor Vehicle Safety Act of 1986) issued by his or her state of domicile. Drivers must have, at a minimum, 1 year of driving experience driving equipment similar to that used to transport DOD freight, or have proof of graduation from an accredited trade truck motor driving school, operating the aforementioned equipment.

b. The carrier agrees to further ensure that drivers carry a company picture identification card to verify affiliation with the carrier named on the Government Bill of Lading.

9. Equipment. The carrier is prohibited from using trip-leased equipment or drivers, except upon prior approval from MTMC. Leases of less than 30 days are considered trip-leases. In order to trip-lease, a carrier must apply for approval under MTMC's trip-lease program.

10. Shipment. The carrier agrees to provide, at no additional cost to the government, the status of any shipment within 24 hours after an inquiry is made. Further, the carrier agrees to not divulge any information to unauthorized persons concerning the nature and movement of any DOD shipment.

11. Documentation.

a. The carrier agrees to accept GBLs and CBLs on which freight charges will be paid by the Government, and be bound by all terms stated on the SF1103, Government Bill of Lading, regardless of the type of bill of lading tendered.

b. The carrier agrees to comply with the documentation prelodge procedures in effect at Military Ocean Terminals or the installation, when cargo is consigned for further movement overseas. (Prelodging is the submission of advance shipment documents which identifies the shipment to the Military Ocean Terminal prior to delivery of the cargo at the terminal.) Instructions will be provided by the consignor to furnish certain data at least 24 hours in advance of cargo delivery to the terminal.

12. Loss or Damage. The carrier agrees to be liable for loss or damage to cargo in accordance with the provisions of 49 U.S.C. 11707 (the Carmack Amendment to the Interstate Commerce Act). Carrier agrees to promptly settle uncontested claims for loss or damage.

13. Standard Tender of Service.

a. The carrier agrees to comply with the preparation and filing instructions in applicable freight traffic rules publications issued by MTMC. Carrier understands that MTMC will reject tenders not in compliance with these instructions.

b. Carrier agrees to provide a street address where the company office is located in lieu of a post office box number. Carrier agrees to provide the address prior to or in conjunction with submission of any tenders or other rate schedules. The carrier agrees to also advise MTMC of any change in address prior to the effective date of the change. Failure to do so is grounds to discontinue use of the carriers.

c. Carrier understands that tenders inadvertently accepted and distributed for use and not in compliance with this agreement, the provisions contained in the Standard Tender of Freight Services (MT Form 364–R), or the applicable MTMC Freight Traffic Rules Publication, and supplements thereof, will be subject to immediate removal or non-use until corrections are made. The issuing carrier will be advised when tenders are removed under these circumstances.

14. Rates.

a. Carrier agrees to transport Government shipments at the lowest tender rate specifically applicable to the department or agency involved.

b. Carrier agrees to publish guaranteed through rates for at least 30 days. These rates must be filed with MTMC, HQ, Eastern Area, ATTN: MTE–IN, Bayonne, New Jersey 07002–5302. The carrier must publish all rates, charges, and accessorial services on a MTMC approved form, and must comply with the tender preparation instructions. (Only services annotated with a charge in the tender will be paid by the shipper.)

15. Carrier Performance. Carrier agrees that carrier's equipment, performance, and standards of service will conform with its obligations under Federal, State and local law and regulation as well as with the guidelines found in the Defense Traffic Management Regulation (DTMR) and this Agreement. The carrier fully understands its obligation to remain current in its knowledge of service standards. The carrier accepts the Government's right to revoke approval, declare ineligible, non-use, or disqualify the carrier for unsatisfactory service for any operating deficiency, noncompliance with terms of this Agreement or terms of any negotiated agreements, tariffs, tenders, bills of lading or similar arrangements determining the relationship of the parties, or for the publication or assessment of unreasonable rates, charges, rules, descriptions, classifications, practices, or other unreasonable provisions of tariffs/tenders. Rules governing the Carrier Performance Program are found in MTMC Regulation 15–1, and Army Regulation 55–355, DTMR. If a carrier is removed or disqualified for 6 months or more, it will have to be re-qualified.

16. General Provisions. The carrier agrees to possess a valid Standard Carrier Alpha Code (SCAC). When a company holding the appropriate authority has operating divisions each with its own unique SCAC, each such division is required to execute a separate agreement with MTMC governing the transportation of protected commodities.

17. Terms of the Agreement.

a. The terms of this Agreement will be applicable to each shipment.

b. This agreement shall be effective from the date of approval by MTMC, until terminated. Termination is effective upon receipt of written notice by either party.

c. Nothing in this Agreement will be construed as a guarantee by the Government of any particular volume of traffic.

d. The carrier agrees to immediately notify MTMC of any changes in ownership, in affiliations, executive officers, and/or board members, and carrier name. Carrier understands that failure to notify MTMC shall be grounds for immediate revocation of the carrier's approval and their participation in the movement of DOD freight.

18. Additional Specialized Requirements. The terms of this Agreement will not prevent different or additional requirements with respect to negotiated agreements or added requirements for other types of service and/or commodities.

19. Inquiries. Inquiries may be referred to: Commander, Military Traffic Management Command, ATTN: MTIN–FF, 5611 Columbia Pike, Falls Church, Virginia 22041–5050.

20. Carrier Acknowledgment and Acceptance. The certifying carrier official agrees to ensure that the appropriate company officials and employees are familiar with the requirements, terms and conditions of this Agreement and are in full compliance with the applicable provisions herein. Any information found to be falsely represented in the Motor Carrier Qualification Form, the attachments or during the qualification procedures, to include additional requirements of this Agreement, shall be grounds for automatic revocation of this Agreement and immediate non-use of the carrier, the affiliated companies, division and entities.

I, _____
(Typed Name and Title of Carrier Official)
verify under penalty of perjury under the laws of the United States of America, that the information contained in the carrier qualification application packet and this Agreement is true, correct and complete. If representing a company or organization, I certify that I am qualified and authorized to offer this information. I know that willful misstatements or omissions of material facts constitute Federal criminal violations punishable under 18 U.S.C. 1001 by up to 5 years imprisonment and fines up to $10,000 for each offense, or punishable as perjury under 18 U.S.C. 1621 by fines up to $2,000 or imprisonment up to 5 years for each offense. Further I understand the requirements of this Agreement and on behalf of _____

9. Appendices B through F are added to read as follows:

Appendix B to part 619—Agreement Between the Military Traffic Management Command and Motor Common Carriers Governing the Transportation of Ammunition and Explosives, Class A and B for and on Behalf of the U.S. Department of Defense

1. The undersigned, who is duly authorized and empowered to act on behalf of _____
(Name of Company, typed or legibly printed)
(herein called the carrier), as a prerequisite for approval to transport ammunition and explosives, class A and B, for the account of the Department of Defense (DOD) and the Military Traffic Management Command (MTMC), (hereinafter called the Government), agree to comply with all additional requirements, terms and conditions as set forth in this Agreement. This Agreement governs the transportation of all DOD class A and B ammunition and explosives shipments administered by the Directorate of Inland Traffic, MTMC. Further, the carrier must also be a party to and in full compliance with requirements contained in the Agreement governing shipments which require a Transportation Protective Service (TPS). Noncompliance by the carrier with any provision of this or any other Agreement it is a party to will be sufficient grounds for immediate revocation of the carrier's approval to participate in the movement of class A and B ammunition and explosives. The carrier may also be subject to further action under the Carrier Performance program, governed by MTMC Regulation 15–1, which could result in nationwide disqualification on all DOD freight shipments.

2. Approval and Revocation.

a. Carrier understands that its initial approval and retention of approval are contingent upon establishing and maintaining, to MTMC's satisfaction sufficient resources to support its proposed scope of operations and services. Sufficient resources include the equipment, personnel, facilities, and finances to handle the traffic anticipated by DOD/MTMC under the carrier's proposed scope of operations in accordance with the service requirements of the shipper.

b. The carrier understands that MTMC may revoke approval at any time upon discovery of grounds for ineligibility or disqualification.

c. In addition to the initial evaluation, the carrier agrees that it will cooperate with MTMC follow-up evaluations at any time subsequent to signing this Agreement to confirm continued eligibility.

d. The carrier certifies that neither the owners, company, corporate officials, nor any affiliation or subsidiary thereof are currently debarred or suspended, or disqualified by a MTMC General Freight Board, or placed in non-use by MTMC from doing business with DOD.

3. Lawful Performance.

a. Carrier agrees to comply with all applicable Federal, State, municipal, and other local laws and regulations governing the safe transportation and storage of ammunition and explosives to include title 49 Code of Federal Regulations (CFR) parts 177 and 386 thru 397. Provisions for exempt intra-city operations as defined in 49 CFR will not apply to the transportation of explosives for the DOD. Intrastate carriers are required to comply with all applicable state or federal regulations, whichever are more stringent.

b. No fines, charges, or assessments for overload vehicles or other violations of applicable laws and regulations will be passed to or be paid by any agency of the Federal Government.

4. Operating Authority. Carrier agrees to maintain valid motor common carrier operating certificates for its scope of operations which is not restricted against the handling and transport of hazardous materials or ammunition and explosives, class A and B. Any carrier found to be, in fact, involved in the brokerage, as defined by the Interstate Commerce Commission (ICC), of DOD freight traffic will have its approval revoked.

5. Insurance.

a. Minimum public liability insurance requirements are prescribed in title 49 of the Federal Code of Federal Regulations (CFR) § 387.9 Carrier agrees to ensure that the ICC is provided proof of their public liability insurance, in the form of a BMC 91 or 91–X, or MCS 90, in accordance with sections 29 and 30 of the Motor Carrier Act of 1980. Further, the motor carrier will provide MTMC with a certificate of insurance form. The certificate holder block of the form will indicate that MTMC, 5611 Columbia Pike, Falls Church, Virginia 22041–5050, ATTN: MTIN–FF, will be notified in writing, 30 days in advance of any change or cancellation. The deductible portion will be shown on the certificate. The insurance underwriter must have a policyholder's rating in the Best's Insurance Guide, listed in the Fiscal Service Treasury Department Circular 570, Listing of Surety Companies.

b. The carrier agrees to also file with MTMC proof of:

(1) Public liability insurance. Interstate and Intrastate carriers $5,000,000 per vehicle.

(2) Cargo insurance. Cargo insurance in the minimum of $150,000 for loss and damage of government freight per vehicle.

c. The insurance, carried in the name of the carrier, will be in force at all times while this

Agreement is in effect or until such time as the carrier cancels all tenders. The carrier agrees to ensure that the policies include a provision requiring the insurer to notify MTMC prior to any performance of service by the carrier. Changes, renewals, and cancellations notices must also be sent to MTMC, 5611 Columbia Pike, Falls Church, Virginia 22041–5050, ATTN: MTIN–FF. This requirement applies to both interstate and intrastate carriers. Carrier's insurance policy(s) must cover all equipment used to transport DOD freight.

6. Performance Bond.

a. Carrier agrees to provide MTMC with a Performance Bond. The bond secures performance and fulfillment of the carrier obligation to deliver DOD freight to destination. It will cover DOD re-procurement costs as a result of carrier default, abandoned shipments, or bankruptcy. The bond will not be utilized for operational problems such as late pick up or delivery, excessive transit time, refusals, no shows, improper/inadequate equipment or claims for lost or damaged cargo. The bond must be issued by a surety company listed in the Fiscal Service Treasury Department Circular No. 570. The bond must be completed on the form provided by MTMC. The bond will be continuous until cancelled. MTMC will be notified in writing, 30 days in advance of any change or cancellation. A letter of intent by the surety company is required with the initial application package. Upon MTMC approval, the carrier agrees to submit the Performance Bond before the Tender of Service will be accepted.

b. The sum of the bond will be determined as follows.

(1) Carriers having done business in their own name with DOD for 3 years or more will be required to submit a Performance Bond in the amount of 2.5% of their total DOD revenue taken from the Freight Information Systems Report (FINS), for the previous 12 months, not to exceed $100,000 and not less than $25,000.

(2) New carriers and those carriers having done business in their own name with the DOD for less than 3 years will be required to submit a Performance Bond based on areas of service they offer. Areas of service will be computed as both origins and destinations.

1 state (including intrastate)—$25,000;
2 to 3 states—$50,000; and
4 or more states—$100,000.

(3) Once a carrier has been doing business with the DOD for 3 years, their bond requirement will change from area of service to percent of revenue.

c. If carrier has secured the Performance Bond as a result of qualifying under the general commodity program or hazardous materials (other than ammunition and explosives, classes A and B) program, no additional Performance Bond is required.

7. Safety and Security.

a. A "satisfactory" safety rating will be maintained with the Federal Highway Administration, Department of Transportation and/or with the appropriate state agency or commission in the case of intrastate. Safety ratings which are "unsatisfactory," "conditional", "insufficient information", or "not rated" will not be accepted. The carrier further agrees to permit unannounced safety and security inspections of its facilities, terminals, equipment and operational procedures by DOD civilian or military personnel, or DOD contract employees. Inspection of carrier equipment, drivers' records, route plans and inspection reports will be permitted during both the pickup and delivery of shipments and in coordination with local police or other authorities while in transit. Carrier also agrees to allow inspection of carrier records and individual driver qualification files. When requested, carrier agrees to provide adequate evidence of an active driver safety, security training and evaluation program. Carrier agrees to furnish, on request, driver's Social Security Numbers to verify their security clearances and allow for inspection of carrier/driver records.

b. Carrier agrees to have in place a company-wide safety and security management program which includes specific on-going safety and security programs for each terminal location. Individual terminal programs will encompass planning and execution of safety and security in routine operations, to include emergency responders and planners, and with the local police and fire authority. Carrier programs will incorporate compliance with all applicable Federal, State, and local statutes or requirements. Conformance with other safety standards, such as NFPA Code 498, will be accomplished as much as possible, with compensating measures for deviations. Safety and security programs at the company wide or terminal level may be subject to evaluation by a DOD representative.

c. The carrier agrees to notify, within a reasonable period of time, the consignor and consignee named by the Government Bill of Lading (GBL) of cargo loss, damage, or unusual delay. Carrier also agrees to notify the consignor and the consignee named on the GBL immediately by telephone of an accident, incident or significant delay. The information to be reported will include origin/destination, GBL number, shipping paper information, time and place of occurrence and other pertinent accident details. Carrier agrees to notify the MTMC area command annotated on the GBL and the Army Operations Center (AOC), within one half (½) hour after notification of the consignor and consignee, and provide status updates as required. The MTMC HOTLINE and AOC telephone numbers are as follows:

—Eastern Area: 800–524–0331; New Jersey only: 800–348–4639
—Western Area: 800–331–1822; California only: 800–624–1361
—AOC: 703–687–0213

When requested, Carrier agrees to furnish MTMC a copy of accident reports submitted to Department of Transportation on Form MCS 50–T (Property) or MCS 50–B (Passengers) when DOD classes A and B explosives movements are involved.

d. Carrier agrees to provide the driver(s) transporting protected commodities an emergency telephone number (indicated on the last page of this Agreement) which, when used at any time (24 hours a day, 7 days a week), will reach a qualified carrier representative who will be able to provide information and assistance. MTMC will be immediately notified if this telephone number should be changed. Carrier also agrees to equip the vehicle transporting the material with communications equipment (CB radio, mobile phone, etc.) capable of being used to obtain assistance in an emergency.

e. Carrier agrees to provide the appropriate Transportation Protective Service (TPS) when requested by a DOD shipper. Carrier further agrees to comply with, and meet, all criteria for TPS as set forth in the Agreement governing the transportation of shipments requiring a TPS and also defined in the MTMC Freight Rules Publication No. 1A (MFTRP No. 1A) and reissues thereto.

f. Carrier agrees to execute a DD Form 441S (Certificate Pertaining to Foreign Interests) as a precondition to providing any TPS for the DOD. Only one DD Form 441S must be executed by a carrier regardless of the number or type of TPS provided.

g. All copies of the Signature and Tally Record (DD Form 1907), Special Instructions for Motor Vehicle Drivers (DD Form 836), and the Motor Vehicle Inspection (DD Form 626), will be transferred from driver to driver throughout the entire movement of classes A and B explosives shipments. All drivers transporting such shipments must sign the DD Form 1907 and follow the instructions shown on the DD Form 836. Furnishing of the Signature and Tally Record is an integral part of a TPS to be provided by the carrier. Carrier must ensure that each person responsible for the proper handling of the shipment signs the Signature and Tally Record at the time he/she assumes responsibility. All drivers transporting such shipment must sign the Signature and Tally Record. When used with Dual Driver (DD), both drivers are required to sign the Signature and Tally Record upon original receipt.

8. Driver Requirements.

a. Carrier agrees to comply with all driver requirements contained in paragraph 7 of the Agreement Between the Military Traffic Management Command and Motor Common Carriers Governing the Transportation of Shipments Which Require a Transportation Protective Service (TPS) for and on Behalf of the U.S. Department of Defense.

b. Carrier agrees that newly employed drivers will not be allowed to transport class A and B explosives until after background checks required by 49 CFR 391.23 have been successfully completed.

c. Carrier agrees that no driver disqualified under 49 CFR 391.15 will be permitted to operate any vehicle transporting class A and B explosives.

d. The driver of a motor vehicle transporting class A and B explosives must undergo a physical examination and must be certified physically qualified to drive a commercial motor vehicle in accordance with 49 CFR 391.43. Carrier agrees to have driver screening programs in place to ensure that the provisions of this paragraph are met.

9. Equipment. Carrier agrees to comply with all equipment requirements contained in paragraph 8 of the Agreement Between the Military Traffic Management Command and Motor Common Carriers Governing the

Transportation of Shipments Which Require a Transportation Protective Service (TPS) for and on Behalf of the U.S. Department of Defense.

10. Shipment.

a. Carrier agrees to ensure that the shipper-provided placards are displayed in accordance with the general requirements found in 49 CFR 172.504

b. Carrier is responsible for shipments from origin to ultimate destination. The carrier also remains responsible for shipments placed in a safe haven or refuge location. Carrier agrees not to disclose any information to unauthorized persons concerning the nature, kind, quantity, destination, consignee or routing of any protected commodities shipment tendered to it. The carrier further agrees to provide, at no additional cost to the Government, the status of any shipment within 24 hours after an inquiry is made.

c. Carrier agrees to comply with all shipment requirements contained in paragraph 9 of the Agreement Between the Military Traffic Management Command and Motor Common Carriers Governing the Transportation of Shipments Which Require a Transportation Protective Service (TPS) for and on Behalf of the U.S. Department of Defense.

d. When requested by the shipper for reasons of security, carrier agrees to cover the shipment with a carrier-provided tarpaulin. Protective tarping is an accessorial service.

11. Documentation.

a. The carrier agrees to accept GBLs on which freight charges will be paid by the Government, and bound by all terms stated on the SF1103, Government Bill of Lading.

b. The carrier will comply with the documentation prelodge procedures in effect at Military Ocean Terminals when cargo is consigned for further movement overseas. (Prelodging is the submission of advance shipment documents which identifies the shipment to the Military Ocean Terminal prior to delivery of the cargo at the terminal.) Instructions will be provided by the consignor to furnish certain data at least 24 hours in advance of cargo delivery to the terminal.

12. Loss or Damage. The carrier agrees to be liable for loss or damage to cargo in accordance with the provisions of 49 U.S.C. 11707 (the Carmack Amendment to the Interstate Commerce Act). Carrier agrees to promptly settle uncontested claims for loss or damage.

13. Standard Tender of Service.

a. The carrier agrees to comply with the preparation and filing instructions and applicable freight traffic rules publications issued by MTMC. Carrier understands that MTMC will reject tenders not in compliance with these instructions.

b. Carrier agrees to provide a street address where the company office is located in lieu of a post office box number. Carrier agrees to provide the address prior to or in conjunction with submission of any tenders or other rate schedules. The carrier agrees to also advise MTMC of any change in address prior to the effective date of the change. Failure to do so is grounds to discontinue use of the carriers.

c. Carrier understands that tenders inadvertently accepted and distributed for use and not in compliance with this Agreement, the provisions contained in the Standard Tender of Freight Services (MT Form 364–R), or the applicable MTMC Freight Traffic Rules Publication, and supplements thereof, will be subject to immediate removal or non-use until corrections are made. The issuing carrier will be advised when tenders are removed under these circumstances.

14. Rates.

a. Carrier agrees to transport Government shipments at the lowest tender rate specifically applicable to the department or agency involved.

b. The carrier's rates must be on file with MTMC, HQ, Eastern Area, ATTN: MTE–IN, Bayonne, New Jersey 07002–5302. The carrier must publish all rates, charges, and accessorial services on a "Department of Defense Standard Tender of Freight Services", MT Form 364–R and must comply with the tender preparation instructions. (Only services annotated with a charge in the tender will be paid by the shipper.)

15. Carrier Performance. Carrier agrees that carrier's equipment, performance, and standards of service will conform with its obligations under Federal, State and local law and regulation as well as with the guidelines found in the Defense Traffic Management Regulation (DTMR) and this Agreement. The carrier fully understands its obligation to remain current in its knowledge of service standards. The carrier accepts the Government's right to revoke approval, declare ineligible, non-use, or disqualify the carrier for unsatisfactory service for any operating deficiency, noncompliance with terms of this Agreement or terms of any negotiated agreements, tariffs, tenders, bills of lading or similar arrangements determining the relationship of the parties, or for the publication or assessment of unreasonable rates, charges, rules, descriptions, classifications, practices, or other unreasonable provisions of tariff/tenders. Rules governing the Carrier Performance Program are found in MTMC Regulation 15–1, and Army Regulation 55–355, DTMR. If a carrier is removed or disqualified for 6 months or more, it will have to be re-qualified.

16. General Provisions. The carrier must possess a valid Standard Carrier Alpha Code (SCAC). When a company holding the appropriate authority has operating divisions each with its own unique SCAC, each such division is required to execute a separate agreement with the MTMC governing the transportation of protected commodities.

17. Terms of the Agreement.

a. The terms of this Agreement will be applicable to each shipment.

b. This Agreement shall be effective from the date of approval by MTMC, until terminated. Termination is effective upon receipt of written notice by either party.

c. Nothing in this Agreement will be construed as a guarantee by the Government of any particular volume of traffic.

d. The carrier agrees to immediately notify MTMC of any changes in ownership, in affiliations, executive officers, and/or board members, and carrier name. Carrier understands that failure to notify MTMC shall be grounds for immediate revocation of the carrier's approval and their participation in the movement of DOD freight.

18. Additional Specialized Requirements. The terms of this Agreement will not prevent different or additional requirements with respect to negotiated agreements or added requirements for other types of service and/or commodities.

19. Inquiries. Inquiries may be referred to: Commander, Military Traffic Management Command, ATTN: MTIN–FF, 5611 Columbia Pike, Falls Church, Virginia 22041–5050.

20. Carrier Acknowledgment and Acceptance. The certifying carrier official agrees to ensure that the appropriate company officials and employees are familiar with the requirements, terms and conditions of this Agreement and are in full compliance with the applicable provisions herein. Any information found to be falsely represented in the Motor Carrier Qualification Form, the attachments or during the qualification procedures, to include additional requirements of this Agreement, shall be grounds for automatic revocation of this Agreement and immediate non-use of the carrier, the affiliated companies, division and entities.

I, _____,
(Typed Name and Title of Carrier Official)
verify under penalty of perjury under the laws of the United States of America, that the information contained in the carrier qualification application packet and this Agreement is true, correct and complete. If representing a company or organization, I certify that I am qualified and authorized to offer this information. I know that willful misstatements or omissions of material facts constitute Federal criminal violations punishable under 18 U.S.C. 1001 by up to 5 years imprisonment and fines up to $10,000 for each offense, or punishable as perjury under 18 U.S.C. 1621 by fines up to $2,000 or imprisonment up to 5 years for each offense. Further I understand the requirements of this Agreement and on behalf of

Appendix C to Part 619—Agreement Between the Military Traffic Management Command and Motor Common Carriers Governing the Transportation of Hazardous Material Other Than Class A and B Explosives for and on Behalf of the U.S. Department of Defense

1. The undersigned, who is duly authorized and empowered to act on behalf of _____

(Name of Company, Typed or Legibly Printed)

(hereinafter called the carrier), as a prerequisite for approval to transport hazardous materials, (other than Class A & B Explosives), as defined in 49 Code of Federal Regulations (CFR) 172/3. Hazardous commodities in bulk include, but not limited to, such items as gasoline, kerosene, lubricating oil, turbine fuel, diesel fuel and fuel oil, for the account of the DOD and the Military Traffic Management Command (MTMC) (herein called the Government), agrees to comply with all requirements, terms and conditions as set forth in this Agreement. If the carrier wishes to participate in DOD traffic which requires a protective service, the carrier must also be a party to and in full compliance with requirements contained in the Agreement governing shipments which require a Transportation Protective Service (TPS). Noncompliance by the carrier with any provision of this or any other Agreement it is a party to will be sufficient grounds for immediate revocation of the carrier's approval to participate in the movement of hazardous materials. The carrier may also be subject to further action under the Carrier Performance Program, governed by MTMC Regulation 15–1, which could result in nationwide disqualification on all DOD freight shipments.

2. Approval and Revocation.

a. Carrier understands that its initial approval and retention of approval are contingent upon establishing and maintaining, to MTMC's satisfaction sufficient resources to support its proposed scope of operations and services. Sufficient resources include the equipment, personnel, facilities, and finances to handle the traffic anticipated by DOD/MTMC under the carrier's proposed scope of operations in accordance with the service requirements of the shipper.

b. The carrier understands that MTMC may revoke approval at anytime upon discovery of grounds for ineligibility or disqualification. The carrier further understands that it is not authorized to submit tenders for shipments requiring a TPS until it has served DOD in an approved status for 12 continuous months. Prior to being allowed to handle shipments which require a TPS or class A & B explosives, the carrier must first meet any additional requirements in effect at the time.

c. In addition to the initial evaluation, the carrier agrees that it will cooperate with MTMC follow-up evaluations at any time subsequent to signing this Agreement to confirm continued eligibility.

d. The carrier certifies that neither the owners, company, corporate officials, nor any affiliation or subsidiary thereof are currently debarred or suspended, disqualified by a MTMC General Freight Board, or placed in non-use by MTMC from doing business with DOD.

3. Lawful Performance.

a. Carrier agrees to comply with all applicable Federal, State, municipal, and other local laws and regulations governing the safe, proper, and lawful operation of motor vehicles to include Title 49 Code of Federal Regulations (CFR) 386–397. Intrastate carriers are required to comply with all applicable state or federal regulations, whichever are more stringent.

b. No fines, charges, or assessments for overload vehicles or other violations of applicable laws and regulations will be passed to or be paid by any agency of the Federal Government.

4. Operating Authority. Carrier agrees to maintain valid motor common carrier operating certificates for its scope of operations which is not restricted against the handling and transport of hazardous materials as defined in 49 CFR 172/3. Any carrier found to be, involved in brokerage, as defined by the Interstate Commerce Commission (ICC), of DOD freight traffic will have its approval revoked.

5. Insurance.

a. Minimum public liability insurance requirements are prescribed in Title 49 of the Federal Code of Federal Regulations (CFR) § 387.9. Carrier agrees to ensure that the ICC is provided proof of their public liability insurance, in the form of a BMC 91 or 91–X, or MCS 90, in accordance with sections 29 and 30 of the Motor Carrier Act of 1980. Further, the motor carrier will provide MTMC with a certificate of insurance form. The certificate holder block of the form will indicate that MTMC, 5611 Columbia Pike, Falls Church, Virginia 22041–5050, ATTN: MTIN–FF, will be notified in writing, 30 days in advance of any change or cancellation. The deductible portion will be shown on the certificate. The insurance underwriter must have a policyholder's rating in the Best's Insurance Guide, listed in the Fiscal Service Treasury Department Circular 570, Listing of Surety Companies.

b. The Carrier agrees to also file with MTMC proof of:

(1) Interstate Public Liability. Carrier will ensure that its insurance company(s) file with MTMC proof of public liability and property damage insurance for the transportation of hazardous commodities in the minimum amounts prescribed in 49 CFR 387.9.

(2) Intrastate Public Liability. Carrier will ensure that its insurance company(s) file with MTMC proof of insurance which meets the state requirements for public liability and property damage for the transportation of hazardous materials.

(3) Cargo Insurance. Carrier will also file with MTMC proof of $150,000 per incident minimum cargo insurance for loss and damage of Government freight other than bulk fuel which is set at $25,000.

c. The insurance, carried in the name of the carrier, will be in force at all times while this Agreement is in effect or until such time as the carrier cancels all tenders. The carrier agrees to ensure that the policies include a provision requiring the insurer to notify MTMC prior to any performance of service by the carrier. Changes, renewals, and cancellation notices must also be sent to MTMC, 5611 Columbia Pike, Falls Church, Virginia 22041–5050, ATTN: MTIN–FF. This requirement applies to both interstate and intrastate carriers. Carrier's insurance policy(s) must cover all equipment used to transport DOD freight.

6. Performance Bond.

a. Carrier agrees to provide MTMC with a Performance Bond. The bond secures performance and fulfillment of the carrier obligation to deliver DOD freight to destination. It will cover DOD re-procurement costs as a result of carrier default, abandoned shipments, or bankruptcy by the carrier. The bond will not be utilized for operational problems such as late pick up or delivery, excessive transit time, refusals, no shows, improper/inadequate equipment or claims for lost or damaged cargo. The bond must be issued by a surety company listed in the Fiscal Service Treasury Department Circular No. 570. The bond must be completed on the form provided by MTMC. The bond will be continuous until canceled. MTMC will be notified in writing, 30 days in advance of any change or cancellation. A letter of intent by the surety company is required with the initial application package. Upon MTMC approval, the carrier agrees to submit the Performance Bond before the Tender of Service will be accepted.

b. The sum of the bond shall be determined as follows:

(1) Carriers having done business in their own name with DOD for 3 years or more will be required to submit a performance bond in the amount of 2.5% of their total DOD revenue, taken from the Freight Information Systems Report (FINS), for the previous 12 months, not to exceed $100,000 and not less than $25,000.

(2) New carriers and those carriers having done business in their own name with the DOD for less than 3 years will be required to submit a Performance Bond based on areas of service they offer. Areas of service will be computed at both origins and destinations served.

1 state (including intrastate)—$25,000;
2 to 3 states—$50,000; and
4 or more states—$100,000.

(3) Once a carrier has been doing business with the DOD for 3 years, their bond requirement will change from area of service to percent of revenue.

c. Bulk fuel carriers will be required to submit a $25,000 Performance Bond.

d. Local drayage and commercial zone carriers are exempt from the bond requirement.

e. If carrier has secured the Performance Bond as a result of qualifying under the general commodity program or class A and B

program, no additional Performance Bond is required.

7. Safety and Security.

a. A "satisfactory" safety rating will be maintained with the Federal Highway Administration, Department of Transportation and/or with the appropriate state agency or commission in the case of intrastate. Safety ratings which are "unsatisfactory," "conditional", "insufficient information", or "not rated" will not be accepted. The carrier further agrees to permit unannounced safety and security inspections of its facilities, terminals, equipment and operational procedures by DOD civilian or military personnel, or DOD contract employees. These inspections may include transit surveillances of vehicles and drivers. The carrier agrees to provide evidence that fulfills the requirement set forth in 49 Code of Federal Regulation Parts 390 thru 396. Inspection of carrier equipment, drivers' records, route plans and inspection reports will be permitted during both the pickup and delivery of shipments and in coordination with local police or other authorities while in transit. Carrier also agrees to allow inspection of carrier records and individual driver qualification files. When requested, carrier agrees to provide adequate evidence of an active driver safety, security training and evaluation program. Carrier agrees to furnish, on request, driver's social Social Security Numbers to verify their security clearances and allow for inspection of carrier/driver records.

b. Carrier agrees to have in place a company-wide safety and security management program which includes specific on-going safety and security programs for each terminal location. Individual terminal programs will encompass planning and execution for safety and security in routine operations, to include emergency responders and planners, and with the local police and fire authority. Carrier programs will incorporate compliance with all applicable Federal, State, and local statutes or requirements. Conformance with other safety standards, such as NFPA Code 498, will be accomplished as much as possible, with compensating measures for deviations. Safety and security programs at the company wide or terminal level may be subject to evaluation by a DOD representative.

c. The carrier agrees to notify, within a reasonable period of time, the consignor and consignee named by the Government Bill of Lading (GBL) or Commercial Bill of Lading (CBL) of cargo loss, damage, or unusual delay. Carrier also agrees to notify the consignor and the consignee named on the GBL immediately by telephone of an accident, incident or significant delay. The information to be reported will include origin/destination, GBL/CBL number, shipping paper information, time and place of occurrence and other pertinent accident details. Carrier agrees to notify the MTMC area command annotated on the GBL and the Defense Logistics Agency (DLA), within one half (½) hour after notification of the consignor and consignee, and provide status updates as required. The MTMC HOTLINE telephone numbers are as follows:

—Eastern Area: 800–524–0331; New Jersey only: 800–624–1361
—Western Area: 800–331–1822; California only: 800–348–4639
—DLA: 800–851–8061.

When requested, carrier agrees to furnish MTMC a copy of accident reports submitted to Department of Transportation on Form MCS 50–T (Property).

d. Carrier agrees to provide the driver(s) transporting hazardous commodities an emergency telephone number (indicated on the last page of this Agreement) which, when used at any time (24 hours a day, 7 days a week), will reach a qualified carrier representative who will be able to provide information and assistance. MTMC will be immediately notified if this telephone number should be changed.

e. Carriers approved to transport DOD hazardous materials requiring TPS agree that no driver disqualified under 49 CFR 391.15 will be permitted to operate any vehicle transporting such commodities.

f. Carriers approved to transport DOD hazardous materials agree to ensure that drivers of a motor vehicle transporting such commodities must undergo a physical examination and must be certified physically qualified to drive a commercial motor vehicle in accordance with 49 CFR 391.43. Carrier also agrees to have driver screening programs in place to ensure that the provisions of this paragraph are met.

8. Drivers Requirements.

a. Carriers agrees to ensure that the driver(s) employed to transport hazardous materials have a minimum of one year of general commodities driving experience (using similar equipment) prior to transporting hazardous commodities, and that its drivers are trained and competent in the movement of these commodities to include an understanding of the following: 49 CFR part 397; instructions on procedures to be followed in the event of a delay; nature of the materials being transported; precautions to be taken in an emergency; written route plans; and shipping paper entries. The carrier will certify that the driver is trained and competent in the movement of hazardous commodities, and proof of certification must be carried in the vehicle of the unit transporting these commodities.

b. The carrier agrees to further ensure that driver(s) carry a valid commercial motor vehicle operator's license issued by his/her state of domicile, a certificate of physical examination issued during the preceding 24 months, and an employee record card, or similar document, one of which must contain the driver's photograph. The driver(s) must be 21 years of age. The driver(s) must carry a company picture identification card to verify affiliation with the carrier named on the Government Bill of Lading (GBL).

9. Equipment.

a. Trip-leased equipment, with or without drivers, will *not* be used to transport hazardous materials for the account of the DOD. Exceptions for the use of intermittent or occasional drivers in 49 CFR 391.63 will not apply to any DOD movement. Any equipment, with or without drivers, leased to augment carrier-owned equipment will be on a not less than 90-day noncancellable basis.

b. A copy of the equipment lease agreement must be carried in the vehicle of the unit transporting these commodities. (Facsimile, Xerox, or otherwise reproduced copies, are not acceptable.) Interchange agreements which originate at origin will be considered trip leases and will not be accepted. The lease must be complete at time of pick up and should require no further information to be completed by the driver. Failure to comply with this requirement or attempted abuse of this requirement could result in the carrier's participation in this type traffic to be immediately revoked and up to a nationwide disqualification on all DOD freight shipments should further action under the Carrier Performance Program be deemed appropriate.

c. Carriers approved to transport DOD hazardous materials requiring TPS agree to comply with all equipment requirements contained in paragraph 8 of the Agreement Between the Military Traffic Management Command and Motor Common Carriers Governing the Transportation of Shipments Which Require a Transportation Protective Service (TPS) for and on Behalf of the U.S. Department of Defense.

10. Shipment.

a. Carrier is responsible for shipments from origin to ultimate destination. The carrier also remains responsible for shipments placed in a safe haven or refuge location. Carrier agrees not to disclose any information to unauthorized persons concerning the nature, kind, quantity, destination, consignee or routing of any hazardous material shipment tendered to it. The carrier further agrees to provide, at no additional cost to the Government, the status of any shipment within 24 hours after an inquiry is made.

b. Carrier agrees to ensure that shipper-provided placards are displayed in accordance with the general requirements found in 49 CFR 172.504 for the transportation of hazardous materials. The carrier further agrees to conform to the requirements found in 49 CFR 177.825 pertaining to the transportation of radioactive materials on designated routes of radioactive materials for which placarding is required. Carrier also agrees to route all other shipments of hazardous commodities in accordance with the provisions of 49 CFR 397.9.

c. When requested by the shipper for reasons of security, carrier agrees to cover the shipment with a carrier-provided tarpaulin. Protective tarping is an accessorial service.

d. Carriers approved to transport DOD hazardous materials requiring TPS agree to comply with all shipment requirements contained in paragraph 9 of the Agreement Between the Military Traffic Management Command and Motor Common Carriers Governing the Transportation of Shipments Which Require a Transportation Protective Service (TPS) for and on Behalf of the U.S. Department of Defense.

11. Documentation.

a. The carrier agrees to accept GBLs and CBLs on which freight charges will be paid by the Government, and bound by all terms stated on the SF1103, Government Bill of Lading, regardless of the type of bill of lading tendered.

b. The carrier agrees to comply with the documentation pelodged procedures in effect at Military Ocean Terminals when cargo is consigned for further movement overseas. (Prelodging is the submission of advance shipment documents which identifies the shipment to the Military Ocean Terminal or the installation prior to delivery of the cargo at the terminal.) Instructions will be provided by the consignor to furnish certain data at least 24 hours in advance of cargo delivery to the terminal.

12. Loss or Damage. The carrier agrees to be liable for loss or damage to cargo in accordance with the provisions of 49 U.S.C. 11707 (the Carmack Amendment to the Interstate Commerce Act). Carrier agrees to promptly settle uncontested claims for loss or damage.

13. Standard Tender of Service.

a. The carrier agrees to comply with the preparation and filing instructions and applicable freight traffic rules publications issued by MTMC. Carrier understands that MTMC will reject tenders not in compliance with these instructions.

b. Carrier agrees to provide a street address where the company office is located in lieu of a post office box number. Carrier will provide the address prior to or in conjunction with submission of any tenders or other rate schedules. The carrier agrees to also advise MTMC of any change in address prior to the effective date of the change. Failure to do so is grounds to discontinue use of the carriers.

c. Carrier understands that tenders inadvertently accepted and distributed for use and not in compliance with this agreement, the provisions contained in the Standard Tender of Freight Services (MT Form 364–R), or the applicable MTMC Freight Traffic Rules Publication, and supplements thereof, will be subject to immediate removal or nonuse until corrections are made. The issuing carrier will be advised when tenders are removed under these circumstances.

14. Rates.

a. Carrier agrees to transport Government shipments at the lowest tender rate specifically applicable to the department or agency involved.

b. The carrier's rates must be on file with MTMC, HQ, Eastern Area, ATTN: MTE–IN, Bayonne, New Jersey 07002–5302. The agent must publish all rates, charges, and accessorial services on a "Department of Defense Standard Tender of Freight Services", MT Form 364–R and must comply with the tender preparation instructions. (Only services annotated with a charge in the tender will be paid by the shipper.)

15. Carrier Performance. Carrier agrees that carrier's equipment, performance, and standards of service will conform with its obligations under Federal, State and local law and regulation as well as with the guidelines found in the Defense Traffic Management Regulation (DTMR) and this Agreement. The carrier fully understands its obligation to remain current in its knowledge of service standards. The carrier accepts the Government's right to revoke approval, declare ineligible, nonuse, or disqualify the carrier for unsatisfactory service subsequent to approval or for any other operating deficiency, or for noncompliance with terms of the Agreement or terms of negotiated agreements, tariffs, tenders, bills of lading or similar arrangements determining the relationship of the parties, or for the publication or assessment of unreasonable rates, charges, rules, descriptions, classifications, practices, or other unreasonable provisions of tariffs/tenders. Rules governing the Carrier Performance Program are found in MTMC Regulation 15–1, and Army Regulation 55–355, DTMR. If a carrier is removed or disqualified for 6 months or more, it will have to be requalified.

16. General Provisions. The carrier agrees to possess a valid Standard Carrier Alpha Code (SCAC). When a company holding the appropriate authority has operating divisions each with its own unique SCAC, each such division is required to execute a separate agreement with MTMC governing the transportation of protected commodities.

17. Terms of the Agreement.

a. The terms of this Agreement will be applicable to each shipment.

b. This Agreement shall be effective from the date of approval by MTMC, until terminated. Termination is effective upon receipt of written notice by either party.

c. Nothing in this Agreement will be construed as a guarantee by the Government of any particular volume of traffic.

d. The carrier agrees to immediately notify MTMC of any changes in ownership, in affiliations, executive officers, and/or board members, and carrier name. Carrier understands that failure to notify MTMC shall be grounds for immediate revocations of carriers approval and their participation in movement of DOD freight.

18. Additional Specialized Requirements. The terms of this Agreement will not prevent different or additional requirements with respect to negotiated agreements or added requirements for other types of service and/or commodities.

19. Inquiries. Inquiries may be referred to: Commander, Military Traffic Management Command, ATTN: MTIN–FF, 5611 Columbia Pike, Falls Church, Virginia 22041–5050.

20. Carrier Acknowledgment and Acceptance. The certifying carrier official agrees to ensure that the appropriate company officials and employees are familiar with the requirements, terms and conditions of this Agreement and are in full compliance with the applicable provisions herein. Any information found to be falsely represented in the Motor Carrier Qualification Form, the attachments or during the qualification procedures, to include additional requirements of this Agreement, shall be grounds for automatic revocation of this Agreement and immediate non-use of the carrier, the affiliated companies, division and entities.

I, _____

(typed name and title of carrier official) verify under penalty of perjury under the laws of the United States of America, that the information contained in the carrier qualification application packet and this Agreement is true, correct and complete. If representing a company or organization, I certify that I am qualified and authorized to offer this information. I know that willful misstatements or omissions of material facts constitute Federal criminal violations punishable under 18 U.S.C. 1001 by up to 5 years imprisonment and fines up to $10,000 for each offense, or punishable as perjury under 18 U.S.C. 1621 by fines up to $2,000 or imprisonment up to 5 years for each offense. Appendix D to Part 619—Agreement Between the Military Traffic Management Command and Motor Common Carriers Governing the Transportation of Shipments Which Require a Transportation Protective Service (TPS) for and on Behalf of the U.S. Department of Defense

1. The undersigned, who is duly authorized and empowered to act on behalf of

_____

(name of company, typed or legibly printed) (hereinafter called the carrier), as a prerequisite for approval to transport classified materials, protected and sensitive material, weapons and ammunition, munitions or other hazardous material as defined in 49 Code of Federal Regulations (CFR) part 172/3 which are designated sensitive by the U.S. Department of Defense (DOD), (hereinafter referred to as "protected commodities"), which require a Transportation Protective Service (TPS) for the account of the DOD and the Military Traffic Management Command (MTMC) (hereinafter called the Government), agree to comply with all additional requirements, terms and conditions as set forth in this Agreement. Carrier further acknowledges that it is in full compliance with the basic qualification standards either for general commodities, hazardous materials (other than class A and B explosives), or class A and B ammunition and explosives, has executed the

appropriate MTMC agreement, and is required to maintain and will maintain in a current status, all basic requirements, in addition to requirements established by this Agreement. Noncompliance by the carrier with any provision of this Agreement will be sufficient grounds for immediate revocation of the carrier's approval to participate in the movement of protected commodities which require a TPS. The carrier may also be subject to further action under the Carrier Performance Program as set forth in MTMC Regulation 15–1, Transportation and Travel, Procedure for Disqualifying and Placing Carriers in Non-Use, which could result in nationwide disqualification on all DOD freight shipments.

2. Approval and Revocation.

a. Carrier understands that its initial approval and retention of approval are contingent upon establishing and maintaining, to MTMC's satisfaction sufficient resources to support its proposed scope of operations and services. Sufficient resources include the equipment, personnel, facilities, and finances to handle the traffic anticipated by DOD/MTMC under the carrier's proposed scope of operations in accordance with the service requirements of the shipper.

b. The carrier understands that MTMC may revoke approval at any time upon discovery of grounds for ineligibility or disqualification.

c. In addition to the initial evaluation, the carrier agrees that it will cooperate with MTMC follow-up evaluations at any time subsequent to signing this Agreement to confirm continued eligibility.

d. Carrier agrees to execute a DD Form 441S (Certificate Pertaining to Foreign Interests) as a precondition to providing any TPS for the DOD. Only one DD Form 441S must be executed by a carrier regardless of the number or type of TPS provided.

e. Carrier agrees to allow a National Agency Check (NAC) on all management and operational personnel involved in the performance of Dual Driver Protective Service with National Agency Checks (DN). The results of the NAC must be favorable as determined by MTMC under DOD criteria as a precondition to the carrier providing Satellite Monitoring (SM) with DN. Management personnel include: owners (including partnership where applicable), principal deputies, board members (where applicable), and company managers responsible for liaison with DOD operations. Operational personnel include: drivers, handlers and terminal and security personnel hired permanently or temporarily by the company to protect the DOD cargo under SM with DN.

f. Carrier providing Protective Security Service (PS) and/or Security Escort Vehicle Service (SE) accompanying a PS shipment must have been cleared by the Defense Investigative Service (DIS) under the DOD Industrial Security Program.

3. Lawful Performance. Carrier agrees it will comply with all rules, regulations and requirements set forth in any and all agreements which may be applicable to the shipment/commodity transported requiring a TPS.

4. Agreements. When applicable, carrier agrees to execute a separate agreement with MTMC governing the transportation of hazardous materials, ammunition and explosives, or Class A and B explosives, as defined in 49 CFR part 173.

5. Security.

a. Carrier agrees to designate a "qualified carrier representative" when handling shipments requiring a TPS. This representative will be employed by the carrier, or the terminal involved, aware of the sensitivity of the shipment, knowledgeable of the safety, security and emergency procedures to be followed, authorized and capable of moving a transportation conveyance and, when providing PS, cleared by DIS.

b. Carrier agrees to ensure that trailers containing protected commodities are always connected to tractors during shipment except when stopped at a DOD activity for loading or unloading, a carrier's terminal for servicing, a carrier-designated point where driver(s) or qualified carrier representative maintains continuous surveillance over the shipment, or a qualified safe haven or refuge location.

c. When requested by the shipper for reasons of security, carrier agrees to cover the shipment with a carrier-provided tarpaulin. Protective tarping for security reasons is an accessorial service.

6. Safety.

a. A "satisfactory" safety rating will be maintained with the Federal Highway Administration, Department of Transportation and/or with the appropriate state agency or commission in the case of intrastate transport. Safety ratings which are "unsatisfactory," "conditional," "insufficient information," or a "not rated" will not be accepted.

b. Carrier agrees to notify the consignor and the consignee named on the GBL immediately by telephone of an accident, incident or significant delay. The information to be reported will include origin/destination, GBL/CBL number, shipping paper information, time and place of occurrence and other pertinent accident details. Carrier will notify the MTMC area command annotated on the GBL within one half (½) hour after notification of the consignor and consignee, and provide status updates as required. The MTMC HOTLINE telephone numbers are as follows:

—Eastern Area: 800–524–0331; New Jersey only: 800–624–1361
—Western Area: 800–331–1822; California only: 800–348–4639

When requested, carrier will furnish MTMC a copy of accident reports submitted to Department of Transportation on Form MCS 50–T (Property).

c. Carrier agrees to provide the driver(s) transporting protected commodities an emergency telephone number (indicated on the last page of this Agreement) which, when used at any time (24 hours a day, 7 days a week), will reach a qualified carrier representative who will be able to provide information and assistance. MTMC will be immediately notified if this telephone number should be changed. Carrier also agrees to equip the vehicle transporting the material with communications equipment (CB radio, mobile phone, etc.) capable of being used to obtain assistance in an emergency.

7. Driver Requirements.

a. Carrier agrees to ensure that the driver(s) employed to transport protected commodities requiring a TPS be 21 years of age and have a minimum of one year of experience driving tractor/trailer equipment under various driving conditions.

b. Carrier agrees to ensure that the driver(s) employed to transport protected commodities requiring a TPS carry a valid motor vehicle operator's license issued by his/her state of domicile, a certificate of physical examination issued during the preceding 24 months, and an employee record card, or similar document, one of which must contain the driver's photograph.

c. Carrier agrees to ensure driver(s) will carry a company picture identification card to verify affiliation with the carrier named on the Government Bill of Lading (GBL). The driver identification requirements for those carriers cleared to handle SECRET shipments will be in accordance with Paragraph 5–410 of the DOD Industrial Security Manual (DOD 5220.22–M) and Paragraph 11a(10) of the Carrier Supplement to the DOD Industrial Security Manual (DOD 5220.22–C).

8. Equipment.

a. Trip-leased equipment, with or without drivers, will not be used to transport protected commodities for the account of the DOD. Exceptions for the use of intermittent or occasional drivers in 49 CFR 391.63 will not apply to any DOD movement. Any equipment, with or without drivers, leased to augment carrier-owned equipment will be on a not less than 90-day noncancellable basis.

b. A copy of the equipment lease agreement must be carried in the vehicle of the unit transporting these commodities. (Facsimile, Xerox, or otherwise reproduced copies, are not acceptable.) Interchange agreements which originate at origin will not be accepted. The lease must be complete at time of pick up and should require no further information to be completed by the driver. Failure to comply with this requirement or attempted abuse of this requirement could result in the carrier's participation in this type traffic to be immediately revoked and up to nationwide disqualification on all DOD freight shipments should further action under the Carrier Performance Program be deemed appropriate.

9. Shipment.

a. Carrier agrees to provide the appropriate TPS when requested by a DOD shipper. Carrier further agrees to perform the TPS as defined in the applicable Military Traffic Management Command Freight Traffic Rules Publication (MFTRP No. 1A) or reissues thereto. A TPS is any one of the following services or any combination thereof:

—DOD Constant Surveillance Service (CS)
—Dual Driver Protective Service (DD)
—Dual Driver w/National Agency Check Protective Service (DN)
—Motor Surveillance Service (MS)
—Protective Security Service (PS)
—DTTS Satellite Motor Surveillance Service (SM)
—Security Escort Vehicle Service (SE)

b. Carrier agrees that all shipments of protected commodities DN and/or PS will only be moved in direct single line-haul

service. Transportation involving an interchange service may be used, however, if the shipment is under DD or CS.

c. Carrier agrees to provide exclusive use of vehicle or dromedary service for all shipments requiring SM with DN and/or PS. The motor vehicle or dromedary furnished will be devoted exclusively to the transportation of the tendered shipment without seal or lock breakage, and without transfer of lading for the convenience of the carrier.

d. Carrier agrees to maintain a Signature and Tally Record (ST) (DD Form 1907) for all shipments of protected commodities requiring a TPS. Furnishing of the ST is an integral part of a TPS to be provided by the carrier. Carrier agrees to ensure that each person responsible for the proper handling of the shipment signs the ST at the time he/she assumes responsibility. All drivers transporting such shipment must sign the ST. When used with DD, both drivers are required to sign the ST upon original receipt.

e. Carrier agrees to be responsible for shipments from original to ultimate destination. The Carrier also remains responsible for shipments placed in a safe haven or refuge location. Carrier agrees not to disclose any information to unauthorized persons concerning the nature, kind, quantity, destination, consignee or routing of any protected commodities shipment tendered to it. The carrier further agrees to provide, at no additional cost to the Government, the status of any shipment within 24 hours after an inquiry is made.

10. Carrier Performance. Carrier agrees that carrier's equipment, performance, and standards of service will conform with its obligations under Federal, State and local law and regulation as well as with the guidelines found in the Defense Traffic Management Regulation (DTMR) and this Agreement. The carrier fully understands its obligation to remain current in its knowledge of service standards. The carrier accepts the Government's right to revoke approval, declare ineligible, nonuse, or disqualify the carrier for unsatisfactory service subsequent to approval or for any other operating deficiency, or for noncompliance with terms of the Agreement or terms of negotiated agreements, tariffs, tenders, bills of lading or similar arrangements determining the relationship of the parties, or for the publication or assessment of unreasonable rates, charges, rules, descriptions, classifications, practices, or other unreasonable provisions of tariffs/tenders. Rules governing the Carrier Performance Program are found in MTMC Regulation 15–1, and Army Regulation 55–355, DTMR. If a carrier is removed or disqualified for 6 months or more, it will have to be requalified.

11. Terms of the Agreement.

a. The terms of this Agreement will be applicable to each shipment.

b. This agreement shall be effective from the date of approval by MTMC, until terminated. Termination is effective upon receipt of written notice by either party.

c. Nothing in this Agreement will be construed as a guarantee by the Government of any particular volume of traffic.

d. The carrier agrees to immediately notify MTMC of any changes in ownership, in affiliations, executive officers, and/or board members, and carrier name. Carrier understands that failure to notify MTMC shall be grounds for immediate revocation of the carrier's approval and their participation in the movement of DOD freight.

12. Additional Specialized Requirements. The terms of this Agreement will not prevent different or additional requirements with respect to negotiated agreements or added requirements for other types of service and/or commodities#.

13. Inquiries. Inquiries may be referred to: Commander, Military Traffic Management Command, ATTN: MTIN–FF, 5611 Columbia Pike, Falls Church, Virginia 22041–5050.

14. Carrier Acknowledgment and Acceptance. The certifying carrier official agrees to ensure the appropriate company officials and employees are familiar with the requirements, terms and conditions of this Agreement and are in full compliance with the applicable provisions herein. Any information found to be falsely represented in the Motor Carrier Qualification Form, the attachments or during the qualification procedures, to include additional requirements of this Agreement, shall be grounds for automatic revocation of this Agreement and immediate non-use of the carrier, the affiliated companies, division and entities.

I, _____

Appendix E to Part 619—Agreement Between the Military Traffic Management Command Surface Freight Forwarders Governing the Transportation of General Commodities for and on Behalf of the U.S. Department of Defense

1. The undersigned, who is duly authorized and empowered to act on behalf of

_____
(name of forwarder, typed or legibly printed)
Thereinafter referred to as the forwarder, as a prerequisite for consideration for participation in the transport of general commodities as an exempt surface freight forwarder, for the U.S. Department of Defense (DOD), agree to comply with all requirements, terms and conditions as set forth in this Agreement. Noncompliance with any provision of this Agreement will be sufficient grounds for immediate revocation of the forwarder's privilege to participate in the movement of DOD freight. For the purpose of this Agreement, a surface freight forwarder is defined as a person or company who acts as a common carrier, that is, a carrier which holds itself out to the general public to provide transportation of property for compensation, assembles and consolidates less-than-truckload freight, as defined in the Instruction for preparation of Department of Defense Standard Tender of Freight Services, MT Form 364–4 (and revisions thereto), Part II, and uses for the whole or any part of the line-haul transportation the services of regulated motor or rail carriers, breaks bulk, and delivers the less-than-truckload freight holding out in its own name and under its own responsibility a through transportation service from point of receipt to destination. Forwarders may participate in truckload movements under extraordinary circumstances, but not on a regular basis nor as their main business.

2. Approval and Revocation.

a. Forwarder understands that its initial approval and retention of approval are contingent upon establishing and maintaining, to MTMC's satisfaction, sufficient resources to support its proposed scope of operations and services. Sufficient resources include personnel, facilities, carriers with adequate equipment, and finances to handle the traffic anticipated by DOD/MTMC under the forwarder's proposed scope of operations in accordance with the service requirements of the shipper.

b. The forwarder understands that MTMC may revoke approval at any time upon discovery of grounds for ineligibility or disqualification. The forwarder further understands that it will not be authorized to participate in any traffic which requires a Transportation Protective Service.

c. In addition to the initial evaluation, the forwarder agrees that it will cooperate with MTMC follow-up evaluations at any time

subsequent to signing this Agreement to confirm continued eligibility.

d. The forwarder agrees and certifies that neither the owners, company, corporate officials, nor any affiliation or subsidiary thereof are currently debarred or suspended, disqualified by a MTMC General Freight Board, or placed in non-use by MTMC from doing business with DOD.

3. Lawful Performance.

a. Forwarder agrees to comply with all applicable federal, state, municipal and other local laws and regulations. No fines, charges, or assessments for overloaded vehicles or other violations of applicable laws and regulations will be passed to, or be paid by any agency of the Federal Government.

b. The forwarder agrees to keep current and on file a list of all carriers to be used in the transport of DOD freight shipments. This list will contain, as a minimum, the company's name, president/vice president's name, operating authority number, corporate office address, telephone number and a designated 24-hour on-call point of contact in the event of an accident or emergency situation. MTMC can direct forwarder not to use specific carriers in the movement of DOD freight shipments.

c. The forwarder further agrees and certifies that it will not use any carrier which has been debarred, suspended by the Government or which has been placed in non-use or disqualified by MTMC from doing business with the DOD for the movement of any DOD freight shipments.

4. Operations. The forwarder agrees and certifies that it is operating as a forwarder as defined herein. If incorporated, evidence of incorporation, bearing the official seal of the state in which filed, Articles of Incorporation, listing all the officers of the corporation are attached and certified to be true, correct and current.

5. Insurance.

a. The forwarder agrees to maintain a minimum of $1,000,000 public liability insurance and $250,000 cargo insurance for loss and damage of Government freight. A copy of the certificate of insurance must be on file with MTMC, ATTN: MTIN-FF, prior to any performance of service by the forwarder.

b. The insurance, carried in the name of the forwarder, will be in force at all times while this Agreement is in effect or until such time as the forwarder cancels all tenders. The forwarder agrees to ensure that the policies include a provision requiring the insurer to notify MTMC prior to any performance of service by the carrier. The certificate holder block of the form will indicate that MTMC, 5611 Columbia Pike, Falls Church, Virginia 22041–5050, ATTN: MTIN–FF, will be notified in writing, 30 days in advance of any change or cancellation. The deductible portion will be shown on the certificate.

c. The insurance underwriter must have a policyholder's rating in the Best's Insurance Guide, listed in the Fiscal Service, Treasury Department Circular 570, Listing of Surety Companies. Self-Insurance will not be accepted.

6. Performance Bond. Forwarder agrees to provide MTMC with a Performance Bond. The bond secures performance and fulfillment of the forwarder's obligation. It will cover default, abandoned shipments, bankruptcy and reprocurement costs. The bond will not be utilized for operational problems such as late pick up or delivery, excessive transit time, refusals, no shows, improper/inadequate equipment or claims for lost or damaged cargo. The bond must be issued by a surety company listed in the Fiscal Service, Treasury Department Circular No. 570. The sum of the bond shall be no less than $100,000. The bond must be completed on the form provided by MTMC and will be continuous until cancelled. MTMC will be notified, in writing, 30 days in advance of any change or cancellation. A letter of intent by the surety company is required with the initial application. Upon MTMC approval forwarder agrees to submit the performance bond before the Tender of Service will be accepted.

7. Safety.

a. The forwarder agrees not to use any carrier that has an "unsatisfactory" safety rating with the Federal Highway Administration, Department of Transportation, and if it is an intrastate motor carrier, with the appropriate state agency.

b. Shipments will be delivered in direct service without delay to the destination shown on the Government Bills of Lading unless consignee or consignor directs diversion of the shipment to a new or different destination. Deliveries will be made during the shipper's normal business hours.

c. The forwarder agrees to not divulge any information to unauthorized persons concerning the nature and movements of any shipment tendered to it.

d. The forwarder agrees to notify within 24 hours, the consignor and consignee named by the Government Bill of Lading (GBL) or Commercial Bill of Lading (CBL) of cargo loss, damage, or unusual delay. Information reported will include origin/destination, GBL/CBL number, shipping paper information, time and place of occurrence, and other pertinent details. Upon request, the forwarder agrees to ensure MTMC is furnished a copy of accident reports submitted to Department of Transportation on Form MCS 50–T (Property).

e. The forwarder agrees to have in place a company-wide safety management program. Forwarder safety program will comply with applicable Federal, State and local statutes or requirements. Safety programs at the company-wide or terminal level may be subject to evaluation by DOD representatives. The forwarder further agrees to permit unannounced safety inspections of its facilities, terminals, equipment, employees, and procedures by DOD civilian, military personnel, or DOD contract employees.

8. Reserved.

9. Equipment. The forwarder agrees to ensure equipment is spotted for loading at the time and place requested. The Government reserves the right to reject the utilization of any equipment placed for loading by the forwarder if it does not, upon inspection, meet specifications and requirements for the particular shipment involved (size, cube, cleanliness, mechanical condition, etc.).

10. Shipment. The Forwarder agrees to provide, at no additional cost to the government, the status of any shipment within 24 hours after an inquiry is made. Further, the forwarder agrees to not divulge any information to unauthorized persons concerning the nature and movement of any DOD shipment.

11. Documentation.

a. Forwarder agrees to accept Government Bills of Lading on which freight charges will be paid by the Government, and will be bound by all terms and conditions stated thereon.

b. The forwarder agrees to comply with the provisions of documentation prelodging in effect at Military Ocean Terminals which cargo is consigned for further movement overseas. (Prelodging is the submission of advance shipment documents which identifies the shipment to the Military Ocean Terminal prior to arrival of the cargo at the terminal to permit preparation of the terminal documentation.) Instructions will be provided by the consignees to furnish certain data at least 24-hours in advance of cargo arrival at the terminal.

12. Loss & Damage. The forwarder agrees to be fully liable for delivery of all cargo in the same condition as received at origin, except loss or damage caused by act of God, public enemy act, omission of shipper, inherent vice or detrimental changes due to nature of commodity, or natural shrinkage. Forwarder agrees to settle promptly, claims for loss or damage. The forwarder also agrees to provide the status of any shipment tendered to them within 24-hours after an inquiry is made.

13. Standard Tender of Service.

a. The forwarder agrees to comply with the preparation and filing instructions and applicable freight traffic rules publications issued by MTMC. Forwarder understands that MTMC will reject tenders not in compliance with these instructions.

b. Forwarder agrees to publish a street address where the company office is located in lieu of a post office box number. The Military Traffic Management Command must be advised of any change in address. Failure to do so is grounds to discontinue the use of the forwarder.

c. Forwarder understands that tenders inadvertently accepted and distributed for use and not in compliance with this agreement, the provisions contained in the Standard Tender of Freight Services (MT Form 364–R), or the applicable MTMC Freight Traffic Rules Publication, and supplements thereof, will be subject to immediate removal or non-use until corrections are made. The issuing forwarder will be advised when tenders are removed under these circumstances.

14. Rates.

a. Forwarder agrees to transport Government shipments at its lowest effective charge named in the tender applicable on the commodity transported, whether or not the rate tender is referenced on the Government bill of lading.

b. The forwarder agrees to publish through rates guaranteed for at least 30 days. These rates must be filed with MTMC HQ, Eastern Area, ATTN: MTE–IN, Bayonne, New Jersey 07002–5302. The forwarder must publish all

rates, charges, and accessorial services on a "Department of Defense Standard Tender of Freight Services", MT Form 364–R and must comply with the tender preparation instructions. (Only services annotated with a charge in the tender will be paid by the shipper.)

c. The forwarder agrees to promptly refund all uncontested overcharges to the Government and authorizes the Government to deduct the amount of overcharges from any amount subsequently found to be due the forwarder.

d. The Government reserves the right to pursue administrative claims directly with forwarders under the Interstate Commerce Act or other authorities.

15. Carrier Performance.

a. Forwarder agrees that its performance, and standards of service will conform with its obligations under Federal, State and local law and regulation as well as with the guidelines found in the Defense Traffic Management Regulation (DTMR) and this Agreement. The forwarder fully understands its obligation to remain current in its knowledge of service standards. The forwarder accepts the Government's right to revoke approval, declare ineligible, non-use, or disqualify the carrier for unsatisfactory service for any operating deficiency, noncompliance with terms of this Agreement or terms of any negotiated agreements, tariffs, tenders, bills of lading or similar arrangements determining the relationship of the parties, or for the publication or assessment of unreasonable rates, charges, rules, descriptions, classifications, practices, or other unreasonable provisions of tariffs/tenders. Rules governing the Carrier Performance Program are found in MTMC Regulation 15–1, and Army Regulation 55–355, DTMR. If a forwarder is removed or disqualified for 6 months or more, it will have to be re-qualified.

b. Failure or nonperformance by the forwarder with any of the terms or conditions of service will constitute a breach of this Agreement. The Government reserves the right to disqualify the forwarder for unsatisfactory service until such time as the forwarder establishes to the satisfaction of DOD that the operating or other deficiency(s) has been corrected.

16. General Provisions. That the forwarder must have a valid Standard Carrier Alpha Code (SCAC) and use it on all DOD billing documents to identify the forwarder. When a company holding the appropriate authority has operating divisions each with its own unique SCAC, each such division is required to execute a separate agreement with MTMC governing the transportation of protected commodities.

17. Terms of the Agreement.

a. The terms of this Agreement will be applicable to each shipment.

b. This Agreement shall be effective from the date of acknowledgment by the Military Traffic Management Command, until terminated upon receipt of written notice by either party.

c. Nothing in this Agreement will be construed as a guarantee by the Government of any particular volume of traffic.

d. The forwarder agrees to immediately notify MTMC of any changes in ownership, in affiliations, executive officers, and/or board members, and forwarder name. Forwarder understands that failure to notify MTMC shall be grounds for immediate revocation of the forwarder's approval and their participation in the movement of DOD freight.

18. Additional Specialized Requirements. The terms of this Agreement will not prevent different or additional requirements with respect to negotiated agreements or added requirements for other types of service and/or commodities.

19. Inquiries. Inquiries may be referred to Commander, Military Traffic Management Command, Attention: MTIN–FF, 5611 Columbia Pike, Falls Church, VA 22041–5050.

20. Forwarder Acknowledgment and Acceptance.

a. The undersigned forwarder official, by affixing signature hereto, states that he has read and understands the general and specific terms and conditions of service outlined and agrees to provide service in accordance with such terms or conditions. Any information found to be falsely represented in the Qualification Form, the attachments or during the qualification procedures, to include additional requirements of this Agreement, shall be grounds for automatic revocation of this Agreement and immediate non-use of the forwarder, the affiliated companies, division and entities.

Appendix F to Part 619—Agreement Between the Military Traffic Management Command and Shipper Agents Governing the Transportation of General Commodities for and on Behalf of the U.S. Department of Defense

1. The undersigned, who is duly authorized and empowered to act on behalf of

_____

(name of shipper agent, typed or legibly printed)

a shipper agent, hereinafter referred to as the agent, as a prerequisite for consideration for participation in the transport of general commodities as an exempt shipper agent, for the U.S. Department of Defense (DOD), agree to comply with all requirements, terms and conditions as set forth in this Agreement. Noncompliance with any provision of this Agreement will be sufficient grounds for immediate revocation of the agent's privilege to participate in the movement of DOD freight. For the purpose of this Agreement, an exempt shipper agent is defined as a person or company who for compensation provides a service by acting as an intermodal intermediary handling truck or container load shipments. The agent also handles drayage on both ends of the movement and other services performed in a terminal area. The agent may not act in its capacity as a broker when charged with the responsibility of moving DOD freight shipments.

2. Approval and Revocation.

a. Agent understands that its initial approval and retention of approval are contingent upon establishing and maintaining, to MTMC's satisfaction, sufficient resources to support its proposed scope of operations and services. Sufficient resources include personnel, facilities, carriers with adequate equipment, and finances to handle the traffic anticipated by DOD/MTMC under the agent's proposed scope of operations in accordance with the service requirements of the shipper.

b. The agent understands that MTMC may revoke approval at any time upon discovery of grounds for ineligibility or disqualification. The agent further understands that it will not be authorized to participate in any traffic which requires a Transportation Protective Service.

c. In addition to the initial evaluation, the agent agrees that it will cooperate with MTMC follow-up evaluations at any time subsequent to signing this Agreement to confirm continued eligibility.

d. The agent agrees and certifies that neither the owners, company, corporate officials, nor any affiliation or subsidiary thereof are currently debarred or suspended, disqualified by a MTMC General Freight Board, or placed in non-use by MTMC from doing business with DOD.

3. Lawful Performance.

a. The agent agrees to comply with all applicable federal, state, municipal and other local laws and regulations. No fines, charges, or assessments for overloaded vehicles or

other violations of applicable laws and regulations will be passed to, or be paid by any agency of the Federal Government.

b. The agent agrees to keep current and on file a list of all carriers to be used in the transport of DOD freight shipments. This list will contain, as a minimum, the company's name, president/vice president's name, operating authority number, corporate office address, telephone number and a designated 24-hour on-call point of contact in the event of an accident or emergency situation. MTMC can direct agent not to use specific carriers in the movement of DOD freight shipments.

c. The agent further agrees and certifies that it will not use any carrier which has been debarred, suspended by the Government or which has been placed in non-use or disqualified by MTMC from doing business with the DOD for the movement of any DOD freight shipments.

4. Operations. The agent agrees and certifies that it is operating as a shipper agent as defined herein. If incorporated, evidence of incorporation, bearing the official seal of the state in which filed, Articles of Incorporation, listing all the officers of the corporation are attached and certified to be true, correct and current.

5. Insurance.

a. The agent agrees to maintain a minimum of $1,000,000 public liability insurance and $250,000 cargo insurance for loss and damage of Government freight. A copy of the certificate of insurance must be on file with MTMC, ATTN: MTIN-FF, prior to any performance of service by the agent.

b. The insurance must be carried in the name of the agent and will be in force at all times while this Agreement is in effect or until such time as the agent cancels all tenders. The agent agrees to ensure that the policies include a provision requiring the insurer to notify MTMC prior to any performance of service by the carrier. Changes, renewal and cancellation notices must also be sent to MTMC, 5611 Columbia Pike, Falls Church, Virginia 22041–5050, ATTN: MT-INFF. The Government will be given 30 days notice prior to any cancellation or material changes in insurance coverages.

c. The insurance underwriter must have a policyholder's rating in the Best's Insurance Guide, listed in the Fiscal Service Treasury Department Circular 570, Listing of Surety Companies. Self-insurance will not be accepted. 6. Performance Bond. Agent agrees to provide to MTMC with a Performance Bond. The bond secures performance and fulfillment of the agent's obligation. It will cover default, abandoned shipments, bankruptcy and re-procurement costs. The bond will not be utilized for operational problems such as late pick up or delivery, excessive transit time, refusals, no shows, improper/inadequate equipment or claims for lost or damaged cargo. The bond must be issued by a surety company listed in the Fiscal Service, Treasury Department Circular No. 570. The sum of the bond shall be no less than $100,000. The bond must be completed on the form provided by MTMC and will be continuous until cancelled. MTMC will be notified, in writing, 30 days in advance of any change or cancellation. A letter of intent by the surety company is required with the initial application. Upon MTMC approval agent will submit the Performance Bond before the Tender of Service will be accepted.

7. Safety.

a. The agent agrees not to use any carrier that has an "unsatisfactory" safety rating with the Federal Highway Administration, Department of Transportation, and if it is an intrastate motor carrier, with the appropriate state agency.

b. Shipments will be delivered in direct service without delay to the destination shown on the Government Bills of Lading unless consignee or consignor directs diversion of the shipment to a new or different destination. Deliveries will be made during the shipper's normal business hours.

c. The agent agrees not to divulge any information to unauthorized persons concerning the nature and movements of any shipment tendered to it.

d. The agent agrees to notify the consignor and consignee named by the Government bill of Lading (GBL) or Commercial Bill of Lading (CBL) of cargo loss, damage, or unusual delay. Information reported will include origin/destination, GBL/CBL number, shipping paper information, time and place of occurrence, and other pertinent details. Upon request, the agent agrees to ensure MTMC is furnished a copy of accident reports submitted to Department of Transportation on Form MCS 50–T (Property).

e. The agent agrees to have in place a company-wide safety management program. Agent safety program will comply with applicable Federal, State and local statutes or requirements. Safety programs at the company-wide or terminal level may be subject to evaluation by DOD representatives. The agent further agrees to permit unannounced safety inspections of its facilities, terminals, equipment, employees, and procedures by DOD civilian, military personnel, or DOD contract employees.

8. Reserved.

9. Equipment. The agent agrees to ensure equipment is spotted for loading at the time and place requested. The Government reserves the right to reject the utilization of any equipment placed for loading by the agent if it does not, upon inspection, meet specifications and requirements for the particular shipment involved (size, cube, cleanliness, mechanical condition, etc.).

10. Shipment. The agent agrees to provide, at no additional cost to the government, the status of any shipment within 24 hours after an inquiry is made. Further, the agent agrees to not divulge any information to unauthorized persons concerning the nature and movement of any DOD shipment.

11. Documentation.

a. Agent agrees to accept Government bills of lading on which freight charges will be paid by the Government, and will be bound by all terms and conditions stated thereon.

b. The agent agrees to comply with the provisions of documentation prelodging in effect at Military Ocean Terminals which cargo is consigned for further movement overseas. (Prelodging is the submission of advance shipment documents which identifies the shipment to the Military Ocean Terminal prior to arrival of the cargo at the terminal to permit preparation of the terminal documentation.) Instructions will be provided by the consignees to furnish certain data at least 24-hours in advance of cargo arrival at the terminal.

12. Loss & Damage. The agent agrees to be fully liable for delivery of all cargo in the same condition as received at origin, except loss or damage caused by act of God, public enemy act, omission of shipper, inherent vice or detrimental changes due to nature of commodity, or natural shrinkage. Agent agrees to settle promptly, claims for loss or damage. The agent also agrees to provide the status of any shipment tendered to them within 24-hours after an inquiry is made.

13. Standard Tender.

a. The agent agrees to comply with the preparation and filing instructions and applicable freight traffic rules publications issued by MTMC. The agent understands that MTMC will reject tenders not in compliance with these instructions.

b. Agent agrees to publish a street address where the company office is located in lieu of a post office box number. The Military Traffic Management Command must be advised of any change in address. Failure to do so is grounds to discontinue the use of the agent.

c. Agent understands that tenders inadvertently accepted and distributed for use and not in compliance with is agreement, the provisions contained in the Standard Tender of Freight Services (MT Form 364–R), or the applicable MTMC freight Traffic Rules Publication MFTRP No. 1A, and supplements thereof, will be subject to immediate removal or non-use until corrections are made. The issuing agent will be advised when tenders are removed under these circumstances.

14. Rates.

a. Agent agrees to transport Government shipments at its lowest effective charge named in the tender applicable on the commodity transported, whether or not the rate tender is referenced on the Government bill of lading.

b. The agent agrees to publish through rates guaranteed for at least 30 days. These rates must be filed with MTMC, HQ, Eastern Area, ATTN: MTE–IN, Bayonne, New Jersey 07002–5302. The agent must publish all rates, charges, and accessorial services on a "Department of Defense Standard Tender of Freight Services", MT Form 364–R and must comply with the tender preparation instructions. (Only services annotated with a charge in the tender will be paid by the shipper.)

c. The agent agrees to promptly refund all uncontested overcharges to the Government and authorizes the Government to deduct the amount of overcharges from any amount subsequently found to be due the agent.

d. The Government reserves the right to pursue administrative claims directly with agents under the Interstate Commerce Act or other authorities.

15. Carrier Performance.

a. Agent agrees that its performance, and standards of service will conform with its obligations under Federal, State and local law and regulation as well as with the guidelines found in the Defense Traffic Management Regulation (DTMR) and this

Agreement. The agent fully understands its obligation to remain current in its knowledge of service standards. The agent accepts the Government's right to revoke approval, declare ineligible, non-use, or disqualify the agent for unsatisfactory service for any operating deficiency, noncompliance with terms of this Agreement or terms of any negotiated agreements, tariffs, tenders, bills of lading or similar arrangements determining the relationship of the parties, or for the publication or assessment of unreasonable rates, charges, rules, descriptions, classifications, practices, or other unreasonable provisions of tariffs/tenders. Rules governing the Carrier Performance Program are found in MTMC Regulation 15–1, and Army Regulation 55–355, DTMR. If a agent is removed or disqualified for 6 months or more, it will have to be re-qualified.

b. Failure or nonperformance by the agent with any of the terms or conditions of service will constitute a breach of this Agreement. The Government reserves the right to disqualify the agent for unsatisfactory service until such time as the agent establishes to the satisfaction of DOD that the operating or other deficiency(s) has been corrected.

16. General Provisions. That the agent must agree to have a valid Standard Carrier Alpha Code (SCAC) and use it on all DOD billing documents to identify the agent. When a company holding the appropriate authority has operating divisions each with its own unique SCAC, each such division is required to execute a separate agreement with MTMC governing the transportation of protected commodities.

17. Terms of the Agreement.

a. The terms of this Agreement will be applicable to each shipment.

b. This Agreement shall be effective from the date of acknowledgment by the Military Traffic Management Command, until terminated upon receipt of written notice by either party.

c. Nothing in this Agreement will be construed as a guarantee by the Government of any particular volume of traffic.

18. Additional Specialized Requirements. The terms of this Agreement will not prevent different or additional requirements with respect to negotiated agreements or added requirements for other types of service and/or commodities.

19. Inquires may be referred to Commander, Military Traffic Management Command, Attention: MTIN–FF, 5611 Columbia Pike, Falls Church, VA 22041–5050.

20. Agent Acknowledgment and Acceptance.

a. The undersigned official, by affixing signature hereto, states that he has read and understands the general and specific terms and conditions of service outlined and agrees to provide service in accordance with such terms or conditions. Any information found to be falsely represented in the Qualification Form, the attachments or during the qualification procedures, to include additional requirements of this Agreement, shall be grounds for automatic revocation of this Agreement and immediate non-use of the agent, the affiliated companies, divisions and entities.

Agent's Acknowledge/Acceptance

I, _____

Department of Labor

Mine Safety and Health Administration

30 CFR Parts 56 and 57

Safety Standards for Explosives at Metal and Nonmetal Mines; Extension of Partial Administrative Stay of Certain Provisions of Final Rule

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Parts 56 and 57

RIN 1219-AA17

Safety Standards for Explosives at Metal and Nonmetal Mines

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Extension of partial administrative stay of certain provisions of final rule.

SUMMARY: The Mine Safety and Health Administration (MSHA) is extending the partial administrative stay of several provisions of the January 18, 1991 (56 FR 2070), final rule on safety standards for explosives at metal and nonmetal mines until July 1, 1993.

EFFECTIVE DATE: The following provisions found in 30 CFR parts 56 and 57 are stayed until July 1, 1993: §§ 56.6000 and 57.6000, the first sentence in §§ 56.6130(b) and 57.6130(b), §§ 56.6131(a)(1) and 57.6131(a)(1), Appendix I to Subpart E, §§ 56.6202(a)(1) and 57.6202(a)(1), §§ 56.6304(b) and 57.6304(b), §§ 56.6306 and 57.6306, §§ 56.6501(a) and 57.6501(a), §§ 56.6902(b) and 57.6902(b), and §§ 56.6903 and 57.6903.

The following provisions found in 30 CFR parts 56 and 57 continue in effect until July 1, 1993: §§ 56.6140 and 57.6140, §§ 56.6220 and 57.6220, §§ 56.6320 and 57.6320, §§ 56.6330 and 57.6330, §§ 56.6331 and 57.6331, § 57.6375 and § 57.6382.

FOR FURTHER INFORMATION CONTACT: Patricia W. Silvey, Director, Office of Standards, Regulations and Variances, MSHA, (703) 235–1910.

SUPPLEMENTARY INFORMATION: On January 18, 1991, MSHA published a final rule in the **Federal Register**, (56 FR 2070), revising its safety standards for explosives at metal and nonmetal mines. After issuing several administrative stays of the effective date of the final rule, MSHA, on September 12, 1991 (56 FR 46500), issued a one-year, partial administrative stay of certain provisions of the final rule in order to conduct supplemental rulemaking restricted to those issues raised by the stayed provisions. The administrative stay was scheduled to expire on October 1, 1992. The remaining standards of the January 18, 1991, final rule became effective on November 1, 1991.

The Agency needs additional time in order to complete the rulemaking process. MSHA will issue a proposed rule addressing these provisions in the near future.

This document is issued under 30 U.S.C. 811.

Dated: September 16, 1992.

William J. Tattersall,

Assistant Secretary for Mine Safety and Health.

[Federal Acquisition Circular 90–13]

Federal Acquisition Regulation; Introduction of Miscellaneous Amendments

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Summary presentation of final and interim rules with request for comment, and technical amendments.

SUMMARY: This document introduces the documents set forth below which comprise Federal Acquisition Circular (FAC) 90–13. The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council are issuing FAC 90–13 to amend the Federal Acquisition Regulation (FAR) to implement changes in the following subject areas:

Item and subject	FAR case	DAR case	Analyst
I. Section 6050M of the Tax Reform Act of 1986.	91–52	91–007	Klein.
II. Small Purchase Limitation.	91–19	90–306	Scott.
III. Award Without Discussions.	91–29	90–302	Scott.
IV. Commercial Pricing Certificate.	91–25	90–304	Olson.
V. Davis-Bacon Act Revisions.	91–14	91–1	O'Neill.
VI. Prohibition on Acquisition of Supplies or Services from Iraq.	91–7	91–002	Loeb.
VII. Independent Research & Development and Bid and Proposal Costs.	91–37/ 91–77	90–313/ 91–307F	Olson.
VIII. Prompt Payment for Fresh or Frozen Fish.	91–79	91–323	Olson.
IX. Disclosure Requirement Relating to Subcontractors.	91–16	90–311	Loeb.

DATES: For effective dates and comment dates, see separate documents which follow. Please cite FAC 90–13 and the appropriate FAR case number(s) in all correspondence related to this and the following documents.

FOR FURTHER INFORMATION CONTACT: The analyst whose name appears in relation to each FAR case or subject area. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405, (202) 501–4755. Please cite FAC 90–13 and FAR case number(s).

SUPPLEMENTARY INFORMATION: Federal Acquisition Circular 90–13 amends the Federal Acquisition Regulation (FAR) as specified below:

Item I—Section 6050M of the Tax Reform Act of 1986 (FAR Case 91–52)

This is an interim rule revising FAR Subpart 4.9, Information Reporting to the Internal Revenue Service, to ensure the collection and reporting of the Taxpayer Identification Number (TIN) for modifications of contracts entered into before January 1, 1989. In addition, the subpart has been rearranged for clarification and the provision at 52.204–3, Taxpayer Identification, has been revised to update a reference.

Item II—Small Purchase Limitation (FAR Case 91–19)

This finalizes, without further change, the interim rule published as Item II of FAC 90–7. The rule implemented section 806 of the FY 1991 National Defense Authorization Act by revising: (1) FAR 5.101(a)(1) and 5.205(d)(1) to eliminate the requirement to synopsize contract actions between $10,000 and $25,000; (2) FAR 13.104(g) to refer to 5.101(a)(2) for public display requirements; (3) FAR 19.702 and 19.708 to refer to the small purchase limitation instead of $10,000; and the prescription for use of the clause at FAR 52.219–8 so that the clause is no longer used in small purchases.

Item III—Award Without Discussions (FAR Case 91–29)

The interim rule published as Item IV of FAC 90–7 is converted to a final rule with one amendment adding a sentence to paragraph (c) of Alternate II of the clause at 52.215–16 to inform offerors that they should submit their best offers initially.

Item IV—Commercial Pricing Certificate (FAR Case 91–25)

This finalizes without further change the interim rule published as Item V of FAC 90–7. The rule revised FAR 15.813 and the clause at 52.215–32 to remove the requirement for contractors under Department of Defense, National Aeronautics and Space Administration, and Coast Guard contracts to certify that the price offered to the Government for parts or components does not exceed the lowest commercial price at which the contractor sold those parts to the public.

Item V—Davis-Bacon Act Revisions (FAR Case 91–14)

This final rule revises FAR Subpart 22.4 and the associated clauses in subpart 52.2 because of changes in the Department of Labor regulations at 29 CFR parts 1 and 5 governing the use of semi-skilled "helpers" on federally financed and assisted construction contracts subject to Davis-Bacon and related acts.

Item VI—Prohibition on Acquisition of Supplies or Services From Iraq (FAR Case 91–7)

This amends and finalizes the interim rule published as Item II of FAC 90–4. The rule implements prohibitions imposed by Executive Orders 12722 and 12724.

Item VII—Independent Research and Development and Bid and Proposal Costs (FAR Cases 91–37 and 91–77)

This final rule makes substantive changes in the treatment of independent research and development and bid and proposal costs. It implements both section 824 of the National Defense Authorization Act for Fiscal Year 1991 (Pub. L. 101–510) and section 802 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Pub. L. 102–190).

Item VIII—Prompt Payment for Fresh or Frozen Fish (FAR Case 91–79)

This final rule revises FAR 32.905 and 52.232–25 to provide for prompt payment of contracts for fresh or frozen fish, *i.e.*, as close as possible to, but not later than, the seventh day after delivery.

Item IX—Disclosure Requirements Relating to Subcontractors (FAR Case 91–16)

This amends and finalizes the interim rule published as Item VI of FAC 90–5. The rule requires that first-tier subcontractors disclose to the prime contractor whether they are debarred, suspended, or proposed for debarment.

Dated: September 17, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy

Federal Acquisition Circular

Federal Acquisition Circular (FAC) 90–13 is issued under the authority of the Secretary of Defense, the Administrator of General Services, and the Administrator for the National Aeronautics and Space Administration.

Unless otherwise specified, all Federal Acquisition Regulation (FAR) and other directive material contained in FAC 90–13 is effective November 23,

1992, except Items I, VII, and VIII which are effective September 23, 1992. In Item VII, section 31.205–18(c)(1)(i) was effective November 5, 1990.

Dated: September 12, 1992.

Eleanor R. Spector,

Director of Defense Procurement, Department of Defense.

Dated: September 17, 1992.

Richard H. Hopf, III,

Associate Administrator for Acquisition Policy, General Services Administration.

Dated: September 11, 1992.

Don G. Bush,

Assistant Administrator for Procurement, NASA.

48 CFR Parts 4 and 52

[FAC 90–13; FAR Case 91–52; Item I]

Federal Acquisition Regulation; Section 6050M of the Tax Reform Act of 1986

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Interim rule with request for comment.

SUMMARY: The Civilian Agency Acquisition Council (CAAC) and the Defense Acquisition Regulations Council (DARC) have agreed on an interim rule revising subpart 4.9, Information Reporting to the Internal Revenue Service, to ensure the collection and reporting of the Taxpayer Identification Number (TIN) for certain contract modifications occurring on or after April 1, 1990, when the initial contract was entered into before January 1, 1989. In addition, the subpart has been rearranged for clarification and the provision at 52.204–3, Taxpayer Identification, has been revised to update a reference. When the IRS issued its final regulations implementing section 6050M of the Tax Reform Act of 1986 (Pub. L. 99–514), the reporting requirements included the requirement to report certain modifications to contracts that were awarded before January 1, 1989. The Office of Federal Procurement Policy requested that the CAAC and the DARC consider revising the FAR accordingly.

DATES: *Effective Date*: September 24, 1992.

Comment Date: Comments should be submitted to the FAR Secretariat at the address shown below on or before November 23, 1992 to be considered in the formulation of a final rule.

ADDRESSES: Interested parties should submit written comments to: General Services Administration, FAR Secretariat (VRS), 18th & F Streets NW., room 4041, Attn: Ms. Deloris Baker, Washington, DC 20405.

Please cite FAC 90–13, FAR case 91–52 in all correspondence related to this case.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Klein at (202) 501–3775 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–13, FAR Case 91–52.

SUPPLEMENTARY INFORMATION:

A. Background

Section 6050M of title 26, United States Code, requires heads of Federal executive agencies to report certain contract information to the IRS. The information returns filed under section 6050M are used as a source of information to collect delinquent Federal tax liabilities of persons who enter into contracts with Federal executive agencies.

On December 6, 1989, the IRS published regulations that implement section 6050M of the Tax Reform Act of 1986 (Public Law 99–514). The regulations apply to Federal executive agencies' contracts entered into on or after January 1, 1989, except that, with respect to a basic or initial contract entered into before January 1, 1989, the regulations do not apply to an increase contract action treated as a new contract if the increase occurs before April 1, 1990, or if the increase is not in excess of $50,000. The information required to be reported for contract actions over $25,000 includes name, address, and TIN of the contractor; name and TIN of the common parent (if any); date of the contract action; amount obligated on the contract; and duration of the contract.

The Office of Federal Procurement Policy has requested that the FAR be revised to ensure that agency reporting requirements include the requirement to report certain modifications to contracts that were awarded before January 1, 1989.

B. Regulatory Flexibility Act

This interim rule is not expected to have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because all taxpayers are required to have a TIN, and this rule merely requests that contractors provide that number for certain modifications. An Initial Regulatory Flexibility Analysis has, therefore, not been performed. Comments are invited from small businesses and other interested parties. Comments from small entities concerning the affected FAR subpart will also be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite FAC 90–13 (FAR Case 91–52) in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96–511) applies because the interim rule increases the existing paperwork burden. Accordingly, a request for approval of a revised information collection requirement concerning 9000–0097, Information Reporting to the Internal Revenue Service (IRS) (Taxpayer Identification Number), is being submitted to the Office of Management and Budget under 44 U.S.C. 3501, *et seq.* Public comments concerning this request will be invited through a subsequent **Federal Register** notice.

D. Determination to Issue an Interim Rule

A determination has been made under the authority of the Secretary of Defense (DOD), the Administrator of General Services (GSA), and the Administrator of the National Aeronautics and Space Administration (NASA) that reasons exist to promulgate this interim rule without prior opportunity for public comment. This action is necessary because publication of IRS regulations, effective January 1, 1989, implementing section 6050M of the Tax Reform Act of 1986 (Pub. L. 99–514) (see 54 FR 50367, December 6, 1989), necessitates a revision to the FAR to ensure the reporting of certain contract modifications occurring on or after April 1, 1990, when the initial contract was entered into before January 1, 1989. Pursuant to Public Law 98–577 and FAR 1.501, public comments received in response to this interim rule will be considered in formulating a final rule.

List of Subjects in 48 CFR Parts 4 and 52

Government procurement.

Dated: September 17, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 4 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 4 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 4—ADMINISTRATIVE MATTERS

2. Subpart 4.9, consisting of sections 4.900 through 4.904, is revised to read as follows:

Subpart 4.9—Information Reporting to the Internal Revenue Service

Sec.
4.900 Scope of subpart.
4.901 Definitions.
4.902 Contract information.
4.903 Payment information.
4.904 Solicitation provision.

4.900 Scope of subpart.

This subpart provides policies and procedures applicable to reporting contract and payment information to the Internal Revenue Service (IRS).

4.901 Definitions.

Common parent, as used in this subpart, means that corporate entity that owns or controls an affiliated group of corporations that files its Federal income tax returns on a consolidated basis, and of which the offeror is a member.

Corporate status, as used in this subpart, means a designation as to whether the offeror is a corporate entity, an unincorporated entity (*e.g.*, sole proprietorship or partnership), or a corporation providing medical and health care services.

Taxpayer Identification Number (TIN), as used in this subpart, means the number required by the IRS to be used by the offeror in reporting income tax and other returns.

4.902 Contract information.

(a) 26 U.S.C. 6050M, as implemented in 26 CFR, requires heads of Federal executive agencies to report certain information to the IRS.

(b) (1) The required information applies to contract modifications—

(i) Increasing the amount of a contract awarded before January 1, 1989, by $50,000 or more; and

(ii) Entered into on or after April 1, 1990.

(2) The reporting requirement also applies to certain contracts and modifications thereto in excess of $25,000 entered into on or after January 1, 1989.

(c) The information to report is—

(1) Name, address, and the Taxpayer Identification Number (TIN) of contractor;

(2) Name and TIN of common parent (if any);

(3) Date of the contract action;

(4) Amount obligated on the contract action; and

(5) Estimated contract completion date.

(d) Transmit the information to the IRS through the Federal Procurement Data System (see subpart 4.6 and implementing instructions).

4.903 Payment information.

(a) 26 U.S.C. 6041 and 6041A, as implemented in 26 CFR, in part, require payors, including Federal Government agencies, to report to the IRS payments made to certain contractors.

(b) The following payments are exempt from this reporting requirement:

(1) Payments to corporations. However, payments to corporations providing medical and health care services or engaged in the billing and collecting of payments for such services are not exempted.

(2) Payments for bills for merchandise, telegrams, telephone, freight, storage, and similar charges.

(3) Payments of income required to be reported on an IRS Form W–2 (*e.g.*, contracts for personal services).

(4) Payments to a hospital or extended care facility described in 26 CFR 501(c)(3) that is exempt from taxation under 26 CFR 501(a).

(5) Payments to a hospital or extended care facility owned and operated by the United States, a state, the District of Columbia, a possession of the United States, or a political subdivision, agency, or instrumentality of any of the foregoing.

(6) Payments for any contract with a state, the District of Columbia, a possession of the United States, or a political subdivision, agency, or instrumentality of any of the foregoing.

(c) The following information is required to provide reports to the IRS:

(1) Name, address, and TIN of contractor.

(2) Corporate status (see 4.901).

(d) Transmit to paying offices the information specified in 4.203.

4.904 Solicitation provision.

The contracting officer shall insert the provision at 52.204–3, Taxpayer Identification, in solicitations, unless the TIN of each offeror has previously been obtained and is known.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

52.204–3 [Amended]

3. Section 52.204–3 is amended in the provision heading by removing the date "(SEP 1989)" and inserting in its place "(SEP 1992)"; in paragraph (b) by removing in the first sentence the words "The offeror is" and inserting in their place "All offerors are"; and removing in the second sentence the reference "4.902(a)" and inserting in its place "FAR 4.903".

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 5, 13, and 19

[FAC 90–13; FAR Case 91–19; Item II]

RIN 9000–AE53

Federal Acquisition Regulation; Small Purchase Limitation

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: This finalizes without further change the interim rule published as Item II of FAC 90–7. That rule changed FAR parts 5, 13, and 19. In FAR 5.101(a), the requirement to synopsize contract actions between $10,000 and $25,000, if there is not a reasonable expectation that at least two offers will be received, is eliminated. In FAR 5.205(d)(1), the requirement to synopsize proposed architect-engineer contract actions for which the total fee is expected to be between $10,000 and $25,000, when there is not a reasonable expectation that at least two offers will be received, is eliminated. FAR 13.104(g) is changed to refer to FAR 5.101(a)(2) for public display requirements. FAR 19.702 is changed to refer to the "small purchase limitation in 13.000" rather than "$10,000." The dollar threshold in the prescription at FAR 19.708 for use of the clause at 52.219–8, Utilization of Small Business Concerns and Small Disadvantaged Business Concerns, is changed from "$10,000" to "the small purchase limitation in 13.000."

EFFECTIVE DATE: November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Shirley Scott at (202) 501–0168 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4041, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–13, FAR Case 91–19.

SUPPLEMENTARY INFORMATION:

A. Background

These changes resulted from the enactment of the Fiscal Year 1991 Defense Authorization Act (Public Law 101–510) on November 5, 1990. Section 806 of that Act amended the Office of Federal Procurement Policy Act, the Small Business Act, the Federal Property and Administrative Services Act of 1949, and 10 U.S.C. 2304(g) to provide a uniform small purchase threshold for Federal-wide use.

The interim rule was published in the **Federal Register** on August 22, 1991, at 56 FR 41730. Three public comments were received; one a no comment, the other two concurred in the changes. As a result, the interim rule is adopted as a final rule without change.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the rule provides a uniform small purchase threshold for Government-wide use. No comments were received on the impact of this rule on small entities during the public comment period.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping information collection requirements or collection of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 14, 15, and 52

[FAC 90–13; FAR Case 91–29; Item III]

RIN 9000–AE51

Federal Acquisition Regulation; Award Without Discussions

AGENCY: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule amending the interim rule that was published in the **Federal Register** on August 22, 1991 (56 FR 41732). The final rule amends FAR parts 14, 15, and 52 to require that solicitations include a statement of the significant evaluation factors and subfactors (including non-cost and non-price factors) and to require that DOD, NASA, and Coast Guard solicitations for competitive proposals indicate whether award will be made without discussions with offerors.

EFFECTIVE DATE: November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Shirley Scott at (202) 501–0168 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–13, FAR case 91–29.

SUPPLEMENTARY INFORMATION:

A. Background

This final rule implements section 802 of the Fiscal Year 1991 Defense Authorization Act (Pub. L. 101–510). The Act amended 10 U.S.C. 2305 to require solicitations for competitive proposals to state whether the Government intends to make award without discussion with offerors. The Act also requires that solicitations include the significant evaluation factors and subfactors (including non-cost and non-price-related factors).

This rule was published as an interim rule on August 22, 1991, at 56 FR 41732. Two responses were received; one a no comment, the other requested a word change. The suggested change was not made because it was believed the change would be confusing to industry and Government procurement activities. However, the interim rule was amended to add a sentence to Alternate II of the clause at 52.215–16 to inform offerors that they should offer their best terms initially, notwithstanding the Government's intent to hold discussions.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, applies to this final rule and a Final Regulatory Flexibility Analysis has been performed. A copy of the analysis may be obtained from the FAR Secretariat.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 14, 15, and 52

Government procurement.

Dated: September 17, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy

Interim Rule Adopted as Final with One Change

Accordingly, the interim rule amending 48 CFR parts 14, 15, and 52, which was published on August 22, 1991, at 56 FR 41732, is adopted as final with one change.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

1. The authority citation for 48 CFR part 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 52.215–16 is amended in Alternate II by revising the date, and adding a second sentence to paragraph (c) to read as follows:

52.215–16 Contract Award.

* * * * *

Contract Award (July 1990)

* * * * *

Alternate II (Nov. 1992). * * *

(c) * * * However, each initial offer should contain the offeror's best terms from a cost or price and technical standpoint.

* * * * *

48 CFR Parts 15 and 52

[FAC 90-13; FAR Case 91-25; Item IV]

RIN 9000-AE11

Federal Acquisition Regulation; Commercial Pricing Certificate

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to convert the interim rule published in the **Federal Register** on August 22, 1991, at 56 FR 41734 to a final rule without further change. The rule revised FAR 15.813 and the clause at 52.215-32 to remove the requirement for contractors under Department of Defense, National Aeronautics and Space Administration, and Coast Guard contracts to certify that the price offered to the Government for parts or components does not exceed the lowest commercial price at which the contractor sold those parts to the public.

EFFECTIVE DATE: November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy Olson at (202) 501-3221 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405, (202) 501-4755. Please cite FAC 90-13, FAR Case 91-25.

SUPPLEMENTARY INFORMATION:

A. Background

These revisions were based on section 804 of the Fiscal Year 1991 DOD Authorization Act (Pub. L. 101-510), which repealed 10 U.S.C. 2323, which required a certification from contractors that the price offered to the Government for parts of components does not exceed the lowest commercial price at which the offeror sold those parts to the public. The similar provision at 41 U.S.C. 253e (for civilian agencies) has not been repealed.

FAC 90-7, Item V, published August 22, 1991, included these revisions as an interim rule with respect for comment. Two comment letters were received and analyzed; however, they did not result in any changes to the interim rule.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because most contracts awarded to small entities are awarded on a full and open competitive, fixed-price basis and the commercial pricing certificate policies do not apply.

C. Paperwork Reduction Act

The Paperwork Reduction Act (Pub. L. 96-511) applies because the final rule contains information collection requirements. Accordingly, a request for a revision to an information collection requirements concerning OMB Control Number 9000-0105, Commercial Pricing Certificate, was submitted to the Office of Management and Budget under 44 U.S.C. 3501, *et seq.* Approval was granted on July 8, 1991. Public comments concerning this request were invited through a subsequent **Federal Register** notice published on May 31, 1991.

48 CFR Parts 22 and 52

[FAC 90-13; FAR Case 91-14; Item V]

Federal Acquisition Regulation; Davis-Bacon Act Revisions

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule to implement changes necessitated by the revised Department of Labor (DOL) regulations at 29 CFR parts 1 and 5 that allow the expanded use of semi-skilled "helpers" on federally financed and assisted construction contracts subject to the Davis-Bacon and related acts.

EFFECTIVE DATE: November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. John O'Neill at (202) 501-3856 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501-4755. Please cite FAC 90-13, FAR case 91-14.

SUPPLEMENTARY INFORMATION:

A. Background

On December 4, 1990, the Department of Labor (DOL) published in the **Federal Register** (55 FR 50148) a notice establishing an effective date of February 4, 1991, for revised final Davis-Bacon regulations, 29 CFR parts 1 and 5. On June 26, 1992, the DOL published in the **Federal Register** (55 FR 28776) a revision to delete a provision invalidated by the U.S. Court of Appeals for the District of Columbia in *Building & Construction Trades Department, AFL CIO* v. *Martin*, Civ. No. 90-5345 (D.C. Cir. April 21, 1992). The revised DOL regulations allow the expanded use of helpers on Federal and federally assisted construction contracts subject to the Davis-Bacon and related acts. FAR Subparts 22.4 and 52.2 are amended to conform to the revised DOL regulations.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the

meaning of FAR 1.501 and Public Law 98–577, and publication for public comments is not required. This rule merely conforms the FAR to regulations published by the DOL. Therefore, the Regulatory Flexibility Act does not apply to this rulemaking. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–13, FAR case 91–14), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.* Information collection requirements contained in the DOL's rule were approved under OMB Control Number 1215–0140.

List of Subjects in 48 CFR Parts 22 and 52

Government procurement.

Dated: September 17, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 22 and 52 are amended as set forth below:

PART 22—APPLICATION OF LABOR LAWS TO GOVERNMENT ACQUISITIONS

1. The authority citation for 48 CFR parts 22 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

2. Section 22.401 is amended by revising paragraph (b) of the definition "Laborers or mechanics" to read as follows:

§ 22.401 Definitions.

* * * * *

Laborers or mechanics. * * *

(b) Apprentices, trainees, helpers, and, in the case of contracts subject to the Contract Work Hours and Safety Standards Act, watchmen and guards. The terms "apprentice," "trainee," and "helper" are defined as follows:

(1) *Apprentice* means (i) a person employed and individually registered in a *bona fide* apprenticeship program registered with the U.S. Department of Labor, Employment and Training Administration, Bureau of Apprenticeship and Training, or with a State Apprenticeship Agency recognized by the Bureau, or (ii) a person in the first 90 days of probationary employment as an apprentice in such an apprenticeship program, who is not individually registered in the program, but who has been certified by the Bureau of Apprenticeship and Training or a State Apprenticeship Agency (where appropriate) to be eligible for probationary employment as an apprentice.

(2) *Trainee* means a person registered and receiving on-the-job training in a construction occupation under a program which has been approved in advance by the U.S. Department of Labor, Employment and Training Administration, as meeting its standards for on-the-job training programs and which has been so certified by the Administration.

(3) A *helper* is a semi-skilled worker (rather than a skilled journeyman mechanic) who works under the direction of and assists a journeyman. Under the journeyman's direction and supervision, the helper performs a variety of duties to assist the journeyman such as preparing, carrying, and furnishing materials, tools, equipment, and supplies and maintaining them in order; cleaning and preparing work areas; lifting, positioning, and holding materials or tools; and other related semi-skilled tasks as directed by the journeyman. A helper may use tools of the trade at and under the direction and supervision of the journeyman. The particular duties performed by a helper vary according to area practice.

* * * * *

3. Section 22.406–3 is amended by revising paragraph (b)(1) and adding paragraph (b)(4) to read as follows:

§ 22.406–3 Additional classifications.

* * * * *

(b) * * *

(1) The classification is appropriate and, except with respect to helpers as defined in section 22.401, the work to be performed by the classification is not performed by any classification contained in the applicable wage determination.

* * * * *

(4) With respect to helpers, as defined in section 22.401, such a classification prevails in the area in which the work is performed.

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

4. Section 52.222–6 is amended by—

(a) Revising the date in the clause heading to read "(NOV 1992)";

(b) Inserting in the first sentence of paragraph (b)(1) after the word "mechanics" the phrase, "including helpers.";

(c) Removing in the beginning of paragraph (b)(1)(i) the word "The" and inserting "Except with respect to helpers, as defined in section 22.401 of the Federal Acquisition Regulation, the" in its place; and

(d) Adding paragraph (b)(2)(iv) to read as follows:

52.222–6 Davis-Bacon Act.

* * * * *

Davis-Bacon Act (Nov 1992)

* * * * *

(b) (1) * * *

(iv) With respect to helpers, such a classification prevails in the area in which the work is performed.

[FAC 90–13; FAR Case 91–7; Item VI]

RIN 9000–AE37

Federal Acquisition Regulation; Prohibition on Acquisition of Supplies or Services From Iraq

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The interim rule published in the **Federal Register** (56 FR 15142, April 15, 1991) as Item II of FAC 90–4 is converted to a final rule with the addition of one cross reference in FAR 25.702(b) to 31 CFR part 575. Appendices at 31 CFR part 575 list individuals and organizations determined to be specially designated nationals of the Government of Iraq and merchant vessels registered, owned, or controlled by the Government of Iraq or by persons acting directly on behalf of the Government of Iraq.

EFFECTIVE DATE: November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Loeb at (202) 501–4547 in reference to this FAR case. For general information, contact the FAR

Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–13, FAR case 91–7.

SUPPLEMENTARY INFORMATION:

A. Background

An interim rule was published in the **Federal Register** (56 FR 15142) on April 15, 1991, as Item II in FAC 90–4. As a result of comments received on the interim rule, the rule is amended to include a cross reference in FAR 25.702(b) to 31 CFR part 575, Iraqi Sanctions Regulations, which are issued by the Treasury Department to implement Executive Orders No. 12722 and 12724. The regulations, at 31 CFR part 575, include appendices listing individuals and organizations determined to be specially designated nationals of the Government of Iraq and merchant vessels registered, owned, or controlled by the Government of Iraq or by persons acting directly on behalf of the Government of Iraq. These appendices were published in the **Federal Register** on April 3, 1991.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because it applies primarily to acquisitions from the Government of Iraq, whose supplies or services cannot be lawfully imported into the United States.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 25

Government procurement.

Dated: September 17, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Interim Rule Adopted as Final with One Change

At 57 FR 20372, May 12, 1992, in FAC 90–11, a final rule was issued which amended FAR 25.702 by removing paragraph (b) and redesignating (c) as (b), and FAR 52.225–11 was amended by removing paragraph (b) and redesignating paragraphs (c) and (d) as (b) and (c). Consequently, 25.702(c), which was added by the interim rule in FAC 90–4, is now made final as paragraph (b) and amended, and 52.225–11(c) is made final as paragraph (b). Accordingly, the interim rule amending 48 CFR parts 25 and 52, which was published at 56 FR 15142 on April 15, 1991, is adopted as final with one change.

PART 25—FOREIGN ACQUISITION

1. The authority citation for 48 CFR part 25 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

25.702 [Amended]

2. In section 25.702, paragraph (b) is amended by inserting the parenthetical reference "(31 CFR 575)" at the end of the first sentence.

Federal Acquisition Regulation; Independent Research and Development and Bid and Proposal Costs

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on revisions of the cost principle at FAR 31.205–18, Independent research and development and bid and proposal costs, to implement section 824 of the National Defense Authorization Act for Fiscal Year 1991 (Pub. L. 101–510) and section 802 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Pub. L. 102–190).

EFFECTIVE DATE: September 24, 1992, except 31.205–18(c)(1)(i), which was effective November 5, 1990.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy Olson at (202) 501–3221 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–13, FAR cases 91–37 and 91–77.

SUPPLEMENTARY INFORMATION:

A. Background

On August 15, 1991, a proposed rule to implement statutory thresholds set forth in section 824 of the National Defense Authorization Act for Fiscal Year 1991 (Pub. L. 101–510) was published in the **Federal Register** (56 FR 40714). As a result of public comments on the proposed rule and subsequent legislation affecting the treatment of IR&D/B&P costs, the rule's unallowability provision at FAR 31.205–18(c)(1)(iv) and the minor changes to subpart 42.10 are withdrawn. The rule is being finalized by amending the thresholds in FAR 31.205–18(c)(1), which addresses the negotiation of mandatory advance agreements on allowable independent research and development/bid and proposal (IR&D/B&P) costs. The thresholds in FAR 31.205–18(c)(1)(i)(A) and in 31.205–18(c)(1)(i)(E) are increased from $5,400,000 to $7,000,000. In addition, the thresholds in FAR 31.205–18(c)(1)(i)(B) are increased from $675,000 to $700,000. These threshold changes are effective November 5, 1990, until contractor's fiscal years beginning on or after October 1, 1992, after which time the requirement for negotiation of advance agreements will no longer exist. Elimination of the requirement for negotiation of advance agreements is a result of section 802 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Pub. L. 102–190). The rule is also being finalized by amending FAR 31.205–18(c) to eliminate the formula method for establishing IR&D/B&P ceilings for companies not required to negotiate advance agreements. Added language provides that IR&D/B&P costs for such companies are allowable to the extent that they are allocable and reasonable.

On April 3, 1992, a proposed rule to implement section 802 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Pub. L. 102–190) was published in the **Federal Register** (57 FR 11550). This Act made significant changes in the treatment of IR&D/B&P costs and eliminated most of the detailed administrative procedures that are currently in place to control the amount of IR&D/B&P reimbursements to contractors. As a result of public comments received in response to this proposed rule, several changes have been made in the final rule. Several

changes were made in the definitions in FAR 31.205–18(a), including revising the definition of "covered segment" to exclude non-covered segments from the requirements to provide financial and technical information to support IR&D/B&P costs as set forth in FAR 31.205–18(c)(2)(ii); deleting the word "covered" in referring to contractor segments in the definition of "major contractor"; and clarifying the definitions of "bid and proposal (B&P) costs" and "independent research and development (IR&D)." The introductory sentence in FAR 31.205–18(c)(2) has been revised to provide civilian agencies the latitude to establish IR&D/B&P reimbursement procedures more suited to the contracting environment of civilian agencies without the burden of obtaining a FAR deviation to do so. Absent a legislative basis for the 75 percent limitation of payment for contractor failure to submit financial and technical information to support their IR&D/B&P costs, as published in the proposed rule, the last two sentences of FAR 31.205–18(c)(2)(ii) have been deleted. In FAR 31.205–18(e), the term "arrangement" has been substituted for the term "agreement" wherever it appeared in the proposed rule to avoid confusion with the meaning of "cooperative agreement" as it is used in the Federal Grant and Cooperative Agreement Act of 1977 (Pub. L. 95–224). The specific statutory authority for the Defense Advanced Research Projects Agency has been added.

For purposes of implementing FAR 31.205–18(c)(2)(i)(C)(2), the following rates of inflation (price escalation indices for Research, Development, Test & Evaluation (RDT&E) account, Total Obligation Authority (TOA)), issued by the Department of Defense Comptroller on January 8, 1992, shall be used for forward pricing agreements and final indirect cost determinations effective October 1, 1992. These rates of inflation shall remain in effect until superseded by the next publication, which is anticipated in January 1993. For fiscal years beyond 1997, use 3.2 percent.

Fiscal year	Annual percentage rate
1992	3.2
1993	3.3
1994	3.3
1995	3.2
1996	3.2
1997	3.2

B. Regulatory Flexibility Act

The final rule will have a significant favorable economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because the changes eliminate the formula method currently prescribed by the FAR which limits the total amount of allowable IR&D/B&P costs for smaller companies. Under the final rule, IR&D/B&P costs incurred by non-major contractors will be fully allowable on contracts to the extent that they are allocable and reasonable. A Final Regulatory Flexibility Analysis (FRFA) has been performed. A copy of the FRFA has been submitted to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the analysis may be obtained from Mr. Jeremy Olson (202) 501–3221. No public comments addressing the Regulatory Flexibility statement, published with the proposed rules in the **Federal Register** on August 15, 1991 (56 FR 40714), and on April 3, 1992 (57 FR 11550), were received.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 31 and 42

Government procurement.

Dated September 17, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 31 and 42 are amended as set forth below:

1. The authority citation for 48 CFR parts 31 and 42 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 31—CONTRACT COST PRINCIPLES AND PROCEDURES

2. Section 31.205–18 is revised to read as follows:

31.205–18 Independent research and development and bid and proposal costs.

(a) *Definitions. Applied research,* as used in this subsection, means that effort which (1) normally follows basic research, but may not be severable from the related basic research, (2) attempts to determine and exploit the potential of scientific discoveries or improvements in technology, materials, processes, methods, devices, or techniques, and (3) attempts to advance the state of the art. Applied research does not include efforts whose principal aim is design, development, or test of specific items or services to be considered for sale; these efforts are within the definition of the term *development,* defined in this subsection.

Basic research, as used in this subsection, means that research which is directed toward increase of knowledge in science. The primary aim of basic research is a fuiler knowledge or understanding of the subject under study, rather than any practical application thereof.

Bid and proposal (B&P) costs, as used in this subsection, means the costs incurred in preparing, submitting, and supporting bids and proposals (whether or not solicited) on potential Government or non-Government contracts. The term does not include the costs of effort sponsored by a grant or cooperative agreement, or required in the performance of a contract.

Company, as used in this subsection, means all divisions, subsidiaries, and affiliates of the contractor under common control.

Contractor, as used in paragraph (c)(2) of this subsection, includes all divisions, subsidiaries, and affiliates under common control.

Covered contract, as used in paragraph (c)(2) of this subsection, means a prime contract entered into by a Government agency for an amount more than $100,000, except for a fixed-price contract without cost incentives. It also includes a subcontract for an amount more than $100,000, except for a fixed-price subcontract without cost incentives under such a prime contract.

Covered segment, as used in paragraph (c)(2) of this subsection, means a product division of the contractor that allocated more than $1,000,000 in IR&D/B&P costs to covered contracts during the preceding fiscal year. In the case of a contractor that has no product divisions, such term means that contractor as a whole. A product division of the contractor that allocated less than $1,000,000 in IR&D/B&P costs to covered contracts during the preceding fiscal year shall not be subject to the limitation for major contractors set forth in 31.205–18(c)(2)(i) and (c)(ii).

Development, as used in this subsection, means the systematic use, under whatever name, of scientific and technical knowledge in the design, development, test, or evaluation of a potential new product or service (or of an improvement in an existing product or service) for the purpose of meeting specific performance requirements or

objectives. Development includes the functions of design engineering, prototyping, and engineering testing. Development excludes: (1) Subcontracted technical effort which is for the sole purpose of developing an additional source for an existing product, or (2) development effort for manufacturing or production materials, systems, processes, methods, equipment, tools, and techniques not intended for sale.

Independent research and development (IR&D), as used in this subsection, means a contractor's IR&D cost that consists of projects falling within the four following areas: (1) Basis research, (2) applied research, (3) development, and (4) systems and other concept formulation studies. The term does not include the costs of effort sponsored by a grant or required in the performance of a contract. IR&D effort shall not include technical effort expended in developing and preparing technical data specifically to support submitting a bid or proposal.

Major contractor, as used in paragraph (c)(2) of this subsection, means any contractor whose covered segments allocated to covered contracts a total of more than $10,000,000 in IR&D/B&P costs in the preceding fiscal year. For purposes of calculating the dollar threshold amounts to determine whether a contractor meets the definition of "major contractor," contractor segments allocating less than $1,000,000 of IR&D/B&P costs to covered contracts in the preceding year shall not be included.

Systems and other concept formulation studies, as used in this subsection, means analyses and study efforts either related to specific IR&D efforts or directed toward identifying desirable new systems, equipment or components, or modifications and improvements to existing systems, equipment, or components.

(b) *Composition and allocation of costs.* The requirements of 48 CFR 9904.420, Accounting for independent research and development costs and bid and proposal costs, are incorporated in their entirety and shall apply as follows—

(1) *Fully-CAS-covered contracts.* Contracts that are fully-CAS-covered shall be subject to all requirements of 48 CFR 9904.420.

(2) *Modified CAS-covered and non-CAS-covered contracts.* Contracts that are not CAS-covered or that contain terms or conditions requiring modified CAS coverage shall be subject to all requirements of 48 CFR 9904.420 *except* 48 CFR 9904.420-50(e)(2) and 48 CFR 9904.420-50(f)(2), which are not then applicable. However, non-CAS-covered or modified CAS-covered contracts awarded at a time the contractor has CAS-covered contracts requiring compliance with 48 CFR 9904.420, shall be subject to all the requirements of 48 CFR 9904.420. When the requirements of 48 CFR 9904.420–50(e)(2) and 48 CFR 9904.420–50(f)(2) are not applicable, the following apply:

(i) IR&D and B&P costs shall be allocated to final cost objectives on the same basis of allocation used for the G&A expense grouping of the profit center (see 31.001) in which the costs are incurred. However, when IR&D and B&P costs clearly benefit other profit centers or benefit the entire company, those costs shall be allocated through the G&A of the other profit centers or through the corporate G&A, as appropriate.

(ii) If allocations of IR&D or B&P through the G&A base do not provide equitable cost allocation, the contracting officer may approve use of a different base.

(c) *Allowability.* (1) This subparagraph (c)(1) implements section 824 of the National Defense Authorization Act for Fiscal Year 1991 (Pub. L. 101–510). Except as provided in paragraphs (c)(2), (d), and (e) of this subsection, or as provided in agency regulations, costs for IR&D and B&P are allowable only in accordance with the following:

(i) *Companies required to negotiate advance agreements.* (A) Any company that received payments for IR&D and B&P costs in a fiscal year, either as a prime contractor or subcontractor, exceeding $7,000,000 from Government agencies, is required to negotiate with the Government an advance agreement which establishes a ceiling for allowability of IR&D and B&P costs for the following fiscal year. This agreement is binding on all Government agencies, unless prohibited by statute. The requirements of section 203 of Public Law 91–441 necessitate that the Department of Defense (DOD) be the lead negotiating agency when the contractor has received more than $7,000,000 in payments for IR&D and B&P from DOD. Computation of IR&D and B&P costs to determine whether the threshold criterion was reached shall include only recoverable IR&D and B&P costs allocated during the company's previous fiscal year to prime contracts and subcontracts for which the submission and certification of cost or pricing data were required. (See also paragraph (b) of this subsection and 15.804.) The computation shall include full burdening pursuant to 48 CFR 9904.420.

(B) When a company meets the criterion in (c)(1)(i)(A) of this subsection, required advance agreements may be negotiated at the corporate level and/or with those profit centers that contract directly with the Government and that in the preceding year allocated recoverable IR&D and B&P costs exceeding $700,000, including burdening, to contracts and subcontracts for which the submission and certification of cost or pricing data were required (see also paragraph (b) of this subsection and 15.804). When ceilings are negotiated for separate profit centers of the company, the allowability of IR&D and B&P costs for any center that in its previous fiscal year did not reach the $700,000 threshold may be determined in accordance with paragraph (c)(1)(ii) of this subsection.

(C) Ceilings are the maximum dollar amounts of total IR&D and B&P costs that will be allowable for allocation over the appropriate base for that part of the company's operation covered by an advance agreement.

(D) No IR&D and B&P cost shall be allowable if a company fails to initiate negotiation of a required advance agreement before the end of the fiscal year for which the agreement is required.

(E) When negotiations are held with a company meeting the $7,000,000 criterion or with separate profit centers (when negotiations are held at that level under (c)(1)(i)(B) of this subsection), and if no advance agreement is reached, payment for IR&D and B&P costs shall be reduced below that which the company or profit center would have otherwise received. The amount of such reduced payment shall not exceed 75 percent of the amount which, in the opinion of the contracting officer, the company or profit center would be entitled to receive under an advance agreement. Written notification of the contracting officer's determination of a reduced amount shall be provided the contractor. In the event that an advance agreement is not reached before the end of the contractor's fiscal year for which the agreement is to apply, negotiations shall immediately be terminated, and the contracting officer shall furnish a determination of the reduced amount.

(F) Contractors may appeal decisions of the contracting officer to reduce payment. The appeal shall be filed with the contracting officer within 30 days of receipt of the contracting officer's determination. (See also subpart 42.10.)

(ii) *Companies not required to negotiate advance agreements.* Costs for IR&D and B&P are allowable as indirect expenses on contracts to the extent that

those costs are allocable and reasonable.

(2) This subparagraph (c)(2) implements section 802 of the National Defense Authorization Act for Fiscal Years 1992 and 1993 (Pub. L. 102–190) and is effective for IR&D and B&P costs incurred by a contractor during fiscal years of that contractor that begin on or after October 1, 1992. Except as provided in paragraph (d) of this subsection, or as provided in agency regulations, costs for IR&D and B&P are allowable as indirect expenses on contracts to the extent that those costs are allocable and reasonable. The following limitations apply to major contractors—

(i) For the first three contractor fiscal years beginning on or after October 1, 1992, the total maximum allowable amount of IR&D/B&P costs shall not exceed the sum of:

(A) The total amount of allowable IR&D/B&P costs in the preceding fiscal year (*i.e.*, the lower of the previous year's ceiling or actual costs incurred); plus

(B) Five percent of the amount in (c)(2)(i)(A) of this subsection; plus

(C) If the total amount of IR&D/B&P costs for a fiscal year is greater than the total amount of IR&D/B&P costs for the preceding fiscal year, the amount that is determined by multiplying the amount in (c)(2)(i)(A) of this subsection by the lesser of—

(*1*) The percentage by which the total amount of IR&D/B&P costs for a fiscal year exceeds the total amount of such costs for the preceding fiscal year; or

(*2*) The percentage rate of inflation from the end of the preceding fiscal year to the end of the fiscal year for which the amount of the limitation is being computed. The rate of inflation shall be the price escalation index for the Research, Development, Test & Evaluation (RDT&E) account, Total Obligation Authority (TOA) which is published annually (normally in January) by the Department of Defense Comptroller and used in preparation of the annual submission of the Defense budget. This rate will be published in the **Federal Register** on an annual basis.

(ii) Major contractors shall submit, in accordance with agency guidance, financial and technical information to support their IR&D/B&P costs.

(iii) A waiver may be granted, in accordance with agency procedures, to increase the amount prescribed in (c)(2)(i) of this subsection for the following special circumstances:

(A) To ensure that the contractor's allowable IR&D/B&P costs are at least the same amount that would have been allowed under this subpart which was in effect prior to enactment of Public Law 102–190; or

(B) When it is in the best interest of the Government.

(d) *Deferred IR&D and B&P costs.* (1) IR&D costs that were incurred in previous accounting periods are unallowable, except when a contractor has developed a specific product at its own risk in anticipation of recovering the development costs in the sale price of the product provided that—

(i) The total amount of IR&D costs applicable to the product can be identified;

(ii) The proration of such costs to sales of the product is reasonable;

(iii) The contractor had no Government business during the time that the costs were incurred or did not allocate IR&D costs to Government contracts except to prorate the cost of developing a specific product to the sales of that product; and

(iv) No costs of current IR&D programs are allocated to Government work except to prorate the costs of developing a specific product to the sales of that product.

(2) When deferred costs are recognized, the contract (except firm-fixed-price and fixed-price with economic price adjustment) will include a specific provision setting forth the amount of deferred IR&D costs that are allocable to the contract. The negotiation memorandum will state the circumstances pertaining to the case and the reason for accepting the deferred costs.

(e) *Cooperative arrangements.* IR&D effort may be performed by contractors working jointly with one or more non-Federal entities pursuant to a cooperative arrangement (for example, joint ventures, limited partnerships, teaming arrangements, and collaboration and consortium arrangements). IR&D effort may also be performed by contractors pursuant to cooperative research and development agreements, or similar arrangements, entered into under (1) section 12 of the Stevenson-Wydler Technology Transfer Act of 1980 (15 U.S.C. 3710(a)); (2) sections 203(c) (5) and (6)) of the National Aeronautics and Space Act of 1958, as amended (42 U.S.C. 2473(c) (5) and (6)), when there is no transfer of Federal appropriated funds; (3) 10 U.S.C. 2371 for the Defense Advanced Research Projects Agency; or (4) other equivalent authority. IR&D costs incurred by a contractor pursuant to these types of cooperative arrangements should be considered as allowable IR&D costs if the work performed would have been allowed as contractor IR&D had there been no cooperative arrangement.

PART 42—CONTRACT ADMINISTRATION

3. Section 42.1002 is revised to read as follows:

§ 42.1002 Applicability.

The procedures in this subpart shall be used for negotiating advance agreements containing dollar ceilings for allowability of independent research and development and bid and proposal (IR&D/B&P) costs when these agreements are required by 31.205–18(c)(1) until contractors' fiscal years beginning on or after October 1, 1992, after which there is no requirement for advance agreement negotiations and formal IR&D technical reviews and evaluations.

BILLING CODE 6820–34–M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Parts 32 and 52

[FAC 90–13; FAR Case 91–79; Item VIII]

Federal Acquisition Regulation; Prompt Payment for Fresh or Frozen Fish

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed on a final rule amending FAR 32.905 and 52.232–25 to implement section 842 of the Fiscal Year 1992 National Defense Authorization Act (Pub. L. 102–190) by requiring that payment for fresh or frozen fish be made within 7 days after delivery.

EFFECTIVE DATE: September 24, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Jeremy Olson at (202) 501–3221 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501–4755. Please cite FAC 90–13, FAR Case 91–79.

SUPPLEMENTARY INFORMATION:

A. Background

Section 842 of the Fiscal Year 1992 National Defense Authorization Act (Public Law 102–190) amended section 3903(a)(2) of title 31, United States Code, to provide that the due date for payment of contracts for fresh or frozen fish (as defined in section 204(3) of the Fish and Seafood Promotion Act of 1986 (16 U.S.C. 4003(3)) be as close as possible to, but not later than, the seventh day after delivery. This change provides for the prompt payment of fresh and frozen fish on the same terms applicable to meat or meat food products.

FAR 32.905(d) is amended to incorporate this provision in a new subparagraph (d)(2) and to renumber the existing subparagraphs (d)(2) and (d)(3) as (d)(3) and (d)(4), respectively. In addition, in determination of any interest penalty for late payment of contracts for fish, the period taken to notify the contractor of defects in invoices submitted to the Government, as addressed in 32.905(e), may not exceed three days. Similar changes have been made in the clause at 52.232–25, Prompt Payment.

B. Regulatory Flexibility Act

The final rule does not constitute a significant FAR revision within the meaning of FAR 1.501 and Public Law 98–577, and publication for public comments is not required. The case provides for the prompt payment of fresh and frozen fish to be on the same terms applicable to meat or meat food products (*i.e.*, as close as possible to, but not later than, the seventh day after delivery). Therefore, the Regulatory Flexibility Act does not apply. However, comments from small entities concerning the affected subpart will be considered in accordance with 5 U.S.C. 610. Such comments must be submitted separately and cite 5 U.S.C. 601, *et seq.* (FAC 90–13, FAR case 91–79), in correspondence.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Parts 32 and 52

Government procurement.

Dated: September 17, 1992.

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Therefore, 48 CFR parts 32 and 52 are amended as set forth below:

1. The authority citation for 48 CFR parts 32 and 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

PART 32—CONTRACT FINANCING

2. Section 32.905 is amended by revising the introductory text of paragraph (d), redesignating paragraphs (d)(2) and (d)(3) as (d)(3) and (d)(4) and adding a new paragraph (d)(2), and revising the second sentence in the introductory text of paragraph (e) to read as follows:

32.905 Invoice payments.

* * * * *

(d) The payment terms on contracts for meat, meat food products, or fish; contracts for perishable agricultural commodities, and contracts for dairy products, edible fats or oils, and food products prepared from edible fats or oils are as follows:

* * * * *

(2) The due date on contractor invoices for fresh or frozen fish, as defined in section 204(3) of the Fish and Seafood Protection Act of 1986 (16 U.S.C. 4003(3)), will be as close as possible to, but not later than, the seventh day after product delivery.

* * * * *

(e) * * * If the invoice does not comply with these requirements, then the contractor must be notified of the defect within 7 days (3 days on contracts for meat, meat food products, or fish, and 5 days on contracts for perishable agricultural commodities, dairy products, edible fats or oils, and food products prepared from edible fats or oils) after receipt of the invoice at the designated billing office. * * *

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

3. Section 52.232–25 is amended by removing in the clause heading the date "(APR 1989)" and inserting "(SEP 1992)" in its place; revising the introductory text of paragraph (a)(3); redesignating paragraphs (a)(3)(ii), (a)(3)(iii), and (a)(3)(iv) as (a)(3)(iii), (a)(3)(iv), (a)(3)(v) and adding a new paragraph (a)(3)(ii), and revising the fourth sentence in the introductory text of paragraph (a)(4) and paragraph (a)(6)(ii)(A) to read as follows:

52.232–25 Prompt payment

* * * * *

(a) * * *

(3) The due date on contracts for meat, meat food products, or fish; contracts for perishable agricultural commodities, contracts for dairy products, edible fats or oils, and food products prepared from edible fats or oils, and contracts not requiring the submission of an invoice shall be as follows:

* * * * *

(ii) The due date for fresh or frozen fish, as defined in section 204(3) of the Fish and Seafood Promotion Act of 1986 (16 U.S.C. 4003(3)), will be as close as possible to, but not later than, the seventh day after product delivery.

(iii) * * *

(iv) * * *

(v) * * *

(4) * * * If the invoice does not comply with these requirements, then the Contractor will be notified of the defect within 7 days after receipt of the invoice at the designated billing office (3 days for meat, meat food products, or fish, and 5 days for perishable agricultural commodities, edible fats or oils, and food products prepared from edible fats or oils). * * *

* * * * *

(6) * * *

(ii) * * *

(A) The period taken to notify the Contractor of defects in invoices submitted to the Government, but this may not exceed 7 days (3 days for meat, meat food products, or fish, and 5 days for perishable agricultural commodities, dairy products, edible fats or oils, and food products prepared from edible fats or oils).

[FAC 90-13; FAR Case 91-16; Item IX]

Federal Acquisition Regulation; Disclosure Requirement Relating to Subcontractors

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council have agreed to finalize an interim rule which added paragraph (b) to the clause at 52.209-6, Protecting the Government's Interest when Subcontracting with Contractors Debarred, Suspended, or Proposed for Debarment. The change required prime contractors to require each first-tier subcontractor to disclose to the prime contractor, prior to award of a subcontract in an amount in excess of the small purchase limitation in FAR 13.000, whether, as of the time of award of the subcontract, the subcontractor has been debarred, suspended, or proposed for debarment by the Federal Government. This interim rule is hereby adopted as a final rule with one minor change to paragraph (a) of FAR 52.209-6. The interim rule was issued in FAC 90-5 and published in the **Federal Register** on June 25, 1991 (56 FR 29124).

EFFECTIVE DATE: November 23, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Edward Loeb at (202) 501-4547 in reference to this FAR case. For general information, contact the FAR Secretariat, room 4037, GS Building, Washington, DC 20405 (202) 501-4755. Please cite FAC 90-13, FAR case 91-16.

SUPPLEMENTARY INFORMATION:

A. Background

Section 813 of the Fiscal Year 1991 Defense Authorization Act (Pub. L. 101-510) required the Department of Defense to prescribe rules to require each prime contractor to require each subcontractor to whom it awards a contract to disclose to the contractor whether the subcontractor is, as of the date of subcontract award, debarred or suspended by the Federal Government from Government contracting or subcontracting. The change was issued as an interim rule because the statutory requirement was effective upon signing of the Defense Authorization Act on November 5, 1990. The change is being applied Governmentwide in an attempt to keep debarment and suspension rules and procedures uniform to the extent practicable.

B. Regulatory Flexibility Act

The Department of Defense, the General Services Administration, and the National Aeronautics and Space Administration certify that this final rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.*, because it merely requires prime contractors to obtain from subcontractors a disclosure as to whether or not they are, or are proposed for, suspension or debarment.

C. Paperwork Reduction Act

The Paperwork Reduction Act does not apply because the changes to the FAR do not impose recordkeeping or information collection requirements, or collections of information from offerors, contractors, or members of the public which require the approval of the Office of Management and Budget under 44 U.S.C. 3501, *et seq.*

List of Subjects in 48 CFR Part 52

Albert A. Vicchiolla,

Director, Office of Federal Acquisition Policy.

Interim Rule Adopted as Final Rule With One Change

Accordingly, the interim rule amending 48 CFR part 52, which was published on June 25, 1991, at 56 FR 29124, is adopted as final with one change.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

1. The authority citation for 48 CFR part 52 continues to read as follows:

Authority: 40 U.S.C. 486(c); 10 U.S.C. chapter 137; and 42 U.S.C. 2473(c).

52.209-6 [Amended]

2. Section 52.209-6 is amended in the clause title by removing the date "(JUN 1991)" and inserting in its place "(NOV 1992)"; and in the second sentence of paragraph (a) by removing the words "has been" and inserting in their place "is".

31 CFR Part 205
Rules and Procedures for Fund Transfers; Final Rule

DEPARTMENT OF THE TREASURY

Fiscal Service

31 CFR Part 205

RIN Number—1510-AA19

Rules and Procedures for Funds Transfers

AGENCY: Treasury, Fiscal, Financial Management Service.

ACTION: Final rule.

SUMMARY: The Financial Management Service issues this final rule for a regulation to implement the Cash Management Improvement Act of 1990 (CMIA). CMIA and this regulation impose requirements for the timely transfer of funds between a Federal agency and a State, and for the exchange of interest where transfers are not made in a timely fashion. The rulemaking is designed to encourage the development of efficient cash management systems and to ensure efficiency, effectiveness, and equity in the transfer of funds between the Federal Government and the States and Territories.

EFFECTIVE DATE: October 24, 1992.

ADDRESSES: Financial Management Service, CMIA Program Manager, Room 521C, 401 14th Street SW., Washington, DC 20227.

FOR FURTHER INFORMATION CONTACT:

John Galligan, (Program Manager), (202) 874–6935
Gary Grippo, (Program Specialist), (202) 874–6955
Christopher Kubeluis, (Program Specialist), (202) 874–6873
Steven D. Laughton, (Principal Attorney), (202) 874–6680
Randall S. Lewis, (Principal Attorney), (202) 874–6680.

SUPPLEMENTARY INFORMATION:

Background

This regulation is authorized by the Cash Management Improvement Act of 1990, Public Law 101–453, October 24, 1990, (CMIA), the substantive provisions of which are codified at 31 U.S.C. 3335 and 6503; and by 5 U.S.C. 301 and 31 U.S.C. 321. CMIA centralizes authority for management of funds disbursement with the Secretary of the Treasury (Secretary). The Secretary has delegated to the Financial Management Service (FMS), an agency within the Department of the Treasury, the Secretary's responsibilities under CMIA unless otherwise specified. The purpose of CMIA and this regulation is to ensure greater efficiency, effectiveness, and equity in the exchange of funds between the Federal Government and the States. CMIA requires the Secretary to regulate and enforce timely disbursement by Federal agencies, to negotiate and monitor agreements with the States to achieve the efficient transfer of funds, and to prescribe regulations governing the transfer of funds for program purposes.

Prior to passage of CMIA, the primary law that addressed the timing of Federal funds transfers to States was the Intergovernmental Cooperation Act, 31 U.S.C. 6503. This law allowed a State to retain for its own purposes any interest earned on Federal funds transferred to a State "pending its disbursement for program purposes."

Since passage of that law in 1968, Federal agencies had expressed concerns that States were drawing down Federal funds well in advance of the time those funds were needed by States to redeem checks. Premature drawdowns cause the Federal Government to lose interest earnings.

Conversely, States had expressed concerns about having to pay out their own funds in advance of receiving funds from the Federal Government. This practice causes States to lose interest earnings on their own funds until they are reimbursed by the Federal Government. Congress enacted CMIA to resolve these issues.

Following passage of CMIA, the FMS met individually with each State and the largest Federal agencies, and disseminated a pre-clearance draft regulation on July 22, 1991. Over half of the States responded with comments, as did the National Association of State Auditors, Comptrollers, and Treasurers, Federal agencies, and the Federal Reserve. Following changes made in response to the comments on the July 22, 1991, draft, and further discussion with States, Federal agencies, and other interested parties, the FMS issued a Notice of Proposed Rulemaking (NPRM) in the March 23, 1992, **Federal Register** (57 FR 10101–10118).

Comments on the Proposed Rule

The FMS received comments on the March 23, 1992, Proposed Rule from more than 100 organizations, including State budget and treasurers' offices, State agencies, Federal agencies, interest groups, universities, and non-profit organizations. Individual comments numbered over 1,000. Following is a discussion of the significant and most heavily commented upon issues:

Effective date extension: Twenty-nine commenters requested a delay of the effective date on which interest would start to accrue. CMIA speaks plainly when interest starts accruing, October 24, 1992. The FMS has no authority to delay administratively the onset date of interest accrual. Accordingly, interest will begin accruing on October 24, 1992.

Onset Period: NPRM § 205.6(h) Interim Agreements [Final Rule § 205.5 Onset Period]. Thirty-three comments were submitted addressing the interim agreement. Several commenters indicated that the full scope of the interim agreement is unclear, and that the ramifications of entering into an interim agreement are unclear. About half of the commenters stated that the interim agreement does not appear to be substantively different from a standard agreement and/or that entering into an interim and standard agreement in less than a year would create an unnecessary duplication of effort and burden for the States, as well as the Federal Government. Five commenters stated that entering into an interim agreement is not feasible. More specifically, the commenters said that if a State does not have the ability to implement the necessary procedures to enter into a standard agreement (such as developing clearance patterns, calculating interest and training employees) by October 24, 1992, then it would not have the ability to enter into an interim agreement by such date.

The FMS agrees with these comments. The Final Rule contains a new section, § 205.5 Onset Period, that applies to any State that chooses not to enter into a Treasury-State Agreement covering the Onset Period, which is from October 24, 1992, until the later of June 30, 1993, or the end of a State's 1993 fiscal year. Under the provisions of this section, States are not required to enter into a Treasury-State Agreement by October 24, 1992. For all States that do not enter into a Treasury-State Agreement, the following applies: Interest liabilities will be imputed to the Onset Period based on fiscal year 1994 interest calculations, as well as any available data from the Onset Period; a State will have until June 30, 1993, or the end of its 1993 fiscal year, whichever is later, to prepare for and finalize a Treasury-State Agreement; State and Federal agencies will be allowed to continue with their existing accounting and cash management procedures during the Onset Period; and, the first Annual Report and corresponding exchange of interest will consist of interest liabilities incurred during each State's 1994 fiscal year and interest liabilities imputed to the Onset Period.

Definition of State: NPRM § 205.2 Definitions [Final Rule § 205.3 Definitions]. Sixty-seven comments

were received addressing the basis upon which the word "State" was defined. The NPRM proposed using the lists of Dependent State Agencies published by the United States Bureau of the Census as an initial baseline. Ten commenters filed explicit disfavor with using the Census lists, while several other commenters stated that the FMS should be flexible in interpreting or excluding entities on the Census lists if the policy of using the lists is to be retained. The FMS has removed the policy of using the lists in the Final Rule because of the opposition expressed in the comments and because the lists are outdated or incomplete in many instances.

Suggestions to allow each State to define its agencies and instrumentalities in the Treasury-State Agreements were received from 12 commenters. An additional 10 commenters recommended making the definition of State dependent on whether the State has direct fiscal control over a particular entity, with different criteria for what constitutes fiscal control being offered. These comments were not incorporated because the concept of equity contained in CMIA requires that all States be treated equally. If each State were allowed to define its agencies and instrumentalities, or base inclusion on the degree of direct fiscal control, there would be a significant variance as to what type of programs would be covered on a State-by-State basis.

The NPRM noted that other options for defining State were under consideration, such as basing the definition on Generally Accepted Accounting Principles (GAAP) or deriving it from Office of Management and Budget (OMB) Circulars on grant administration (i.e., A–102 and A–110). Twenty-three commenters did support the option of excluding from the provisions of CMIA all State entities subject to OMB Circular A–110, or suggested that universities specifically should be exempted. Because State chartered institutions of higher education are clearly instrumentalities of States, it would be inconsistent with CMIA to exempt them or to rely on a definition which would exclude them. Accordingly, suggestions to exempt universities or to exempt entities covered by OMB Circular A–110 were not incorporated.

Six commenters suggested using the GAAP definition of the State reporting entity, or the State's most recent Consolidated Annual Financial Report (which is generally based on GAAP). The Final Rule replaces reliance on the Census lists with GAAP principles. This change has been incorporated because GAAP represents a standard which is recognized by States and the Federal Government. It is noted that as many commenters as were in favor of GAAP were opposed to it because of its extensive scope and because it would result in inclusion of State chartered universities and colleges. Although it would be inconsistent with CMIA to exempt institutions of higher education, or to otherwise substantially limit the inclusive definition of State in CMIA, the Final Rule does provide for a phase-in of institutions of higher education. Unless otherwise specified in a Treasury-State Agreement, the provisions of Subpart A do not apply to institutions of higher education until the start of a State's 1995 fiscal year. This deferral was included to provide States and institutions of higher education an extended opportunity to resolve the difficulties created by the autonomous nature of many State chartered colleges and universities.

Scope—Programs for which the payment of interest is inconsistent with program purposes: NPRM § 205.10(e) Exception [Final Rule § 205.12(d) Exception]. CMIA requires States to pay interest on Federal funds received in advance of need "when not inconsistent with program purposes." This exception recognizes that under certain programs interest on Federal funds is to be applied to program purposes or is legally required to be retained by the State. This exception applies solely to the payment of interest from States to the Federal Government. Therefore, a State may be excepted from paying interest to the Federal Government under a certain program, but the program is still subject to all other requirements of CMIA and this Final Rule, including the requirements for coverage in the Treasury-State Agreements, application of a funding technique, and the accrual and payment of interest from the Federal Government to a State. Although States may be excepted from paying interest to the Federal Government under these types of programs, the general principle that a State and a Federal agency must minimize the time between the transfer of funds from the Treasury and the time that the State needs the funds for program purposes is still applicable. If a State is found to be drawing funds in advance of need, then the State will be considered in non-compliance with this regulation and/or a Treasury-State Agreement, and the provisions of § 205.17(k) may be initiated.

Scope—Catalog of Federal Domestic Assistance: NPRM § 205.3 *Scope* [Final Rule § 205.2 *Scope of Part*]. Several commenters requested clarification of whether certain types of programs would be covered by the regulation, such as research and development programs. To clarify any ambiguity regarding applicability to specific or types of programs, an explicit statement was added to the Final Rule at § 205.2, which specifies that Subparts A and B apply to Federal programs in the Catalog of Federal Domestic Assistance (CFDA), pursuant to chapter 61 of title 31, United States Code. Subpart B, § 205.19, specifies that Subpart B applies to Federal programs in the CFDA that are not subject to Subpart A. Chapter 61 of title 31 defines what is and is not considered Federal domestic assistance, and requires the Director of OMB to catalog information on all Federal domestic assistance programs (i.e., it establishes the Catalog of Federal Domestic Assistance). Generally, college and university research and development programs are not considered assistance and are not contained in the CFDA, and therefore are not covered under Subpart A or Subpart B of the Final Rule.

Responses from several States indicated that Federal agencies periodically issue grant awards which do not include a CFDA number. Respondents emphasized the problems created in such situations given the fact that this rule relies on program CFDA numbers for tracking withdrawals and payments, and for calculating interest accruals.

The FMS agrees that CFDA numbers are key to the provisions of this rule. The FMS will seek to ensure that CFDA numbers and other necessary program information are provided to the States. The FMS also will seek to ensure that States are not penalized as a consequence of a Federal agency's failure to provide this information.

Scope—programs below the threshold/non-State recipients (NPRM Subpart C): NPRM §§ 205.3 *Scope* and 205.31 *Purpose and Scope* [Final Rule Subpart B]. The NPRM provided that all programs that were below a State's dollar threshold for classification as a major Federal assistance program or were otherwise not covered in a Treasury-State Agreement would be subject to NPRM Subpart C. In the Final Rule, the provisions applying to State programs covered by NPRM Subpart C are contained at (new) 31 CFR Part 205 Subpart B.

NPRM Subpart C also applied to programs administered by non-State recipients and non-State subrecipients. In the Final Rule, Subpart C has been

reserved for such programs pending further consideration.

In addition to being reformatted in a new section, the provisions applying to States in Subpart B of the Final Rule have been substantively altered in only one aspect—accountability for interest. Under the NPRM, § 205.33(e), interest earned on Federal funds transferred to States covered by Subpart C would be treated in accordance with the administrative requirements specified under the appropriate OMB Circulars. In general this meant that actual interest earned less an allowance for administrative expenses would have to be remitted to the Federal Government.

The Final Rule revises this policy as it applies to States. A State is not to be held accountable for interest earned on programs that are under the threshold, or that are not otherwise covered by a Treasury-State Agreement. However, if it is found that the State is in repeated or egregious non-compliance with the requirement to minimize the time elapsing between the transfer of funds from the Treasury and disbursement of such funds for program purposes, then the program may become subject to the provisions of Subpart A and be brought into the Treasury-State Agreement. Likewise, if the Federal Government is egregious or repeatedly late in transferring funds to States, then the program may become subject to the provisions of Subpart A and be brought into the Treasury-State Agreement. This ensures that a State can earn interest on all programs where the Federal Government is late in transferring funds to the State. NPRM § 205.3(c), which allowed for the coverage of additional programs under Subpart A upon the mutual agreement of a State and the FMS, is retained in the Final Rule at § 205.4(d).

Payment schedule technique: NPRM § 205.4. Several States suggested that NPRM § 205.4 should be modified to include an additional funding technique—payment schedules, in which specific times or intervals (i.e., bi-monthly, monthly, etc.) for the transfer of funds would be negotiated in the Treasury-State Agreements. Adherence to the schedule would preclude an interest liability for the State or the Federal Government. The comments suggested that such a technique would provide a less administratively burdensome means for funding block and formula grants which often cover many separate programs.

The FMS recognizes the potential problems arising from certain block and formula grants, but believes that including such a payment schedule technique in a list of funding techniques would be inappropriate. A payment schedule technique as described in the comments would be designed to lessen administrative burden, but also may undermine CMIA provisions directing all parties to minimize the time between the transfer of Federal funds to a State and the pay out of funds for program purposes. The FMS policy is that such arrangements may be appropriate under some circumstances. The payment schedule technique may be agreed to in the Treasury-State Agreement, if specific conditions warrant its application. Generally, the payment schedule technique will be acceptable under block grant programs which have fixed annual awards and no matching requirement.

Funding of indirect costs and administrative cost grants: NPRM § 205.4(f) Funding of indirect costs/administrative expenses [Final Rule § 205.10 Funding of indirect costs and administrative cost grants]. Twenty-eight comments were received addressing the indirect costs/administrative expenses provisions of the NPRM. A number of commenters expressed support for the funding conventions described for indirect costs and administrative expenses. Essentially all of the conventions contained within the NPRM have been retained in the Final Rule, although a new section (§ 205.10) is devoted solely to transfers of funds for such costs. Several commenters questioned what the provisions of this section applied to and what was meant by the term "indirect costs/administrative expenses." The section has been modified to make clear that it applies to all indirect costs and to administrative cost grants. "Administrative cost grant" is defined in the Final Rule at § 205.3.

The majority of comments submitted on NPRM § 205.4(f) requested clarification on the applicability of the several conventions listed. Essentially, a State may apply one of the approved funding techniques and exchange interest (if relevant under the funding technique), or apply one of several specified conventions to ease the administrative burden that would otherwise be associated with tracking and calculating interest for such costs. Specific needs relating to the funding conventions may be detailed in the individual Treasury-State Agreements.

3-Day rule under pre-issuance funding: NPRM § 205.5(b)(4) Pre-issuance funding [Final Rule § 205.6(c) Pre-issuance funding and § 205.7(c)(4) Pre-issuance funding]. Eighteen commenters recommended revising the provision limiting a State's ability to request funds under the pre-issuance funding technique to 3 business days prior to the date on which it issues checks, warrants, or payments by other means. It was suggested that the 3 day request period should be incorporated as a goal rather than a requirement, and that States should not have to justify to, or obtain approval from, the FMS in order to request funds earlier than 3 business days prior to issuing checks, warrants, or payments by other means. The FMS believes that establishing 3 business days as the standard for requesting funds under the pre-issuance funding technique is a sound cash management policy for the following reasons: (1) CMIA requires that the time elapsing between the transfer of funds from the Treasury and the issuance or redemption of checks, warrants, or payments by other means must be minimized; (2) The practice ensures that funds will be provided to States at least 2 business days prior to the date needed for satisfying constitutional or statutory requirements that funds be in State accounts prior to the issuance of a check, warrant, or payment by other means. (If it is not practicable for a State to meet its legal requirements by requesting Federal funds 3 business days prior to issuance, and receiving them at least 2 business days prior to issuance, then the State may provide justification as to why it requires funds on hand for a longer period, which the FMS will consider when negotiating the Treasury-State Agreement); and (3) Providing justification for holding Federal cash balances in excess of 3 days is an existing standard used by Federal agencies in interpreting the Treasury Department's requirements under current 31 CFR Part 205 to advance only enough cash to meet actual, immediate cash needs.

Default provisions for a State without an Agreement: NPRM § 205.6(i) Default procedures for States without Agreements [Final Rule § 205.9(f) Default procedures for a State without a Treasury-State Agreement after the Onset Period]. A number of comments were received which indicated that the funding procedures required under the default provisions would not be feasible. The Final Rule provides that, consistent with Federal and State law, the FMS will prescribe the funds transfer procedures for a State that does not enter into a Treasury-State Agreement. In order to provide more flexibility in considering factors unique to a particular State, the FMS will only prescribe techniques which are administratively feasible for a State.

Federal agency responsibilities—reverse flow programs: NPRM § 205.7(j)

[Final Rule § 205.15(e) Reverse flow programs]. Several States commented that § 205.7(j) of the NPRM, which required Federal agencies to submit interest calculations to States no later than December 31, was inconsistent with NPRM § 205.13, which required States to submit Annual Reports including Federal agency information on that same date. The States commented that the inconsistency would necessarily cause the States to miss the December 31 deadline.

The FMS recognizes the inconsistency in the NPRM provisions, and the Final Rule requires Federal agencies to provide States with interest calculations at least one month prior to the deadline for States to submit their Annual Reports.

State responsibilities—documenting reimbursable costs: NPRM § 205.8(l) [Final Rule § 205.14(b)(3) Documentation]. Several States commented about NPRM § 205.8(l), which required States to maintain "separate, formal accounting records for direct costs." Commenters requested that the language be changed to define more clearly the FMS's position. All comments reflected a concern that a literal interpretation of the NPRM language would result in an onerous and unnecessary burden on the States.

The FMS has changed the language to clarify that a State is not required to develop new systems for tracking direct costs. States are required to maintain documentation to substantiate claims for direct costs. This means that States must retain records which support direct cost claims in a manner which facilitates the audit and review of such figures pursuant to § 205.17.

State responsibilities—record retention: NPRM § 205.8(n) [Final Rule § 205.17(d) Record retention]. Several comments suggested that the 5-year record retention requirement of NPRM § 205.8(n) was too long and would impose an unnecessary cost and burden upon the States. It was suggested that the retention period should be 3 years to be consistent with existing Federal standards. This recommendation has been incorporated into the Final Rule.

State responsibilities—transfers to non-State subrecipients: NPRM § 205.8(r) [Final Rule Subpart C (reserved)]. Several States commented on this section, interpreting it as requiring States to enter into Treasury-State type agreements with each non-State subrecipient to which they transfer Federal funds. The FMS does not expect States to enter into separate agreements with each subrecipient, but does expect States and subrecipients to work together to develop procedures which will ensure the efficient and effective transfer of Federal funds. The Final Rule does not contain specific provisions addressing non-State subrecipients at this time. In this Final Rule, Subpart C has been reserved for regulations governing the transfer of Federal funds to non-State recipients and non-State subrecipients (see discussion under "Scope—programs below the threshold/non-State recipients"). Nevertheless, as envisioned by the State/Federal Cash Management Reform Task Force (Task Force), States are expected to administer subgrants along the same principles as grants from the Federal Government to the States and to time the transfer of funds to subrecipients, to the maximum extent practicable, with the subrecipients' actual, immediate funds requirements in carrying out the program or project.

Federal interest liabilities—general provision: NPRM § 205.9(a) General [Final Rule § 205.11(a) General]. Thirteen comments related to NPRM § 205.09(a) were received. The primary concern was the NPRM language providing that "a State shall be entitled to interest from the Federal Government if it pays out its own funds for program purposes with valid authorization, appropriation, and obligational authority * * *." States are concerned that such language will limit the amount of interest States can earn.

The language of the Final Rule specifies that the Federal Government will incur an interest liability to a State if the State pays out its own funds for program purposes with valid obligational authority under Federal law, Federal regulation, or Federal-State agreement. This language is based directly on language contained in the House of Representatives Committee Report on CMIA (House Report), which specifies that a State could claim interest costs only if it advanced its funds to pay an obligation which is recognized as valid under Federal law, Federal regulation, or Federal-State agreement. Thus, a State is generally entitled to interest if it advances its own funds in accordance with agreed upon funding techniques for an expenditure which the Federal Government is obligated to pay, or if the obligation of Federal funds comes subsequent to the State's expenditure but permits payment for the expenditure.

NPRM paragraph (e) Exhausted appropriations under appropriated entitlements has been deleted in this Final Rule because of concerns expressed by Federal agencies that it may be misconstrued as changing capped entitlements into open-ended entitlements. This ramification was not intended, and this paragraph has been deleted in deference to the concerns expressed.

Because the Federal Government will incur an interest liability even in cases where a State pays out its own funds prior to the obligation of Federal funds, Federal agencies are expected to work to ensure the availability of funds and to rectify the systemic breakdowns in the funding process. Federal agencies must submit apportionment requests to OMB on a timely basis and must review grant applications and project plans promptly. Federal agencies are also responsible for executing grant awards to States on a timely basis to preclude Federal interest liabilities.

The Final Rule also clarifies that if a State pays out its own funds for program purposes without obligational authority, the Federal Government will incur an interest liability if the lack of obligational authority is not the result of limitation, reduction, or termination of the program and where obligational authority is subsequently established to permit payment for the State's expenditures. States are expected to be cautious in advancing their funds in situations where appropriations for ongoing programs may be exhausted and should avoid such advances when it is the intent of Congress to limit, reduce, or terminate funding, in contrast to delays in providing appropriations.

Failure to request funds: NPRM § 205.9(a)(1) Failure to request funds [Final Rule § 205.17(1) Failure to request funds]. Seventeen comments were received addressing NPRM § 205.9(a)(1). This subsection specified that if a State fails to request funds in accordance with the procedures established for its funding techniques, it would not be entitled to interest for any period prior to the date that a Federal agency received the request for funds. The majority of comments suggested that a State should be entitled to interest from the day it advances its own funds unless it egregiously or repeatedly fails to request funds in accordance with agreed upon or default techniques. Although States and Federal agencies are expected to comply with procedures specified for each funding technique to the fullest extent practicable, a State will be entitled to interest except in cases of deliberate or repeated failure to request funds in accordance with agreed upon or default procedures. This policy acknowledges that States unintentionally may make minor errors in amounts requested or unknowingly fail to request funds in accordance with agreed upon or default funding techniques. A single instance of a

decision to circumvent agreed upon or default techniques for requesting funds may constitute deliberate failure if it involves a large dollar amount of Federal funds. This provision is located in § 205.17(a) of the Final Rule.

Reimbursable programs: [Final Rule § 205.6(e) *Reimbursable funding,* § 205.7(f) *Prohibition of reimbursable funding,* § 205.9(b)(2)(iii)]. Thirty-six comments were received addressing the provisions that apply to reimbursable funding programs. The majority of comments stated that there should be no distinction between mandated reimbursable programs and others, and that a State should be entitled to interest whenever it advances its own funds. Several commenters suggested that States should be allowed to select reimbursable funding, where conditions warrant, and be subject to the same interest provisions as under mandatory reimbursable programs. Under this Final Rule, reimbursable funding is not generally available for selection by a State, but may be allowed in specific circumstances.

A major provision of CMIA is that the head of each Federal executive agency and each State "shall minimize the time elapsing between the transfer of funds from the United States Treasury and the issuance or redemption of checks, warrants, or payments by other means for program purposes." This provision applies whether the disbursement of funds from the Treasury occurs prior to or after the issuance or redemption of State payments. If States were, as a matter of administrative practice, to advance funds and subsequently request reimbursement while earning interest over the entire period, the major incentive to comply with the aforementioned provision of CMIA is removed. Thus, reimbursable funding is not generally available for selection by a State.

Additionally, the Task Force did not envision reimbursable funding as a valid technique, except where required by statute. This is documented in the general principles developed by the Task Force and contained in the 1983 Memorandum of Understanding (MOU) entered into by the Federal and State members of the Task Force. Principle 6 from the MOU presents three funding techniques "that shall be available for selection by a State," none of which is reimbursable funding. This Final Rule incorporates the three techniques developed by the Task Force, and allows a fourth, average clearance, which is merely a modification of one of the three funding techniques. Also, MOU principle 14 states: "Where Federal statutes require reimbursement, the Federal Government will revise regulations or administrative procedures to ensure that cash is transferred as closely as possible to the time that States make disbursements." So not only did the Task Force intend to limit reimbursable funding solely to instances where required by statute, but also it anticipated that the Federal Government should revise regulations and administrative procedures to protect States from having Federal agencies require reimbursable funding except where expressly required by Federal law.

Nevertheless, the FMS recognizes that some States have long used reimbursable funding as a matter of administrative practice for reasons of internal control and administrative ease. Accordingly, the Final Rule allows States to continue using reimbursable funding on an interim basis with those programs for which it was used prior to October 24, 1992, excepting the 19 programs listed in § 204.4(a).

In short, this regulation: (1) Allows a State to continue using reimbursable funding for an interim period with those programs for which it was used prior to October 24, 1992, excepting the programs listed in § 205.4(a); (2) prohibits Federal agencies from requiring a State to use reimbursable funding; (3) provides that the Federal Government will incur an interest liability to a State if a Federal agency requires a State to use reimbursable funding contrary to these regulations, or if a State continues to use reimbursable funding for a program for which reimbursable funding was used prior to October 24, 1992; and (4) specifies that reimbursable funding will be prohibited after June 30, 1994. During this period, the FMS will evaluate the use of reimbursable funding by States. If it is determined that reimbursable funding is an appropriate and equitable technique, the FMS will authorize its continued use through rulemaking.

Several commenters have requested that a list of all programs for which Federal law requires reimbursable funding to States be included in the Final Rule. At this time no programs have been identified where Federal law requires a State to pay out its own funds before it may request and receive Federal funds.

Federal Highway Trust Fund programs: NPRM § 205.9(a)(4) *Federal-aid highway programs* [Final Rule § 205.11(d) *Federal Highway Trust Fund*]. Forty-nine commenters addressed the supplemental language and regulation policy regarding Federal-aid highway programs. The Department of Transportation suggested that the phrase "Federal-aid highway programs" be replaced with "Federal Highway Trust Fund programs." This suggestion was offered, and incorporated, because the Intermodal Transportation Efficiency Act of 1991 allows the States more flexibility in using such funds, i.e., they may be used for highway, transit or other transportation related purposes.

The large majority of the commenters perceived the policy of limiting a State's ability to accrue interest until the date that the Federal Highway Administration (FHWA) receives a request for funds to be inequitable to the States and/or contrary to the intent or language of CMIA and its legislative history. The Final Rule amends this policy and specifies, at § 205.11(d), that a State will be entitled to interest from the time it advances its own funds provided that it requests funds for current project costs at least weekly. This amended policy allows the 35 States that are currently billing on a weekly or more frequent cycle to earn interest if they expend funds prior to submitting a request. Commensurate with the purpose of CMIA, the policy also promotes efficiency and effectiveness in the transfer of Federal funds by providing an incentive for all States to bill the FHWA at least weekly. Fifteen commenters suggested that interest be allowed to accrue prior to the submittal of a bill, at least for a limited time period (such as 7 days). Several commenters noted language from the Senate Report to the 1988 version of CMIA (which was not enacted into law) as support for a State's entitlement to earn interest prior to submitting a bill. The weekly billing policy of CMIA is consistent with the language of the Senate Report which specifies that a State will be entitled to calculate interest due to it from the Federal Government, including interest for that period after State funds have been used but prior to submission of a formal request, provided that amounts requested are related to projects that have been approved, authorized, and placed under agreement, and that "the State is submitting reimbursement billings on a timely basis."

Although States are allowed to earn interest if they advance funds prior to submitting a request under Federal Highway Trust Fund programs, the FMS will strongly encourage selection of one of the funding techniques indicated in § 205.6 in order to minimize the time between the transfer of funds from the Treasury and payment for program purposes. As noted in the NPRM,

because States are authorized to bill on an accrual basis, they are not required to advance funds under FHWA programs, and more importantly can apply any of the approved funding techniques. Using one of the funding techniques as described in Final Rule § 205.6 maintains the intent of Task Force principle 6, which specifies that 3 techniques will be made available for selection by a State: Checks paid (zero balance accounting), estimated checks cleared (estimated clearance and its variation average clearance), and checks issued (pre-issuance funding).

Eleven commenters suggested that interest should accrue from the time a State advances its own funds prior to submitting a bill, but that such amounts of interest be available for offset only against either: (1) Interest foregone on accrued unbilled costs, or (2) interest owed to the Federal Government under Federal-aid highway programs. The Final Rule does not incorporate such suggestions because timely billing and reimbursement are paramount to achieving efficiency, effectiveness, and equity in Federal funds transfers. CMIA requires the head of an executive agency and the State to "minimize the time elapsing between transfer of funds from the United States Treasury and the issuance or redemption of checks, warrants, or payments by other means for program purposes," which applies whether such issuance or redemption occurs prior to, or subsequent to, the transfer of funds from the Treasury. The weekly billing cycle provision minimizes such time while taking into account the unique nature of the Federal Highway Trust Fund programs and allowing interest to accrue prior to the submission of a bill.

The suggestion to allow States to offset interest owed the Federal Government with interest foregone on accrued unbilled cost was not accepted because it would entitle a State to earn interest on accrued unbilled costs. Accrued unbilled costs are costs in excess or otherwise outside of approved cost estimates and/or project agreements between a State and the FHWA. The House Report clearly indicates that States are not entitled to earn interest on such accrued unbilled costs, as they are not obligations of the Federal Government:

[A] State could claim interest costs only if it advanced its funds to pay an obligation which is recognized as valid under Federal law, Federal regulation or Federal/State agreement. * * * or, with respect to programs such as those funded by the Federal Highway Administration, a State could collect interest if it advanced funds to meet programs obligations, which were incurred with valid obligational or contractual authority.

To clarify this point a specific provision addressing the issue was inserted into the Final Rule at § 205.11(d)(2).

Eleven commenters suggested that the Federal Highway Trust Fund be exempted from the interest provisions of CMIA. It is clearly the intent of CMIA to cover the Federal Highway Trust Fund, as evidenced by specific references in the legislative history.

Refunds: NPRM § 205.10(b) *Refunds* [Final Rule § 205.12(b) *Refunds*]. Twenty-two comments were received addressing the treatment of refunds. Ten of these comments requested that some threshold of materiality, as existed in the July 22, 1991, pre-clearance draft, be reinstated. Suggested dollar amounts for a threshold ranged from $1,000 to $100,000. In order to lessen the administrative burden that would otherwise ensue if States were required to track and calculate interest on every refund, a threshold of materiality in the amount of $10,000 has been included in the Final Rule, below which neither States nor Federal agencies are required to track and calculate interest on an individual refund transaction. A State may choose a lower threshold or no threshold if it determines that doing so is less burdensome. The term "refund transaction" means when the State's bank account is credited with all repayments that have accumulated under a given program. If, under a given program, the total dollar amount of the refund transaction is less than $10,000, then no interest liability accrues; if the amount credited to the State's bank account is greater than, or equal to, $10,000 then interest accrues from the date that the State's bank account is credited with the deposit until the date that the funds are offset against other payments or are credited to an account of the Federal Government. If a State is found to be holding back or grouping the deposit of repayments so as to avoid reaching the threshold of $10,000, then the State will be considered to be in non-compliance, and the remedial actions listed under § 205.17(k) will be initiated.

Disallowances: NPRM § 205.10(c) *Disallowances*. Fifty-nine comments addressing disallowances were received. The FMS has reassessed the provision covering disallowances (referring to incurred costs which are questioned by an audit organization and agreed to by the appropriate Federal agency as costs which should not be charged to the Federal Government) and has determined that disallowances are not covered by CMIA, but are covered by existing program, audit, and debt collection requirements. Accordingly, the provisions relating to disallowances have been removed from the Final Rule. Disallowances will continue to be handled by Federal agencies as a compliance issue relating to program administration.

Direct cost of implementation: NPRM § 205.12(a) Definition [Final Rule § 205.14 Direct costs of implementation]. Thirteen suggestions to revise the provisions defining what would be considered a direct cost of implementing CMIA were received. As stated in the NPRM, the regulation followed the guidance contained in the House Report which notes that the statute is a compromise between the views of Federal and State officials. A number of the comments suggested that types of costs that were explicitly refuted in the compromise should be eligible in the Final Rule. For example, it was recommended that such costs as developing and negotiating the Treasury-State Agreements and training employees should be eligible for reimbursement by the FMS. The House Report states that costs attributable to CMIA fall into two broad categories: "The first, are costs which should be reimbursed under current OMB guidelines for obtaining reimbursement for indirect program costs (OMB Circular A–87). The second are costs associated with computing the interest payments which should be considered by the Secretary in determining amounts of interest due to/from the State." Moreover, the Report specifically states that "most of the costs associated with H.R. 4279 are already eligible for reimbursement under the OMB Circular A–87; for example, developing and implementing the cash management policies and procedures, negotiating the agreement, and training State employees on how to implement the new procedures." Congress was clear in its intent, as documented in the House Report, that only those costs directly related to the interest calculations required by CMIA would be eligible for reimbursement through an offset of interest. The Final Rule, therefore, reflects that such costs consist of those associated with developing and maintaining clearance patterns and for performing the actual calculation of interest. Costs incurred in compiling and analyzing data related to interest calculation and in preparing and transmitting the Annual Report to the

FMS would be eligible for reimbursement.

Addressing NPRM § 205.12(a)(1), several commenters stated that it will be nearly impossible to budget accurately or to forecast implementation costs for the first several years of implementation. The Final Rule acknowledges this and removes such requirement. In addition several commenters suggested that the costs should not have to be clearly described in the Treasury-State Agreement. However, this comment is directly contradicted by the legislative intent as documented in the House Report which states that the Treasury-State Agreement would clearly describe what costs would be considered.

Several commenters disagreed with § 205.12(a)(2) of the NPRM, which states that direct costs do not include expenses for upgrading or modernizing of accounting systems. This provision is intended to ensure that a State does not claim an accounting system overhaul under the cost reimbursement provisions of CMIA. This provision does not preclude a State from receiving cost reimbursement for systems programming or computer time. In accordance with the legislative intent as documented in the House Report, such costs should be relatively minor and clearly described in the Treasury-State Agreement.

NPRM 205.12(b) Reimbursement of direct costs [Final Rule § 205.14(b)(4) Eligibility of costs]. The NPRM provided that direct costs in excess of $30,000 in any year will not be eligible for reimbursement unless a State can justify that without such costs it would be unable to develop clearance patterns or calculate interest. Approximately 35 comments were received addressing the $30,000 figure with the majority calling for its elimination, indicating that it is neither reasonable nor in accord with CMIA and its legislative history. The FMS is raising this figure to $50,000 in light of the comments received. This $50,000 figure does not cap the amount of reasonable direct costs for which a State may be compensated. CMIA requires the FMS to consider all direct costs incurred by a State for interest calculations, and the Final Rule is consistent with CMIA. The $50,000 figure merely constitutes the point at which the burden of justifying and establishing the reasonableness of those eligible direct costs shifts. For those eligible direct costs under $50,000, the FMS will review those costs under the presumption that such costs are reasonable. For those eligible direct costs claims of $50,000 or more, a State will have the burden of establishing and justifying to the FMS the reasonableness of such costs.

Direct cost offset: NPRM 205.12(b)(7) [Final Rule § 205.14(b)(8) Payment by the FMS]. Several commenters requested clarification of how, and why, the FMS will score each State's direct costs against the total interest owed by all the States. The reason for scoring and offsetting interest and direct costs at the aggregate level is to ensure that each State will receive its total reimbursable direct costs. There is a permanent indefinite appropriation embodied within CMIA for the payment of interest; however, there is no appropriation for the direct payment of costs incurred by the State. The legislative history makes it clear that States are to receive reimbursement for the allowable direct costs of implementation through an offset against interest owed to the Federal Government. However, if this were done on a State-by-State basis, any State whose reimbursable costs are greater than its interest liability to the Federal Government would not be able to receive full reimbursement. In brief, to alleviate the problem, each State's total interest liability will be aggregated to create a pool against which all direct cost claims will be offset. By pooling each State's interest liability and offsetting costs at an aggregate level, the FMS enables a State that otherwise would have a total interest liability insufficient to cover all of its costs to recoup such costs from the pool of total liabilities. It is anticipated that the total of all States' interest liabilities will be greater than the total of all States' reimbursable direct costs.

Annual Reports: NPRM § 205.13 Annual Reports [Final Rule § 205.15 *Annual Reports*]. Twenty comments addressing the Annual Reports section were received. Six commenters felt that the numerous breakdowns required in the NPRM were unnecessary and/or burdensome. The reporting requirements were carried over from the July 22, 1991, pre-clearance draft which provided for direct costs being offset on a State-by-State basis. If direct costs were offset on an individual State basis, all of the reporting breakdowns would be necessary to determine whether a State would receive full reimbursement for its direct costs. Since the Final Rule provides for direct cost offset on an aggregate level, ensuring that each State will receive full reimbursement, as long as the total of all States' interest liabilities exceed the total of all States reimbursable direct costs, there is no need for many of the breakdowns. The Final Rule eliminates any distinction between trust fund programs and non-trust fund programs (except with regard to the State's account in the Unemployment Trust Fund (UTF)) in the Annual Report, and substantially reduces the minimum reporting requirements.

Several commenters requested that a list of all trust funds be published in the Final Rule. Because the Final Rule removes the requirement to identify separately interest for trust fund programs (except for the State's account in the UTF), a list of trust funds is not relevant, and has not been included. The FMS will match the individual programs to the appropriate trust fund to remove this burden from the States.

Three commenters questioned the requirement that interest be reported on a program specific basis. It is necessary for interest to be calculated on a program specific basis in order to monitor and ensure the successful implementation of CMIA. If interest is not specified on a program basis it will be impossible for both the States and Federal agencies to determine, and work toward eliminating, the specific factors causing the accrual of interest. It will also make it impossible for the FMS to carry out its duties and collect a charge for noncompliance from a Federal agency that egregiously or repeatedly fails to comply with the requirements of this Final Rule.

Several commenters stated that the annual reporting and exchange of interest should be tied to the end of a State's fiscal year, rather than a fixed date. However, in order for interest liabilities to be aggregated among all States for offset against direct costs, all interest must be exchanged on the same day (see discussion under direct cost offset).

The Unemployment Trust Fund and programs: NPRM Subpart B [Final Rule § 205.13(i) *Funds withdrawn from a State account in the Unemployment Trust Fund (UTF)*]. In the NPRM, an entire subpart (Subpart B, The Unemployment Trust Fund) was devoted to the UTF. Numerous comments were received on the various provisions of this Subpart. Because the large majority of its content in the NPRM was either repetitive of the provisions of Subpart A, or applied to general UTF cash management issues rather than direct CMIA issues, the NPRM Subpart B has been deleted from the Final Rule.

The Department of Labor (DOL) will issue regulations and/or other directives covering all unemployment fund cash management issues and operations.

Those regulations will specifically include issues formerly contained in Subpart B of the NPRM, and will include standards and policy for immediate deposit requirements contained in the Social Security Act (SSA) § 303(a)(4) and the Federal Unemployment Tax Act (FUTA) § 3304(a)(3) and the limited withdrawal requirements in SSA § 303(a)(5) and FUTA § 3304(a)(4). Those regulations and/or other directives will be compatible with CMIA and these regulations. The Secretary of Labor will retain full authority to administer the provisions of §§ 303(a)(4) and 303(a)(5) of the SAA and §§ 3304(a)(3) and 3304(a)(4) of the FUTA and to monitor State conformity and compliance with the requirements therein. However, the withdrawal requirements of the SSA and the FUTA are affected by CMIA. Section 5(b) of CMIA, 31 U.S.C. 6503(c)(3)(B), addresses the special treatment of interest computation and exchange for funds drawn from State accounts in the UTF. States are permitted to use earnings generated to pay "related banking costs" for maintaining those accounts, and return interest earnings in excess of "related banking costs" to the UTF annually.

The specific provisions implementing § 6503(c)(3)(B) of CMIA (amounts of interest paid by a State, on funds withdrawn from its account in the UTF, will consist of actual interest earnings less related banking costs) are contained in § 205.13(i) of the Final Rule. Many commenters recommended that the provision that actual interest earned less related bank costs should be applied to the clearing account as well as funds withdrawn from the Federal Employees Compensation Account (FECA) and the Extended Unemployment Compensation Account (EUCA). CMIA is explicit that such provision applies only to funds withdrawn from the State's account in the UTF. The FMS does not have the authority to change administratively such provision, so the Final Rule retains its limited applicability only to funds withdrawn from the State's account in the UTF. The interest provisions applicable to any other State program covered by CMIA (including calculation of interest at the 13-week T-Bill rate) apply to funds withdrawn from the FECA and EUCA accounts. The clearing account is not covered by CMIA because CMIA generally applies to payments for program purposes, whereas the clearing account serves as a depository and holding account for unemployment funds prior to transfer to the UTF. Applicable regulations regarding the timing of transfers from the clearing account to the UTF are encompassed in DOL regulations and program directives.

A number of commenters interpreted the language requiring separate tracking, reporting, and recordkeeping by source of funds in the UTF as being overly burdensome. For purposes of CMIA, the Final Rule requires that the funds withdrawn from the State's account in the UTF must be allocated a pro rata share of interest earnings and related bank costs of the benefit payment account or relevant investment pools. Specifications relating to separate tracking, accounting, recordkeeping, etc., are deferred to DOL requirements.

Several commenters suggested that the provisions requiring an annual exchange of interest are inapplicable to interest on funds drawn down from the UTF, because such interest is to be immediately remitted to the Federal Government under the immediate deposit requirements of both the SSA and the FUTA. The annual remittance of interest on funds drawn down from the UTF is specifically required by CMIA but does not otherwise impact the immediate deposit requirements of SSA/FUTA.

OMB Circulars

The OMB Circulars referenced in this regulation may be obtained from the Office of Management and Budget, New Executive Office Building, 725–17th Street, NW., Washington, DC 20503.

Regulatory Analysis

It has been determined that this document is not a major regulation as defined in Executive Order 12291 and a regulatory impact analysis is not required. Although some States may have to make interest payments to the Federal Government for the use of Federal funds, such costs will be a direct result of implementation of CMIA.

Regulatory Flexibility Act

It is hereby certified that this regulation will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required. States do not fit within the Regulatory Flexibility Act definition of "small entity," 5 U.S.C. 601.

Paperwork Reduction Act

The collection of information contained in this final regulation has been reviewed and approved by OMB in accordance with the requirements of the Paperwork Reduction Act (44 U.S.C. 3504(h)) under control number 1510–0061. The estimated annual burden per respondent/recordkeeper varies from 250 to 750 hours, depending on individual circumstances, with an estimated average of 500 hours.

Five comments were received addressing the estimated annual burden of 250 hours to 750 hours per respondent/recordkeeper contained in the NPRM. One commenter stated that it is unreasonable to use the Paperwork Reduction Act estimate as a guideline in calculating a State's direct costs of implementing CMIA. The FMS agrees that the Paperwork Reduction Act estimate may not be the only basis for calculating a State's direct costs. The estimated recordkeeping and reporting burden may represent only a portion of the costs that will be recovered by the States. In addition, some of the reporting/recordkeeping costs presumably will be recoverable under OMB Circular A–87 rather than as a direct cost recovery under CMIA.

Several of the comments also indicated that the reporting and/or recordkeeping estimate appears to be low. The FMS emphasizes that the estimate applies solely to hours involved in recordkeeping and reporting. In addition, none of the comments received provided a basis for adjusting the estimate, nor offered a reasonable alternative. The FMS has not amended the estimate, and maintains that 250 to 750 hours per respondent is the most reasonable estimate available given the recordkeeping and annual reporting requirements under CMIA and this Final Rule. However, in response to State comments some of the recordkeeping and reporting requirements have been simplified in the Final Rule. Such changes which simplify the reporting and recordkeeping burden are as follows: (1) There is a de minimis rule applicable to refunds; (2) The requirement to calculate interest for disallowed payments has been removed; (3) The requirement to report separately interest by trust fund has been removed; and (4) The requirement to retain records for 5 years has been reduced to 3 years.

Additional comments concerning the accuracy of this burden estimate and suggestions for reducing this burden should be directed to the Financial Management Service, Facilities Management Division, Property and Supply Section, 3361–L 75th Avenue, Landover, MD 20785; and to the Office of Management and Budget, Paperwork Reduction Project (1510–0061), Washington, DC. 20503. THIS ADDRESS SHOULD BE USED ONLY FOR COMMENTS AND/OR SUGGESTIONS CONCERNING THE AMOUNT OF

TIME SPENT TO COLLECT THIS DATA.

List of Subjects in 31 CFR Part 205

Grant programs, Grant administration, Intergovernmental relations, Electronic funds transfers.

Authority and Issuance

For the reasons set forth in the preamble, 31 CFR Part 205 is revised to read as follows. Subpart C is reserved.

PART 205—RULES AND PROCEDURES FOR FUNDS TRANSFERS

Sec.

205.1 Purpose.
205.2 Scope of Part.
205.3 Definitions.

Subpart A—Negotiation of Intergovernmental Agreements for Financing Federal Assistance Programs—Interest Liabilities on Intergovernmental Funds Transfers

205.4 Scope of Subpart.
205.5 Onset Period.
205.6 Funding techniques.
205.7 Requesting and transferring funds.
205.8 Clearance patterns.
205.9 Treasury-State Agreements.
205.10 Funding of indirect costs and administrative cost grants.
205.11 Federal interest liabilities.
205.12 State interest liabilities.
205.13 Interest calculation.
205.14 Direct costs of implementation.
205.15 Annual Reports.
205.16 Interest payment.
205.17 Compliance and oversight.
205.18 Appeals and dispute resolution.

Appendix A to Subpart A of Part 205—Definition of Major Federal Assistance Program

Subpart B—Potential Liabilities on Intergovernmental Funds Transfers Included in the Catalog of Federal Domestic Assistance but Otherwise Generally Excluded from Subpart A

205.19 Scope of Subpart.
205.20 Cash advances.
205.21 Federal agency oversight responsibilities.
205.22 State noncompliance.
205.23 Failure to make funds available.

Subpart C—[Reserved]

Authority: 5 U.S.C. 301; 31 U.S.C. 321, 3335, 6501, 6503.

§ 205.1 Purpose.

Subparts A and B of this part implement the Cash Management Improvement Act and prescribe rules and procedures for the transfer of funds between the Federal Government and the States for Federal grant and other programs. Subpart C of this part is reserved and, if issued, may implement other authorities and govern transactions outside the scope of Subparts A and B.

§ 205.2 Scope of part.

(a) Subparts A and B apply to programs listed in the Catalog of Federal Domestic Assistance, pursuant to chapter 61 of title 31, United States Code.

(b) This part does not generally apply to direct loan programs.

(c) This part does not apply to payments made to States acting as vendors on Federal contracts, which are subject to the Prompt Payment Act of 1982, as amended, 31 U.S.C. 3901 *et seq.*, Office of Management and Budget (OMB) Circular A–125 "Prompt Payment," and 48 CFR Part 32.

(d) This part does not apply to the Tennessee Valley Authority (TVA) or programs administered by the TVA.

§ 205.3 Definitions.

For the purpose of this part:

Administrative cost grant means a grant exclusively for administrative expenses under a program with separate grant awards for benefit payments and administrative expenses.

Auditable means the sources of data and information for a calculation are readily available, fully documented, and verifiable, such that the calculation can be replicated and proven to comply with all pertinent standards.

Authorized State official means a person with the authority under the laws of a State to make commitments on behalf of the State for the purposes of this regulation, or that person's official designee as certified in writing.

Check means a negotiable demand draft or warrant.

Clearance pattern means a frequency distribution showing the proportion of a total amount disbursed that is debited against the payer's bank account each day after the disbursement.

Current project cost means a cost for which the liability has been recorded on or after the day on which a State last requested funds for the project.

Day means a calendar day unless otherwise specified.

Disburse means to issue a check or initiate an electronic funds transfer payment.

Discretionary grant project means a project for which a Federal agency is statutorily authorized to exercise judgment in awarding a grant and in selecting a grantee, generally through a competitive process.

Drawdown means a process whereby a State requests and receives Federal funds.

Electronic funds transfer (EFT) means, in the context of Federal payments to States, the delivery of funds through wire transfer or the Automated Clearing House.

Equivalent rate means auction average equivalent yield, also known as the auction average investment rate of 13-week Treasury bills.

Federal agency means an executive agency as defined by section 102 of title 31, United States Code, exclusive of the TVA.

Federal-State agreement means an agreement between a State and a Federal program agency specifying terms and conditions for carrying out a program or group of programs, but does not mean a Treasury-State Agreement described in § 205.9.

Fiscal year means, unless otherwise indicated, a State's budget year ending in the specified calendar year.

Issue checks means to release or distribute checks to the payees.

Major Federal assistance program is defined in appendix A to subpart A of this part.

Obligational authority means the existence of a definite commitment on the part of the Federal Government to provide appropriated funds to a State to carry out specified programs, whether the commitment is executed before or after a State pays out funds for program purposes. This term means that an obligation to a State has been executed and does not refer to the amount of budgetary resources available.

Pay out means to debit the payor's bank account.

Pay out funds for program purposes means, in the context of State payments, to debit a State account for the purpose of making a payment to 1) a person or entity that is not considered part of the State pursuant to the definition of "State" in this section, or 2) a State entity for the procurement of goods or services for the direct benefit or use of the payor State entity or the Federal Government.

Program means the range of activities encompassed under, and classified by, a Catalog of Federal Domestic Assistance number (CFDA #).

Refund means a recovery of funds previously paid out for program purposes.

Related banking costs means stand-alone, non-credit services which are considered necessary and/or customary for sustaining an account in a financial institution, whether in commercial financial institutions or State Treasurer accounts. Investment service fees are not related to banking costs.

Request for funds means a solicitation for funds that is completed and submitted in accordance with Federal agency guidelines.

Secretary means the Secretary of the United States Department of the

Treasury. The Financial Management Service (FMS) is the Secretary's representative in all matters concerning this Part, unless otherwise specified.

State means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the Virgin Islands, and an agency, instrumentality, or fiscal agent of a State so defined, but does not mean a local government or an Indian tribal government.

A State agency or instrumentality is any organization or component unit of the State reporting entity as defined by Generally Accepted Accounting Principles.

A fiscal agent of a State is an entity that pays, collects, or holds Federal funds on behalf of the State in furtherance of a Federal program, exclusive of a private nonprofit community organization.

Trust fund for which the Secretary is the trustee means a trust fund administered by the Secretary.

Subpart A—Negotiation of Intergovernmental Agreements for Financing Federal Assistance Programs—Interest Liabilities on Intergovernmental Funds Transfers

§ 205.4 Scope of subpart.

(a) *Initial programs.* From October 24, 1992, to the end of a State's 1994 fiscal year, this subpart applies, at a minimum, to the following programs, provided they meet the threshold for major Federal assistance programs in the State:

Alcohol and Drug Abuse and Mental Health Services Block Grant (CFDA 93.992);
Chapter 1 Programs—Local Educational Agencies (CFDA 84.010);
Child Support Enforcement (CFDA 93.023);
Family Support Payments to States (CFDA 93.020);
Foster Care—Title IV–E (CFDA 93.658);
Highway Planning and Construction (CFDA 20.205);
Job Opportunities and Basic Skills Training (CFDA 93.021);
Job Training Partnership Act (CFDA 17.250);
Low-Income Home Energy Assistance (CFDA 93.028);
Medical Assistance Program (CFDA 93.778);
National School Lunch Program (CFDA 10.555);
Nutrition Assistance for Puerto Rico (CFDA 10.566).
Pell Grant Program (CFDA 84.063);
Rehabilitation Services—Basic Support (CFDA 84.126);
Social Services Block Grant (CFDA 93.667);
Special Education—State Grants (CFDA 84.027);
Special Supplemental Food Program for Women, Infants, and Children (CFDA 10.557);
State Administration Matching Grants—Food Stamp Program (CFDA 10.561);
Supplemental Security Income (CFDA 93.807);
Unemployment Insurance (CFDA 17.225);

(b) *Threshold of materiality.* From the beginning of a State's 1995 fiscal year and thereafter, this subpart applies, at a minimum, to all programs that meet the threshold for major Federal assistance programs in a State.

(c) *Determining major Federal assistance programs.* Unless otherwise specified in a Treasury-State Agreement, major Federal assistance programs will be determined from the most recent Single Audit data available from the U.S. Bureau of the Census and, if necessary, other data from the most recent fiscal year for which funding can be documented.

(d) *Covering additional programs.* A State and the FMS may agree, in a Treasury-State Agreement, to cover additional programs under this subpart. However, the FMS has unilateral authority to require a State and Federal agency to cover additional programs under this subpart if a State or a Federal agency fails to comply with Subpart B of this part, as set forth in §§ 205.22 and 205.23.

(e) *Programs not covered by this subpart.* Programs in the Catalog of Federal Domestic Assistance that are not covered by this subpart are subject to Subpart B of this part.

(f) *Grace period for colleges and universities.* Unless otherwise specified in a Treasury-State Agreement, this subpart does not apply to a State institution of higher education prior to a State's 1995 fiscal year, notwithstanding any other provision of this section.

§ 205.5 Onset Period.

(a) *Definition.* The Onset Period is from October 24, 1992, to the later of June 30, 1993, or the last day of a State's 1993 fiscal year.

(b) *Continuing existing practices.* Notwithstanding any other provision of this subpart and unless otherwise specified in a Treasury-State Agreement, during the Onset Period a State and a Federal agency shall be allowed to continue with the accounting and cash management practices used prior to the Onset Period. A State and a Federal agency shall not be required to implement new funding techniques, monitor funds for the purpose of calculating interest, or otherwise change the manner in which Federal program funds are requested, transferred, managed, or accounted for prior to the Onset Period.

(c) *Imputing interest liabilities to the Onset Period.* Notwithstanding any other provision of this subpart and unless otherwise specified in a Treasury-State Agreement, a State shall use the interest calculation for its 1994 fiscal year, as well as available data from the Onset Period, to impute retrospectively Federal and State interest liabilities, pro rata, to the Onset Period.

(d) *Initial reports and interest payments.* Notwithstanding any other provision of this subpart and unless otherwise specified in a Treasury-State Agreement, the first Annual Reports and the first payments of interest pursuant to this subpart will consist of interest liabilities incurred during a State's 1994 fiscal year and interest liabilities imputed to the Onset Period.

§ 205.6 Funding techniques.

(a) *Zero balance accounting.* Zero balance accounting is a method of transferring Federal funds to a State based on the actual amount of funds that are paid out by the State each day after a disbursement. Neither the Federal Government nor a State will incur an interest liability when this funding technique is properly applied.

(b) *Estimated clearance.* Estimated clearance is a method of transferring Federal funds to a State based on the estimated amount of funds that are paid out by the State each day after a disbursement. Neither the Federal Government nor a State will incur an interest liability when this funding technique is properly applied.

Example: A State mails $1 million in checks to benefit recipients under a Federally funded program. The State has developed the following clearance pattern for the program, based on when checks historically have been presented for payment:

Day	Percentage of $'s paid out
0 (checks mailed)	0
1	0
2	0
3	0
4	40
5	30
6	15
7	10
8	5

On Day 3, the State requests 40 percent of the funds disbursed, or $400,000, and the Federal agency deposits funds in the State account on Day 4 to coincide with the expected presentment of 40 percent of the total disbursement. On Day 4, the State requests 30 percent of the funds to pay for checks presented on Day 5, and so on. Furthermore, if the State draws down $400,000 to pay for checks presented on Day 4, neither the State nor the Federal Government will incur an interest liability if the amount of checks actually presented is more or less than $400,000. Over the long term, the amounts drawn down and the amounts of checks presented for payment will converge to the historical clearance pattern.

(c) *Pre-issuance funding.* Pre-issuance funding is a method of transferring Federal funds to a State prior to the day the State issues checks or initiates EFT payments. When this funding technique is applied, a State will incur an interest liability to the Federal Government from the day Federal funds are credited to a State account to the day the State pays out the funds for programs purposes.

Example: Three business days before a State issues $1 million in checks, it requests $1 million from a Federal agency, which deposits the funds in a State account the next day. The State has developed the following clearance pattern, based on when the State's checks historically have been presented for payment:

Day	Percent of $'s paid out
0 (funds deposited)	0
1	0
2 (checks issued)	0
3	0
4	0
5	40
6	30
7	15
8	10
9	5

The State will owe the Federal Government 5 days of interest on 40 percent of the funds, or $400,000, since that amount will be paid out for checks presented 5 days after Federal funds are deposited in a State account. The State will owe 6 days of interest on 30 percent of the funds, or $300,000, 7 days of interest on 15 percent of the funds, and so on.

(d) *Average clearance.* Average clearance is a method of transferring funds to a State based on the dollar-weighted average number of days required for funds to be paid out by the State after a disbursement. Neither the Federal Government nor a State will incur an interest liability when this funding technique is properly applied.

Example: A State mails $1 million in checks to contractors for a Federally funded program. The State has developed the following clearance pattern, based on when checks historically have been presented for payment, and has determined the average day of clearance, weighted by dollar amount, to be 5 days after checks are issued:

Day	Percent of $'s paid out	Factor (day × percentage)
0 (checks issued)	0	
1	0	
2	0	
3	0	
4	40	1.60
5	30	1.50
6	15	0.90
7	10	0.70
8	5	0.40
Average day of clearance		5.10

The State requests $1 million on day 4 and receives that amount on day 5, which is the dollar-weighted average number of days required for checks to be presented at the State's bank, and neither the State nor the Federal Government incurs an interest liability.

(1) In determining a dollar-weighted average day of clearance, fractions of days are rounded to the nearest whole number.

(2) The standards and maintenance requirements for clearance patterns, as set forth in § 205.8, apply for average day of clearance calculations.

(e) *Reimbursable funding.* Reimbursable funding is a method of transferring Federal funds to a State after the State has paid out its own funds for program purposes. After June 30, 1994, reimbursable funding is prohibited, except where mandated by Federal law.

§ 205.7 Requesting and transferring funds.

(a) *Electronic funds transfer.* To the maximum extent practicable, a Federal agency shall use EFT for transfers of funds to a State.

(b) *Minimizing the time between transfer and payment.* A State and a Federal agency shall minimize the time elapsing between the transfer of funds from the United States Treasury and the pay out of funds for program purposes by a State, whether the transfer occurs before or after the pay out.

(c) *Procedures for funding techniques.* Unless otherwise specified in a Treasury-State Agreement, a State and a Federal agency shall adhere to the following procedures for each funding technique:

(1) *Zero balance accounting.* A State shall request funds the same day it pays out funds for program purposes, and a Federal agency shall deposit funds in a State account the same day it receives a request for funds.

(2) *Estimated clearance.* A State shall request funds 1 business day prior to the day it expects to pay out funds, in accordance with a clearance pattern, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(3) *Average clearance.* A State shall request funds 1 business day prior to the dollar-weighted average number of days required for funds to be paid out after a disbursement, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(4) *Pre-issuance funding.* A State shall request funds not more than 3 business days prior to the day on which it makes a disbursement, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(5) *Reimbursable funding.* A State shall request funds only after it has paid out its own funds for programs purposes, and a Federal agency shall deposit funds in a State account the next business day after receiving a request for funds.

(d) *Limiting the amount transferred.* Consistent with a funding technique and with funds transfer procedures in a Treasury-State Agreement, a State and a Federal agency shall limit the amount of funds transferred to a State to the minimum required to meet a State's actual, immediate cash needs.

(e) *Frequency of requests for funds.* A Federal agency shall allow a State to submit requests for funds, or bills, as often as daily. However, this requirement shall not be construed to change Federal agency guidelines defining a properly completed request for funds.

(f) *Prohibition of reimbursable funding requirements.* A Federal agency may not require a State to use reimbursable funding, unless mandated by Federal law.

§ 205.8 Clearance patterns.

(a) *Use and basis of development.* When required by a funding technique, a clearance pattern will be used to schedule the transfer of funds to a State and to support the calculation of interest. A State may:

(1) Develop a separate clearance pattern for an individual program; or

(2) Develop a composite clearance pattern for a logical group of programs that have the same disbursement method and that reasonably can be expected to have comparable clearance activity. A composite clearance pattern for a group of programs must be applied separately to each program in the group when scheduling funds transfers or calculating interest; or

(3) Develop a clearance pattern on another basis that is agreed upon by the FMS.

(b) *Standards for clearance patterns.* A State shall ensure that a clearance pattern accurately represents the flow of Federal funds and that a clearance pattern reflects seasonal or other periodic variations in clearance activity. A State shall ensure that a clearance pattern is auditable.

(c) *Maintaining clearance patterns.* (1) If a State has actual or constructive knowledge, at any time, that a clearance pattern does not correspond to a program's clearance activity, or if a program undergoes operational changes that may affect clearance activity, the State shall:

(i) Immediately notify the FMS in writing of the program requiring a new clearance pattern, and

(ii) Develop a new clearance pattern and certify that it corresponds to a program's clearance activity.

(2) If a Federal agency has actual or constructive knowledge, at any time, that a State's clearance pattern does not correspond to a program's clearance activity, the agency shall notify the FMS in writing of the State and the program. the FMS shall immediately notify the State of the programs, and the State shall either:

(i) Develop a new clearance pattern and certify that it corresponds to a program's clearance activity, or

(ii) Re-certify the accuracy of the existing clearance pattern.

(d) *Certification for accuracy.* An authorized State official shall certify that a clearance pattern corresponds to a program's clearance activity. If a State develops a clearance pattern for a program or a group of programs, as set forth in paragraphs (a)(1) and (a)(2) of this section, an authorized State official shall re-certify the accuracy of the clearance pattern at least every 5 years. If a State develops a clearance pattern on another basis, as set forth in paragraph (a)(3) of this section, the FMS may prescribe requirements for re-certifying the accuracy of the clearance pattern.

§ 205.9 Treasury-State Agreements.

(a) *Purpose.* A State may enter into a Treasury-State Agreement with the FMS to set forth terms and conditions for implementing this subpart.

(b) *Components.* A Treasury-State Agreement pursuant to this subpart must include, but will not be limited to, the following:

(1) *Programs.* Consistent with § 205.4, a Treasury-State Agreement must indicate the programs subject to this subpart.

(2) *Funding techniques.* A Treasury-State Agreement must indicate the funding techniques to be applied to the programs subject to this subpart, in accordance with the following:

(i) Zero Balance Accounting, Estimated Clearance, and Pre-Issuance Funding are techniques available for selection by a State, subject to the approval of the FMS.

(ii) A State may request approval to use the Average Clearance funding technique, but must provide the FMS with adequate justification for its use in lieu of Estimated Clearance.

(iii) Reimbursable funding is available for selection by a State, subject to the approval of the FMS, only for a program for which the State used reimbursable funding prior to October 24, 1992. However, reimbursable funding is not available for selection by a State for the programs listed in § 205.4(a).

(iv) A State and the FMS may negotiate the use of other mutually agreed upon funds transfer procedures.

(v) A State may apply more than one funding technique or funds transfer procedure to a program with multiple cash flows.

(3) *Interest calculation method.* Consistent with § 205.13, a Treasury-State Agreement must indicate the method a State will use to calculate and document interest liabilities pursuant to this Subpart.

(4) *Clearance pattern method.* Consistent with § 205.8, a Treasury-State Agreement must indicate the method and standards a State will use to develop and maintain clearance patterns pursuant to this subpart.

(5) *Direct costs.* Consistent with § 205.14, a Treasury-State Agreement must specify the types of direct costs a State expects to incur.

(6) *Reverse flow programs.* Consistent with §§ 205.8 and 205.13, with respect to programs for which the Federal Government makes payments on behalf of a State, a Treasury-State Agreement must indicate the methods a Federal agency will use to calculate and document interest liabilities and to develop and maintain clearance patterns pursuant to this subpart.

(c) *Consultation with Federal agencies.* The FMS will consult with Federal program agencies as necessary and appropriate when negotiating a Treasury-State Agreement.

(d) *Amendment.* A Treasury-State Agreement may be amended by the mutual written consent of the State and the FMS.

(e) *Five-year expiration.* A Treasury-State Agreement expires if it is not amended for 5 years.

(f) *Default provisions for a State without a Treasury-State Agreement after the Onset Period.* With respect to a State that does not have a Treasury-State Agreement in effect after the later of June 30, 1993, or the last day of the State's 1993 fiscal year, the following apply:

(1) The FMS shall prescribe funds transfer procedures to be used by the State and a Federal agency in implementing this Subpart, consistent with Federal and State law.

(2) The FMS shall prescribe the method for calculating interest liabilities pursuant to this subpart.

§ 205.10 Funding of indirect costs and administrative cost grants.

(a) A State and the FMS may agree, in a Treasury-State Agreement, to the following funding conventions for indirect costs and administrative cost grants:

(1) The State will draw down a prorated amount of an administrative cost grant on the date of the State payday. For example, the State would draw one-third of a quarterly administrative cost grant if payroll is monthly, or one-sixth of a quarterly administrative cost grant if payroll is semi-monthly.

(2) If an indirect cost rate is applied to a program, the State will include a proportionate share of the indirect cost allowance in each drawdown by applying the indirect cost rate to the appropriate direct costs of each drawdown.

(3) If costs must be allocated to various programs pursuant to a labor distribution or other system under an approved cost allocation plan, the State will draw down funds to meet cash outlay requirements based on the most recent, certified cost allocations, with subsequent adjustments pursuant to the actual allocation of costs.

(b) A State and the FMS may agree, in a Treasury-State Agreement, that no interest liabilities will be incurred or calculated for indirect costs and administrative cost grants, notwithstanding any other provision of this subpart.

§ 205.11 Federal interest liabilities.

(a) *General.* The Federal Government will incur an interest liability to a State if the State pays out its own funds for program purposes with valid obligational authority under Federal law, Federal regulation, or Federal-State agreement. A Federal interest liability will accrue from the day a State pays out its own funds for program purposes to the day Federal funds are credited to a State account.

(b) *Late appropriations.* If a State pays out its own funds for program purposes due to delay in passage of a Federal appropriations act, the Federal Government will incur an interest liability if an appropriations act, as enacted, covers the period of the State's expenditure and permits payment for expenses already incurred by the State.

(c) *Lack of obligational authority other than occurring through late appropriations.* If a State pays out its own funds for program purposes without obligational authority, the Federal Government will incur an interest liability if the lack of obligational authority is not the result of limitation, reduction, or termination of the program and where obligational authority is subsequently established to permit payment for the State's expenditure.

(d) *Federal Highway Trust Fund.* The following applies to programs and projects funded out of the Federal Highway Trust Fund, notwithstanding any other provision of this section:

(1) If a State does not request funds at least weekly for current project costs, a Federal interest liability will not accrue prior to the day a State submits a request for funds.

(2) If a State pays out its own funds in the absence of a project agreement or in excess of the Federal obligation in a project agreement, the Federal Government will not incur an interest liability.

(e) *Discretionary grant project approval.* If a State pays out its own funds prior to the earlier of (1) The day a Federal agency officially notifies the State in writing that a discretionary grant project has been approved, or (2) The date that a Federal agency is otherwise obligated in law to pay the discretionary grant project to the State, the Federal Government will not incur an interest liability, notwithstanding any other provision of this section.

(f) *Authorizations and appropriations for future years.* If a State pays out its own funds prior to the availability of Federal funds that have been authorized or appropriated for a future Federal fiscal year, the Federal Government will not incur an interest liability, notwithstanding any other provision of this section.

(g) *Reverse flow programs.* With respect to programs for which the Federal Government makes payments on behalf of a State, such as Supplemental Security Income, the Federal Government will incur an interest liability if State funds are in a Federal Government account prior to the day a Federal agency pays out funds for program purposes. A Federal interest liability will accrue from the day State funds are credited to the Federal Government's account to the day the Federal agency pays out the State funds for program purposes.

§ 205.12 State interest liabilities.

(a) *General.* A State will incur an interest liability to the Federal Government if Federal funds are in a State account prior to the day the State pays out funds for program purposes. A State interest liability will accrue from the day Federal funds are credited to a State account to the day the State pays out the Federal funds for program purposes.

(b) *Refunds.* A State will incur an interest liability to the Federal Government on a refund transaction of Federal funds. A State interest liability will accrue from the day the refund is credited to a State account to the day the refund is either paid out for program purposes or credited to a Federal Government account. However, a State may adopt a transaction threshold not exceeding $10,000, below which the State will not incur an interest liability on a refund transaction.

(c) *Reverse flow programs.* With respect to programs for which the Federal Government makes payments on behalf of a State, such as Supplemental Security Income, a State will incur an interest liability to the Federal Government if a Federal agency pays out Federal funds for program purposes on behalf of the State. A State interest liability will accrue from the day the Federal agency pays out Federal funds for program purposes to the day State funds are credited to the Federal Government's account.

(d) *Exception.* Notwithstanding any other provision in this section, a State will not incur an interest liability to the Federal Government if Federal law requires that the interest a State earns on Federal funds must be retained by the State or used for program purposes. This exception shall not be construed to exempt a program from any other provision of this subpart.

§ 205.13 Interest calculation.

(a) *State responsibilities.* A State shall calculate Federal interest liabilities and State interest liabilities for each program subject to this subpart, except as provided for in paragraph (b) of this section.

(b) *Reverse flow programs.* A Federal agency shall calculate Federal interest liabilities and State interest liabilities for a program subject to this subpart for which the Federal agency makes payments on behalf of a State, such as Supplemental Security Income.

(c) *Start date.* Interest liabilities begin accruing October 24, 1992.

(d) *Interest rate.* The interest rate for all interest liabilities pursuant to this subpart is the annualized rate equal to the average equivalent yields of 13-week Treasury Bills auctioned during a State's fiscal year, except as provided for in paragraph (i) of this section. The FMS will provide this rate to each State.

(e) *Interest calculation method and standards.* A State shall calculate and report interest liabilities on the basis of its fiscal year. A State shall ensure that its interest calculations are auditable. As set forth in § 205.9, a Treasury-State Agreement must include the method a State will use to calculate and document interest liabilities pursuant to this subpart.

(f) *Statistical sampling.* If a State uses statistical sampling to calculate interest, the State must randomly sample transactions for each program subject to this subpart to ensure, at a minimum, a 95 percent confidence interval subject to a .3 dollar-weighted day bound of error estimate.

(g) *Onset Period.* A State shall determine interest liabilities for the Onset Period, which is from October 24, 1992, to the later of June 30, 1993, or the last day of the State's 1993 fiscal year, in accordance with § 205.5.

(h) *Transactions prior to a State's 1994 fiscal year.* Consistent with the provisions of § 205.5, a State shall not include in an interest calculation a transaction in which either the transfer of funds to the State or the pay out of funds for program purposes by the State occurs prior to the later of July 1, 1993, or the first day of the State's 1994 fiscal year.

(i) *Funds withdrawn from a State account in the Unemployment Trust Fund (UTF).* A State shall account for the actual interest earnings and the related banking costs attributable to funds withdrawn from the State's account in the UTF.

(1) If funds withdrawn from the several accounts in the UTF are commingled in the State's

Unemployment Insurance benefit payment account, the funds withdrawn from the State's account must be allocated a pro rata share of the actual interest earnings and related banking costs of the benefit payment account. Funds withdrawn from the State's account in the UTF that are included in investment pools must be allocated a pro rata share of interest earnings of the investment pool.

(2) Notwithstanding any other provision of this subpart, a State's interest liability on funds withdrawn from its account in the UTF consists of the actual interest earnings less the related banking costs of such funds, and shall be deposited in the State's account in the UTF.

(3) This paragraph (i) does not apply to funds withdrawn from the Federal Employees Compensation Account and the Extended Unemployment Compensation Account in the UTF.

§ 205.14 Direct costs of implementation.

(a) *Definition.* Direct costs of implementing this subpart are those costs necessary for the development and maintenance of clearance patterns and those costs necessary to perform the actual calculation of interest liabilities. Direct costs do not include expenses incurred for upgrading or modernizing of accounting systems.

(b) *Reimbursement of direct costs.* A State will be compensated annually for the direct costs of implementing this subpart, subject to the following conditions and limitations.

(1) *Treasury-State Agreement.* A State must have a Treasury-State Agreement with the FMS, as set forth in § 205.9.

(2) *Direct cost claim.* A State must submit a claim for direct costs with its Annual Report, as set forth in § 205.15(c).

(3) *Documentation.* A State must maintain documentation to substantiate its claim for direct costs.

(4) *Eligibility of costs.* Direct costs in excess of $50,000 in any year are not eligible for reimbursement, unless a State can justify to the FMS that it would be unable to develop clearance patterns or perform the actual calculation of interest without incurring such costs.

(5) *Costs incurred in prior years.* Direct costs incurred prior to a State's most recently completed fiscal year are not eligible for reimbursement, excepting costs incurred prior to the first day of a State's 1994 fiscal year and claimed for reimbursement with the State's first Annual Report submitted pursuant to this subpart.

(6) *Costs incurred prior to July 22, 1991.* Direct costs incurred prior to July 22, 1991, are not eligible for reimbursement, unless a State makes separate application for such costs, with adequate justification and documentation.

(7) *Review by the FMS.* The FMS will review all direct cost claims for reasonableness. Unreasonable cost claims, as determined by the FMS, will not be reimbursed, notwithstanding any other provision of this section.

(8) *Method of reimbursement.* The FMS will affect direct cost reimbursement by reducing the State interest liability and adjusting the Federal interest liability for each State, to the extent allowed by the following limitations:

(i) Interest liabilities for programs funded out of trust funds for which the Secretary is trustee may not be reduced or adjusted; and

(ii) The aggregate Federal interest liability for all States may not increase.

(c) *Application of cost principles.* A State shall not include direct costs of implementing this subpart, as defined in paragraph (a) of this section, in the development of its Statewide cost allocation plan, as provided for in OMB Circular A–87. All other costs incurred by a State to implement this subpart are subject to the procedures and principles of OMB Circular A–87.

(d) *Sunset review.* By July 1, 1996, the FMS will review the policies in this section to determine their effectiveness.

§ 205.15 Annual Reports.

(a) A State shall submit an Annual Report to the FMS by December 31 accounting for the interest liabilities of the State's most recently completed fiscal year. The format of the Annual Report will be prescribed by the FMS and will include, at a minimum, the following:

(1) The Federal interest liability for each program subject to this subpart;

(2) The State interest liability for each program subject to this subpart, with the State interest liability on refunds for each program reported separately;

(3) The total Federal interest liability for all programs subject to this subpart;

(4) The total State interest liability for all programs subject to this subpart;

(5) The net total interest owed by the State or the Federal Government;

(6) For information purposes, not for the calculation of interest, the actual interest earnings on and the related banking costs for funds drawn from the State's account in the UTF.

(b) A State shall submit its Annual Report both in hard copy and either on computer diskette or by other electronic means prescribed by the FMS.

(c) A State may submit as part of its Annual Report a claim for reimbursement of the direct costs of implementing this subpart, in accordance with § 205.14. An authorized State official shall certify the accuracy of a State's direct cost claim.

(d) An authorized State official shall certify the accuracy of a State's Annual Report.

(e) *Reverse flow programs.* With respect to a program for which the Federal Government makes payments on behalf of a State, a Federal agency shall provide an interest report to a State by December 1 for the State's most recently completed fiscal year. The interest report will include the State interest liability and the Federal interest liability for the program, including the Federal interest liability on refund transactions of $10,000 or more. The Federal agency shall certify the accuracy of the interest report. A State shall incorporate the interest report in its Annual Report.

(f) The FMS will distribute Annual Reports to Federal agencies.

§ 205.16 Interest payment.

(a) *Adjusted interest liabilities.* The FMS will adjust a State's total interest liability and the Federal Government's total interest liability to a State to effect direct cost reimbursement, as set forth in § 205.14(b)(8).

(b) *Net interest payment.* The adjusted total State interest liability and the adjusted total Federal interest liability for each State will be offset to determine the net interest payable to or from a State. The payment of net interest to or from a State for its most recently completed fiscal year will occur no later than March 1.

(c) *Disputed amounts.* If the amount of interest payable is disputed according to the provisions of § 205.18, payment must occur for any undisputed portions. The interest in dispute must be paid within 14 days of receipt of the decision by the Assistant Commissioner, Federal Finance, as set forth in § 205.18.

§ 205.17 Compliance and oversight.

(a) State coordinator. A State shall designate an official representative with the statutory or administrative authority to coordinate all interaction with the Federal Government concerning this subpart, and shall notify the FMS of the representative's name and title in writing.

(b) *Federal agency coordinator.* A Federal Agency shall designate an official representative to coordinate all interaction with the FMS and the States concerning this subpart, and shall notify

the FMS of the representative's name and title in writing.

(c) *Recordkeeping.* A State shall maintain records supporting interest calculations, clearance patterns, direct costs, and other functions directly pertinent to the implementation and administration of this subpart.

(d) *Record retention.* A State shall retain the records related to implementation of this subpart of each fiscal year for 3 years from the date the State submits its Annual Report, or until any dispute or action involving the records and documents is completed, whichever is later.

(e) *Availability of records.* The FMS, the Comptroller General, and a Federal agency shall have the right of access to all records for the purpose of verifying interest calculations, clearance patterns, direct cost claims, and the State's accounting for Federal funds.

(f) *Records for reverse flow programs.* With respect to programs for which the Federal Government makes payment on behalf of a State, a Federal agency shall maintain records supporting interest calculations and clearance patterns. A Federal agency shall retain such records for 3 years from the date the Federal agency submits its interest calculations to a State, as set forth in § 205.15(e), or until any dispute or action involving the records is completed, whichever is later. The FMS, the Comptroller General, and a State shall have the right of access to all records for the purpose of verifying interest calculations, clearance patterns, and the Federal agency's accounting for State funds.

(g) *State audits.* A State's implementation of this subpart is subject to audit in accordance with chapter 75 of title 31, United States Code, "Requirements for Single Audits."

(h) *Federal agency compliance reviews.* A Federal agency's implementation of this subpart is subject to review pursuant to procedural instructions issued by the FMS.

(i) *Reviewing Annual Reports.* The FMS will distribute Annual Reports to Federal agencies, as set forth in § 205.15(f). Upon request by the FMS, a Federal agency shall review a State's Annual Report for accuracy and reasonableness and shall report its findings to the FMS.

(j) *Federal agency noncompliance.* If a Federal agency egregiously or repeatedly causes Federal interest liabilities or fails to comply with this subpart, the FMS may collect a charge from the Federal agency in an amount the FMS determines to be the cost to the general fund of the Treasury caused by such noncompliance, in accordance with the following:

(1) The FMS will issue a Notice of Assessment to the Federal agency, indicating the nature of the noncompliance, the amount of the charge, the manner in which it was calculated, and the right to file an appeal.

(2) A charge for noncompliance, to the maximum extent practicable, will be paid out of appropriations available for the Federal agency's operations and will not be paid from amounts available for funding the programs of the Federal agency.

(3) If a Federal agency does not pay a charge for noncompliance within 45 days after receiving a Notice of Assessment, the FMS will debit the appropriate Federal agency account.

(4) A Federal interest liability resulting from circumstances beyond the control of a Federal agency does not constitute noncompliance.

(k) *State noncompliance.* If a State materially fails to comply with this subpart, the FMS may take one or more of the following actions, as appropriate in the circumstances:

(1) Request a Federal agency or the General Accounting Office to conduct an audit of the State to determine interest owed to the Federal Government, and implement procedures to recover such interest; or

(2) Deny the reimbursement of all or a part of the State's direct cost claim; or

(3) Take other remedies legally available.

(l) *Failure to request funds.* If a State repeatedly or deliberately fails to request funds in accordance with the procedures established for its funding techniques, as set forth in § 205.7 or in a Treasury-State Agreement, the FMS may deny the State payment or credit for any resultant Federal interest liability, notwithstanding any other provision of this part.

§ 205.18 Appeals and dispute resolution.

(a) *Appeal by a Federal agency.* A Federal agency may appeal any charge assessed by the FMS for noncompliance by submitting an appeal in writing to the Assistant Commissioner, Federal Finance (hereinafter Assistant Commissioner), of the FMS, within 45 days of the date of the Notice of Assessment. The appeal shall include a concise factual statement of the conditions leading to the Notice of Assessment, the basis of the appeal, and the action requested by the agency. In the event of an appeal, the charge imposed under the Notice of Assessment will be deferred pending the results of the appeal.

(1) *Appeal review process.* The Assistant Commissioner will review the Notice of Assessment, any documentation supporting the Notice, and the written appeal from the agency. If based on this review, the Assistant Commissioner finds that additional information is required, the Assistant Commissioner may request to meet with the agency, as well as other parties selected by the Assistant Commissioner, as part of the review process.

(2) *Decision.* The Assistant Commissioner will issue a written decision within 30 days of receipt of the appeal. The Assistant Commissioner may unilaterally extend this period for an additional 30 days if required. The decision of the Assistant Commissioner whether to uphold the Notice of Assessment, to overturn the Notice, or to mandate some other action will be stated in the written decision. Other actions mandated may include a reduced charge, a deferral of the charge, an alternate solution to cash management improvement, or any combination thereof. The basis of the decision, the amount of the charge and the effective date of the charge will be stated in the written decision. The effective date of the charge may be retroactive to the date indicated in the Notice of Assessment.

(b) *Resolution of disputes.* If a dispute arises from the implementation or administration of this Subpart, the following resolution mechanism is available:

(1) The aggrieved party may submit a written appeal to the Assistant Commissioner. The aggrieved party shall concurrently serve a copy of the written appeal to the other concerned parties.

(2) Within 30 days of the submission of the written appeal, the aggrieved party shall submit to the Assistant Commissioner a written statement not exceeding 15 pages, with supporting documentation in appendices, that articulates the dispute, the aggrieved party's position, and the relief sought. The aggrieved party shall concurrently serve its statement upon the other concerned parties.

(3) Within 30 days of receipt of the aggrieved party's statement, the responding party may submit a response statement not exceeding 15 pages, with supporting documentation in appendices, to the Assistant Commissioner. The responding party shall concurrently serve its response statement to the other concerned parties.

(4) The Assistant Commissioner will issue a written decision within 30 days after the period for the submission of the response statement. The Assistant

Commissioner may unilaterally extend the deadline for issuing a decision by 30 days if required. The Assistant Commissioner's decision shall be the final agency action on the part of the FMS for the purposes of judicial review procedures under the Administrative Procedures Act, 5 U.S.C. 701–706, unless either party invokes the provisions of the Administrative Dispute Resolution Act of 1990, 5 U.S.C. 581–593 (ADRA), in accordance with the following.

(i) Either party may seek to invoke the assistance of a neutral party appointed under the provisions of the ADRA within 30 days of receipt of the Assistant Commissioner written decision. The party invoking the ADRA shall notify both the Assistant Commissioner and the responding party in writing. With the written mutual consent of the parties and the Assistant Commissioner, a neutral party appointed under the provisions of the ADRA may assist in resolving the dispute through the use of alternate means of dispute resolution as defined in the ADRA.

(ii) If the party invoking the ADRA is unable to reach a satisfactory resolution of the problem using the ADRA, the Assistant Commissioner's decision shall be the final agency action on the part of the FMS for purposes of the judicial review procedures under the Administrative Procedure Act, 5 U.S.C. 701–706.

Appendix A to Subpart A of Part 205—Definition of Major Federal Assistance Program

Major Federal Assistance Program, for State governments having Federal assistance expenditures between $100,000 and $100,000,000 means any program for which Federal expenditures during the applicable year exceed the larger of $300,000, or 3 percent of such total expenditures. Where total expenditures during the applicable year exceed $100,000,000, the following criteria apply:

Total expenditure of federal financial assistance for all programs		Major federal assistance program means any program that exceeds (million)
More than	But less than (billion)	
$100 million	$1	$3
1 billion	2	4
2 billion	3	7
3 billion	4	10
4 billion	5	13
5 billion	6	16
6 billion	7	19
Over 7 billion		20

Subpart B—Potential Liabilities on Intergovernmental Funds Transfers Included in the Catalog of Federal Domestic Assistance but Otherwise Generally Excluded From Subpart A

§ 205.19 Scope of Subpart.

This subpart applies to programs in the Catalog of Federal Domestic Assistance that are not subject to subpart A.

§ 205.20 Cash advances.

(a) Cash advances to a State shall be limited to the minimum amounts needed and shall be timed to be in accord only with the actual, immediate cash requirements of the State in carrying out a program or project. The timing and amount of cash advances shall be as close as is administratively feasible to the actual cash outlay by the State for direct program costs and the proportionate share of any allowable indirect costs.

(b) Neither a State nor the Federal Government will incur an interest liability on the transfer of funds for a program subject to this subpart.

§ 205.21 Federal agency oversight responsibilities.

(a) A Federal agency shall review the practices of States as necessary to ensure compliance with this subpart. A Federal agency shall notify the FMS if a State demonstrates an unwillingness or inability to comply with this subpart.

(b) A Federal agency shall formulate procedural instructions specifying the methods for carrying out the responsibilities of this section.

§ 205.22 State noncompliance.

If a State demonstrates an unwillingness or inability to comply with this subpart, the FMS may require the State and a Federal agency to cover additional programs under Subpart A of this part, notwithstanding any other provision of this part.

§ 205.23 Failure to make funds available.

Consistent with program purposes and regulations, if a Federal agency demonstrates an unwillingness or inability to make Federal funds available to a State as needed to carry out a program, the FMS may require the State and the Federal agency to cover additional programs under Subpart A of this part, notwithstanding any other provision of this part.

Subpart C—[Reserved]

Dated: September 21, 1992.

Russell D. Morris,

Commissioner.

Part VI

Environmental Protection Agency

40 CFR Parts 153 and 159
Reporting Requirements for Risk/Benefit Information; Proposed Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Parts 153 and 159

[OPP-60010C; FRL 4047-5]

Reporting Requirements for Risk/Benefit Information

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to codify its interpretation regarding which failures to report information, or delays in reporting, will be regarded by EPA as violations of FIFRA section 6(a)(2), actionable under FIFRA sections 12(a)(2)(B)(ii) and 12(a)(2)(N). EPA's first enforcement policy regarding FIFRA section 6(a)(2) appeared in the **Federal Register** of July 12, 1979 (44 FR 40716). EPA took steps to amend and codify that policy by issuing a final rule and statement of policy which was published in the **Federal Register** of September 20, 1985 (50 FR 38115). That rule was not made effective by EPA because of comments received after it was published. Based on the comments, the Agency has revised the rule, and is now issuing a proposed rule which incorporates those revisions. The proposal revises the requirements for submission of information regarding pesticide ingredients, impurities, metabolites and degradates; it also contains changes intended to clarify the Agency's intent regarding whether and when to submit information pursuant to FIFRA section 6(a)(2). This rule is proposed under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), 7 U.S.C. 136 et seq.

DATES: Comments on this proposed rule will be accepted until November 23, 1992.

ADDRESSES: Submit written comments, bearing the identification number OPP-60010C, by mail to: Public Docket, Field Operations Division (H7506C), Office of Pesticide Programs, U.S. Environmental Protection Agency, 401 M St., SW., Washington DC 20460. In person deliver comments to: Public Docket Rm. 1132, CM # 2, 1921 Jefferson Davis Highway, Arlington, VA.

Information submitted in any comment concerning the proposal may be claimed to be confidential by marking any or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice to the submitter. Comments will be available for public inspection in Room 1132 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, except legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: James V. Roelofs, and/or David Alexander, Office of Pesticide Programs (H7501C), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Crystal Mall #2, Rm. 1115, 1921 Jefferson Davis Highway, Arlington, VA, (703) 305-7102.

SUPPLEMENTARY INFORMATION:

ELECTRONIC AVAILABILITY: This document is available as an electronic file on *The Federal Bulletin Board* at 9 a.m. on the date of publication in the **Federal Register**. By modem dial 202-512-1387 or call 202-512-1530 for disks or paper copies. This file is available in Postscript, Wordperfect 5.1 and ASCII.

The 1985 rule was issued as a final interpretive rule as subpart D of 40 CFR part 153. This proposed rule is being issued for notice and comment as 40 CFR part 159, subpart D. This Supplementary Information is organized into five units. Unit I provides a brief history of the Agency's regulatory efforts regarding FIFRA section 6(a)(2). Unit II sets forth EPA's interpretation of section 6(a)(2) to provide a context for the proposed rule. Unit III provides a discussion of the basis for the proposed rule, and examples of how the rule is applied. Unit IV notes that this rule complies with section 25 of FIFRA, and that the FIFRA Scientific Advisory Panel waived review of the rule and the U.S. Department of Agriculture had no comments on the rule. Unit V demonstrates that promulgation of this rule complies with various regulatory review requirements, including Executive Order 12291, the Regulatory Flexibility Act, and the Paperwork Reduction Act. The last Unit is the text of the proposed rule.

The proposed rule is organized as follows. General information appears in the earlier sections of the rule, and includes: the text of the relevant statutory requirements (§ 159.152); definitions (§ 159.153); provisions concerning when and how information must be submitted (§ § 159.155-159.156), and what information must be submitted (§ 159.158). Sections 159.165 through 159.195 provide details on the specific types of information that give rise to reporting requirements.

This rule is proposed pursuant to FIFRA section 25, 7 U.S.C. 136w. This proposal sets forth which "reports" must be submitted to satisfy the requirements of FIFRA section 12(a)(2)(B)(ii) and 12(a)(2)(N) insofar as they pertain to FIFRA section 6(a)(2). This rule does not require submission of all "additional factual information" which is within the scope of section 6(a)(2); it does describe that information for which EPA will hold registrants responsible under FIFRA section 12. The July 12, 1979 **Federal Register** Notice contemplated later issuance of supplementary notices concerning types of information not specifically considered in the July 1979 Notice (See 44 FR 40717). This proposed rule should be considered such a supplementary notice.

On January 2, 1992, the Agency issued a Notice to Manufacturers, Formulators, Producers and Registrants of Pesticide Products (PR Notice 92-1) to remind them of their statutory responsibilities under section 6(a)(2) and to provide general guidance. The PR Notice suggests that this proposed rule could be used as a guide to the Agency's 6(a)(2) policies. However, since this rule is not final, registrants are not obligated to meet reporting requirements which are being proposed for comment at this time. The requirements of the final rule may differ from the proposals due to information gained during the comment period.

I. History

Section 6(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act, 7 U.S.C. 136d(a)(2), states: "If at any time after the registration of a pesticide the registrant has additional factual information regarding unreasonable adverse effects on the environment of the pesticide, he shall submit such information to the Administrator."

Section 6(a)(2) requires each registrant to submit any item of information in its possession which pertains to a pesticide product for which it holds or held a registration and which, if true, would be relevant to an evaluation of the risks and benefits of the pesticide product. Information consisting solely of certain unsolicited lay opinion or which has been previously submitted is an exception to this requirement. See the discussion in Unit II of this document and § 159.158(b) and (d).

On September 20, 1985, EPA issued a comprehensive codification of EPA's enforcement policy. In it, EPA codified its policy regarding the types of information EPA actually wants to have submitted under FIFRA section 6(a)(2).

That codification amended the previous policy (44 FR 40716) by specifying that certain failures to submit information concerning pesticide residues in food, feed, ground water or elsewhere in the environment would be regarded as actionable violations of FIFRA section 6(a)(2). That codification also specified that most information had to be received by EPA within 15 working days of the time any officer, employee or other person acting for or employed by the registrant and capable of appreciating the significance of such information first comes into possession of, or knows, the information.

The Agency invited comments on the September 20, 1985 rule and indicated that appropriate modifications to the rule would be considered on the basis of those comments. Comments and questions were received on many aspects of the rule from trade associations, public interest groups and individual registrants. Based on the Agency's review of the comments and questions it became apparent that clarification of the rule was appropriate. Accordingly, the rule proposed today, when effective, will supersede that rule and all previous policy statements pertaining to section 6(a)(2).

II. General Interpretation Regarding the Type of Information That Must Be Submitted Under FIFRA Section 6(a)(2)

Section 6(a)(2) requires registrants to provide additional factual information to the Agency regarding unreasonable adverse effects on the environment of their pesticide products. The language of the statute limits the type of information to be submitted in three ways discussed here. First, it must be "additional" information. Second, it must be "factual" information. Third, it must be information "regarding" unreasonable adverse effects of the pesticide. Each of these three elements operates to reduce the required information from the total universe of "all information."

The first limiting factor is that the information be "additional." The word "additional" must be read in the context of a statute that permits the Agency to require extensive information from an applicant before and after a registration is granted. Thus, "additional" information refers to information not already submitted by the registrant to the Agency.

The second limiting factor, "factual information," is not explained in the statute. In *CSMA v. EPA*, et. al., 484 F. Supp. 513 (D.D.C. 1980), the U. S. District Court for the District of Columbia offered its view that "factual information," in the context of section 6(a)(2), did not include any opinion information, even expert opinion. This issue was not before the Court and because the Agency believes the Court's view is contrary to the weight of legal authority, the Agency has elected not to follow what it believes to be an incorrect reading of the statute. The Agency notes that, because it was not aggrieved by the District Court decision, it could not challenge the District Court's view of the scope of section 6(a)(2) in the Court of Appeals.

In general, American courts have recognized that "[t]he difference between so-called 'fact' and 'opinion' is not a difference between opposites or contrasting absolutes, but a mere difference in degree with no recognizable line to mark the boundary." (*U.S. v. Pierson*, 503 F. 2d 173, 176 (1974)). Formerly, the admissibility of evidence turned on the question of whether it was fact or opinion, but the courts now look to the value or utility of the evidence rather than to its classification. (McCormick on Evidence, sec. 11 (1972); *U.S. v. Pierson*, cited above). Under sections 701 through 703 of the Federal Rules of Evidence, an expert's opinion and theories are admissible apart from the information underlying the opinion (*Rodriquez v. Olin Corp.*, 780 F.2d 491 (5th Cir. 1980), *U.S. v. Williams*, 447 F.2d 1285 (5th Cir. 1971)).

Consideration of this question was first set out in a 1978 opinion issued by EPA and published in the **Federal Register** at 43 FR 3761, August 23, 1978. Key to that opinion was the meaning of "factual information," which was discussed in terms of the likely function Congress intended this provision to serve. The opinion stated that under FIFRA section 6(a)(2) registrants must provide the Agency with information of the type it normally relies upon in making decisions under FIFRA. Thus, "factual information" was determined to include data from scientific studies, expert opinions and information about toxic or adverse incidents caused by the use of a pesticide.

Additional guidance as to the meaning of "factual information" is provided by the commonly understood meaning of "factual." Thus, the dictionary definition of factual includes "something known with certainty," "something asserted as certain," and "something that has been objectively verified" [American Heritage Dictionary of the American Language, Morris, Editor, Boston, 1976]. The common understanding of "factual" is that type of information which is more reliable than information which, for example, has not been verified, or is not known to be, or believed to be, certain. This definition would include more than just scientific data. It also contemplates any observed or verifiable information as well as information asserted to be correct, such as expert opinion.

This reliability factor has been incorporated into these regulations. Only information which has a special degree of reliability is required to be submitted under these regulations. Thus, data developed in the course of a scientific study and reports of toxic or adverse effects can meet this standard of reliability because they are based on observations of tangible events. Expert opinion is also considered to be factual because the reliability of the opinions of experts is enhanced by their special training, knowledge and skill.

In several instances where the boundary between factual and other types of information may be less clear, the Agency's proposed rule limits the scope of information which must be submitted by employing a test which takes into account the degree of reliability of information and EPA's need for it. Thus, an unsolicited report of a single toxic and adverse incident which is received by a registrant need not be submitted unless it concerns: (1) A toxic or adverse effect in a given species after exposure to a pesticide when that effect was not previously reported to the Agency, (2) a toxic or adverse effect in a given species after exposure to a pesticide when that effect is more severe than previously reported to the Agency, or (3) any toxic or adverse effects to humans or non-target organisms in which an expert or a person associated with the registrant concludes that there may be a causal connection between the use of the pesticide and the observed effect. Although reporting of other incidents could be required under the statute, the Agency has limited reporting of single incidents to meet the practical need of sorting out information which, if reported, would be of little value to the Agency in its decision making.

The third limiting factor is the requirement that only information "regarding" unreasonable adverse effects of the pesticide need be submitted. "Regarding" in this context operates to require a causal connection between the use of the pesticide and the adverse effect. Here again, the statute and legislative history do not provide evidence regarding the strength or the proximity of the cause and effect. The strongest and closest link would result from a scientific study or risk assessment specifically designed to establish a causal link between the use of a pesticide and an adverse effect. A weaker and more distant link might

result from an unsolicited report by a lay person of a single toxic and adverse incident in which the use of the pesticide and the toxic and adverse effect are separated in time or space and where observable connections between the two events are not reported. Although the causal connection in the latter case is adequate to meet the statutory standard, this situation is closer to the boundary between factual and other information. To avoid an extremely broad reporting requirement, the Agency's proposed rule does not require a single incident report to be submitted without an additional measure of either reliability or need. This measure is provided by the requirement found in the regulations, that the effect occur after exposure and be new, more severe or that an expert or person associated with the registrant conclude that a causal connection between the use of the pesticide and the observed toxic and adverse effect may exist. This is the same requirement discussed above. It serves both to strengthen the factual reliability of information and is used here to establish both the need for the information and the causal link. (However, Unit III.D. discusses the requirement that records of such reports be retained for a specific period.)

In a similar fashion, registrants are required to report a series of similar toxic and adverse incidents. As is the case with single incident reports, the causal link for some or all of the incidents which comprise a series may be weak. Although some of the reported incidents might meet neither the statutory standard nor the more rigorous standard regarding need or causality established by the proposed rule, every incident in the series must be reported. The series must be reported because a series of incidents contains an inherent factor which enhances the strength of the causal connection. The cumulative weight of several toxic and adverse incidents associated with use of the same pesticide provides both greater assurance of the existence of a causal link between use and the toxic and adverse effect than would result from a single incident report and a greater indication of need for the information on the part of the Agency. Thus, the requirement that there be expert opinion, intended to strengthen the causal link, or the requirement that there be known exposure followed by new or more severe effects, intended to demonstrate the Agency's need, are not needed for a report of a series of toxic and adverse incidents. When three or more organisms show toxic and adverse effects following exposure to a pesticide, it is more likely that a causal relationship exists than when only one organism is injured. Thus, when evidence indicates that many organisms can be injured, either at the same time or at different times, the Agency's concern is heightened.

III. Basis of Policy and Examples

In this unit, EPA provides additional information and guidance concerning sections of the proposed rule. Examples of how the rule applies, and discussion of major changes from the 1985 rule are provided.

A. Who Must Submit Information Under FIFRA Section 6(a)(2)

EPA believes all registrants are subject to FIFRA section 6(a)(2). Section 6(a)(2) imposes a requirement that a registrant submit certain information "at any time after the registration of a pesticide." Although section 6(a)(2) does not directly address applicants, 40 CFR 152.50(f)(3) requires applicants for registration to submit with their applications any factual information regarding unreasonable adverse effects of the pesticide that would be required to be submitted by registrants under section 6(a)(2) if the product were registered. FIFRA section 2(y) defines registrant as any person ". . . who has registered any pesticide pursuant to the provisions of [FIFRA]." This statutory language suggests the term "registrant" should be viewed as including former holders of a registration. EPA also believes that the context of other statutory provisions where the term is used, as well as policy considerations, suggest that some obligations under FIFRA continue after a person has transferred a registration, or it has been canceled.

First, FIFRA section 3(c)(2)(B), in giving the Administrator the authority to require the submission of data to support registration, speaks of "existing registrants," thus suggesting that the term "registrants" may, in other contexts, apply to persons other than those who currently hold a registration.

Second, although many obligations in FIFRA apply only to existing registrants, there are important policy reasons to subject former holders of registrations to the requirements of section 6(a)(2). These persons may obtain information that would be relevant to EPA's regulation of registrations currently held by other persons. A prior registrant may, for example, receive consumer complaints after it has sold a registration or it has been canceled. The registrant may also become involved in lawsuits regarding a product which has been transferred or canceled, or may obtain information as a result of distribution of a canceled pesticide outside of the United States, distribution by another registrant, or during the life of an existing stocks provision. Therefore, to remind registrants of their continuing duty to comply with FIFRA section 6(a)(2), EPA defines "registrant" in § 159.153(b) to include any person who has ever held a registration for a pesticide product under FIFRA sections 3 or 24. The policy that voluntary cancellation of a pesticide registration does not relieve the registrant of its duties under FIFRA section 6(a)(2) was announced in EPA's existing stocks policy at 56 FR 29367, June 26, 1991.

B. When to Submit Information Under FIFRA Section 6(a)(2)

Section 6(a)(2) does not require investigation or other information-gathering efforts by registrants. Although time is provided to allow a basic investigation to be done by the registrant if he so chooses, nothing in this rule requires the conduct of an investigation.

The time period for submission of incident reports begins when a registrant knows of the information. However, in order to assure that registrants have enough time to elevate information through their organizations, in § 159.155(a) EPA is now proposing that information be submitted within 30 calendar days after any officer, employee, or agent of a registrant possesses or knows of the information.

EPA solicits comment on whether a shorter, or longer, time period may be appropriate given EPA's need to analyze and act on information promptly, and a registrant's need to have adequate time to transmit data from a field office to headquarters, analyze it, and transmit it to EPA. If, in response to comment, EPA provides time in excess of 30 calendar days for registrants to submit information, EPA is hereby providing notice that it may establish dual time frames in which the most critical information would have to be submitted more promptly than other information. Therefore commenters who advocate establishment of a longer time frame are requested to specify which information can and should be submitted earlier, and why.

C. What Information to Submit Under Section 6(a)(2)

Section 6(a)(2) does not require a registrant to gather information from outside its organization or to conduct investigations. FIFRA section 3(c)(2)(B) allows the Agency to impose such

requirements. However, FIFRA section 14(b)(4) provides that an omission (such as a failure to report information) of any officer, agent, or other person acting for or employed by a registrant is to be regarded as the omission of the registrant. Therefore, although registrants have no duty to gather information from persons who have no obligation to them, registrants must develop a system for becoming aware of, and submitting, information known to their employees or agents.

Section 159.158(a) makes clear that information may be reportable when the registrant possesses or knows of the information which pertains to a pesticide registered by the registrant. The requirement that information a registrant "knows of" is meant to require submission of relevant aurally or visually received information as well as written information. The provision that submittable information "pertains to a pesticide registered to the registrant" is meant to require submission of pertinent information regarding a registrant's pesticide, whether or not the information was actually generated with a pesticide produced by the registrant. Such submittable information may include generic studies and incidents involving competitors' products if they contain one or more "pesticides" in common, unless the information has previously been submitted. The term "Pesticide" is defined in § 159.153(a)(3).

Information possessed by, or known to, the registrant, such as relevant abstracts, must be submitted as well as information gained through voluntary investigations. In addition, § 159.195 requires reporting of information other than the kinds specified in § § 159.165 through 159.188 if the registrant knows, or should know, that the information raises questions about the continued registrability or the terms and conditions of registration of a pesticide product. EPA wishes to clarify that, after EPA has informed a registrant, or a registrant's agent, that EPA considers such additional information to be pertinent to the question of whether the product's registrations should be canceled, suspended, or modified in some respect, the registrant or agent will undoubtedly be charged with actual knowledge that such questions have been raised.

In § 159.158(d), EPA has deleted the exceptions, formerly at § § 153.66(b)(2)(i)(B) and (D), from submitting information contained in certain Federal or scholarly publications. This change does not require that registrants conduct literature searches or gather information from outside their organizations but if they are aware of it, they must submit appropriate information under section 6(a)(2).

Submission of information which is wholly opinion information is limited. The limitation is contained in § 159.158(b) and is discussed in Unit II. of this document.

-D. How to Submit FIFRA Section 6(a)(2) Information

In order to bring important information to EPA's attention, § 159.156(c) requires that information which is submitted under this rule include a prominent statement to that effect. In order to allow EPA to properly evaluate information submitted under this rule, § 159.156(e) requires that all available information about a submittable event be provided, rather than only the information which makes the event submittable. This requirement includes all information that a registrant has or knows of as a result of an investigation.

If a registrant knows of any additional information about an event or effect of concern that has been submitted, the additional information must also be submitted under § 159.156(e) and the other provisions of this rule. For instance, if a series of incidents are reported under § § 159.184(c) or 159.188(b), a registrant must report any similar incident in accordance with the provisions of this rule. If a preliminary report of a toxicology study is submittable, the final report must also be submitted in accordance with the provisions of this rule. If a registrant knows of a follow-up, tiered, or other study regarding an effect which was the subject of a submission under this rule, information regarding that later study must be submitted in accordance with the provisions of this rule. In all of the above situations, a prominent reference in the later submission to the earlier submission and the fact that the earlier submission was submitted under FIFRA section 6(a)(2) will be sufficient to meet the requirements of § 159.156(c)

In order to permit EPA to enforce the requirements, under authority of FIFRA section 8(a), § 159.157(a) requires registrants to retain a copy of each submission and proof of the time of the delivery to EPA for 5 years after delivery.

Section 159.157(b) requires that information derived from any incident involving toxic effects to one or two individual humans, or involving one or two failures of efficacy of uses which were subject to a "Formal Review" (a Special Review proceeding—formerly called a Rebuttable Presumption Against Registration—under Part 154 of this chapter, or a cancellation or suspension proceeding under FIFRA section 6(b) or (c), respectively), or any information about organisms which may pose a risk to human health unless controlled be retained by the registrant and kept available for inspection for a period of 10 years from the date the registrant receives the information. Such information may become submittable under § § 159.184 or 159.188 during the 10-year time period.

Section 159.157(c) requires that information derived from any incident involving toxic effects to one or two individual non-target organisms be maintained and kept available for inspection for a period of 5 years from the date of the incident, unless the information need not be reported due to the exception in § 159.184(c)(4). Such information may become submittable under § 159.184(c) during the 5-year time period.

Section 159.157(d) reiterates the requirement in 40 CFR 169.2(k) requiring retention of research data for the life of the product. EPA may request access to any of these records during an inspection of a facility in which they are located.

E. Submission of Toxicology Studies

1. *Basis of policy.* The result of any study in which exposure to a pesticidal substance is associated with a toxic effect is clearly pertinent to evaluation of risk and is thus legally reportable under section 6(a)(2). However, unless an item of toxicological information provides new results as indicated in § 159.165(a), or unless it suggests that reliance on material previously submitted to EPA may have resulted in underestimation of the level or degree of risk, or was otherwise inaccurate or incomplete, submission of such new information is not likely to affect the registration status of products containing the substance tested. EPA ordinarily will not treat failure to submit toxicological information which is identical to previously submitted information as an actionable violation of section 6(a)(2); however in § 159.165(a), the Agency insists on submission of any toxicological data which indicate that a pesticide may present different or greater risks than previously reported to EPA.

When a particular pesticide is or was involved "Formal Review," EPA's need for information is considerably greater. In such circumstances, the ultimate status of the pesticide depends on a comprehensive Agency reevaluation of the pesticide's risks and benefits,

including an assessment of the reliability of previously submitted material and the extent to which it has been corroborated. Thus, if a particular substance is or was the subject of a Formal Review, EPA will treat failure to submit any toxicological information linking that substance with any toxic or adverse effect which was, or is, the subject of that proceeding as an actionable violation of section 6(a)(2), even if such informatien merely confirms or corroborates prior data.

EPA does not now distinguish between reporting of results from complete, or incomplete toxicology studies. Information from either which shows a risk of a kind or degree not previously associated with the substance tested must be submitted within 30 calendar days after the information is known to the registrant, regardless of whether the study is complete.

EPA has eliminated the requirement that toxicology studies be submitted solely because a product is in reregistration review.

2. *Examples of how the rule will be applied.* (a) A registrant conducts the first study of the acute effects of ingestion of a certain pesticide on rabbits. A prior acute study of the same pesticide using mice found that exposed mice experienced increased mortality due to liver damage. The registrant notes increased mortality of unknown origin in the exposed rabbits compared to control animals. The registrant may take a reasonable period, not exceeding 30 calendar days, for investigation of the significance and cause of the increased mortality. After that period has elapsed, failure to submit information concerning the study to EPA will be treated as an actionable violation of section 6(a)(2), regardless of whether or not the analysis is yet complete, because the information concerns a study in which toxic effects have been observed in a different species than previously reported. Of course, the registrant will always be entitled to supplement any initial submission with the results of subsequent analysis.

(b) A foreign competitor of the registrant conducts a 2-year study of the effects of chronic exposure to a certain pesticide on rats. The pesticide is also in the registrant's pesticide product. Nine months after the study commences, the registrant learns at a meeting that study personnel observed that a large percentage of the exposed rats have developed ocular opacity of the type associated with formation of cataracts. None of the control rats exhibits a comparable abnormality. Though the test is incomplete and the evidence that the pesticide is inducing cataracts is not yet definitive, the ocular abnormalities seen in the rats may be attributable to exposure to the pesticide, and the observed effects must be reported to EPA within 30 calendar days of the date the registrant learned of the observation. Despite the fact that the registrant did not manufacture the actual pesticide tested, because the pesticide is also in the registrant's product, the information pertains to the registrant's pesticide and must be reported.

F. Discontinued Studies

Section 159.167 requires reporting of the reason(s) for cessation of a study whose results are reportable under this subpart within 30 days after work on the study stops, if testing is ceased before the time specified in the test protocol, or if work on analysis of results is ceased before completion. The requirement of § 159.167 is designed to ensure that stopping work on a study will not serve to avoid submission requirements under this rule.

G. Human Epidemiological and Exposure Studies

Epidemiological studies can be indispensable sources of information on the critical issue of the risks associated with human exposure to pesticide products. Thus, it is important that EPA be able to examine independently the relevance of any epidemiological information concerning pesticide exposure. The Agency will consider any failure to provide such information within 30 calendar days of receipt by the registrant to be an actionable violation of section 6(a)(2). Registrants may supplement any submission of epidemiological information with a statement describing any reservations they might have concerning the information's validity or significance but such information must be submitted under § 159.170.

H. Submission of Information Concerning Pesticide Residues

1. *Food or feed.* Information on exposure is as important to assessment of the potential risk associated with use of a pesticide as data which indicate the toxicological effects of a pesticide. If monitoring or other information is available which is likely to allow EPA to better protect public health or assess environmental fate by refining exposure calculations, it is imperative that EPA receive that information. Data on ingredients, impurities, metabolites, or degradates are important to the Agency's efforts to verify or modify calculations of levels of exposure to these chemicals.

The requirement to report information on active ingredients and their derivatives which are found in an amount above an established level on/in food or feed has been retained and expanded to require reporting of information on active and inert ingredients, impurities, metabolites and degradates which are found on/in food above established levels. EPA has announced in its Inert Ingredients in Pesticide Products Policy Statement, 52 FR 13305, April 22, 1987, pages 13307–13308, its policy of gathering exposure information for inert ingredients which may be of toxicological concern and issuing tolerances or exemptions from tolerance for inerts used on food. EPA is also gathering data on impurities which may be of concern. Accordingly, EPA sees no reason to distinguish in this rule between any components of pesticides with regard to reporting of residues on food or feed. Section 159.178(a) now requires reporting of information on any pesticide ingredient, impurity, metabolite or degradate found on or in food or feed above an established level.

EPA establishes permissible levels of pesticides in food and feed by setting tolerances and promulgating food additive regulations under the Federal Food, Drug, and Cosmetic Act (FFDCA). EPA has added "action levels" set by the Food and Drug Administration (FDA) to the list in § 159.153(b)(1) of levels of residues established for food and feed. If no levels have been established, information concerning any amounts of residue found on food or feed are required to be reported.

If a pesticide has been exempted from the requirement of a tolerance, or is not subject to a tolerance, action level, or other established level and is known to be an innocuous part of the human diet, EPA has no interest in learning of any amounts of that substance in or on food or feed, unless that information would be relevant to a promulgated or issued requirement intended to allow conduct of a material-balance analysis to determine levels of exposure to amounts of substances which may be of concern.

On the other hand registrants must provide EPA with any information which may show that residues resulting from pesticide use may exceed established levels, even if such excess levels may not reach the consumer. Therefore registrants must report information from studies showing that a single tested sample exceeds a tolerance, even if some tested composites in the same or a different study do not exceed the tolerance, and must report information from studies which show that the average tested

sample of a composite exceeds a tolerance level.

Recent information submitted to EPA demonstrated that residues of the pesticide aldicarb on individual samples of bananas exceeded tolerances, sometimes by large amounts, even though composite samples previously tested had never exceeded tolerance levels. EPA believes that it is critical that information on both individual samples and composite samples which may exceed tolerances or other established levels be submitted promptly so that EPA can assess the significance of the excess and the risk presented to public health and take any regulatory measures which may be needed. EPA will enforce this provision. This requirement is identical to the one included in 40 CFR 153.73 and 153.77, published on September 20, 1985, and EPA does not believe responsible parties could view this provision as excessively stringent. However, EPA solicits comment on this aspect of today's proposal and will give careful consideration to any comments.

Section 159.178(a) clarifies that legal performance studies will not normally result in reportable information under this section. Specifically, information from legally conducted performance studies using application rates in excess of label rates will not normally constitute information reportable under this section.

EPA strongly feels that the reporting requirements stated above will provide the Agency with meaningful information on potential adverse health or environmental effects that may result from there being unacceptable levels of pesticide active and inert ingredients, impurities, metabolites, and degradates in food or feed—even in cases where the tolerance exceedence is detected on only one sample. However, the Agency is interested in receiving substantive comment on whether the requirements as proposed will provide the best possible information on the magnitude of the potential risk and whether there may be other reporting requirements that would better accomplish this end.

2. *Surface water.* Sections 159.178(b)(1) and (4) require that studies or incident reports be submitted if they concern a pesticide found in "waters of the United States" (i.e., virtually all surface waters) in amounts in excess of the "Water Reference Level." The "Water Reference Level" is defined in § 159.153 to be the limit of detection of a pesticide; or, alternatively, equal to 10 percent of the Maximum Contaminant Level (MCL), if one has been established by EPA, or if one has not, 10 percent of the most recent draft or final long-term Health Advisory Level (HAL). If EPA has not published or proposed an MCL or an HAL, the Water Reference Level would be the lowest detectable amount of the pesticide. EPA is proposing both of these definitions in the regulatory text because the Agency is aware of arguments in favor of each of these approaches. The Agency is soliciting comment on the best approach to defining a "Water Reference Level" for reporting adverse effects to the Agency. In the final rule there will be only one definition of Water Reference Level. In addition to comment on the approach, EPA solicits comment on whether reporting should be based on a single incident or a series of incidents.

If EPA takes the position that any detection should be reported, the Agency does not mean to suggest that any level of these chemicals poses a significant risk to human health or the environment. However, such findings may lead the Agency to conclude that there is a need for further monitoring or for regulatory activity designed to lessen the likelihood that levels of concern will result in the future. In addition, any information concerning the levels of pesticide ingredients in surface water can enhance EPA's understanding of chemical characteristics and environmental conditions which may lead to unacceptable environmental contamination. Inclusion of the term "waters of the United States," which is defined in 40 CFR 122.2, allows EPA to specify better where it anticipates a pesticide active ingredient, metabolite or degradate, which may cause unexpected avoidable harm, may be found. However, as used here, "waters of the United States" excludes 40 CFR 122.2(d) because that paragraph encompasses impoundments into which waste water with known industrial contaminants is released.

If the Agency selects 10 percent of the MCL as the "Water Reference Level," the regulatory text in § 159.153 (Definitions) would be changed by substituting "10 percent of the MCL" for "the limit of detection."

3. *Ground water.* Section 159.178(b)(2) requires that information from studies or incident reports be submitted if they concern a pesticide found in ground water at a level above the "Water Reference Level."

Under proposed 40 CFR 152.170(b)(3), 56 FR 22076, May 13, 1991, EPA proposed in pertinent part, to consider restricting the use of pesticides whose ingredients reach ground water three or more times in distinct locations. However, the Agency is proposing in § 159.178 of this rule to require reporting single incidents of ground water contamination so that it receives information about individual incidents of ground water contamination known to different registrants. Submission of three or more such incidents from any source would be sufficient to allow EPA to consider a restricted use classification under proposed § 152.170(b)(3).

The "Water Reference Level" is defined in § 159.153 to be the limit of detection of a pesticide; or, alternatively, equal to 10 percent of the Maximum Contaminant Level (MCL), if one has been established by EPA, or if one has not, 10 percent of the most recent draft or final long-term Health Advisory (HA) Level. If EPA has not published or proposed either an MCL or HA, the Water Reference Level would be the lowest detectable amount of the pesticide. EPA is proposing both of these definitions in the regulatory text because the Agency is aware of arguments in favor of each of these approaches. The Agency is soliciting comment on the best approach to defining a "Water Reference Level" for reporting adverse effects to the Agency. In the final rule there will be only one definition of Water Reference Level.

In addition to comment on the approach, EPA solicits comment on whether reporting should be based on a single incident or a series of incidents.

4. *Drinking water.* Section 159.178(b)(3) requires submission of information on studies or individual incidents regarding amounts of a pesticide found in finished drinking water above the "Water Reference Level." Finished drinking water includes water which has gone through a community water supply and is ready for drinking, as well as ground water being used directly as a source of drinking water.

The "Water Reference Level" is defined in § 159.153 to be the limit of detection of a pesticide or 10 percent of MCL; or, alternatively, equal to 10 percent of the MCL, if one has been established by EPA, or if one has not, 10 percent of the most recent draft or final long-term Health Advisory (HA) Level. If EPA has not published or proposed either an MCL or HA, the Water Reference Level would be the lowest detectable amount of the pesticide. EPA is proposing both of these definitions in the regulatory text because the Agency is aware of arguments in favor of each of these approaches. The Agency is soliciting comment on the best approach to defining a "Water Reference Level" for reporting adverse effects to the Agency. In the final rule there will be

only one definition of Water Reference Level.

In addition to comment on the approach, EPA solicits comment on whether reporting should be based on a single incident or a series of incidents.

5. *Pesticides applied to water.* Re-reporting of an additional detection of a pesticide at levels which a registrant, in his application for registration, reported can result from legal use in drinking water or waters of the United States is not required because these amounts are expected when the pesticide is used.

I. New Metabolites

EPA has an interest in learning of the existence of new chemicals resulting from pesticide use so that EPA can determine the need for definitive data to assess whether those chemicals are of toxicological concern. Accordingly, EPA has added a new § 159.179 to require submission of information regarding the existence of metabolites, degradates, or impurities which may result from use of pesticides, if the existence of those metabolites or degradates has never been reported to EPA and they may be persistent or of possible toxicological concern. The standards of persistence are those EPA proposes to use in proposed 40 CFR 152.170(b)(3), and are discussed at 56 FR 22076, May 12, 1991.

J. Submission of Information Regarding Toxic Incidents

1. Section 159.158(a) interprets FIFRA section 6(a)(2) to require submission of information the registrant "has" when the information, if true, would be relevant, by itself or in conjunction with other information, to an Agency decision regarding the risks and benefits of the registrant's pesticide. All information concerning an incident which meets the requirements set forth in those sections is likely to be useful during EPA's evaluation of a pesticide. Accordingly, registrants are reminded that they must submit all information which they have concerning an incident reportable under § § 159.184 or 159.195 rather than only the information which triggers the requirement to report.

At a minimum, EPA expects to receive copies of written reports of incidents which are provided to the registrant, and/or descriptions written by the registrant from information the registrant receives aurally or visually, which describe all known details of the incident, the effects alleged to have occurred, the results of investigations, how the registrant became aware of the incident, and the author of reports.

Information concerning incidents in which toxic effects are attributed to pesticide exposure varies considerably in specificity and accuracy. Some reports received by registrants are so vague or implausible that they would be unlikely to provide a basis for administrative action. On the other hand, some incident reports may contain unique and valuable information on the risks and environmental impacts associated with actual use and practice which cannot be readily derived from laboratory data alone. Thus, the Agency has endeavored to select sets of criteria which will give practical assistance to each registrant in identifying those types of incident information which are currently needed by EPA in order to discharge properly its statutory responsibilities. Each set of criteria contains the following elements: A report of a toxic effect; a report of pesticide exposure; an opportunity for investigation of the accuracy of the reports; and some inference that the toxic effect and the pesticide exposure were related, balanced with EPA's need to consider the information.

Incident information concerning a single incident of toxic effects generally has little current utility for regulatory purposes and need not be submitted to EPA under section 6(a)(2) unless the information is predicated on a conclusion, opinion, or reasonable inference that the reported effects were related to pesticide exposure. Under § 159.184(a), failure to submit information regarding any single incident of a toxic effect to a single non-target organism will not be treated as a violation of section 6(a)(2) unless the registrant has concluded that the reported effect may have been caused by the reported pesticide exposure, or has been advised by any person described by § 159.158(b) that a causal relationship may exist, or the information indicates that the effect *succeeded exposure* and is new or more severe than that previously reported to EPA. The Agency believes that an effect which is more severe than one previously reported is a matter of significant concern. However, this criterion requires a judgment as to whether the effect is truly greater than any previously reported. EPA solicits comment on whether this is an appropriate reporting criterion as stated, or whether there is a better way to identify data showing a greater magnitude of risk than previously known.

Information concerning a single incident in which humans exposed to a pesticide have experienced toxic effects is extremely useful in evaluating the risks associated with pesticide use, and in deciding whether a method of applying the pesticide should be prohibited or the labeling should be changed. Receipt of incident information regarding toxic and adverse effects in humans is particularly important because of the difficulties associated with predicting human toxicity on the basis of animal data. Thus, under § 159.184(a) and (b) EPA considers any failure to submit incident information concerning any single toxic effect in humans which includes the basic elements previously identified and which is otherwise reportable under section 6(a)(2) to be an actionable violation of FIFRA, regardless of the circumstances which resulted in the pesticide exposure. The exception that does not require registrants to submit data for an effect noted on the product label is based on the fact that sufficient data were available to EPA on that effect for the Agency to determine it necessary to require a warning statement on the product label.

In contrast, under § 159.184(b)(3) EPA will not treat failure to submit information on any single incident involving toxic effects on non-target organisms as an actionable violation of section 6(a)(2) if the registrant can demonstrate that the pesticide was used improperly and that the label provides reasonable notice of the risk of the specific toxic effects reported.

Considering that phytotoxicity is known to occur even when a pesticide is used properly, an expansion of the misuse exception has been added so that a non-lethal incident (§ 159.184(b)(2), or series of incidents (§ 159.184(c)(4)), of phytotoxicity at the application site adequately warned against on the label need not be reported, even if the effect occurred as a result of legal use.

In contrast to the requirements applicable to an incident involving a single organism, if a registrant has been informed of a series of incidents (i.e., incidents involving three or more organisms) in which the same kind of toxic effect has followed exposure to the same pesticide, a reasonable inference of a causal relationship may arise from the existence of the series or pattern itself, even in the absence of a specific conclusion or expert opinion to that effect. In such circumstances it would be superfluous to require that the registrant conclude or be advised that a causal relationship exists or that the effect is new or more severe. Therefore, registrants must report, under § 159.184(c) any series or pattern of three or more incidents involving the same kind of toxic effect from the same pesticide. Moreover, even if a series or pattern consists of incidents which

would otherwise not be reportable under this rule because each incident involves predictable effects on non-target organisms (other than humans) resulting from improper use, EPA will treat failure to report such information in an aggregate form as an actionable violation of section 6(a)(2). EPA needs this type of incident information because the existence of widespread or routine misuse of pesticide products may be a basis for changes in labeling, additional restrictions on use, or other regulatory action.

EPA's position is that three or more discrete incidents comprise a series and thus establish a reasonable presumption of a causal, non-aberrational relationship between the use of a pesticide and the observed effect. In basing reporting requirements on a fixed number of incident occurrences, EPA is attempting to ensure that it receives vital and informative data, that registrants have decisive guidance on what to submit, and that registrants do not bear the legal responsibility of having to determine whether the relationship between the use of the pesticide and the observed effect is causal. EPA believes that a reporting trigger of three incidents is appropriate. However, the Agency is interested in receiving substantive comment on whether a different number of incidents, or an alternative approach that does not establish an investigation requirement, may be more appropriate to trigger reporting of multiple incidents.

For ease of interpretation, EPA has now specified in § 159.184(c) that incidents involving similar toxic effects to any three or more individual non-target animals or endangered or threatened plants, within a 5 year period, must be reported. For humans § 159.184(c) specifies that information derived from any number of occurrences involving similar toxic effects affecting a total of three or more individual persons within a 10 year period must be reported. For non-endangered, non-threatened plants similar incidents involving any three or more plants on different days or in different locations within a 5–year period must be reported. When any such incident is reportable, all additional occurrences of similar toxic and adverse effects known at the time must be reported, even if the additional effects would not have to be reported alone.

Studies or incidents which arguably indicate failures of public health antimicrobials, products meant to control possible disease vectors, and products which have been subject to Special Review, are reportable under § 159.188. Unit III. K. of this preamble discusses the reporting requirement and indicates the urgency with which EPA views the need to receive information about products designed to prevent public health problems.

2. *Examples of how the rule will be applied.* (a) A registrant receives a report from an unidentified source indicating that an agricultural employee experienced respiratory difficulties after working in a field where a pesticide manufactured by the registrant had recently been applied. A few days later, the registrant discusses the alleged incident with a toxicologist, who states that, in his opinion, the reported respiratory symptoms could have been caused by exposure to the registrant's pesticide. This is the basis of a reportable toxic incident and the registrant then has 30 calendar days to investigate the incident (if the registrant chooses) and submit information to EPA. If the registrant discovers within that time frame facts which establish that the reported toxic and adverse effect or reported exposure did not occur, or which conclusively establish that the respiratory difficulties experienced by the exposed individual were unrelated to pesticide exposure, the incident need not be reported. Otherwise, information concerning the incident must be submitted to EPA and proof of submission must be retained for 5 years because the toxicologist is a qualified expert whose opinion is reportable under FIFRA section 6(a)(2).

(b) A registrant receives a report from an agricultural extension agent indicating that two fish were killed in a creek adjacent to a field where a registrant's pesticide had recently been applied. After investigation, not exceeding 30 calendar days, the registrant concludes that the reported fish kill probably resulted from exposure to the registrant's pesticide. However, the registrant also discovers facts which establish that the pesticide was improperly applied by an individual who disregarded a statement on the label expressly warning that use resulting in contamination of surface waters could kill fish. This incident need not be reported under this section because fewer than three fish were affected. However the information must be retained for 5 years after the incident in compliance with § 159.157(c).

(c) The registrant has received reports of mortality in non-target birds feeding in or near fields where the registrant's pesticide has been applied. Though some of these reports were not specific enough to enable investigation of their accuracy, the registrant has identified specific investigable incidents affecting three or more birds in which it appears that birds died following use of the registrant's pesticide. However, the registrant has not determined whether or not the pesticide was responsible for the observed bird mortality, and no employee, consultant, or qualified expert has indicated that a causal relationship may exist. Nevertheless, the existence of the unexplained incidents in the organisms is sufficient to support a reasonable inference of a causal relationship between the toxic and adverse effects and excess residues, and failure to submit all information concerning any of the incidents will be considered an actionable violation of section 6(a)(2) if more than three birds were affected.

(d)(i) A registrant receives a complaint from a user who says he experienced gastric disturbances after using a registrant's product. The user is no longer ill and did not visit a doctor or hospital and EPA has received reports of a similar character and severity previously. Absent additional information the incident need not be reported because neither the registrant, nor a qualified expert, has concluded that the incident may have resulted from exposure to the pesticide. However, the registrant must retain a record of this incident for 10 years, under § 159.157(b).

(ii) If the user visited a doctor, Poison Control Center, or hospital, expert opinion will often be part of the file. If the registrant concludes, or a qualified expert advises the registrant, that the effect may indeed have resulted from exposure, the incident must then be reported.

(iii) If the user experiences other effects not previously reported to EPA in connection with the pesticide, or similar effects that are more severe than previously reported, the incident must then be reported unless the registrant can demonstrate that the pesticide was used improperly and that the label provides reasonable notice of the risk of the specific toxic effects reported.

(iv) In the above examples, if the information is reported, a copy of the report and proof of delivery must be retained by the registrant for 5 years after delivery under § 159.157(a). If it is not reported, the information must be retained for 10 years after the incident in compliance with § 159.157(c).

(e)(i) A registrant receives a report of a flagger who suffered eye irritation. A doctor's notes about which the registrant is aware indicate that the irritation may be due to exposure to the registrant's pesticide. However the product's label contains a warning

statement about eye irritation and the registrant discovers within 30 calendar days of receipt of the report that the flagger failed to wear goggles as required by the label. The incident need not be reported because it involves a minor risk which is warned against on the label and is of a type excepted by § 159.184(b)(1) but the information must be retained by the registrant for 10 years under § 159.157(b).

(ii) A registrant receives a report of a worker who reentered the field contrary to label directions who later suffered eye irritation. The information indicated that a doctor concluded that the irritation may have been due to exposure to residues of the registrant's product. The label warns against eye irritation and the registrant has information showing the worker failed to wear goggles required by the label. The incident need not be reported under § 159.184(b)(1) but the information must be retained by the registrant for 10 years.

(iii) Subsequent to the incident in Unit III.J.2.(d)(ii) above, the registrant receives one detailed report regarding two more reentry workers who suffered the same kind of effect in the same field at the same time as each other. The registrant has no new information regarding a doctor's diagnosis. The information from the new report regarding toxic and adverse effects suffered by two humans and the information regarding the previous one must be submitted to EPA within 30 calendar days of receipt of the latter report because, in total, the information now constitutes three incidents involving toxic and adverse effects to humans under § 159.184(c). That section contains no exception regarding minor risks warned against on the label and the fact that two persons were injured at one time does not change the fact that, in total, three humans were affected.

(iv) Another registrant receives a report of a reentry worker who suffered eye irritation. The information indicated that a doctor concluded that the irritation may be due to exposure to residues of the registrant's product. The label warns against eye irritation and also requires workers to wear goggles if they enter the field within 24 hours after application of the pesticide. The registrant has information indicating that the worker did not wear goggles. However the registrant investigates and finds that the worker entered the field 48 hours after application of the pesticide. Even though minor, the incident must be reported under § 159.184(a). The effect does not qualify as an exception under § 159.184(b)(1), because the risk of the effect suffered by the worker was not adequately warned against on the label.

In each of the above examples, if the registrant had become aware of an incident involving a product manufactured by someone else, the reporting requirement would not change if the toxic and adverse effect may have been due to an ingredient, metabolite or degradate in, or derived from, the registrant's product.

K. Submission of Efficacy Studies and Incidents

In most instances, EPA will not treat the failure to submit information from studies concerning the efficacy of a pesticide as an actionable violation of section 6(a)(2) unless such information indicates that the pesticide may not perform as claimed when used to control organisms which pose a potential risk to human health. This standard is incorporated in § 159.188(b)(2).

The Agency will not treat any failure to submit incident information concerning failure of performance against organisms which may pose any risk to human health but do not pose an immediate risk to human health, (i.e., failure to control possible disease vectors) as an actionable violation of section 6(a)(2) unless such information concerns a series or pattern of three or more comparable failures of performance. In an instance where a reported failure of performance involved use against organisms which may pose an immediate risk to human life, EPA would consider any single reported incident of failure of performance to be relevant to regulatory action. Single incidents of failures of products which may pose an immediate risk to human health are reportable under § 159.188(a), and a series of incidents of three or more similar failures in which a product failed to perform as claimed against organisms which may pose a risk to human health is reportable under § 159.188(b)(1).

Examples of organisms which could pose a risk, but perhaps not an immediate risk, to human health include disease vectors such as ticks. Organisms which could pose an immediate risk to human health include microorganisms, like hepatitis B virus, which themselves infect humans. Such organisms are controlled by "public health antimicrobials." Public health antimicrobials are often registered for use in hospital settings to prevent the spread of life threatening diseases. It is imperative to the mission of the Agency that each incident concerning possible failure of a public health antimicrobial be reported to EPA without delay. EPA has noted that compliance with this requirement, which already appears in current policy statements, has been spotty in the recent past. If this critical requirement is violated, the Agency intends to pursue enforcement action and sanctions with vigor appropriate for regulatory requirements that, if violated, may have a direct and immediate impact on public health.

In instances where use of a particular pesticide appears to involve substantial risks, EPA must evaluate the efficacy of the pesticide, in addition to the magnitude and value of its use and the feasibility of substitutes, before determining whether or not the risks associated with use of the pesticide are acceptable. Accordingly, whenever any use of a registered pesticide is or was the subject of a Formal Review as defined in § 159.153(b)(2), EPA is interested in information which concerns any deficiency in or reduction below the claimed efficacy of the product for the use being reviewed. When users of pesticides conduct methodical investigations, such as comparative field trials, and provide registrants with the information concerning studies, or a series of incidents listed in § 159.158(c)(1), the information regarding deficiencies in claimed efficacy is reliable enough to be considered by EPA and therefore must be reported. Information regarding such studies of products which are, or have been, the subject of Formal Review must be submitted to EPA.

L. Submission of Information Not Listed

1. *Discussion of basis for rule.* Sections 159.165 through 159.188 establish policies concerning the types of information which have been the subject of most of the inquiries made and concerns expressed with regard to FIFRA section 6(a)(2). There are, however, other categories of information which may be reportable under FIFRA section 6(a)(2) and § 159.158. Such reportable information includes, for example, information concerning soil, plant, and animal metabolism; bioaccumulation by various life forms, levels of exposure to applicators, farm workers, and other persons, drift of pesticides to non-target areas; and a variety of other information which might affect EPA decisions concerning the continued registrability of a product or the appropriate terms and conditions of registration.

EPA has not attempted to establish with specificity, for each category of such additional information, which failures to report information EPA will or will not treat as actionable violations

of FIFRA section 6(a)(2). However, in order to provide some guidance to registrants, § 159.195 sets forth a general rule covering all information not described by § § 159.165 through 159.188. In cases when the registrant should know that the information, alone or in conjunction with other information, raises questions about a greater than negligible risk or toxic or adverse effects in a species not previously reported to EPA, or more severe than previously reported to EPA, § 159.156(a) allows registrants a reasonable period, never exceeding 30 calendar days, to verify or investigate apparently reportable information. If, during this period, the registrant learns of facts showing that the information is incorrect, the information need not be submitted and failure to report will not be considered an actionable violation of section 6(a)(2). Otherwise the information must be submitted and proof of delivery must be retained for 5 years. Information not submitted to EPA, solely because the registrant is aware of less than three similar adverse effects, must be retained for 10 years if the effects are to humans, and for 5 years if the effects are to non-target organisms.

It should be noted again that whenever a registrant, including any employee or agent of a registrant or any person acting for a registrant, is notified by EPA that the Agency considers such additional information to be pertinent to the question of whether the product's registrations should be modified in any respect, the Agency considers such notification to constitute actual knowledge on the part of the registrant that the information is covered by § 159.195.

2. *Examples.* (a) The registrant receives verifiable reports that five cans of the registrant's product leaked 3 years after the registrant sold them. The registrant has no information regarding incidents of toxic and adverse effects caused by the leaks. Nonetheless, the registrant should know that such information about container failures may raise serious questions about the proper terms and conditions of registration of the product, due to the possibility of uncontrolled, unpredictable exposure to the product or its residues, as demonstrated by the series of incidents. Therefore the information would have to be submitted within 30 calendar days of the time the registrant possesses or knows of the information. However, if the registrant investigates, and, within the time permitted, discovers that three cans leaked because they were stored under conditions which were neither in accordance with the labelling or commonly recognized practice (such as the cans were damaged in a warehouse fire), the series of incidents need not be reported unless the registrant has knowledge that EPA is considering terms and conditions of registration to which such information would be relevant.

(b)(i) A registrant has previously submitted a toxicological study and an exposure study concerning its product to the Agency. Based on those studies, a consultant to a test lab engaged by the registrant calculates the risk presented to applicators by the use of the registrant's product. Unless the registrant knows that a calculation suggesting greater risk has been reported to EPA previously, the consultant's conclusion and the basis for it must be submitted to EPA within 30 calendar days because the registrant should know EPA would regard this type of information as having the potential for raising questions about the terms and conditions of registration of the product.

(ii) Within 30 calendar days an employee of the registrant concludes that the risk presented to applicators is much lower than the risk calculated by the consultant. The difference is due to use of a different assumption by the employee. However, the information consisting of the consultant's conclusion and its basis must be submitted because the registrant does not have facts establishing that use of the consultant's assumption is incorrect.

(iii) Within 30 calendar days an employee of the registrant concludes that the risk presented to applicators is much lower than the risk calculated by the consultant. The difference is due to an arithmetic error in the consultant's calculation which the consultant corrects in writing. The consultant's original conclusion and calculation need not be submitted because the registrant is aware of facts establishing that the information is incorrect.

IV. Statutory Review Requirements

In accordance with section 25 of FIFRA, this rule was provided to the U.S. Department of Agriculture (USDA), the Committee on Agriculture, Nutrition and Forestry of the Senate, the Committee on Agriculture of the House of Representatives, and the FIFRA Scientific Advisory Panel (SAP) for comment prior to publication. USDA had no comment and SAP waived review.

V. Regulatory Review Requirements

A. Executive Order 12291

Under Executive Order 12291, EPA must judge whether a rule is "major" and therefore subject to the requirement that a regulatory analysis be performed. A "major" rule is one which has an annual effect of $100 million or more, or results in a major increase in costs or prices, or has significant adverse effects on economic activities. The Agency concludes that this proposed rule does not meet the criteria for "major" because it imposes no requirements for data generation and will result in submission of certain existing information an estimated total of 120 times per year. This will result in an estimated total burden to all registrants of 5,380 person hours, excluding voluntary investigations performed by registrants, but including time spent analyzing those reports which would not be analyzed absent this rule. This proposed rule has been submitted to the Office of Management and Budget for review as required by Executive Order 12291.

B. Regulatory Flexibility Act

As required by the Regulatory Flexibility Act (5 U.S.C. 605(b)), I hereby certify that this proposed rule will not have a significant economic impact on a substantial number of small entities. EPA has estimated that the regulation will impose a total cost of $564,000 on 2,500 pesticide registrants. Since only a fraction of these are small entities, the number of small entities affected and the cost imposed on them is substantially less than the total.

C. Paperwork Reduction Act

The information collection requirements of this proposed rule have been submitted for approval to the Office of Management and Budget (OMB) under the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. An Information Collection Request (ICR) document has been prepared by EPA (ICR No. 1204) and a copy may be obtained from Sandy Farmer, Information Policy Branch, (PM-223) EPA, 401 M St., SW., Washington DC 20460, or by calling (202) 260-2740.

Public reporting burden for this collection of information is estimated to average 25 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or any other aspect of this

collection of information, including suggestions for reducing this burden, to: Chief, Information Policy Branch, PM-223, Environmental Protection Agency, 401 M St., SW., Washington DC 20460, and to: Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: EPA Desk Officer, Washington DC 20503.

The final rule will respond to any OMB or public comments on the information collection requirements contained in this proposal.

List of Subjects in 40 CFR Parts 153 and 159

Pesticides and pests, Policy statements, Reporting and recordkeeping requirements.

Dated: September 10, 1992.

F. Henry Habicht,

Acting Administrator.

Therefore, it is proposed that 40 CFR chapter I be amended as follows:

PART 153—[AMENDED]

1. In part 153:

a. The authority citation for part 153 continues to read as follows:

Authority: 7 U.S.C. 136—136y.

Subpart D—[Removed and Reserved]

b. By removing subpart D, consisting of §§ 153.61 through 153.79, and designating subpart D as "[Reserved]."

2. By adding new part 159 consisting of subparts A, B, and C, which are reserved, and subpart D to read as follows:

PART 159—STATEMENTS OF POLICIES AND INTERPRETATIONS

Subparts A—C [Reserved]

Subpart D—Reporting Requirements for Risk/Benefit Information

Sec.

159.152 What the law requires of registrants.
159.153 Definitions.
159.155 When information must be submitted.
159.156 How information must be submitted.
159.157 Recordkeeping.
159.158 What information must be submitted.
159.165 Toxicological and ecological studies.
159.167 Discontinued studies.
159.170 Human epidemiological and exposure studies.
159.178 Information about pesticides in or on food or feed, or in water.
159.179 New metabolites, degradates, and contaminants.
159.184 Toxic or adverse effect incident reports.
159.188 Failure of performance information.
159.195 Reporting of other information.

Authority: 7 U.S.C. 136-136y.

Subparts A—C [Reserved]

Subpart D—Reporting Requirements for Risk/Benefit Information

§ 159.152 What the law requires of registrants.

(a) Section 6(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) states that if at any time after the registration of a pesticide the registrant has additional factual information regarding unreasonable adverse effects on the environment of the pesticide, he shall submit such information to the Administrator.

(b) Compliance with this part will satisfy a registrant's obligations to submit additional information pursuant to section 6(a)(2).

§ 159.153 Definitions.

(a) The definitions set forth in FIFRA section 2 and in part 152 of this chapter apply to this part unless superseded by a definition in paragraph (b) of this section.

(b) The following definitions apply to this part:

Established level means a tolerance, food additive regulation, action level, or other limitation on residues imposed by law, regulation, or other authority.

Formal review means Special Review, Rebuttable Presumption Against Registration (RPAR), FIFRA section 6(c) suspension proceeding, or FIFRA section 6(b) cancellation proceeding, whether completed or not.

Pesticide means each active ingredient, inert ingredient, impurity, metabolite, or degradate contained in, or derived from, a pesticide product which is or was registered.

Registrant includes any person who holds, or ever held, a registration for a pesticide product issued under FIFRA section 3 or 24(c).

Water reference level means the limit of detection of a pesticide in water; or, alternatively, 10 percent of the Maximum Contaminant Level (MCL) if one has been established by EPA, or if one has not, 10 percent of the most recent draft or final long-term Health Advisory Level (HAL), or if EPA has not published or proposed an MCL or an HAL, the lowest detechable amount of the pesticide.

§ 159.155 When information must be submitted.

(a) EPA will consider information to be submitted on time if it is received by EPA not later than the 30th calendar day after the registrant first possesses or knows of the reportable information.

(b) For purposes of this part a registrant possesses or knows of information at the time any officer, employee, agent, or other person acting for or employed by the registrant first comes into possession of, or knows of, such information.

§ 159.156 How information must be submitted.

A submission under FIFRA section 6(a)(2) must:

(a) Be identical to, but be in addition to, copies sent in compliance with any other requirements.

(b) Be addressed to: FIFRA 6(a)(2) Document Processing Desk, Program Management and Support Division (H-7504C), U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460.

(c) Contain the name of the submitter, the company name and number, the date of transmittal to EPA, and a prominent statement that the information is being submitted in accordance with FIFRA section 6(a)(2).

(d) Identify the substance tested or otherwise covered by the information (including the EPA registration number(s) to which the information pertains, and if known, the CAS Registry Number).

(e) Summarize all known information concerning the study or incident or other event being reported.

(f) Assert any claims of confidentiality for information contained in the submission.

(g) If submitted under another provision of FIFRA (e.g., sections 3(c)(2)(B), 4(e)(1)(E)), also comply with all applicable requirements and any additional guidelines for the submission of data under such provision.

§ 159.157 Recordkeeping.

Registrants shall maintain records of all the following for the time periods specified:

(a) A copy of each submission under FIFRA section 6(a)(2) with proof of delivery to the address in § 159.156(b) must be maintained and kept available

for inspection for 5 years after the date of the submission.

(b) The following information must be maintained and kept available for inspection for a period of 10 years from the date of the incident:

(1) Information derived from any incident involving toxic effects to one or two humans (see § 159.184(c)).

(2) Information derived from any incident involving one or two failures of a pesticide to perform as claimed in use against organisms which, unless controlled, may pose a risk to human health (see § 159.188(b)).

(3) Information derived from any incident involving one or two failures of a pesticide to perform as claimed if such use is, or in the past has been, the subject of a Formal Review (see § 159.188(c)).

(c) Information derived from any incident involving toxic effects to one or two individual non-target organisms must be maintained and kept available for inspection for a period of 5 years from the date of the incident, unless the information need not be reported due to the exception in § 159.184(c)(4) (see § 159.184(c)).

(d) Research data must be retained for the life of the pesticide product(s) to which it pertains, as per 40 CFR 169.2(k).

§ 159.158 What information must be submitted.

(a) *General.* Information which is reportable under one or more of the sections from § 159.165 to § 159.195 must be submitted if the registrant, including any officer, employee, agent, or other person acting for the registrant possesses or knows of the information, and the information pertains to the registrant's pesticide, regardless of whether the information was generated from use or testing of the registrant's pesticide.

(b) *Opinion information.* Information reportable under one or more of the sections from § 159.165 to § 159.195 must be submitted if the opinion which makes it reportable was expressed by a person:

(1) Who was employed or retained (directly or indirectly) by the registrant.

(2) From whom the registrant requested the opinion(s) or conclusion(s) in question.

(3) Who, by virtue of his or her knowledge, skill, experience, training, or education could be considered to be an expert with regard to the matter on which he or she rendered the opinion.

(c) *Clearly erroneous information.* Information need not be submitted if before the date on which the registrant must submit such information:

(1) The registrant discovers that any analysis, conclusion, or opinion was predicated on data that were erroneously generated, recorded, or transmitted, or on computational errors.

(2) Every author(s) of each such analysis, conclusion, or opinion has acknowledged in writing that the analysis, conclusion, or opinion was improper because of the use of the erroneous data, and has corrected the original analysis, conclusion, or opinion accordingly.

(3) As a result of the correction, the information is no longer required to be reported under FIFRA section 6(a)(2).

(d) *Previously submitted information.* Information regarding an incident, study, or other occurrence need not be submitted if before the date on which the registrant must submit such information, the registrant is aware that all information concerning that incident, study, or other occurrence is contained completely in:

(1) Documents officially logged in by EPA.

(2) EPA publications, EPA hearing records, or publications cited in EPA **Federal Register** notices.

(3) Any other documents which are contained in the official files and records of the EPA Office of Pesticide Programs.

§ 159.165 Toxicological and ecological studies.

(a) The results of an incomplete or complete study of the toxicity to any human or other non-target organism of a pesticide must be submitted if:

(1) It shows a toxic effect in a different organ or tissue of the test organism than a previously submitted valid study.

(2) It shows a toxic effect at a lower dosage, or after a shorter exposure period, or after a shorter latency period than a previously submitted valid study.

(3) It shows a toxic effect at a higher incidence or frequency than a previously submitted valid study.

(4) It shows a toxic effect in a different species, strain, sex, or generation of test organism than a previously submitted valid study.

(5) It shows a toxic effect by a different route or medium of exposure than a previously submitted valid study.

(6) It shows a toxic effect through a different pharmacokinetic, metabolic, or biological mechanism than a previously submitted valid study.

(b) Results from a study that demonstrates any toxic effect (even if corroborative of information already known to the Agency) must be submitted if the pesticide is or has been the subject of a formal review based on that effect. Within 30 calendar days of the publication of a Notice of Commencement of a Formal Review in the **Federal Register**, all information which has become reportable due to the commencement of the Formal Review must be submitted.

§ 159.167 Discontinued studies.

The fact that a study has been discontinued before the planned termination must be reported to EPA, with the reason for termination if known, if submission of information concerning the study is, or was, required under this subpart.

§ 159.170 Human epidemiological and exposure studies.

Information which concerns any study (or portion thereof) upon which a person described in § 159.158(b) has concluded, or a person described in § 159.158(b)(3) would conclude, that a positive correlation or association may exist between exposure to a pesticide and either a toxic effect in humans, or residues of the pesticide in human tissue or body fluid, must be submitted regardless of whether or not the registrant considers any observed correlation or association to be significant.

§ 159.178 Information about pesticides in or on food or feed, or in water.

(a) *Food and feed.* Information must be submitted if it arguably shows that the pesticide is present on food or feed at a level in excess of established levels, except that information on excess residues resulting solely from studies conducted under authority of FIFRA section 5 need not be submitted.

(b) *Water.* Information must be submitted if it may show that a pesticide:

(1) Is present in waters of the United States, (as defined at 40 CFR 122.2, except paragraph (d) of § 122.2) above the "Water Reference Level," as defined in § 159.153.

(2) Is present is groundwater above the "Water Reference Level."

(3) Is present in finished drinking water above the "Water Reference Level."

(4) But information need not be submitted regarding the detection of a pesticide in waters of the United States or finished drinking water if it is registered for use in finished drinking water or surface water and the amount detected does not exceed those amounts reported by a registrant, in its application for registration, as resulting in those waters from legal applications of pesticides.

§ 159.179 New metabolites, degradates, and contaminants.

Information which shows the existence of any substance which appears to be a pesticide, as defined in this part, must be submitted if:

(a) The substance may occur under conditions of use of the pesticide product; and

(b) The existence of the substance or the association of the substance with the pesticide product has not previously been reported to EPA; and

(c) Any of the following is true:

(1) Any person described in § 159.158(b) has determined that the substance may be of toxicological or ecological concern.

(2) The registrant has concluded, or has been advised by any person described in § 159.158(b), that the substance, or analogous chemicals, may have any experimentally determined halflife greater than 3 weeks as shown from laboratory aerobic soil metabolism studies or field dissipation studies, or may have any experimentally determined resistance to hydrolytic degradation, or photolytic degradation on soil or in water, under any conditions, resulting in degradation of less than 10 percent in a 30-day period.

(3) The registrant has concluded, or a reasonable person described in § 159.158(b) person would conclude, that the substance may be of toxicological or ecological concern based on:

(i) The physical or chemical properties of the new substance; and/or

(ii) Data regarding analogous chemicals; and/or

(iii) Data regarding chemical reactivity of the substance and analogous substances; and/or

(iv) Data on the substance.

§ 159.184 Toxic or adverse effect incident reports.

(a) *Information from incidents affecting one or two humans or non-target organisms.* Information regarding a single toxic or adverse effect incident must be submitted if:

(1) The registrant has been informed that a person or nontarget organism suffered a toxic effect.

(2) The registrant has been informed that the affected person or non-target organism may have been exposed to a pesticide.

(3) The registrant is not aware of facts which establish that the reported toxic effect, or reported exposure, did not occur.

(4)(i) The registrant, or any person described in § 159.158(b), has concluded that there may be a causal relationship between the toxic effect and exposure to its pesticide.

(ii) The toxic or adverse effect occurred in a species in which that effect was not previously reported to the Agency.

(iii) The toxic or adverse effect was more severe than that previously reported in that species.

(b) *Exceptions.* Information regarding a single toxic effect need not be submitted if:

(1) It concerns an effect for which the label provides adequate notice of the risk of that effect in the affected type of organism.

(2) It concerns a non-lethal toxic effect to non-target plants which were at the use site at the time the pesticide was applied, if the label provides adequate notice of such a risk.

(3) It concerns a toxic effect to organisms other than humans which was due to misuse of the pesticide.

(c) *Information on incidents affecting three or more humans or non-target organisms.* This paragraph covers information derived from any number of occurrences involving similar toxic effects to any three or more individual non-target animals or endangered or threatened plants, or involving any three or more other plants on different days or in different locations, at any time within a 5-year period. For humans, this paragraph covers information derived from any number of occurrences involving similar toxic effects affecting a total of three or more individual persons at any time within a 10-year period. Covered information must be reported if the information meets the standards in paragraphs (c)(1) through (3) of this section and is not subject to the exclusion in paragraph (c)(4) of this section:

(1) The registrant has been informed that the persons or non-target organisms suffered similar toxic effects.

(2) The registrant has been informed that the affected persons or non-target organisms may have been exposed to a specific pesticide.

(3) The registrant is not aware of facts which establish that the reported toxic effects, or reported exposures, did not occur, or establish that the reported exposures and reported similar effects were unrelated.

(4) Notwithstanding paragraphs (c)(1), (2), and (3) of this section information pertaining solely to non-lethal toxic effects to non-target plants at the use-site at the time the pesticide was applied need not be submitted if warnings of the specific effect appear on the label of the registrant's product.

§ 159.188 Failure of performance information.

(a) *Immediate risk to human health.* Information must be submitted which concerns an incident in which:

(1) The registrant has been informed that a pesticide product did not perform as claimed against target organisms.

(2) The failure of the pesticide to perform as claimed involved a use, such as a public health antimicrobial use, against organisms of any character which, unless controlled, may pose an immediate risk to human health.

(3) The registrant has received sufficient information to conduct an investigation of the incident and has not established that the reported failure of performance did not occur.

(b) *Risk to human health.* Information must be submitted which concerns either incidents described in paragraph (b)(1) of this section or a study described in paragraph (b)(2) of this section:

(1) A series or pattern of three or more similar incidents in which:

(i) The registrant has been informed that a pesticide product did not perform as claimed against target organisms.

(ii) The registrant has received sufficient information to conduct an investigation of three or more incidents and has not established that the failures of performance occurred less than three times.

(iii) The failures of the pesticide to perform as claimed involved the use against organisms such as possible disease vectors which, unless controlled, may pose a risk to human health.

(iv) The three or more incidents occurred within 10 years of each other.

(2) A study which demonstrates that the pesticide may not perform in accordance with any claim by the registrant regarding uses intended for control of organisms that may pose a risk to human health, including any of the public health antimicrobial or other uses identified in § 158.640 of this chapter.

(c) *Products subject to formal review.* Information must be submitted if it shows any deficiency or reduction in the claimed efficacy of a registered pesticide, if such use is, or in the past has been, the subject of a formal review and it concerns any study or an incident described in paragraph (c)(1) of this section.

(1)(i) The registrant has been informed of three or more similar failures to perform as claimed against target organisms.

(ii) For at least three individual incidents the registrant has received

sufficient information to conduct an investigation and has failed within 30 days of the third incident to establish that the reported failures of performance occurred less than three times.

(iii) The three or more incidents occurred within a 10 year period.

(2) Within 30 calendar days of the publication of a Notice of Commencement of a Formal Review in the **Federal Register**, all information under this section which has become reportable due to the commencement of the formal review must be submitted.

§ 159.195 Reporting of other information.

(a) If the registrant knows of information other than that discussed in other sections of subpart D of this part, the registrant shall submit such information to the Administrator if:

(1) The registrant is not aware of facts which establish that the information is incorrect.

(2) The registrant knows, or reasonably should know, that if the information should prove to be correct, EPA would regard the information alone or in conjunction with other information about the pesticide, as having the potential to raise questions about the continued registrability of a product or about the appropriate terms and conditions of registration of a product.

(3) Examples of reportable information include but are not limited to: bioaccumulation by various life forms, levels of exposure to applicators, farm workers, and other persons, drift of pesticides to non-target areas, calculations showing possible unreasonable risk, and a variety of other information which might affect EPA decisions concerning the continued registrability of a product or the appropriate terms and conditions of registration.

(b) [Reserved]

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $175.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

The President

Proclamation 6475 of September 23, 1992

Gold Star Mother's Day, 1992

By the President of the United States of America
A Proclamation

Now that Marxist-Leninist regimes around the world have crumbled, now that dictators from Baghdad to Havana have found themselves isolated in a world that is growing freer by the day, one of the greatest risks we face as a Nation is that of forgetfulness. While we rightly celebrate improved prospects for international cooperation and peace, we must not forget that the preservation of freedom requires eternal vigilance and resolve. Only by remembering the lessons of the past can we ensure our liberty and security in the future; only by honoring the memory of those who fought and died for our country can we fully appreciate our way of life. One group of Americans who will never forget the price that has been paid for our freedom is the Gold Star Mothers, women whose sons and daughters have died in service to our country.

There is little that we can offer in consolation to America's Gold Star Mothers. Yet, while it is beyond our earthly power to alleviate their great loss, we can show these women that their children's sacrifices are remembered and appreciated, not only on occasions such as Memorial Day, but also throughout the year.

Every time we cast our ballot at the voting booth, every time we join in prayer at our place of worship, we Americans enjoy the liberty and self-government that have been preserved for us by the courage and sacrifices of others. Every time we say good night to our children and grandchildren, knowing that they need no longer fear the nightmare of global nuclear conflict, we enjoy the peace and security that have been attained by the blood of American patriots. So much that we cherish in our daily lives has been made possible by our fallen service members—truly, we cannot express our respect and gratitude often enough.

It is fitting that, in addition to honoring the memory of our fallen military personnel, we also salute the women who nurtured them. Through their children, our Nation's Gold Star Mothers have made a profound contribution to the United States and, yes, to the freedom of millions of people around the world. Today many Gold Star Mothers continue to serve our Nation through generous volunteer work in behalf of veterans, through efforts to promote civic education and patriotism among youth, and through countless other means of community service. On this occasion, we proudly acknowledge their courage and example and reaffirm America's commitment to promoting democracy and respect for human rights, which are the only sure foundation for lasting freedom, justice, and peace among nations.

The Congress, by Senate Joint Resolution 115 (June 23, 1936), designated the last Sunday in September as "Gold Star Mother's Day" and requested the President to issue a proclamation in observance of this day.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim September 27, 1992, as Gold Star Mother's Day. I call on all government officials to display the United States flag on government buildings on this day. I also urge the American people to display the flag and to hold appropriate meetings in their homes, places of worship, or other suitable places, as a public expression of the sympathy and the respect that our Nation has for its Gold Star Mothers.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of September, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

Proclamation 6476 of September 23, 1992

National Disability Employment Awareness Month, 1992

By the President of the United States of America

A Proclamation

The United States has long been the world's leading champion of the rights of individuals, and it is only natural that we now serve in the forefront of efforts to promote equal opportunity for persons with disabilities. Since I signed the Americans with Disabilities Act (ADA) on July 26, 1990, scores of other nations have been motivated to reexamine the challenges faced by their citizens with disabilities. The ADA, which prohibits discrimination in employment, public accommodations, transportation, and communications, provides a model for people everywhere as it affirms our commitment to ensuring that Americans with disabilities are not excluded from our Nation's cultural and economic mainstream.

Ensuring equal opportunities for persons with disabilities is not only a serious moral and legal obligation, it is also good business sense. As we work to expand markets for U.S. goods and services and to strengthen America's competitiveness in an increasingly technological world, we must fully utilize our Nation's wealth of human capital. One-third of all Americans with disabilities who are of working age are currently employed. The other two-thirds constitute a vast, untapped source of knowledge, skills, and talent. In addition to being costly—today Americans spend more than $200 billion annually to support potentially productive people—such a waste of human ability stands in stark contrast to the American traditions of individual dignity and self-reliance and empowerment through opportunity and hard work. There are some 43 million Americans with disabilities in the United States, and the vast number of these individuals want very much to lead full, independent, and productive lives. To employ these determined candidates is to make a wise investment in our Nation's future.

As we work to achieve harmonious implementation of the Americans with Disabilities Act, we will open doors of opportunity for millions of people—thereby expanding the ranks of workers and consumers, which, in turn, generates productivity and profits for business while enabling individuals and families to pursue the American Dream. I congratulate the business and industry leaders and community leaders from all walks of life who are working together to implement the ADA, and I pledge the total cooperation of the Federal Government. Our continuing progress is testimony both to the fundamental vitality and fairness of our free enterprise system and to our abiding commitment to liberty and justice for all.

The Congress, by joint resolution approved August 11, 1945, as amended (36 U.S.C. 155), has called for the designation of October of each year as "National Disability Employment Awareness Month." This month is a special time for all Americans to recognize the tremendous potential of persons with disabilities and to renew our commitment to equal opportunity for them, as for every citizen.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, do hereby proclaim October 1992 as National Disability Employment Awareness Month. I call on all Americans to observe this month with appropriate programs and activities that affirm our determination to fulfill both the letter and the spirit of the 1990 Americans with Disabilities Act.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of September, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

Proclamation 6477 of September 23, 1992

National Farm-City Week, 1992

By the President of the United States of America

A Proclamation

The tremendous productivity of America's farms has been a great blessing to this Nation and to millions of people around the world. As our leading industry, agriculture has fueled America's strength and progress while, at the same time, making the United States the world's largest exporter of food products and its most generous provider of food aid. The week that ends on Thanksgiving is, therefore, a fitting time to salute our farmers and all those Americans who work in partnership with them to bring the Lord's bounty from the fields to our families' tables.

While the United States enjoys a wealth of God-given resources, from hospitable climates to rich, fertile soils, the key to our agricultural productivity is the ingenuity and skill of our farmers and the fundamental efficiency and fairness of our free enterprise system. On average, one American farmer currently produces food and fiber for 129 people—a number that continues to increase. One of every three acres planted in this country produces crops for export. As a result of such efficiency and productivity, we in the United States can purchase our food with a smaller percentage of our disposable income than citizens of any other country. This enables us to use the remainder of our income to purchase other goods and services and to save and invest for the future. Together, these factors help the United States to maintain the highest standard of living in the world.

America's farmers are joined in their efforts by millions of other men and women who have, in a sense, put their hands to the plow in a competitive, market-based system that provides farmers with production supplies and related services, then processes, packages, and transports agricultural goods to retail markets across the United States and around the world. This system includes researchers in our Land Grant universities and private companies, who are developing ever-safer and more effective fertilizers, technologies, and pest control methods. It also includes specialists who ensure crop quality and manufacturers who transform raw materials into usable products, from breakfast cereals to grain-based alternative fuels. From wholesalers and distributors to local retailers, a vast network of men and women completes the partnership that begins in our rural communities and extends to our largest urban areas. For nearly 40 years now, we Americans have observed National Farm-City Week in celebration of this partnership and in grateful recognition of the more than 20 million Americans who make it work so well for all of us.

NOW, THEREFORE, I, GEORGE BUSH, President of the United States of America, by virtue of the authority vested in me by the Constitution and laws of the United States, do hereby proclaim the week of November 20 through November 26, 1992, as National Farm-City Week. I encourage all Americans, in rural and urban communities alike, to join in recognizing the accomplishments of our farmers and all those hardworking individuals who cooperate in producing the abundance of agricultural goods that strengthen and enrich the United States.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-third day of September, in the year of our Lord nineteen hundred and ninety-two, and of the Independence of the United States of America the two hundred and seventeenth.

George Bush

Rules and Regulations

Federal Register
Vol. 57, No. 187
Friday, September 25, 1992

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 928

[Docket No. FV-92-070FR]

Approval of 1992-93 Fiscal Year Expenses and Assessment Rate for the Marketing Order Covering Papayas Grown in Hawaii

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This final rule authorizes expenses and establishes an assessment rate for the 1992-93 fiscal year (July 1-June 30) under Marketing Order No. 928. The expenses and assessment rate are needed by the Papaya Administrative Committee (committee) established under this marketing order to pay its expenses and collect assessments from handlers to pay those expenses. The action will enable the committee to perform its duties and the marketing order to operate.

EFFECTIVE DATE: July 1, 1992, through June 30, 1993.

FOR FURTHER INFORMATION CONTACT: Gary D. Rasmussen, Marketing Specialist, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, Room 2523-S, Washington, DC 20090-6456; telephone: (202) 720-5331.

SUPPLEMENTARY INFORMATION: This final rule is issued under Marketing Agreement and Marketing Order No. 928 (7 CFR part 928) regulating the handling of papayas grown in Hawaii, hereinafter referred to as the marketing order. The marketing order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), hereinafter referred to as the Act.

This final rule has been reviewed by the Department of Agriculture (Department) in accordance with Departmental Regulation 1512-1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. Under the marketing order provisions now in effect, papayas grown in Hawaii are subject to assessments. It is intended that the assessment rate herein will be applicable to all assessable papayas during the 1992-93 fiscal year, beginning July 1, 1992, through June 30, 1993. This final rule will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this final rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this final rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are about 120 handlers of Hawaiian papayas subject to regulations under the marketing order covering papayas grown in Hawaii and about 345 papaya producers in Hawaii. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of the handlers and producers may be classified as small entities.

This marketing order, administered by the Department, requires that the assessment rate for a particular fiscal year shall apply to all assessable papayas handled from the beginning of such year. An annual budget of expenses is prepared by the committee and submitted to the Department for approval. The committee members are handlers and producers of Hawaiian papayas. They are familiar with the committee's needs and with the costs for goods, services, and personnel in their local areas and are thus in a position to formulate appropriate budgets. The budgets are formulated and discussed in public meetings. Thus, all directly affected persons have an opportunity to participate and provide input.

The assessment rate recommended by the committee is derived by dividing anticipated expenses by the expected pounds of assessable papayas shipped. Because that rate is applied to actual shipments, it must be established at a rate which will produce sufficient income to pay the committee's expected expenses. The annual budget and assessment rate are usually acted upon by the committee shortly before a season starts, and expenses are incurred on a continuous basis. Therefore, budget and assessment rate approvals must be expedited so that the committee will have funds to pay its expenses.

A proposed rule concerning the 1992-93 budget was published in the **Federal Register** (57 FR 429271, July 14, 1992). Comments on the proposed rule were invited from interested persons until July 24, 1992. No comments were received.

The Papaya Administrative Committee (committee) met on April 30, 1992, and recommended a 1992-93 budget with expenses of $823,450 and an assessment rate of $0.0085 per pound of assessable papayas shipped. Eight members voted in favor of the 1992-93

expenses and assessment rate, while one member voted "no" and one member abstained, because they favored lower assessment rate. The 1992-93 budget is similar in scope to the one approved for 1991–92. Budgeted expenses for 1991–92 totaled $746,650, while the assessment rate was $0.0085.

The 1992-93 budget contains $368,450 for program administration, $410,000 for advertising and promotion, and $45,000 for research and development. In comparison, budgeted expenses for 1991–92 were $336,650 for program administration, $400,000 for advertising and promotion, and $10,000 for research and development.

Program income for 1992–93 is expected to total $831,660, with assessment income estimated at $552,500, based on projected shipments of 65,000,000 pounds of assessable papayas. Other income includes $200,000 in promotional grants from the Hawaii Department of Agriculture, $63,360 from the USDA's Foreign Agricultural Service, $7,800 from the Japan Inspection Program, and $8,000 from miscellaneous sources including interest. Projected 1992–93 income over expenses ($8,210) will be placed in the committee's operational reserve. This reserve is projected at $72,301 on June 30, 1993, an amount well within the maximum authorized under the marketing order.

While this action will impose some additional costs on handlers, the costs are in the form of uniform assessments on all handlers. Some of the additional costs may be passed on to producers. However, these costs will be offset by the benefits derived from the operation of the marketing order.

Based on the above, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, the information and recommendations submitted by the committee, and other information, it is found that this action will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) 1992–93 season Hawaiian papayas are currently being shipped to market; (2) this action must be expedited because the committee needs to have sufficient funds to pay its expenses which are incurred on a continuous basis; (3) the 1992–93 fiscal year for this marketing order began on July 1, 1992, and the marketing order requires that the rate of assessment for the fiscal year apply to all assessable Hawaiian papayas handled during the fiscal year; (4) handlers are aware of this action which was recommended by the committee at a public meeting, and they will need no additional time to comply with these requirements; (5) the committee's financial reserves are expected to be depleted early in the 1992-93 season; and (6) the proposed rule provided a 10-day comment period, and no comments were received.

List of Subjects in 7 CFR Part 928

Marketing agreements, Papayas, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 928 is amended as follows:

PART 928—PAPAYAS GROWN IN HAWAII

1. The authority citation for 7 CFR part 928 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended, 7 U.S.C. 601–674.

2. New § 928.222 is added to read as follows:

Note. This section will not appear in the annual Code of Federal Regulations.

§ 928.222 Expenses and assessment rate.

Expenses of $823,450 by the Papaya Administrative Committee are authorized, and an assessment rate of $0.0085 per pound of assessable papayas is established for the fiscal year ending June 30, 1993. Any unexpended funds from the 1992–93 fiscal year may be carried over as a reserve.

Dated: September 18, 1992.

Martha B. Ransom,

Acting Deputy Director, Fruit and Vegetable Division.

[FR Doc. 92-23275 Filed 9-24-92; 8:45 am]

BILLING CODE 3410-02-M

---

7 CFR Part 959

[Docket No. FV-92-096IFR]

Onions Grown in South Texas; Expenses

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Interim final rule with request for comments.

SUMMARY: This interim final rule authorizes expenditures under Marketing Order No. 959 for the 1992–93 fiscal period (August 1, 1992, through July 31, 1993). Authorization of this budget enables the South Texas Onion Committee (Committee) to incur expenses that are reasonable and necessary to administer the program. Funds to administer this program are derived from assessments on handlers.

DATES: Effective beginning August 1, 1992, through July 31, 1993. Comments received by October 26, 1992, will be considered prior to issuance of a final rule.

ADDRESSES: Interested persons are invited to submit written comments concerning this action. Comments must be sent in triplicate to the Docket Clerk, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456. Comments should reference the docket number and the date and page number of this issue of the **Federal Register** and will be available for public inspection in the Office of the Docket Clerk during regular business hours.

FOR FURTHER INFORMATION CONTACT: Belinda G. Garza, McAllen Marketing Field Office, Fruit and Vegetable Division, AMS, USDA, 1313 East Hackberry, McAllen, Texas 78501, telephone 512–682–2833, or Martha Sue Clark, Marketing Order Administration Branch, Fruit and Vegetable Division, AMS, USDA, P.O. Box 96456, room 2523–S, Washington, DC 20090–6456, telephone 202–720–9918.

SUPPLEMENTARY INFORMATION: This rule is issued under Marketing Agreement No. 143 and Order No. 959, both as amended (7 CFR Part 959), regulating the handling of onions grown in South Texas. The marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the Act.

This rule has been reviewed by the Department of Agriculture (Department) in accordance with Departmental Regulation 1512–1 and the criteria contained in Executive Order 12291 and has been determined to be a "non-major" rule.

This interim final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This action authorizes expenditures for the 1992–93 fiscal period (August 1, 1992, through July 31, 1993). This interim final rule will not preempt any State or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to an order may file with the Secretary a petition stating that the

order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with law and requesting a modification of the order or to be exempted therefrom. Such handler is afforded the opportunity for a hearing on the petition. After the hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA), the Administrator of the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities.

The purpose of the RFA is to fit regulatory actions to the scale of business subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act, and the rules issued thereunder, are unique in that they are brought about through group action of essentially small entities acting on their own behalf. Thus, both statutes have small entity orientation and compatibility.

There are approximately 47 producers of South Texas onions under this marketing order, and approximately 34 handlers. Small agricultural producers have been defined by the Small Business Administration (13 CFR 121.601) as those having annual receipts of less than $500,000, and small agricultural service firms are defined as those whose annual receipts are less than $3,500,000. The majority of South Texas onion producers and handlers may be classified as small entities.

The budget of expenses for the 1992–93 fiscal period was prepared by the South Texas Onion Committee, the agency responsible for local administration of the marketing order, and submitted to the Department for approval. The members of the Committee are producers and handlers of South Texas onions. They are familiar with the Committee's needs and with the costs of goods and services in their local area and are thus in a position to formulate an appropriate budget.

The committee, in a mail vote which was completed on July 3, 1992, unanimously recommended a 1992–93 budget of $100,000 for personnel, office, and travel expenses, the same as last year. The assessment rate and funding for the research and promotion projects will be recommended at the Committee's organizational meeting this fall. Funds in the reserve as of June 30, 1992, estimated at $349,822, were within the maximum permitted by the order of two fiscal periods' expenses. These funds will be adequate to cover any expenses incurred by the Committee prior to the approval of the assessment rate.

Since no assessment rate is being recommended at this time, no additional costs will be imposed on handlers. Therefore, the Administrator of the AMS has determined that this action will not have a significant economic impact on a substantial number of small entities.

After consideration of all relevant matter presented, including the information and recommendations submitted by the Committee and other available information, it is hereby found that this rule, as hereinafter set forth, will tend to effectuate the declared policy of the Act.

Pursuant to 5 U.S.C. 553, it is also found and determined upon good cause that it is impracticable, unnecessary, and contrary to the public interest to give preliminary notice prior to putting this rule into effect and that good cause exists for not postponing the effective date of this action until 30 days after publication in the **Federal Register** because: (1) The fiscal period began on August 1, 1992, and the Committee needs to have approval to pay its expenses which are incurred on a continuous basis; (2) this action is similar to that taken at the beginning of the 1991–92 fiscal period; and (3) this interim final rule provides a 30-day comment period, and all comments timely received will be considered prior to finalization of this action.

List of Subjects in 7 CFR Part 959

Marketing agreements, Onions, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, 7 CFR part 959 is amended as follows:

PART 959—ONIONS GROWN IN SOUTH TEXAS

1. The authority citation for 7 CFR part 959 continues to read as follows:

Authority: Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

2. A new § 959.233 is added to read as follows:

§ 959.233 Expenses.

Expenses of $100,000 by the South Texas Onion Committee are authorized for the fiscal period ending July 31, 1993. Unexpended funds may be carried over as a reserve.

Dated: September 18, 1992.

Robert C. Keeney,

Deputy Director, Fruit and Vegetable Division.

BILLING CODE 3410–02–M

Rural Electrification Administration

7 CFR Part 1703

Rural Economic Development Loan and Grant Program

AGENCY: Rural Electrification Administration, USDA.

ACTION: Final rule.

SUMMARY: The Rural Electrification Administration (REA) hereby amends its regulation on the Rural Economic Development Loan and Grant Program. Policies, requirements, and procedures contained in this regulation implement a rural economic development zero-interest loan and grant program established by section 313 of the Rural Electrification Act of 1936, as amended. The program provides funds to REA borrowers for the purpose of promoting rural economic development and job creation projects.

DATES: *Effective date:* This regulation is effective October 26, 1992.

Applicability dates: This regulation is applicable as to loans on October 26, 1992. This regulation will be applicable as to grants at a later date.

FOR FURTHER INFORMATION CONTACT: Blaine D. Stockton, Jr., Assistant Administrator, Economic Development and Technical Services, Rural Electrification Administration, telephone number (202) 720–9552.

SUPPLEMENTARY INFORMATION:

Executive Order 12291

This rule has been issued in conformance with Executive Order 12291 and Departmental Regulation 1512–1. This action has been classified as "nonmajor" because it does not meet the criteria for a major regulation as established by the Order.

Executive Order 12778

This rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule: (1) Will not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule; (2) Will not have any retroactive effect; and (3) Will not require administrative proceedings before parties may file suit challenging the provisions of this rule.

Regulatory Flexibility Act

This action does not fall within the scope of the Regulatory Flexibility Act.

National Environmental Policy Act Certification

The Administrator has determined that this rule will not significantly affect the quality of the human environment as defined by the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*). Therefore, this action does not require an environmental impact statement or assessment.

Intergovernmental Review

This program is subject to the provisions of Executive Order 12372 that requires intergovernmental consultation with State and local officials with the exception of applications for project feasibility studies. A notice informing the public of the intergovernmental review coverage was published in the **Federal Register** on March 20, 1989, at 54 FR 11426.

Catalog of Federal Domestic Assistance

This program is listed in the Catalog of Federal Domestic Assistance under No. 10.854, Rural Economic Development Loan and Grant Program.

Information Collection and Recordkeeping Requirements

In compliance with the Office of Management and Budget (OMB) regulations (5 CFR part 1320) which implement the Paperwork Reduction Act of 1980 (Pub. L. 96–511) and section 3504 of that Act, the information collection and recordkeeping requirements contained in this final rule have been approved by OMB under control number 0572–0090. Comments concerning these requirements should be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, USDA Desk Officer, room 3201, New Executive Office Building, Washington, DC 20503.

Background

On February 15, 1989, REA published the final rule, 7 CFR 1709, subpart B, in the **Federal Register** (54 FR 6867) that implemented the Rural Economic Development Loan and Grant Program, also known as the Cushion of Credit Payments Program, established by section 313 of the Rural Electrification Act of 1936, as amended (Act). This program provides funds to Act borrowers for the promotion of rural economic development and job creation projects. On September 27, 1990, REA changed the designation of this rule from 7 CFR part 1709 to part 1703 (55 FR 39393). On July 30, 1991, REA published a proposed rule at 56 FR 36014 to revise the Rural Economic Development Loan and Grant Program.

Comments

All of the comments REA received on the proposed rule were taken into consideration in preparing the final rule. REA received comments from the following organizations:

(1) Basin Electric Power Cooperative, Bismark, North Dakota.

(2) Central Electric Power Cooperative, Inc., Columbia, Georgia.

(3) Central and South West Corporation.

(4) Consumers Power, Jackson, Michigan.

(5) East River Electric Power Cooperative, Madison, South Dakota.

(6) Edison Electric Institute, Washington, DC.

(7) Electric Power Associations of Mississippi, Jackson, Mississippi.

(8) The Empire District Electric Company, Joplin, Missouri.

(9) National Rural Electric Cooperative Association, Washington, DC.

(10) National Telephone Cooperative Association, Washington, DC.

(11) North Dakota Association of Rural Electric Cooperatives, Mandan, North Dakota.

(12) Otter Tail Power Company, Fergus Falls, Minnesota.

(13) SCANA Corporation, Columbia, South Carolina.

(14) Sequachee Valley Electric Cooperative, South Pittsburg, Tennessee.

(15) Slope Electric Cooperative, Inc., New England, North Dakota.

(16) United States Department of Agriculture, Office of the Inspector General, Washington, DC.

(17) United States Department of the Treasury, Financial Management Service, Washington, DC.

(18) United States Environmental Protection Agency, Washington, DC.

(19) United States Telephone Association, Washington, DC.

(20) UtiliCorp United, Kansas City, Missouri.

(21) West River Electric Association, Inc., Rapid City, South Dakota.

The comments will be addressed in the following paragraphs by first discussing REA's modifications to the proposed rule and then discussing the remaining suggested modifications. The modifications will be discussed in the order in which they appear in the final rule.

Many sections of the proposed rule have been rearranged and renumbered to improve the structure of the rule. For example, the section on documenting the evaluation and selection of applications has been moved to immediately following the application review section.

REA has added three policy statements that further clarify current policy for this program (§ 1703.11). First, it is REA's policy to use the Rural Economic Development Loan and Grant Program to promote projects that will result in long-term economic development in rural areas and thereby lead to higher levels of income for rural citizens. Second, it is REA's policy to direct funds to projects which will primarily benefit those rural areas that are experiencing the greatest economic hardship as determined by the selection criteria in this rule. Third, it is REA's policy to encourage economic development in rural areas and job creation projects without regard to service area.

In response to public comments, the definition of "electric or telephone purpose" has been modified. The revised definition provides an exclusion for any funding under this subsection for any facilities which the Administrator of REA or Governor of the Rural Telephone Bank is authorized to finance under sections 2, 4, 5, 201, 305 and 408 of the Act. It also includes any purpose characterized as furnishing, generating, or transmitting electric energy or other activities involved in providing electricity or is characterized as providing telephone service. In the proposed rule, community antenna television systems or facilities intended exclusively for educational purposes were excluded from the definition for REA electric borrowers. An organization suggested that REA modify the rule to avoid dissimilar treatment of electric and telephone borrowers. To avoid dissimilar treatment, REA has deleted the exclusion for REA electric borrowers from this definition and explicitly prohibits funding for any community antenna television system or facility in section 1703.20(a)(7).

The defined term "technical assistance" has been replaced with "project feasibility studies." The change was made to be consistent with the term used in a notice REA published on intergovernmental review in the **Federal Register** on March 20, 1989, at 54 FR 11426. The use of "technical assistance" in this program will refer to advice and guidance such as business planning.

There were several comments on the section pertaining to limitations on an owner of an REA borrower being the owner of the rural development project and on situations resulting in conflicts of interest. REA considered these comments and has made a few changes

in the language. The Administrator must balance the worthiness of the project against any conflicts of interest in the project. Full disclosure will permit the Administrator to make an informed decision.

To clarify the conflict of interest provisions and the limitations on the use of funds in the proposed rule, a provision has been added under section 1703.20, Ineligible uses of zero-interest loans and grants, regarding the prohibited use of funds to pay the salaries of any employee or owner of the REA borrower, its subsidiaries, or its affiliates. The provision in the proposed rule covering the use of REA funds to purchase equipment and real property from the REA borrower has been modified. Control over these transactions will be exercised through the conflict of interest provision in this section which requires full disclosure to the Administrator.

The section establishing a preference for providing borrowers zero-interest loans rather than grants has been deleted because the appropriation bill provides for a certain amount of funds for zero-interest loans and the associated subsidy for these loans under the "Federal credit reform" provisions.

Under section 1703.28, Maximum and minimum sizes of a zero-interest loan or grant application, the language has been modified to establish the maximum size of an application for assistance that will be considered for funding during a fiscal year as three percent of the projected total amount that will be available for the program during that fiscal year, rounded to the nearest $10,000. This modification to the proposed rule was made to avoid the necessity of going through the lengthy rulemaking process to change the maximum size of an application. It is also consistent with the public's suggestion that the maximum size should be increased to a level considerably higher than the $100,000 level in the current rule given the current amount of funding available to this program. REA has placed upper and lower limits on the size regardless of the percentage calculation. The maximum size of an application may not be lower than $200,000 nor greater than $400,000. Currently, it is anticipated that the maximum amount per application for the remainder of Fiscal Year 1992 after the effective date of this rule would be $400,000. The three percent level means that a minimum of 34 applications would be selected in any given fiscal year. In selecting this percentage, REA balanced the desire to finance a significant number of projects given the limited amount of funds available for the program with the agency's desire to increase the maximum amount above current limit of $100,000. The amount of funds available to this program has increased since the $100,000 level was established in 1989. The Administrator's determination based on this calculation will be published by notice in the **Federal Register**. The minimum amount of an application remains unchanged at $10,000.

The section on the description of the application has been divided into four sections, §§ 1703.34 through 1703.37.

Several comments suggested that REA rearrange and regroup the selection factors. In response, REA has rearranged and clarified the provisions in section 1703.46 covering the process of analyzing and evaluating applications under consideration. This clarification is based on REA's basic review process in which the Administrator makes an initial determination whether a project meets feasibility standards and program goals. A project that has a low probability of being a viable operation or a project that does not promote economic development in rural areas and/or job creation as described in this rule should not receive points and should not be considered for selection. Under REA's current process, which is not based on a specific number of points for each factor, a project that has a low probability of being successful or did not fulfill the purpose of this program would not be selected by the Administrator. Similarly, under a point system, the Administrator must consider whether a project will be a viable operation or promote economic development in rural areas and/or job creation before points are awarded for the selection factors and the application is ranked.

The selection factors have been regrouped into two sections, 1703.46(g) and (h). First, the Administrator considers the nature of the project and three other factors related to the promotion of economic development in rural areas and job creation. Applications receiving a minimum number of points, or falling within the top 75 percent of all applications, on the basis of these four factors, are then evaluated on the basis of the selection factors in the second group. The second group contains factors such as supplemental funds, income levels, and cushion of credit payments. Under this modified system, an application could not be selected on the basis of factors such as supplemental funds or income levels without regard to the nature of the project.

This two-stage process includes a method to compensate for the variety of applications that will be on file and under consideration at any particular time. First, all applications being considered could score high under the first group of selection factors and be evaluated under the second group of selection factors. There is no cutoff point at any particular percentage level if all applications score relatively high. Second, regardless of the number of points received by applications on file and under consideration, at least 75 percent of the applications will be evaluated under the second group of selection factors.

The public discussed the types of projects that should be financed under this program given the limited amount of funds. REA has added language that specifically addresses these matters. The rule requires an application for a project that will provide recreational facilities to present a convincing case that the project would be an integral part of a tourism industry in the community or region. The application must include support, such as regional studies, that shows the impact of the recreational facilities on the economy of the rural area. Projects that either do not meet this requirement or are developed to provide recreational facilities for the residents of an area would not receive points. These provisions reflect a lower priority given to funding recreational facilities versus other projects given the limited funds in this program. Similar priorities for this program explain the provisions dealing with residential dwellings, entertainment television, land transfers or land speculation, and personal vehicles. In the proposed rule, these were not considered projects that would promote rural economic development and/or job creation. In the final rule as in the proposed rule, if a project does not promote rural economic development and/or job creation, it will not be selected. In this same section, a provision was added which provides that points will not be given to projects that are primarily to finance the purchase of an established business or operation. This was added to the final rule to clarify that such a project would primarily transfer ownership rather than promote economic development or job creation.

In response to public comments on the proposed rule, the change in population in the county where the project will be located over a two-year period has been added as a selection factor. REA considered many different economic measurements before deciding that this factor is the best additional measure of

economic conditions at the county level. The change in population was analyzed over many different periods and the two-year period appeared to be the most appropriate.

A selection factor that REA retained in the final rule is support for the program provided by cushion of credit payments. The use of both absolute dollar amounts and percentage levels for awarding points under this factor was designed to accommodate both large and small REA borrowers. As REA has discussed in the preamble to the final rule published on February, 15, 1989, at 54 FR 6867, points are provided for cushion of credit payments to encourage support for the program. The REA borrower's cushion of credit payments result in funds being allocated to this program. A significant number of points are awarded for even a modest level of cushion of credit payments.

A provision limiting the number of applications selected for a particular project has been added in section 1703.46. Since numerous applications on file for the same project would score the same number of points, this provision is necessary for the benefit of all REA borrowers. The limitation of one selected application during a selection period has been added because some of the selection factors are based on the a borrower's situation and there could be a tendency for all of a particular REA borrower's applications to score high on these factors. In addition, this limitation tends to spread scarce funds to many different areas of the country.

A clarification has been made regarding the Administrator's ability to select an application receiving fewer points than another application if there were insufficient funds during a period to select the higher ranked application. As suggested in one of the comments, the Administrator may ask the REA borrower that submitted the higher-ranked application if it desires to reduce the amount of its application to the amount of funds available. The reduction in the amount of the application may require additional supplemental funds to ensure a successful project. The Administrator would need to re-analyze the project based on information the REA borrower provided to ensure that the project is still feasible.

The public discussed the ranking of feasibility studies. The final rule allows the Administrator to select the highest ranking applications to finance project feasibility studies. This simply recognizes that applications for project feasibility studies will not score as many points under the factors as other projects. This method is tantamount to ranking applications for project feasibility studies separately. Another approach, which REA did not choose to adopt, is to create separate selection factors for applications for project feasibility studies. Many of the same factors would be repeated and it would appear to serve no additional purpose.

A provision has been added that provides for the highest ranking application during each selection period requesting less than 5 percent of the total project costs to be considered with the applications requesting 5 percent or more of total project costs. This is consistent with the overall preference for projects that have a meaningful level of REA funds yet provides an opportunity for the highest ranked application requesting less than 5 percent of total project costs to be considered.

Two organizations suggested that REA delete the language in section 1703.58, "Post selection period" that says the selection is not binding on the Administrator. They say the discretion for the Administrator to "change his mind" should not be in the rule even though it is not likely to occur. Another says the Administrator has the right to place conditions on the advance of REA loan funds but that it could result in serious credibility problems if a selected project were simply "deselected." The language in the proposed rule was based on a distinction between the selection and the approval that was designed to expedite the process of advancing REA funds. Under the procedures in the proposed rule, the approval of an application occurs when the letter of agreement is executed. Prior to that time, the REA borrower might have had to submit additional information, such as environmental information, that must be considered prior to approval. As the two organizations correctly assumed, it was not intended to permit the Administrator merely to "change his mind." REA has clarified the manner in which these matters are handled in the final rule. The rule has been amended to say that the advance of funds is contingent on the borrower and the project complying with certain conditions and requirements.

Under section 1703.61, "Disbursement of zero-interest loan and grant funds", REA has modified the language requiring disbursement of funds within a certain time period. Similarly, under section 1703.66, "Review and other requirements", REA has added language covering the use of funds by the ultimate recipient within a certain time period and the requirement for adequate documentation of the uses of pass-through loan funds. These changes reflect current REA procedures.

REA received numerous comments on the matter of tying the receipt of rural development assistance from REA borrowers to the acceptance of electric or telephone service. All comments and suggestions were considered. One REA electric borrower believes it is appropriate to restrict funds under this program to projects that will enhance the future sale of electricity to the REA borrower which received the REA zero-interest loan or grant. Another REA electric borrower believes that if an REA borrower is working to promote economic development, then it needs the additional electric load and diversity a business brings to its system.

The investor-owned utilities, their trade organization, and their representatives oppose tying the receipt of rural development assistance from REA borrowers to the acceptance of electric or telephone service. In summary, they believe: (1) Tying creates conflicts of interest; (2) Congress did not intend that access to rural development assistance be tied to electric sales; (3) Tying is likely to interfere with the Congressional goals of building community infrastructure and creating new jobs; (4) Tying improperly restrains competition, and (5) Tying threatens REA security interest in its loans and loan guarantees because of potential damage awards. The investor-owned utilities, their trade organization, and their representatives proposed numerous provisions in the regulation that would prohibit tying.

Rather than commenting on the each of these points or adopting any of the proposed language, REA has decided to stay with its original policy on this matter. REA said in the preamble to the final rule published on February 15, 1989 (54 FR 6867), that the rule implementing the Rural Economic Development Loan and Grant Program was written to encourage economic development in rural areas without regard to service territory. At that time, REA did not put specific language in the rule but rather said the Administrator would use his discretion to select projects that meet this objective. Since that time, REA's policy has remained consistent and is unchanged.

REA believes that the operation of the program for the past several years and the projects that have been selected demonstrate REA's commitment to this policy. On several occasions, REA has required an REA borrower to delete a requirement in its agreement with the ultimate recipient to take service for the term of the zero-interest loan. It is true

that the REA borrower that relends the REA zero-interest loan proceeds bears the risk that the loan might not be repaid. Some might argue that this risk is justification for a tying arrangement. REA has developed a program where the REA borrower assesses the risks of the project and the likelihood of the full repayment in determining whether to make the loan. The REA borrower may also transfer the repayment risk. The receipt of electric or telephone business from the ultimate recipient of the loan is separate from this risk assessment and is not a compensation for the risk. In this manner, the REA borrower is both a local promoter of economic development and a conduit of low cost government funds to rural development projects. With respect to risk assessment and financing local projects, it has, in essence, taken on attributes of a local bank. REA has explicitly stated its current position on this matter by adding a provision under section 1703.21, "Limitations on the use of zero-interest loan and grant funds" that prohibits an REA borrower from conditioning the receipt of the proceeds of a zero-interest loan or grant with the requirement to take electric or telephone service from the REA borrower.

There were other suggestions made that were carefully considered but not adopted in the final rule. Two telephone trade organizations believe that Section 302(c) of the Act (7 U.S.C. 932) requires the Administrator to separate the rural economic development subaccount into electric and telephone subaccounts and that funds appropriated for this program should be allocated to separate electric and telephone subaccounts on the basis of their size. REA does not interpret Section 302(c) of the Act as requiring the separation, and believes that based upon its experience in administering the program to date, such a separation would not be desirable. Therefore, REA has decided not to separate the subaccount into electric and telephone subaccounts.

The rule retains the language permitting the Administrator to allocate funds between applications from REA electric and telephone borrowers which will ensure that funding is spread between borrowers from both programs.

One organization believes the prohibition on the use of REA zero-interest loan and grant funds for electric and telephone operations would retard the opportunities for economic development in rural areas and job creation. This provision is intended to protect the integrity and reputation of the program. For example, a building financed with a zero-interest loan or grant that was to be used for a particular rural economic development project should not be used instead for the REA borrower's normal service operations. The use of funds in this manner would result in no benefit for the intended rural development purpose. The REA borrower has the option of using its own funds or electric or telephone financing programs under the Act for purposes that are considered part of its electric or telephone operations.

Two telephone trade organizations believe the provision in Section 1703.46, Documenting the evaluation and selection of applications for zero-interest loans and grants, which permits the Administrator to decline to select an application based on the management and financial situation of the REA borrower, goes beyond the need of REA to be assured of loan repayment and one organization believes this is "... tantamount to the back-door implementation of a general funds policy...." It was in no manner REA's intention to implement a general funds policy prohibited by the Act. The purpose of the language was to specifically mention items the Administrator would consider in determining both the management and financial situation of the REA borrower rather than merely refer broadly to the borrower's current condition and its ability to repay the loan.

The telephone trade organizations also do not believe the language permitting the Administrator to decline to select an application based on a determination that limitations under state laws will lessen the likelihood of repayment of the REA loan should be in the final rule. REA has considered their comments and decided this discretion would be appropriate in the situation described in the rule and is in the best interests of the program.

One organization recommended limiting the number of outstanding rural development loans for each REA borrower to an amount equal to a certain percentage of its net plant. REA believes that there are many different measures of the financial well-being of a borrower in addition to the ratio of outstanding rural development loans to total utility plant. For this reason, REA believes it is more appropriate to consider the financial situation of the REA borrower on a case-by-case basis rather than selecting one ratio.

One organization did not want any restriction on the number of loans or grants to a particular state during a fiscal year. The limitation on the number of selections in a particular state is designed to ensure a broad distribution of the limited amount of funds available each year across the rural areas of the country. This limitation, if used, would simply prevent a high percentage of the total amount of funds from being used in a few states.

There were several comments on the requirement for a minimum amount of supplemental funds. Some believe it should be deleted and others believe it should be retained. REA has decided to retain the requirement for a modest amount of supplemental funds. As stated in the preamble to the proposed rule, it is important to have other funds supplement REA's financing to spread the benefit of limited funds, increase the probability of success, and select projects that others are willing to finance. There were a few comments with regard to the owner's equity section. REA has decided to retain the proposed language because owner's equity increases the probability of a successful project.

REA will publish for public consideration a separate proposed rule containing grant approval procedures to be used in circumstances when Congress allocates a certain amount of the total funds made available for this program during a fiscal year for grants.

In a separate notice, the Administrator is publishing a determination that the maximum amount of an application for a zero-interest loan will be $400,000 upon the effective date of this rule.

List of Subjects in 7 CFR Part 1703

Community development, Grant programs-housing and community development, Loan programs-housing and community development, Reporting and recordkeeping requirements, Rural areas.

For reasons set forth in the preamble, REA hereby amends 7 CFR chapter XVII, part 1703, as follows:

PART 1703—RURAL DEVELOPMENT

1. The authority citation for 7 CFR part 1703 is revised to read as follows:

Authority: 7 U.S.C. 901 *et seq.*

2. Subpart B of part 1703 is revised to read as follows:

Subpart B—Rural Economic Development Loan and Grant Program

Sec.

1703.10 Purpose.
1703.11 Policy.
1703.12 Definitions.
1703.13 Source of funds.
1703.14 Disposition of funds in the subaccount.

borrower's completed application by REA or for refinancing or repaying a loan made under the Act or a program administered by the Administrator;

(6) For any electric or telephone purpose, as determined by the Administrator;

(7) For any community antenna television systems or facilities;

(8) For the borrower's electric or telephone operations or for any operations affiliated with the borrower unless the Administrator has specifically informed the borrower in writing that the operations are part of the approved purposes;

(9) To pay the salaries of any employee or owner of the borrower, its subsidiaries, or affiliates. This restriction does not prohibit the use of loan or grant funds for printing and similar costs for project feasibility studies it has prepared, commissioned or purchased if specifically approved by the Administrator;

(10) For proposed projects located in areas covered by the Coastal Barrier Resources Act (16 U.S.C. 3501 *et seq.*); or

(11) For anything other than an approved purpose.

(b) [Reserved]

§ 1703.21 Limitations on the use of zero-interest loan and grant funds.

(a) A borrower may not charge interest for the use of the proceeds of the zero-interest loan provided under this program; however, it may charge reasonable loan servicing charges, reasonable legal fees involved in providing the REA funds to the recipient, and the amount paid for an irrevocable letter of credit made payable to REA and issued on behalf of the borrower that guarantees repayment of an REA zero-interest loan, all as determined by the Administrator. A borrower may require the recipient of a pass-through-loan to provide and/or obtain adequate security for the zero-interest loan funds.

(b) A borrower must calculate any costs to charge in connection with the use of grant funds under this program for the project and must temporarily deposit the grant funds in accordance with 7 CFR parts 3015, Uniform Federal Assistance Regulations, and 3016, Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments, as appropriate.

(c) A borrower may not make a profit from any zero-interest loan or grant provided from the subaccount, with the exception of the $500 interest income exclusion in paragraph (d) of this section.

(d) The borrower must temporarily deposit the zero-interest loan funds into a separate federally insured account called the Rural Economic Development Account unless the funds will be disbursed within two months. However, all interest earned on temporarily deposited funds in excess of $500 per 12-month period must be used for approved purposes or returned to REA. The $500 exemption is to avoid placing additional administrative burdens on the borrower for funds that were only briefly deposited in an interest-bearing account prior to disbursing them.

(e) The borrower may not condition the receipt of the proceeds of a zero-interest loan or grant under this subpart with the requirement that the recipient take electric or telephone service from the borrower.

§ 1703.22 [Reserved]

§ 1703.23 Supplemental funds requirements for zero-interest loans and grants.

The Administrator will not select an application unless the project will receive supplemental funds in an amount at least equal to 20 percent of the REA zero-interest loan and grant to be provided to the project, as determined by the Administrator. Supplemental funds as used in this section may come from the project owner in the form of equity funds, private sources, state and local government sources, other Federal Government sources, the borrower or other sources. Only supplemental funds that will be provided to the project after the date REA receives the borrower's completed application may be used to satisfy this requirement. Supplemental financing must be verified and committed to the project in form and substance satisfactory to the Administrator before REA will advance any funds.

§ 1703.24 [Reserved]

§ 1703.25 Significance of REA financing to the total project cost.

Selection of applications will be based on a preference for applications requesting REA financing which will be at least equal to 5 percent of the total project costs, as determined by the Administrator. Projects costs will be based on the amount that would be spent over the first 2 years after the first advance of REA funds for the component or phase of the undertaking for which the borrower is requesting REA funds, as determined by the Administrator. The Administrator may determine that a component or phase, especially actions necessary to initiate a larger project, constitute a distinct project for the purposes of this section.

§ 1703.26 [Reserved]

§ 1703.27 Owner's equity in the project.

The Administrator may require, as a condition to REA financing, that the owner(s) of the project invest equity capital if determined to be financially necessary, based on an REA financial analysis and sound lending practices.

§ 1703.28 Maximum and minimum sizes of a zero-interest loan or grant application.

(a) The maximum size of an application that will be considered for funding under this subpart during a fiscal year will be 3 percent of the projected total amount available for the zero-interest loans or grants under section 313 of the Act during that fiscal year, rounded to the nearest $10,000. This determination will be made by the Administrator for each fiscal year.

(b) Regardless of the projected total amount that will be available, the maximum size may not be lower than $200,000 nor greater than $400,000.

(c) The projected total amount available during a particular fiscal year is calculated as the sum of the projected amount that will be credited to the subaccount during a particular fiscal year from the interest differential calculation based on the REA borrowers' cushion of credit levels at the time the Administrator makes the determination and any amounts appropriated for that fiscal year for zero-interest loans or grants made under section 313 of the Act.

(d) After the Administrator has determined the maximum size for a fiscal year, a notice of the calculation and amount will be published promptly in the **Federal Register**. Thereafter, the maximum size will remain in effect until the Administrator has published the maximum size for the next fiscal year.

(e) All unselected applications on file at REA, including both loan and grant applications, from the same borrower for the same project will be considered to be one application in determining that the maximum size of the application is in accordance with this section.

(f) The minimum size of an application for assistance under this subpart that will be considered for funding is $10,000.

§ 1703.29 Terms of zero-interest loan repayment.

(a) The Administrator will determine the terms and repayment schedule of the zero-interest loan to the borrower based on the nature of the project and approved purposes. Ordinarily, the total term of the zero-interest loan, including any principal deferment period, will not exceed 10 years. The repayment terms the borrower sets on a pass-through-

loan must equal the terms of the loan provided to the borrower unless a written request from the borrower to provide a longer deferment period, shorter total term of the loan, or other benefits is approved by the Administrator.

(b) The Administrator has the discretion to defer the repayment of principal up to two years, based on an analysis of the feasibility of the project. Ordinarily, if the Administrator considers the project to be a business expansion or going concern, the first repayment of principal will not begin until one year after the date of the REA note. Ordinarily, if the Administrator considers the project to be a start-up project, the first repayment of principal will not begin until 2 years after the date of the REA note. Loans must be repaid under terms set forth in REA's legal documents.

(c) Unless the Administrator has specifically approved otherwise, the borrower will be required to repay the REA zero-interest loan in full at such time as a pass-through-loan has been fully repaid to the borrower. If the borrower uses the proceeds of the REA zero-interest loan to provide pass-through-loans to more than one entity, this requirement will only apply to that portion of the zero-interest loan associated with the loan that has been fully repaid to the borrower.

(d) If the Administrator determines that, as a result of state law, court rulings, or regulatory commission decisions, it is necessary to ensure that the borrower will repay the REA zero-interest loan, the borrower may be required to provide an irrevocable letter of credit, or another form of guarantee satisfactory to the Administrator. The letter of credit or other guarantee is to be made payable to REA. The letter of credit or other guarantee may not be secured by any assets under a REA and/or Rural Telephone Bank mortgage and must be in form and substance satisfactory to the Administrator. REA must receive the letter of credit or other guarantee prior to the advance of any zero-interest loan funds.

§ 1703.30 Approval of agreements.

(a) The Administrator must approve any agreements between the borrower and the owner(s) of the project, those undertaking the project, or any intermediary that will re-lend or transfer the proceeds of the REA funds, that the Administrator deems necessary.

(b) Borrowers must obtain the Administrator's approval of any loan, grant or security agreement, mortgage or note between the borrower and the owner(s) of the project, those undertaking the project or any intermediary that will re-lend or transfer the proceeds of the REA funds, prior to the advance of REA zero-interest loan or grant funds to the borrower. The borrower must receive the Administrator's approval of the final draft version of the documents prior to their execution.

(c) Borrowers must obtain the Administrator's written approval prior to revising or amending any loan, grant or security agreement, mortgage or note that has been reviewed and approved by the Administrator pursuant to paragraph (b) of this section. Additionally, the borrower must obtain the Administrator's written approval prior to executing, revising or amending any other agreement, in connection with the project, between the borrower and the owner(s) of the project, those undertaking the project or any intermediary that will re-lend or transfer the proceeds of the REA funds.

(d) The borrower and the owner(s) of the project, or those undertaking the project, should make agreements and prepare documents in accordance with all applicable laws.

(Approved by the Office of Management and Budget under control number 0572-0086)

§ 1703.31 Transfer of employment or business.

The project must not result primarily in the transfer of any existing employment or business activity from one area to another.

§ 1703.32 Environmental requirements.

(a) Prospective recipients of zero-interest loans or grants should consider the potential environmental impact of their proposed projects at the earliest planning stage and plan development in a manner that reduces, to the extent practicable, the potential to affect the quality of the human environment adversely.

(b) *Application for zero-interest loans or grants for project feasibility studies.* For a proposal to fund a project feasibility study, the only environmental information normally required is whether or not the proposed project being studied or analyzed will be located within an area protected under the Coastal Barrier Resources Act (16 U.S.C. 3501 *et seq.*) Generally, the use of Federal funds to promote development on coastal barriers is strictly limited by the Coastal Barriers Resources Act.

(c) *Application for zero-interest loans or grants for a project that is not considered project feasibility studies.* (1) The Administrator will review support materials in the application and initiate an environmental review process pursuant to 7 CFR part 1794. This process will focus on any environmental concerns or problems that are associated with the project.

(2) The level and scope of the environmental review will be determined in accordance with the National Environmental Policy Act of 1969 (NEPA), as amended, (42 U.S.C. 4321 *et seq.*), the Council on Environmental Policy for Implementing the Procedural Provisions of NEPA (40 CFR parts 1500—1508), REA's environmental policies and procedures (7 CFR part 1794) and other relevant Federal environmental laws, regulations and Executive Orders.

(3) Activity related to the project that will adversely affect the environment or limit the choice of reasonable alternatives must not be undertaken prior to completion of REA's environmental review process.

§ 1703.33 Other considerations.

(a) *Equal opportunity and nondiscrimination requirements.* All zero-interest loans and grants made under this subpart are subject to the nondiscrimination provisions of Title VI of the Civil Rights Act of 1964, as amended, (42 U.S.C. 1971 *et seq.*, 1975a *et seq.*, 2000a *et seq.*; 7 CFR part 15); section 504 of the Rehabilitation Act of 1973, as amended, (29 U.S.C. 701 *et seq.*; 7 CFR part 15b); the Age Discrimination Act of 1975, as amended, (42 U.S.C. 6101 *et seq.*; 45 CFR part 90); and Executive Order 11246, Equal Employment Opportunity, (3 CFR, 1964—1965 Comp., p. 339) as amended by Executive Order 11375, Amending Executive Order 11246, Relating to Equal Employment Opportunity (3 CFR, 1966—1970 Comp., p. 684).

(b) *Architectural barriers.* All facilities financed with REA zero-interest loans or grants that are open to the public or in which physically handicapped persons may be employed or reside must be designed, constructed, and/or altered to be readily accessible to, and usable by handicapped persons. Standards for these facilities must comply with the Architectural Barriers Act of 1968, as amended, (42 U.S.C. 4151 *et seq.*) and with the Uniform Federal Accessibility Standards (UFAS), (Appendix A to 41 CFR part 101.19, subpart 101-19.6).

(c) *Flood hazard area precautions.* In accordance with 7 CFR part 1788, if the project is in an area subject to flooding, flood insurance must be provided to the extent available and required under the Flood Disaster Protection Act of 1973, as amended (42 U.S.C. 4001 *et seq.*). The insurance must cover, in addition to the

buildings, any machinery, equipment, fixtures and furnishings contained in the buildings. REA will comply with Executive Order 11988, Floodplain Management (3 CFR, 1977 Comp., p. 117), and § 1794.41 of this chapter, in considering the application for the project. As set forth in § 1794.41 of this chapter, public notice is required if a project will be located in a floodplain.

(d) *Uniform relocation assistance.* Relocations in connection with this program are subject to 49 CFR part 24 as referenced by 7 CFR Part 21, Uniform Relocation Assistance and Real Property Acquisition for Federal and Federally Assisted Programs except that the provisions in Title III, Uniform Real Property Acquisition Policy, of the Uniform Relocation Assistance and Real Property Acquisition Act of 1970, as amended, (42 U.S.C. 4601–4655) (the "Uniform Act") do not apply to this program.

(e) *Drug-free workplace.* Grants made under this program are subject to the requirements set forth in 7 CFR part 3017, Subpart F, Drug-Free Workplace Requirements, which implements the Drug-Free Workplace Act of 1988 (41 U.S.C. 701 *et seq.*). A borrower requesting a grant will be required to certify that it will establish and make a good faith effort to maintain a drug-free workplace program.

(f) *Debarment and suspension.* The requirements of Executive Order 12549, Debarment and Suspension (3 CFR, 1986 Comp., p. 189), and 7 CFR part 3017, Subparts A through E, Governmentwide Debarment and Suspension (Nonprocurement), regarding debarment and suspension are applicable to this program.

(g) *Intergovernmental review of Federal programs.* (1) This program is subject to the requirements of Executive Order 12372, Intergovernmental Review of Federal Programs (3 CFR, 1982 Comp., p. 197) and 7 CFR part 3015, Subpart V, Intergovernmental Review of Department of Agriculture Programs and Activities, which implements Executive Order 12372.

(2) With the exception of zero-interest loans and grants for project feasibility studies, proposed projects are subject to the state and local government review process set forth in 7 CFR part 3015. Under the review process, state and local governments have 60 days to comment on the proposed project.

(3) The Administrator will not give final approval to an application until the requirements of 7 CFR part 3015, subpart V, regarding state and local government review have been satisfied.

(h) *Restrictions on lobbying.* (1) The restrictions and requirements imposed by 31 U.S.C. 1352, entitled "Limitation on Use of Appropriated Funds to Influence Certain Federal Contracting and Financial Transactions" and the implementing regulation, 7 CFR Part 3018, New Restrictions on Lobbying, are applicable to this program.

(2) The regulation that implements this statute requires applicants for a zero-interest loan in excess of $150,000 and applicants for a grant in excess of $100,000 to file a certification statement regarding the use of Federal appropriated funds to lobby the Executive and Legislative branches of the Federal Government, and to file a disclosure form if engaged in these activities using unappropriated funds.

(3) In addition, persons that receive contracts or subcontracts in excess of $150,000 under a zero-interest loan and persons that receive subgrants, contracts or subcontracts in excess of $100,000 under a grant are required to file certification statements regarding lobbying the Executive and Legislative branches and, if engaged in these activities, to file disclosure forms.

§ 1703.34 Applications.

(a) Borrowers may file an application on any official workday during the first 14 days of every month. A borrower must send a copy of the application, except for an application that requests a zero-interest loan or grant for project feasibility studies, to the state single point of contact for state and local governments at the same time it submits the application to REA. As discussed in § 1703.33(g), state and local governments have 60 days to review a borrower's proposal before the Administrator gives final approval to an application, except a proposal for project feasibility studies. The Administrator may establish a special application period if determined necessary.

(b) A completed application will consist of an original and two copies of:

(1) *An application form.* The application must include a completed application form, "Application for Federal Assistance," Standard Form 424;

(2) *A board resolution.* The application must include a board resolution that:

(i) Requests a zero-interest loan and/or grant, including the amount of the zero-interest loan and/or the amount of the grant rounded to the nearest 1,000 dollars;

(ii) Includes the total combined deferment and repayment period requested for a zero-interest loan if less than 10 years;

(iii) Includes the board's endorsement of the proposed rural economic development project as described in the application;

(iv) States the proposed project does not violate § 1703.20 and § 1703.21; and discloses any information regarding a conflict of interest, potential conflict of interest, or appearance of a conflict of interest that would allow the Administrator to make an informed decision;

(v) Authorizes an official of the borrower to requisition zero-interest loan or grant funds under this program;

(vi) For an application for a grant only, authorizes the chief executive officer of the borrower to execute and deliver on behalf of the borrower the certification Form AD-1049 regarding a drug-free workplace program as required in part 3017, subpart F of this title; and

(vii) Any other matters deemed necessary by the Administrator;

(3) *Miscellaneous Federal forms.* The application must include the following completed forms:

(i) Form AD-1047, "Certification Regarding Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions," as required in part 3015, subparts A through E of this title; and

(ii) Assurance statement or certification statement required under the Uniform Act as set forth in § 1703.33(d). For pass-through-loans and pass-through-grants, the ultimate recipient of the proceeds of the REA zero-interest loan or grant must sign the assurance statement that it will comply with the applicable provisions of the Uniform Act or sign a certification that the provisions of the Uniform Act will not apply to the rural development project which will be partially financed with the proceeds of REA funds. If the borrower will not provide a pass-through-loan or pass-through-grant to another entity, the borrower must submit a completed assurance statement or certification regarding the applicable provisions of the Uniform Act, or have such an assurance statement on file at REA;

(4) *Contingent certifications and disclosures.* As determined by the type and amount of requested funds, the application must include the following completed forms:

(i) For an application for a zero-interest loan in excess of $150,000 or for an application for a grant in excess of $100,000, a certification statement, "Certification Regarding Lobbying," and, if the borrower is engaged in lobbying activities described under § 1703.33(h), a completed disclosure form, "Disclosure of Lobbying Activities"; and

(ii) For an application for a grant only, a completed certification form, "Certification Regarding Drug-Free Workplace Requirements (Grants)," Form AD-1049 as required in part 3017, subpart F of this title;

(5) *Other requirements.* The following:

(i) A section entitled "Selection Factors" as set forth in § 1703.35;

(ii) A section entitled "Project Description" as set forth in § 1703.36; and

(iii) Except for applications for project feasibility studies, a section entitled "Environmental Impact of the Project" as set forth in § 1703.37.

(c) The Administrator may request additional information it considers relevant from the borrower.

(d) During the application review process, the borrower may change the amount of the zero-interest loan or grant funds requested or other portions of its application, only if approved by the Administrator. A borrower that changes its request from a grant to a zero-interest loan must submit information necessary for the Administrator to evaluate a loan proposal as set forth in this subsection, and submit a new board resolution requesting the loan.

(The information collection requirements contained in paragraph (b) of this section were approved by the Office of Management and Budget under control number 0572-0080)

§ 1703.35 Section of the application covering the selection factors.

The application must contain a section addressing the "selection factors" consisting of the following:

(a) "Nature of the project" (§ 1703.46(g)(1)), which includes any information considered appropriate including aspects of the project that may not be obvious to an outside observer;

(b) "Job creation project" (§ 1703.46(g)(2)), which includes any information that is not readily apparent concerning whether the project would directly create jobs in rural areas. The number of the jobs and the basis for the job projection should be included under "Number of long-term jobs";

(c) "Long-term improvements in economic development" (§ 1703.46(g)(3)), which addresses the extent to which the project will improve the productive potential of the labor force, industrial plant, infrastructure, natural resources and institutions by employing advanced technology, creating higher-skilled occupations, adding higher value to natural resources, creating jobs with higher-career potential, or is considered part of a knowledge intensive industry;

(d) "Diversifying the rural economy or alleviating underemployment" (§ 1703.46(g)(4)), which includes any information the borrower desires the Administrator to consider;

(e) "Supplemental funds" (§ 1703.46(h)(1)), which includes the name of each source and the respective amount of supplemental funds that was provided to the project within 6 months of submitting the application to REA, and the amount that will be provided within two years of receiving REA funds. Also indicate the nature and strength of the commitments to make these supplemental funds available, when these funds are expected to be disbursed, any special terms and conditions associated with the commitments, copies of the commitments, and, if established, the interest rate, term and deferment period on any loan for the project;

(f) "Economic conditions and job creation" (§ 1703.46(h)(2)), which includes:

(1) "Unemployment rates" (§ 1703.46(h)(2)(i)). List the county or counties in which the project will be located. It is not necessary to include the county, state or national unemployment rates. REA obtains these rates from other Federal agencies;

(2) "Per capita personal income" (§ 1703.46(h)(2)(ii)). As with "Unemployment rates," it is not necessary to include the county, state or national per capita personal income levels;

(3) "Change in population" (§ 1703.46(h)(2)(iii)). It is not necessary to include the county population levels;

(4) "Number of long-term jobs" (§ 1703.46(h)(2)(iv)). Include the number of long-term jobs that the project will directly create in rural areas and the total project cost;

(5) "Community-based economic development program" (§ 1703.46(h)(2)(v)). Explain if the project is part of a community-based economic development program; and

(6) "Plan for improving the marketable skills of people in rural areas" (§ 1703.46(h)(2)(vi)). Include information on any written plan for the project to provide opportunities or incentives to improve the marketable skills of rural residents through training and/or education. For projects that consist of providing training or education, indicate how it will benefit rural residents;

(g) "Location" (§ 1703.46(h)(3)), which indicates whether or not the project will be located in a town and, if so, the name of the town;

(h) "Support for the program—cushion of credit payments" (§ 1703.46(h)(4)), which mentions any cushion of credits payments made recently in accounts at REA;

(i) "Demonstration project" (§ 1703.46(h)(5)), which includes a discussion of any commitments from the owner(s) of the project to be a demonstration project and a copy of the written commitment;

(j) "Probability of success" (§ 1703.46(h)(6)), which includes:

(1) "Owners and management of the project" (§ 1703.46(h)(6)(i)) that discusses how the knowledge, experience, education and training of the proposed owners and management of the project increases the likelihood of long-term success; and

(2) "Ultimate recipient's business plan" (§ 1703.46(h)(6)(ii)), that references an attached copy of the business plan.

(i) The plan should include:

(A) A description of the project;

(B) A description of the business, if applicable, its products and the prospects of the industry;

(C) What will be produced or accomplished;

(D) The area to be served;

(E) Any market research or marketing plan;

(F) Any operating plan;

(G) Total project costs and projected use of funds by purpose or category;

(H) A financial plan, including a feasibility study with projected balance sheets, income statements and cash flow statements;

(I) The source of supplemental funds, the nature and strength of commitments from other sources of financing, and the equity contribution;

(J) The proposed ownership and management of the project;

(K) A description of any coordination with a local, regional or state development organization; and

(L) Other relevant information.

(ii) The scope of the plan should reflect the amount requested in the application, the risks involved with developing and operating the project, and the overall cost of the project. The plan should describe any coordination with a local, regional or state development organization.

§ 1703.36 Section of the application covering the project description.

In general, this section should be more detailed the larger the project for which the borrower is requesting funding. The section of the application on the "project description" must include:

(a) A description of the proposed project including the nature of the project, the location of the project, organizations that will be involved in the project and the primary beneficiaries of the project. Also include in this subsection a statement describing

whether the borrower has or will have a direct or indirect (through a subsidiary or affiliated organization) ownership or similar beneficial interest in the facilities to be constructed or in the entity that will occupy or utilize these facilities. In addition, explain whether it seems likely that the proposed project will be undertaken or completed in the absence of an REA zero-interest loan or grant;

(b) A separate paragraph entitled "Uses of REA Funds and Total Project Costs", that includes a breakdown of the specific uses of REA funds and a breakdown of the specific uses of all funds necessary to ensure completion of the project. Project costs should be limited to the amount to be spent over the 2-year period after receiving REA funds;

(c) For a project that involves the establishment of a new venture, such as a rural business incubator or a similar start-up venture, a discussion of how the costs of establishing, organizing and arranging financing for the venture will be paid, how start-up costs incurred after the venture has been established will be paid, the expected sources of revenue necessary to sustain the project and revenue and expense projections for the first 3 years of the project;

(d) If the borrower will provide a pass-through-loan or pass-through-grant to another entity, outline the terms and conditions that the borrower intends to place on the recipient of the REA funds including the security arrangements and collateral on a zero-interest loan. The discussion of proposed security arrangements and collateral should reflect the amount requested in the application, the risks involved with developing and operating the project, and the overall cost of the project;

(e) For pass-through-loans and pass-through-grants, a description of the ultimate recipient, including the form of organization and ownership (i.e., corporation, nonprofit corporation, cooperative, partnership, sole proprietor), the owner(s) and the chief officers;

(f) If the project involves construction, a brief description of the construction necessary to make the project operational and the organization involved with the project that will be responsible for building the project facilities or having them built;

(g) A discussion of the manner in which the borrower intends to monitor the zero-interest loan and/or grant proceeds to ensure that they are used only for approved purposes; and

(h) If applicable, a discussion on any potential conflict of interest or the appearance of a conflict of interest, a clarification of any aspect of the project with respect to the restriction that it must not result primarily in the transfer of any existing employment or business activity from one area to another or a clarification of any aspect of the project with respect to limitations in § 1703.20 and § 1703.21.

§ 1703.37 Section of the application covering the environmental impact of the project.

(a) For a proposed project that only involves internal modifications or equipment additions to buildings or other structures (for example; relocating interior walls or adding computer facilities) and/or external changes or additions to existing buildings, structures or facilities requiring physical disturbance of less than 0.4 hectare (0.99 acre), the environmental information normally required is:

(1) A copy of a flood hazard zone map from the Federal Emergency Management Agency with the location of the project site marked;

(2) A statement of whether or not the proposed project will be located within an area protected under the Coastal Barrier Resources Act (16 U.S.C. 3501 *et seq.*);

(3) A description of the internal modifications or equipment additions, and the external changes or additions to existing buildings, structures or facilities being proposed, the size of the site in hectares, and the general nature of the proposed use of the facilities once the project is completed, including any hazardous materials to be used, created or discharged, any substantial amount of air emissions, wastewater discharge, or solid waste that will be generated; and

(4) A statement of whether the project site contains or is near a property listed or eligible for listing in the National Register of Historic Places (16 U.S.C. 470).

(b) For all other proposed projects include:

(1) A copy of a flood hazard zone map from the Federal Emergency Management Agency with the location of the project site marked (42 U.S.C. 4001 *et seq.*);

(2) A diagram showing the general layout of the proposed facilities on the project site;

(3) The size of the project site in hectares;

(4) A map (preferably a U.S. Geological Survey map) of the project area indicating the boundaries of the project;

(5) A statement of whether or not the project will be located within an area protected under the Coastal Barrier Resources Act;

(6) The amount of property to be cleared, excavated, fenced or otherwise disturbed by the project;

(7) The current land use and zoning of the project site and any vegetation on the project site;

(8) A description of buildings or other major structures, including dimensions, to be constructed or modified;

(9) A statement of whether the presence of wetlands or existing agricultural operations are present at the project site (7 CFR part 1794); whether properties listed or eligible for listing in the National Register of Historic Places are on or near the project site; whether threatened or endangered species or critical habitat are on or near the project site (16 U.S.C. 1531 *et seq.*);

(10) The general nature of the proposed use of the facilities once the project is completed, including any hazardous materials to be used, created or discharged, any substantial amount of air emissions, wastewater discharge, or solid waste that will be generated (7 CFR part 1794); and

(11) A copy of any environmental review, study, assessment, report or other document that has been prepared in connection with obtaining permits, approvals or other financing for the proposed project from state, local or other Federal agencies. Such material, to the extent relevant, may be used to fulfill the requirements of this section.

(c) The Administrator may request additional environmental information in specific cases to satisfy § 1703.32.

§§ 1703.38—1703.44 [Reserved]

§ 1703.45 Review and analysis of applications.

Completed applications received at REA by the 14th day of the month will be considered at the first selection date which occurs at least 40 days after the application was received. Completed applications received at REA after the 14th day of a month will be either be held for the next application period or returned to the borrower, at the borrower's option. The review period of at least 40 days should allow sufficient time for state and local governments to review the proposed projects under the intergovernmental review process, as set forth in 7 CFR part 3015, and to provide sufficient time for the Administrator to fully review and analyze these applications. In the event state and local government review has not been completed, the Administrator's approval may be contingent upon the review being satisfactorily documented. The Administrator reserves the

discretion to consider applications outside the normal selection period.

§ 1703.46 Documenting the evaluation and selection of applications for zero-interest loans and grants.

(a) The Administrator will only consider for selection applications that request funds for uses set forth in § 1703.17 and are not ineligible under § 1703.20, as determined by the Administrator. The Administrator will not consider applications that do not conform with all of the provisions of this subpart, as determined by the Administrator. The Administrator will make the determination of all numbers, dollars, levels and rates, as well as the nature, costs, location and other characteristics of the proposed project, to calculate the number of points assigned to an application for each selection factor. Applications for zero-interest loans and grants will be ranked separately. In addition, applications requesting less than 5 percent of the total project costs as provided in § 1703.25 will be ranked separately, subject to § 1703.46(k). The Administrator will select applications that receive the greatest number of total points under paragraphs (g) and (h) of this section, subject to available funds and the provisions of § § 1703.25, 1703.46(j), and 1703.46(k).

(b) After reviewing an application, the Administrator may decline to select an application:

(1) That would result in a conflict of interest or the appearance of a conflict of interest;

(2) Based on the management and financial situation of the borrower applying for the zero-interest loan or grant. In determining the borrower's financial situation, the Administrator will consider, among other things, the borrower's existing and projected cash flows, equity to asset ratios, times interest earned ratios, debt service coverage ratios, the level of its investments, the level of its cash and other liquid assets, its working capital and repayment of its debts;

(3) Based on a determination that limitations under state laws will lessen the likelihood of repayment of the REA zero-interest loan in the event that the borrower does not receive funds from the project necessary to cover the REA zero-interest loan payments;

(4) Based on the unwillingness of the borrower applying for the zero-interest loan or grant to exercise diligence in repaying REA loans or loan guarantees, and comply with REA's legal documents and regulations;

(5) For an otherwise eligible project when any of the revenues of the project are derived from a legalized gambling activity; or

(6) For any illegal activity.

(c) (1) The Administrator will first evaluate the application and the project with respect to the three factors in this paragraph. The Administrator will not select applications requesting funds for projects that in the Administrator's best judgment have a low probability of:

(i) Being a viable business or operation;

(ii) Being successful as measured by long-term job creation or retention; and

(iii) Producing long-term economic development in rural areas.

(2) The Administrator's determination in paragraph (c) of this section will be based on the ultimate recipient's feasibility studies, income statements, cash flow statements, existing and projected balance sheets, market research, job creation potential, industry trends, and current economic conditions given the nature of the project. Long-term job creation and economic development in rural areas as used for this factor will mean jobs or economic development that would generally be expected to last at least five years.

(d) The Administrator will not award points under the selection factors in paragraphs (g) and (h) of this section for applications that:

(1) Involve the purchase land that will not be developed or used as a site for a project structure during the current phase of the project, as determined by the Administrator;

(2) Will be used for residential purposes or entertainment purposes at the residential level, such as residential dwellings and land sites, facilities to provide entertainment television, or personal, non-business related vehicle(s); however, nursing homes providing medical care, as determined by the Administrator, will not be considered to be residential dwellings;

(3) Will be used primarily to finance the purchase of an established business or operation rather than for economic development in rural areas or job creation purposes; or

(4) Will be used primarily to transfer property or real estate between owners without making any improvements or additions that will promote economic development in rural areas or job creation.

(e) Projects to provide recreational facilities must convincingly demonstrate that the project would be an integral part of a tourism industry in the community or region to receive points. The application must include support, such as regional studies, that shows the impact of the recreational facilities on the economy of the rural area. Projects that are intended to provide recreational facilities for the residents of an area would not receive points.

(f) After the above determinations, the Administrator will evaluate the applications and assign points with respect to the factors in paragraph (g) of this section. Applications evaluated under paragraph (g) of this section that do not receive at least 35 points or are not within the top 75 percent when all applications being assigned points are ranked from high to low by total number of points will not be evaluated with respect to the factors in paragraph (h) of this section. The only exception to this evaluation process would be the Administrator's determination that additional applications must be selected in accordance with § 1703.14. After such a determination, the remaining applications evaluated in paragraph (g) of this section will be also evaluated under the factors in paragraph (h) of this section.

(g) *Selection factors pertaining to the type of project.* The number of points assigned for each selection factor will be determined as follows:

(1) *Nature of the project.* The extent to which the nature of the project will promote economic development in rural areas and/or job creation—up to 50 points. The determination for this factor will be based on whether the project:

(i) Is considered a start-up, expansion, or enhancement of a business, a business incubator, an industrial building or park, infrastructure necessary to connect these types of projects to existing infrastructure, necessary for the development and operation of these types of projects, or, in the Administrator's determination, basic infrastructure necessary for successful businesses in the rural economy;

(ii) Will provide technical assistance to rural businesses or rural residents, train or educate rural residents, promote economic development in rural areas on a non-profit basis, or provide medical care to rural residents; and

(iii) Will succeed as envisioned in the application, and the possibility that the owners or operators may become delinquent on their loan payments.

(2) *Job creation project.* The extent to which the project will directly lead to job creation given the size of the project and the amount of REA funds requested or the project is necessary for job creation—up to 25 points. As part of the determination, the Administrator will consider whether the project will provide long-term employment for rural residents. For industrial parks, industrial buildings, and similar projects, the

Administrator will consider whether the application includes information on businesses or tenants that will occupy the building(s) and the nature and extent of the commitments to use the buildings in determining the number of points to award. The Administrator will also consider the probability that the project will not result in job creation as envisioned in the application in terms of both the number of jobs and the duration of the jobs.

(3) *Long-term improvements in economic development.* Projects that lead directly to an increase in long-term productivity and per capita income in rural areas—up to 25 points. The Administrator's determination will be based on the extent to which the project will improve the productive potential of the labor force, industrial plant, natural resources, institutions, and infrastructure necessary for economic development and job creation by utilizing advanced technology, creating higher skilled occupations, creating jobs with higher career potential or jobs that are considered part to be of a knowledge intensive industry, or adding higher value to natural resources. In considering infrastructure projects, the Administrator will award points only for the facilities, such as water and sewer facilities, that will serve and are necessary for commercial activities described under this factor.

(4) *Diversifying the rural economy or alleviating underemployment.* Projects that in the judgement of the Administrator will diversify the rural economic base or assist in alleviating chronic underemployment for rural residents—10 points. The Administrator will assign points only to the extent the application contains convincing evidence pertaining to this factor.

(h) *Other selection factors.* The number of points assigned for each selection factor will be determined as follows:

(1) *Supplemental funds.* (i) A determination of the amount of supplemental funds provided or to be provided to the project from the project owner in the form of equity funds, private sources, state and local government sources, other Federal Government sources, the borrower or other sources of funds. The supplemental funds used in this calculation must be disbursed to the project during the period covering six months prior to the receipt of the application by REA and two years after the first advance of REA funds for the project. Supplemental funds must be committed to the project before REA will advance its funds. REA loan or grant funds from the borrower or REA loan or grant funds from any other organization will not be included in the calculations. The Administrator will determine what constitutes expenditures on the project. If supplemental funds as a percentage of the REA zero-interest loan and/or grant to be provided to the project is:

(A) Equal to 20%—10 points, the minimum number of points;

(B) Equal to 100%—20 points;

(C) Equal to 500%—30 points, the maximum number of points.

(ii) Ratios of supplemental funds to REA funds falling between these levels will be assigned points based on a straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1.

(2) *Economic conditions and job creation.* (i) A comparison will be made of the unemployment rate in the county where the project will be located to the state and national unemployment rates.

(A) If the unemployment rate in the county where the project will be located exceeds the National unemployment rate by 30 percent or more—10 points, the maximum number of points awarded.

(B) If the unemployment rate in the county where the project will be located is equal to the National unemployment rate—5 points.

(C) If the unemployment rate in the county where the project will be located is equal to or less than 75 percent of the National unemployment rate—0 points.

(D) If the unemployment rate in the county where the project will be located exceeds the state unemployment rate by 30 percent or more—8 points, the maximum number of points awarded.

(E) If the unemployment rate in the county where the project will be located is equal to the state unemployment rate—4 points.

(F) If the unemployment rate in the county where the project will be located is equal to or less than 75 percent of the state unemployment rate—0 points.

(G) For both the state and national unemployment rate calculations, rates falling between the levels will be assigned points based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1. If the project will be located in several counties, the Administrator will use a simple average (mean) of the counties for the comparison. The Administrator will use the average of the most recent twelve months of unemployment rates it has obtained from the Bureau of Labor Statistics, U.S. Department of Labor or other government sources and processed into a suitable format.

(ii) A comparison will be made of the per capita personal income in the county where the project will be located to the state and national per capita personal income levels.

(A) If the per capita personal income level in the county where the project will be located is less than or equal to 90 percent of the National per capita personal income level—10 points, the maximum number of points awarded.

(B) If the per capita personal income level in the county where the project will be located is equal to the National per capita personal income level—5 points.

(C) If the per capita personal income level in the county where the project will be located exceeds the National per capita personal income level by 15 percent or more—0 points.

(D) If the per capita personal income level in the county where the project will be located is less than or equal to 90 percent of the state per capita personal income level—8 points, the maximum number of points awarded.

(E) If the per capita personal income level in the county where the project will be located is equal to the state per capita personal income level—4 points.

(F) If the per capita personal income level in the county where the project will be located exceeds the state per capita personal income level by 15 percent or more—0 points.

(G) For both the state and national per capita personal income calculations, incomes falling between the levels will be assigned points based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1. If the project will be located in several counties, the Administrator will use a simple average (mean) of the counties for the comparison. The Administrator will use the most recent annual per capita personal income levels it has obtained from the Bureau of Economic Analysis, U.S. Department of Commerce or other government sources and processed into a suitable format.

(iii) A calculation will be made of the change in total population over the most recent two-year period in the county where the project will be located. The population change will be the based on the total percentage change over the two-year period calculated as follows: the population for the most recent year less the population as of two years prior to that year with the difference being divided by the population as of two years prior to the most recent year.

(A) If the percentage growth over the two-year period is negative 2.00 percent or higher negative amount (a population decline)—8 points, the maximum number of points.

(B) If the percentage growth over the two-year period is equal to zero or is positive (population increase)—0 points.

(C) Population growth percentages falling between these levels will be assigned points based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1. If the project will be located in several counties, the Administrator will use a simple average (mean) of the counties for the comparison. The Administrator will use the most recent population data for all counties it has obtained from the Bureau of Economic Analysis, U.S. Department of Commerce or other government sources and processed into a suitable format. The data provide one population figure for the year.

(iv) The number of long-term jobs that the project will directly create in rural areas.

(A) For five or more direct long-term jobs per $100,000 of total project costs—15 points, the maximum number of points awarded.

(B) For two direct long-term jobs per $100,000 of total project costs—8 points.

(C) For no direct long-term jobs—0 points.

(D) Direct, long-term jobs under this factor are jobs that would generally be expected to last at least five years. Long-term jobs that would provide 6 months per year of equivalent full-time employment will be counted under this factor. Long-term jobs that would provide fewer months of employment would be given points based on the ratio of the number of months per year of employment to 12 months. Jobs of at least 20 hours per week will be counted under this factor. For construction of an industrial building, extension of water and/or sewer lines to a building, or a similar project, the Administrator will require a reasonable analysis of the number of jobs that will be created before awarding points for this factor. The Administrator reserves the right to adjust the number based on its analysis of the project, the explanation in the application of the businesses that will locate in the building(s), and any commitments from businesses to locate in the building(s). This factor will not count indirect job creation that results from an overall increase in the local economy once the project is completed. If total project costs per job falls between these levels, points will be assigned based on straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1.

(v) Projects that are part of a local, community-based rural economic development program that would improve the local economy and enhance the well-being of rural residents—10 points. The determination will be based on information submitted by the borrower in its application and other information the Administrator considers appropriate.

(vi) Projects that have a written plan to provide opportunities or incentives to improve marketable skills for rural residents through training and/or education, or projects which consist of providing this training and/or education—5 points.

(3) *Location.* Projects that will be physically in a rural area—20 points.

(4) *Support for program—cushion of credit payments.* (i) Applications submitted by borrowers that have made cushion of credit payments as set forth in section 313 of the Act based on the following:

(A) If the borrower has $300,000 or three percent of total assets, whichever is less, in cushion of credit payments—15 points;

(B) If the borrower has $100,000 or one percent of total assets, whichever is less, in cushion of credit payments—10 points;

(C) If the borrower has at least $5,000 or 0.5 percent of total assets, whichever is less, in cushion of credit payments—5 points.

(ii) The amount of cushion of credit payments will be based on the amount at the time the Administrator evaluates the project. The calculation of a borrower's total assets will be based on REA's most recently published Statistical Report, Rural Electric Borrowers (REA Informational Publication 201–1) or Statistical Report, Rural Telephone Borrowers (REA Informational Publication 300–4). These publications are available from the Rural Electrification Administration, Administrative Services Division, Washington, DC, 20250. If the amount of cushion of credits payments falls between these levels, points will be based on a straight-line interpolation calculated to the nearest whole point. The result will be rounded based on the standard convention of a fraction of 1/2 or greater equals 1.

(5) *Demonstration project.* If the application contains a written commitment from the owner(s) of the project that the project will be a demonstration project—5 points.

(6) *Probability of Success.* (i) The knowledge, experience, education and training of the proposed owners and management of the project—up to 10 points.

(ii) The ultimate recipient's business plan and indications that the project will successfully result in economic development in rural areas and/or job creation—up to 40 points. The Administrator's evaluation of the success of the project will be based on indications in the application and REA's analysis that the project will be a viable business or operation, be successful in creating or retaining long-term jobs, and be successful in producing economic development that will result in long-term benefits to rural areas. The plan should include:

(A) A description of the project;

(B) A description of the business, if applicable, its products and the prospects of the industry;

(C) What will be produced or accomplished;

(D) The area to be served;

(E) Any market research or marketing plan;

(F) Any operating plan;

(G) Total project costs and projected use of funds by purpose or category;

(H) A financial plan, including a feasibility study with projected balance sheets, income statements and cash flow statements;

(I) The source of supplemental funds, the nature and strength of commitments from other sources of financing, and the equity contribution;

(J) The proposed ownership and management of the project;

(K) A description of any coordination with a local, regional or state development organization; and

(L) Other relevant information.

(iii) The Administrator expects the ultimate recipient's business plan referenced in paragraph (h)(6)(ii) of this section to be comparable to a plan normally submitted to a bank for long-term financing. In evaluating an application for this selection factor, the Administrator will consider the probability that the project will result in long-term economic development in rural areas and/or job creation as envisioned in the application.

(iv) Quality and completeness of borrower's initial application submitted to REA—up to 10 points. The Administrator's determination will be based on the completeness and quality of the application as measured by the additional information required from the borrower to complete the analysis.

(i) *Outline of selection factors.* The selection factors contained in

§ 1703.46(g) and § 1703.46(h) and the maximum number of points that may be assigned to each is listed below:

(1) *Nature of the project*—50 points;

(2) *Job creation project*—25 points;

(3) *Long-term improvements in economic development*—25 points;

(4) *Diversifying the rural economy or alleviating underemployment*—10 points;

(5) *Supplemental funds*—30 points;

(6) *Economic conditions and job creation:*

(i) *Unemployment rates*—18 points;

(ii) *Per capita personal income*—18 points;

(iii) *Change in population*—8 points;

(iv) *Number of long-term jobs*—15 points;

(v) *Community-based economic development program*—10 points;

(vi) *Plan for improving the marketable skills of people in rural areas*—5 points;

(7) *Location*—20 points;

(8) *Support for program*—cushion of credit payments—15 points;

(9) *Demonstration project*—5 points;

(10) *Probability of success:*

(i) *Owners and management of the project*—10 points;

(ii) *Ultimate recipient's business plan*—40 points; and

(iii) *Completeness of borrower's initial application*—10 points.

(j) Regardless of the number of points assigned to a borrower's application, the Administrator may:

(1) Limit the number of applications selected in any one state during any fiscal year to the ratio of borrowers in that state to the total number of borrowers multiplied by three, or ten percent of the total number selections that have been made during the current fiscal year, or ten, whichever is greatest. The number of borrowers will be determined as of the latest published REA statistical reports (Statistical Report, Rural Electric Borrowers, REA Informational Publication 201–1 and Statistical Report, Rural Telephone Borrowers, REA Informational Publication 300–4. These publications are available from the Rural Electrification Administration, Administrative Services Division, Washington, DC, 20250);

(2) Limit a borrower to one selected application during any selection period;

(3) Limit the number of applications selected for a particular project;

(4) Allocate available funds between applications from electric and telephone borrowers;

(5) Select an application receiving fewer points than another application if there are insufficient funds during a particular budget period to select the higher ranked application; except that the Administrator may ask the borrower that submitted the higher ranked application if it desires to reduce the amount of its application to the amount of funds available. The reduction may require additional supplemental funds to ensure a successful project. Based on information the borrower provides, the Administrator will re-analyze the project to ensure that the project will still be feasible with reduced funding; or

(6) Select the highest ranking applications for funds to finance projects that the Administrator classifies as project feasibility studies.

(k) During each selection period, the highest ranking application from among the applications requesting less than 5 percent of the total project costs as provided in § 1703.25 will be considered with the applications requesting 5 percent or more of total project costs.

(l) The Administrator reserves the right to use the region or data it considers most appropriate if "county" data are unavailable for a particular area.

§§ 1703.47—1703.57 [Reserved]

§ 1703.58 Post selection period.

(a) REA will inform a borrower whether the Administrator has selected its application. The advance of REA funds after the selection has occurred is contingent upon the borrower meeting any terms and conditions the Administrator determines are necessary. A borrower that submitted an application which was not selected will be asked to inform REA whether it desires to be reconsidered at a later date. The borrower may modify the application after it has been considered without resubmitting all the required material in an application, except if it changes the request from a grant to a zero-interest loan it must submit information necessary for the Administrator to evaluate a loan proposal as set forth in § 1703.35 and § 1703.36 and submit a new board resolution requesting a loan. If the borrower so desires, the Administrator will consider an application for up to one year after the date REA originally received the application. A borrower may submit new applications as often as it desires.

(b) During the period between the selection of the application and the execution of REA's legal documents, the borrower must inform the Administrator if the project is no longer viable or the borrower no longer desires a zero-interest loan or grant for the project. Upon a determination by the Administrator to that effect, the selected application will be considered cancelled.

(c) If an application has been selected and the nature of the project changes, as determined by the Administrator, the borrower may be required to submit a new application to REA for consideration. The selection may not be transferred to another project, as determined by the Administrator. At any time after the selection of an application, the Administrator may, upon a request from the borrower and receipt of any documentation the Administrator considers necessary, approve changes in the method of carrying out the purpose of the project as long as the overall purpose of the project remains the same, revise the amount of the zero-interest loan and/or grant, revise the loan maturity date and principal deferment period and make other adjustments. The Administrator may reduce the amount of the REA loan or grant to reflect reductions in the amount of supplemental funds to be provided to the project. For substantial reductions in amount of supplemental funds to be provided to the project, the Administrator may require the borrower to re-apply for the REA loan or grant funds.

(d) If state or local governments raise objections to a proposed project under the intergovernmental review process that are not resolved within three months of the Administrator's selection of the application, the Administrator may consider the selection of the application cancelled.

§ 1703.59 Final application processing and legal documents.

(a) After a borrower has submitted all information the Administrator determines is necessary for the selected application, REA will send the necessary legal documents to the borrower to execute and return to REA. The legal documents will include a letter of agreement and any legal documents the Administrator deems appropriate, including any loan agreements, notes, security instruments, certifications or legal opinions. The letter of agreement will, among other things, constitute the Administrator's approval of funds for the project subject to certain terms and conditions as determined by the Administrator, and include a project description, approved purposes of the zero-interest loan and/or grant, the maximum amount of zero-interest loan and/or grant, supplemental funds to be provided to the project and certain agreements or commitments the borrower proposed in its application.

(b) The Administrator has the discretion to include as an approved purpose the reimbursement of short-

term financing and expenditures that were used for costs incurred on the project in accordance with § 1703.20(a)(2).

(c) If the borrower fails to submit within one month from the date of the Administrator's selection of an application all of the information that the Administrator determines to be necessary for REA to prepare legal documents, the Administrator may consider the selection of the application cancelled.

§ 1703.60 [Reserved]

§ 1703.61 Disbursement of zero-interest loan and grant funds.

(a) REA will disburse zero-interest loan funds to the borrower which must disburse zero-interest loan proceeds to the project for approved purposes in accordance with the legal documents executed by the Administrator and the borrower and applicable REA regulations. The borrower must make payments on a zero-interest loan as set forth in the legal documents executed by the Administrator and the borrower.

(b) REA will disburse grant funds to the borrower which must disburse grant proceeds to the project for approved purposes in accordance with the provisions of 7 CFR part 3015 and 7 CFR part 3016, as appropriate, the legal documents executed by the Administrator and the borrower, and applicable REA regulations.

(c) If the borrower fails to satisfy all conditions, requirements, and terms prerequisite to the advance of zero-interest loan and/or grant funds as set forth in the letter of agreement or other REA legal documents within 120 days from the date the borrower signs the letter of agreement agreeing and accepting the conditions, requirements, and terms of the REA zero-interest loan and/or grant, or such later date as the Administrator may approve, the Administrator may rescind the zero-interest loan and/or grant commitment.

(d) During the period between the execution of REA's legal documents and the disbursement of funds, the borrower must provide the Administrator written notification if the project is no longer viable or the borrower no longer desires a zero-interest loan or grant for the project. After REA has received the borrower's notification, the Administrator will rescind the commitment.

(e) The borrower must return to REA all proceeds of the zero-interest loan and/or grant, including any interest earned on the funds being returned, which have not been lent or disbursed by the borrower for approved purposes during the six months following the advance of the loan or grant funds from REA to the borrower, or such later date as the Administrator may approve. If the project is under the control of the borrower, all proceeds of the zero-interest loan and/or grant must be returned to REA, including any interest earned on the funds being returned, which have not been expended by the borrower for approved purposes before the first anniversary of the date of the advance of the loan or grant funds from REA to the borrower, or such later date as the Administrator may approve. Authorization of any extension rests solely within the discretion of the Administrator.

§§ 1703.62—1703.65 [Reserved]

§ 1703.66 Review and other requirements.

(a) REA will review borrowers receiving zero-interest loans or grants, as necessary, to ensure that funds are expended for approved purposes. Borrowers receiving zero-interest loans or grants must monitor the project to the extent necessary to ensure that the project is in compliance with all applicable regulations, including ensuring that funds are expended for approved purposes. The borrower is responsible for ensuring that disbursements and expenditures of funds are properly supported with certifications, invoices, contracts, bills of sale, or any other forms of evidence determined appropriate by the Administrator and that such supporting material is available, at the borrower's premises, for review by the REA field accountant, borrower's certified public accountant, the Office of Inspector General, the General Accounting Office and any other accountant conducting an audit of the borrower's financial statements or this rural economic development program. Borrowers will be required to permit REA to inspect and copy its records and documents that pertain to the project.

(b) The borrower must require the recipient of a pass-through loan to provide an itemized list to the borrower that shows the expenditures made on the project for approved purposes, including a certification to that effect. The borrower will also require the recipient to attach invoices, receipts, bills of sale, and other evidence representing the items on the list of expenditures that at least total the amount of the REA zero-interest loan. REA's legal agreements will include the terms and conditions that the borrower must require in its agreement with the recipient of a pass-through loan covering the use and intended schedule of expenditures of the loan funds.

(c) REA's legal documents may require the borrower to include in its legal documents with the recipient of a pass-through loan or a pass-through-grant the requirement to expend the funds for approved purposes by a certain date specified in REA's legal documents or return to the borrower all funds that have not been expended by such date. The borrower must promptly return to REA all unexpended funds that the recipient returns to the borrower under the terms set forth in the legal documents executed between the Administrator and the borrower. The borrower may request an extension due to delays in the project. Authorization of any extension rests solely within the discretion of the Administrator.

(d) The legal documents executed between the borrower and the Administrator in connection with a zero-interest loan must contain provisions giving the Administrator discretionary rights and remedies in the event a borrower fails to comply with this subpart, other Federal regulations and statutes, or the terms, conditions and requirements of the executed legal documents. Regardless of any right or remedy that the Administrator chooses to assert, if the borrower uses any zero-interest loan funds other than for approved purposes, the borrower will be required to return to REA the amount used for unapproved purposes and it will be considered a prepayment on the REA note.

(e) Borrowers receiving zero-interest loans must have a financial report and general accounting of all zero-interest loan funds prepared in accordance with the provisions of 7 CFR Part 1773, REA Policy on Audits of electric and telephone borrowers.

(f) The borrower must promptly notify the Administrator in writing if another entity is in default on a pass-through-loan between the borrower and the entity.

(g) Grants provided under this program will be administered under and are subject to 7 CFR part 3015 and 7 CFR part 3016, as appropriate. The borrower that receives a grant will be subject to requirements under these regulations which cover, among other things, financial reporting, accounting records, budget controls, record retention and audits.

§§ 1703.67—1703.99 [Reserved]

Dated: September 16, 1992.

James B. Huff, Sr.,

Administrator.

BILLING CODE 3410-15-F

Animal and Plant Health Inspection Service

9 CFR Part 94

[Docket No. 91-197-2]

Change in Disease Status of Chile Because of Swine Vesicular Disease and Velogenic Viscerotropic Newcastle Disease

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations to add Chile to the lists of countries considered to be free of swine vesicular disease (SVD) and velogenic viscerotropic Newcastle disease (VVND). There has never been an outbreak of SVD in Chile, and there have been no cases of VVND in Chile since 1975. The change in the VVND status of Chile relieves certain prohibitions and restrictions on the importation into the United States, from Chile, of certain poultry and poultry products.

However, Chile is not free of hog cholera. Therefore, the importation from Chile of swine and fresh, chilled, and frozen meat from swine will continue to be prohibited because of this disease.

EFFECTIVE DATE: October 26, 1992.

FOR FURTHER INFORMATION CONTACT: Dr. Harvey A. Kryder, Chief Staff Veterinarian, Import-Export Products Staff, VS, APHIS, USDA, room 756–A, Federal Building, 6505 Bélcrest Road, Hyattsville, MD 20782, (301) 436–7885.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 94 (referred to below as the regulations) regulate, among other things, the importation into the United States of certain animals, meat, and animal products. These regulations are designed to prevent the introduction into the United States of certain animal diseases, including swine vesicular disease (SVD) and velogenic viscerotropic Newcastle disease (VVND).

SVD is an acute, highly infectious viral disease of swine. It is characterized by vesicular lesions and subsequently by erosions of the epithelium of the mouth, nares, snout, and feet.

VVND (also called exotic Newcastle disease) is an infectious and contagious virus disease affecting all species of poultry and birds. In poultry, the clinical evidence of the disease is severe respiratory distress, depression, and death in up to 100 percent of the poultry in infected flocks. Many birds, particularly of the psittacine families, may survive the acute infection. However, they still may shed the virus.

There have been no outbreaks of VVND in Chile since 1975, and there has never been an outbreak of SVD in Chile. This has been confirmed by the Office of International Epizootics (OIE), in which Chile maintains membership. The OIE reports any outbreaks of these and other diseases in member countries. We have determined that Chile has adequate controls to prevent the introduction and spread of VVND and SVD.

Chile has applied to the U.S. Department of Agriculture (USDA) to be recognized as free of VVND and SVD. The Animal and Plant Health Inspection Service (APHIS) has reviewed the documentation submitted by the Government of Chile in support of its request. A team of APHIS officials recently conducted an on-site evaluation of the animal health program in Chile in regard to the VVND and SVD situation in that country. The evaluation consisted of a review of the capability of the Chilean veterinary services, laboratory and diagnostic procedures, disease reporting and surveillance procedures, vaccination practices, and the administration of laws and regulations to insure against the introduction into Chile of VVND and SVD through the importation of animals, meat, and animal products.

On May 29, 1992, we published a proposal in the **Federal Register** (Docket No. 91-197, 57 FR 22669-22670) to declare Chile free of SVD and VVND. Comments on the proposed rule were required to be received on or before July 28, 1992. We did not receive any comments. Therefore, based on the rationale set forth in the proposal, we are adopting the provisions of the proposal as a final rule without change.

Section 94.12(a) of the regulations provides that SVD is considered to exist in all countries of the world except those listed in § 94.12(a). By adopting this final rule, we are adding Chile to this list.

Section 94.6(a)(1) of the regulations provides that VVND is considered to exist in all countries of the world except those listed in § 94.6(a)(2), which are considered to be free of VVND. By adopting this final rule, we are adding Chile to this list.

By adopting this final rule, we also add Chile to the list of countries in § 94.13 and restrict importation of pork and pork products from Chile in accordance with § 94.13. Pork and pork products from countries listed in § 94.13 are subject to special restrictions because they either (1) supplement their national pork supply by importing fresh, chilled, or frozen pork from countries in which SVD is considered to exist; or (2) have a common border with countries in which SVD exists; or (3) have certain trade practices regarding imports from countries in which SVD is considered to exist that could result in commingling of fresh, chilled, and frozen meat from countries in which SVD is considered to exist and pork or pork products from the SVD-free country, presenting a possibility that products from a country with SVD could contaminate products exported to the United States from the SVD-free country.

Executive Order 12291 and Regulatory Flexibility Act

We are issuing this rule in conformance with Executive Order 12291, and we have determined that it is not a "major rule." Based on information compiled by the Department, we have determined that this rule will have an effect on the economy of less than $100 million; will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and will not cause a significant adverse effect on competition, employment, investment, productivity, innovation, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

This final rule eliminates the requirements of § 94.6 concerning VVND for carcasses and parts and products of carcasses of poultry, game birds, and other birds to be imported into the United States from Chile. Live poultry imported into the United States from Chile will continue to be subject to the restrictions of 9 CFR part 92, including the 30-day quarantine period required by § 92.209.

This final rule also eliminates the requirements of § 94.12 concerning SVD for pork and pork products to be imported from Chile. However, the pork and pork products from Chile will instead have to comply with the requirements of § 94.13. The importation of live swine and fresh, chilled, or frozen pork from Chile will continue to be prohibited in accordance with § § 94.9 and 94.10, due to the existence of hog cholera in Chile.

Based on available information, the Department does not anticipate a major increase in exports of live poultry or poultry products from Chile to the United States as a result of this final rule. Since Chile is already trading in international markets, it is unlikely to disrupt established trade relationships with traditional European trading partners by diverting a significant amount of its exports of live poultry or poultry products to the United States. Increases in imports of live poultry from Chile are also highly unlikely because of high transportation costs.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. By adopting this rule:

(1) All State and local laws, regulations, and policies that are in conflict with this rule will be preempted;

(2) No retroactive effect will be given to this rule; and

(3) It will not require administrative proceedings before parties may file suit in court challenging its provisions.

Paperwork Reduction Act

This final rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 94

Animal diseases, Imports, Livestock, Meat and meat products, Milk, Poultry and poultry products, Reporting and recordkeeping requirements.

Accordingly, 9 CFR part 94 is amended as follows:

PART 94—RINDERPEST, FOOT-AND-MOUTH DISEASE, FOWL PEST (FOWL PLAGUE), VELOGENIC VISCEROTROPIC NEWCASTLE DISEASE, AFRICAN SWINE FEVER, HOG CHOLERA, AND BOVINE SPONGIFORM ENCEPHALOPATHY: PROHIBITED AND RESTRICTED IMPORTATIONS

1. The authority citation for part 94 continues to read as follows:

Authority: 7 U.S.C. 147a; 150ee, 161, 162, 450; 19 U.S.C. 1306; 21 U.S.C. 111, 114a, 134a, 134b, 134c, and 134f; 31 U.S.C. 9701; 42 U.S.C. 4331, 4332; 7 CFR 2.17, 2.51, and 371.2(d).

2. The heading for part 94 is revised to read as set forth above.

§ 94.6 [Amended]

3. In § 94.6, paragraph (a)(2) is amended by adding "Chile," immediately after "Canada,".

§ 94.12 [Amended]

4. In § 94.12, paragraph (a) is amended by adding "Chile," immediately after "Central American countries,".

§ 94.13 [Amended]

5. In § 94.13, the first sentence of the introductory text is amended by adding "Chile," immediately after "Bulgaria,".

Done in Washington, DC, this 22 day of September, 1992.

Robert Melland,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410-34-F

FEDERAL TRADE COMMISSION

16 CFR Part 305

Rules for Using Energy Cost and Consumption Information Used in Labeling and Advertising of Consumer Appliances Under the Energy Policy and Conservation Act; Ranges of Comparability for Central Air Conditioners and Heat Pumps

AGENCY: Federal Trade Commission.

ACTION: Final rule.

SUMMARY: The Federal Trade Commission amends its Appliance Labeling Rule by publishing the ranges of comparability to be used on required labels for central air conditioners and heat pumps and by updating the annual national average cost figure for electricity to be used in the cost calculation formula required on fact sheets and in directories. These cost figures are for consumers to use to calculate their own heating and cooling costs.

EFFECTIVE DATE: December 24, 1992.

FOR FURTHER INFORMATION CONTACT: James Mills, Attorney, Division of Enforcement, Federal Trade Commission, Washington, DC 20580 (202–326–3035).

SUPPLEMENTARY INFORMATION: Section 324 of the Energy Policy and Conservation Act of 1975 (EPCA) [1] requires the Federal Trade Commission to consider labeling rules for the disclosure of estimated annual energy cost or alternative energy consumption information for at least thirteen categories of appliances. Central air conditioners (including heat pumps) are included as one of the categories. The statute also requires the Department of Energy ("DOE") to develop test procedures that measure how much energy the appliances use. In addition, DOE is required to determine the representative average cost a consumer pays for the different types of energy available.

On November 19, 1979, the Commission issued a final Rule covering seven of the thirteen appliance categories that were then covered by DOE test procedures: refrigerators and refrigerator-freezers, freezers, dishwashers, water heaters, clothes washers, room air conditioners and furnaces.[2]

On December 10, 1987 (52 FR 46888), the Commission amended the Appliance Labeling Rule by extending its coverage to central air conditioners and heat pumps. For these products, the Commission adopted a disclosure scheme that consists of labels showing simple energy efficiency and range information, together with a requirement to disclose further efficiency and cost information by means of either fact sheets or a listing in a general directory containing such information.

Section 305.8(b) of the rule requires manufacturers, after filing an initial report, to report annually by specified dates for each product type.[3] These

[1] Public Law 94–163, 89 Stat. 871 (Dec. 22, 1975).

[2] 44 FR 66466, 16 CFR part 305 (Nov. 19, 1979). The Statement of Basis and Purpose for the Final Rule describes the reasons the Commission declined to cover the other categories of covered products. *Id* at 66467–69.

[3] Reports for central air conditioners (including heat pumps) are due by July 1.

reports, which are to assist the Commission in preparing the ranges of comparability, contain the estimated annual cost or energy efficiency rating for the appliances derived from tests performed pursuant to the DOE test procedures. The reports also contain the model number, the number of tests performed on each model, and the capacity of each. Because the costs for the various types of energy change yearly, and because manufacturers regularly add new models to their lines, improve existing models and drop others, the data base from which the ranges of comparability are calculated is constantly changing. To keep the required information in line with these changes, the Commission is empowered, under § 305.10 of the rule, to publish new ranges (but not more often than annually) if an analysis of the new data indicates that the upper or lower limits of the ranges have changed by more than 15%. Otherwise, the Commission must publish a statement that the prior range or ranges remain in effect for the next year.

The annual reports for central air conditioners (including heat pumps) have been received and analyzed by the Commission. New ranges based upon them are herewith published.

In addition, this Notice provides an updated figure for the annual national average cost of electricity. This figure, along with national average cost figures for natural gas, propane, heating oil and kerosene, is published annually by the Department of Energy for the industry's use in calculating the cost figures required by the Commission's Rule. The cost figure for electricity must be used in the cost calculation formulas that appear in appendices H and I. These formulas must be provided on fact sheets and in directories so consumers can calculate their own costs of operation for the central air conditioners and heat pumps that they are considering purchasing. The updated figure, which DOE published on January 14, 1992 (57 FR 1461), and which the Commission published on February 20, 1992 (57 FR 6071), is 8.25 cents per kilowatt-hour. The formulas (and calculations) in both Appendices have been changed to reflect this.

In consideration of the foregoing, the Commission revises Appendices H (1) and (2) and I (1) and (2) of its Appliance Labeling Rule by publishing the following ranges of comparability and cost figures for use in the labeling and advertising of central air conditioners and heat pumps beginning December 24, 1992.

List of Subjects in 16 CFR Part 305

Advertising, Energy conservation, Household appliances, Labeling, Reporting and recordkeeping requirements.

PART 305—[AMENDED]

Accordingly, 16 CFR part 305 is amended as follows:

1. The authority citation for part 305 continues to read as follows:

Authority: Sec. 324 of the Energy Policy and Conservation Act (Pub. L. 94–163) (1975), as amended by the National Energy Conservation Policy Act (Pub. L. 95–619) (1978), the National Appliance Energy Conservation Act (Pub. L. 100–12) (1987), and the National Appliance Energy Conservation Amendments of 1988 (Pub. L. 100–357) (1988), 42 U.S.C. 6294; sec. 553 of the Administrative Procedure Act, 5 U.S.C. 553.

2. Appendix H of part 305 is amended by revising the chart on Range Information to read as follows:

* * * * *

APPENDIX H.—COOLING PERFORMANCE AND COST FOR CENTRAL AIR CONDITIONERS

[Range information]

Single package units	Range of EER's	
Manufacturer's rated cooling capacity (Btu's hr.)	Low	High
Central air conditioners (Cooling only): All capacities	5.60	12.50
Heat pumps (Cooling function): All capacities	8.00	12.10
Split system units	**Range of EER's**	
Manufacturer's rated cooling capacity (Btu's/hr.)	Low	High
Central air conditioners (Cooling only): All capacities	10.00	16.90
Heat pumps (Cooling function): All capacities	10.00	16.40

* * * * *

3. In section 2 "Yearly Cost Information" of appendix H of part 305, the text and formulas are amended by removing the figure "8.24¢" wherever it appears and by adding, in its place, the figure "8.25¢. In addition, the text and formulas are amended by removing the figure "12.36¢" wherever it appears and by adding, in its place, the figure "12.38¢".

4. Appendix I of part 305 is amended by revising the chart on Range Information to read as follows:

APPENDIX I.—HEATING PERFORMANCE AND COST FOR CENTRAL AIR CONDITIONERS

[Range information]

Single package units	Range of EER's	
Manufacturer's rated heating capacity (Btu's hr.)	Low	High
Heat pumps (Heating function): All capacities	5.65	7.35
Split system units	**Range of EER's**	
Manufacturer's rated heating capacity (Btu's/hr.)	Low	High
Heat pumps (Heating function): All capacities	6.80	10.20

The EER shall be the Region IV value based on the appropriate average design heat loss from the table below.

* * * * *

5. In section 2 "Yearly Heating Cost Information" of appendix I of part 305, the text and formulas are amended by removing the figure "8.24¢" wherever it appears and by adding, in its place, the figure "8.25". In addition, the text and formulas are amended by removing the figure "12.36¢" wherever it appears and by adding, in its place, the figure "12.38¢".

By direction of the Commission.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–M

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[T.D. 8438]

RIN 1545–AM49

Consolidated Return Regulations; Coordination With Section 833

AGENCY: Internal Revenue Service, Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations providing rules relating to the removal of the tax-exempt status of organizations described in section 833 of the Internal Revenue Code (relating to certain Blue Cross or Blue Shield organizations and certain other health insurers). The rules were needed because, as a result of the removal of tax-exempt status, such organizations are, for taxable years beginning after 1986, includible corporations under section 1504(b) of the Code.

EFFECTIVE DATE: The regulations are effective for taxable years beginning after December 31, 1986.

FOR FURTHER INFORMATION CONTACT: David B. Friedel, 202–622–7770 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Background

Section 1012 of the Tax Reform Act of 1986 denied, for taxable years beginning after December 31, 1986, tax-exempt status to certain organizations described in section 833(c) of the Internal Revenue Code ("section 833 organizations"), relating to certain Blue Cross or Blue Shield organizations and certain other health insurers. As a result, such organizations became includible corporations under section 1504(b) of the Code. Under § 1.1502–75(d)(1), as a result of a section 833 organization becoming the new common parent of an existing consolidated group ("old consolidated group"), the old consolidated group terminated and a new affiliated group with the section 833 organization as the new common parent was created.

There is no indication that Congress intended the termination of the old consolidated group and the creation of a new affiliated group as a consequence of the denial of tax-exempt status to section 833 organizations.Therefore, on September 14, 1988, the Service announced in Notice 88–107, 1988–2 C.B. 445, that it would promulgate regulations ameliorating the harsh results that would follow from the termination of the old groups.

On September 5, 1990, a notice of proposed rulemaking by cross-reference to temporary regulations adding section 1.1502–75T(d)(5) to part 1 of title 26 of the Code of Federal Regulations was published in the **Federal Register** (55 FR 36290). These regulations adopted a neutrality principle which was intended to preclude treating members of an old group better or worse by reason of the enactment of section 833.

One written comment responding to the proposed rules was received. No public hearing was requested or held. For the reasons set forth below, the proposed rules are adopted without modification.

The written comment objected to the application of the separate return limitation year rules to an old group which elected to be treated as remaining in existence with the section 833 organization as its new common parent. As explained in the explanation of provisions in the temporary regulations, T.D. 8310, 55 FR 36274 (September 5, 1990), the proposed regulations provided a modified rule under which a taxable year beginning before 1987 of a member of an old group that elected to remain in existence is not treated as a separate return limitation year with respect to the post-1986 taxable years of any corporation that was a member of the old group for each day of that taxable year.

Under this modified rule, pre-1987 losses may generally be carried forward to offset the post-1986 income of other members of the same old group, but those losses may not offset the post-1986 income of any other corporation, including the section 833 organization which became the group's new common parent. Thus, the loss carryover treatment of each corporation affiliated with the section 833 organization is generally unaffected by the enactment of section 833. The Service continues to believe that this rule is the proper rule under the neutrality principle.

Special Analyses

These final regulations are not major rules as defined in Executive Order 12291. Therefore, a Regulatory Impact Analysis is not required.

It is hereby certified that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations.

It is hereby certified that these rules do not have a significant impact on a substantial number of small entities. The rules will primarily affect consolidated groups, which tend to be larger businesses. The rules will not significantly alter the reporting or recordkeeping duties of small entities. Therefore, a final Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required.

Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking for the regulations was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on the impact of the rules on small businesses.

Drafting Information

The principal author of these regulations is David B. Friedel, of the Office of Assistant Chief Counsel (Corporate) within the Office of Chief Counsel, Internal Revenue Service. Other personnel of the Internal Revenue Service and the Treasury Department participated in developing the regulations.

List of Subjects

26 CFR §§ 1.1502–75 through 1.1502–100

Income taxes.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Paragraph 1. The authority citation for part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * * Section 1.1502–75T also issued under 26 U.S.C. 1502. * * *

§ 1.1502–75 [Amended]

Par. 2. Section 1.1502–75 is amended by adding and reserving paragraph (d)(4) and by redesignating section 1.1502–75T(d)(5) as section 1.1502–75(d)(5).

§ 1.1502–75T [Amended]

Par. 3. Section 1.1502–75T is amended by revising the section heading to read as set forth below and by removing paragraphs (c) and (d).

§ 1.1502–75T Temporary regulations for filing consolidated returns; coordination with section 338(h)(10) (Temporary).

BILLING CODE 4830–01–M

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

43 CFR Parts 3150 and 3160

[WO–610–4111–24–1A; Circular No. 2646]

RIN: 1004–AC02

Onshore Oil and Gas Geophysical Exploration; Onshore Oil and Gas Operations

AGENCY: Bureau of Land Management, Interior.

ACTION: Final rule.

SUMMARY: This final rule adds to the regulations on onshore oil and gas geophysical exploration a section governing appeals of decisions and approvals to allow decisions and approvals by an authorized officer to remain in full force and effect when an appeal is filed with the Interior Board of Land Appeal (IBLA), unless sufficient justification for a stay is provided. It

similarly amends the section in the regulations governing appeals of decisions and approvals relating to onshore oil and gas operations to allow the decision of a State Director or Administrative Law Judge to remain in full force and effect during the pendency of an appeal to IBLA. Such provisions are needed to allow the IBLA to determine whether the issues involved in an appeal warrant a stay of onshore oil and gas activities and the accompanying delays and economic consequences. Both full-force-and-effect rules apply to appeals to IBLA only. The rules do not affect the authority of the State Director to grant or deny a request for a stay while a decision is under State Director Review.

EFFECTIVE DATE: October 26, 1992.

ADDRESSES: Inquiries or suggestions should be sent to: Director (610) Bureau of Land Management, Room 501 L Street Building, 1849 C Street, NW., Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Erick Kaarlela, (202) 653–2127.

SUPPLEMENTARY INFORMATION: An interim final rule and a proposed rule with a 30-day comment period were published simultaneously in the **Federal Register** on March 13, 1992 (50 FR 9010 and 9014). The purpose of the proposed rule was to request public review and comment to aid the agency in determining whether or not to publish a subsequent and permanent final rule for the provisions, which would be effective prior to or concurrently with the December 31, 1992, expiration date of the interim final rule. This final rule will supersede the interim final rule upon the date that this rule becomes effective.

Part 3150 establishes procedures for conducting oil and gas geophysical exploration operations when authorization for such operations is required from the Bureau of Land Management (BLM). Part 3160 governs operations associated with the exploration, development, and production of oil and gas deposits from leases issued or approved by the United States. During the comment period, comments were received from 106 sources: 86 from business interests, primarily related to the oil industry; 14 from associations; and 6 from private attorneys. Most of the comments fully supported the proposal to allow decisions and approvals of the BLM authorized officer, State Director, or Administrative Law judge to remain in full force and effect during the pendency of an appeal to IBLA. Some comments, in addition to supporting the proposed rule, suggested specific revisions or recommendations. The comments and BLM's responses to them are discussed below.

Two comments suggested that *ad hoc* advocacy organizations be required by the IBLA to post a bond when requesting a stay in any case under an appeal, as is required by most State and Federal Courts for purposes of protecting the lessee's or permittee's interest during appeal. One other comment suggested that, in order to cover the cost of any economic hardship to the lessee or permittee, any third parties making an appeal should be required to provide a bond. The standards for obtaining a stay require third parties making an appeal to show justification for the stay. Therefore, bonding is not deemed to be necessary.

One comment suggested that the word "subpart" should be changed to "part" in the proposed rule at § 3150.2(b), sentence 2, to assure that the exemption from 43 CFR 4.21(a) includes all subparts of part 3150. Section 4.21(a) of title 43 is an automatic stay provision for decisions that do not fall into any excepting laws or regulations such as are created by this final rule. This comment has been adopted in the final rule for part 3150 and part 3160 in order to remove an unintended inconsistency between the first and second sentences in paragraph (b) and in paragraph (c) of § 3165.4.

One comment suggested that, in order to maintain consistency in the regulations governing IBLA appeals, similar provisions regarding the request for stay should be added to the regulations governing the State Director Review Process at § 3165.3 or that § 3165.3(b) and (d) be amended in the final rule to list specifically "approvals" of the authorized officer. For purposes of § 3165.3(b), "approvals" are encompassed within the meaning of the phrase "decision of the authorized officer." In § 3165.3(d), a State Director's affirmation or denial of an approval of the authorized officer is properly termed a decision. The stay request language is not necessary in § 3165.3 because the ability to grant a stay is inherent in a State Director's authority to conduct an administrative review and the reserved authority over subordinate authorized officers. The delegation of authority to an authorized officer under the jurisdiction of a State Office does not deprive the State Director of any reviewing authority. In addition, specific changes to sections in parts 3150 and 3160 that were not amended in the proposed rule would arguably require separate proposed rulemaking. Therefore, this suggestion was not incorporated in the final rule.

One comment suggested that the current rule at paragraphs 3165.3(e) (1) and (2) be rewritten to incorporate appeals of decisions and approvals of authorized officers that do not address compliance requirements, notices of violations, or penalties. The writer felt that this would maintain consistency with the proposed rule by allowing all decisions to remain in force pending appeal. Current paragraphs 3165.3(e) (1) and (2) specifically address the continuing full force and effect, during a period of State Director review, of notices of noncompliance, notices of violation, or proposed penalties and daily accumulations of penalties that were included in the regulations as a result of the enactment of the Federal Oil and Gas Royalty Management Act of 1982 (30 U.S.C. 1701). The suggestion that other types of decisions be added to these two provisions was not adopted in the final rule because a decision or approval normally goes into effect on the effective date of the decision or approval absent a postponement of its effectiveness by the authorized officer or a subsequent stay by the State Director.

Two comments suggested that proposed § 3165.4(c) should refer to decisions and approvals of "State Directors and Administrative Law Judges," rather than decisions and approvals of the "authorized officer." The comments pointed out that, unlike the parallel rule in part 3150 concerning geophysical decisions under which appeals on the merits of decisions and approvals are made directly to the IBLA under 43 CFR 4.21, decisions and approvals of authorized officers affecting the merits of oil and gas operations are appealable under § 3165.3(b) first to the State Director, rather than directly to the IBLA. Because the decisions and approvals of the authorized officer under part 3160 must first be reviewed by the State Director, this recommendation was adopted in the final rule for part 3160. The term "State Director or Administrative Law Judge" replaces the term "authorized officer" in the final rule.

One comment recommended that the rule be amended to include an exception for proposed oil or gas wells located in a Federal potash area or within close proximity to an underground mine to ensure that all safety issues are fully considered before a well is drilled. It is the policy of the BLM to include a provision in oil and gas leases which notifies oil and gas operators that wells may not be allowed in locations that may be hazardous to potash mining operations. Further, by Order of the

Secretary of the Interior, approval is denied for most applications for permits to drill oil and gas wells when wells would be located within potash enclaves. Therefore, provisions are already in place to protect Federal potash areas from oil and gas drilling operations and vice versa. The final rule does not adopt this recommendation.

Some comments reasoned that the proposed rule did not consider long-term impacts of oil and gas operations; that leasing decisions in some areas are made without benefit of environmental review or public input; that current procedures covering the BLM environmental analyses do not provide for meaningful public involvement, nor do those procedures provide an adequate forum for analysis of the true impacts of leasing decisions and that the Resource Management Plan (RMP) sets leasing boundaries without thoroughly examining the impacts of field development. The RMP consists of 9 action steps, including identifying the issues, developing planning criteria, inventorying and data collection, analyzing the management situation, formulating alternatives, analyzing effects of alternatives, selecting the preferred management plan, and monitoring and evaluation. National Environmental Policy Act (NEPA) analyses are made prior to BLM decisions or approvals authorizing oil and gas exploration, leasing, or operational activities. Public participation is encouraged throughout the process. Comments are routinely requested from all interested and affected parties during public scoping meetings, which are held before BLM planning and NEPA documents are initiated. Under usual circumstances, the public is then again requested to review and provide comments on the draft planning document. After the proposed planning document is published, a 30-day protest period is provided. If any protests are filed, administrative review is completed before the plan is approved.

One comment stated that the placement of decisions into immediate full force and effect would negate the purpose and efficacy of appeal procedures. On the contrary, however, the proposed rule in no way reduces public opportunity to file an appeal. In part 3160, two opportunities for appeal remain. A request for a formal review by the State Director is the first opportunity that an adversely affected party must exhaust before seeking further review by the IBLA. By virtue of the State Director's supervisory authority, the State Director has the inherent discretionary authority to review and overturn or modify, if necessary, the decision of subordinates. This inherent discretionary authority to exercise supervisory prerogatives allows the State Director to entertain requests for a stay or to stay the decision's effectiveness on his own initiative. Second, the State Director's decision may be appealed to the IBLA. Under part 3150, an authorized officer's decision may be appealed to the IBLA. Once again, in each case a stay may be requested with a sufficient showing of justification as is required by all Federal judicial bodies. The rule places a reasonable burden on the appellants to show clearly why a stay of approved exploratory or operational activity is warranted without taking away any substantive right of appeal. The rule serves to preserve the right to appeal while at the same time contemplating potential harm to permittees, licensees, lessees, or operators caused by an unwarranted stay.

If a State Director splits his decision into two parts by denying a stay requested by an adversely affected party before reaching a conclusion on the merits of the decision being reviewed under § 3165.3(b), the denial of the stay request constitutes a decision within the meaning of section 3165.4(a) and can be appealed to the IBLA pursuant to § 3165.4(a). The effect of an appeal of a denial of a stay request will be governed, like appeals of other decisions, by the revised § 3165.4(c). The lodging of an appeal of a stay denial will not automatically stay, under 43 CFR 4.21(a), the decision for which the adversely affected party sought a stay. Instead, the revised § 3165.4(c) gives the adversely affected party the opportunity to petition the IBLA for a stay in accordance with the four standards set out in § 3165.4(c). Because, in explaining the effect of appeals, the first sentence of § 3165.4(c) states that all decisions shall remain in effect pending appeal to IBLA, additional language has been added to § 3165.4(c) making it clear that a State Director retains his discretionary authority to grant a request for a stay or to stay on his own initiative the decision that he affirmed, overturned, or denied upon his review while the matter is being appealed to IBLA. If a request for a stay is denied at this stage of the appeals process, the clarifying language gives the adversely affected party the right to petition the IBLA for a stay by addressing the standards for obtaining a stay described in § 3165.4(c). In that instance, as well as with other instances under the rule, the IBLA will, as is provided in the first sentence of § 3165.4(c), base its decision to grant or deny a stay upon consideration of the standards set out in § 3165.4(c).

One comment expressed the concern that, in these situations where BLM has denied a stay, IBLA could not act on a petition for a stay absent having BLM's administrative record. To the contrary, these situations are comparable to a judicial proceeding involving a challenge to agency action in which the court is called upon to act on a motion for a temporary restraining order or a preliminary injunction without having the benefit of the agency's administrative record on the challenged action. Furthermore, 43 CFR 4.411(a) requires an adversely affected party filing an appeal with IBLA to notify the State Director of its appeal, and 43 CFR 4.413(a) requires the appellant to serve the statement of reasons for appeal filed with IBLA on the appropriate official in the Office of the Solicitor of the Department of the Interior representing the affected State Director. By virtue of these provisions, BLM will be notified of the appeal and the reasons that the appellant asserts as warranting a stay of the State Director's decision. If the State Director is concerned that the existence of the appeal or the reasons given by the appellant may lead the IBLA to grant a stay, he can, acting through the Office of the Solicitor, file an expedited response to rebut the appellant's assertions.

Because the revised § 3165.4(c) also concerns effects of an appeal from a decision subject to an appeal under § 3165.4(b), the additional language added in the final rule to § 3165.4(c) clarifies the right of an Administrative Law Judge or a State Director to stay decisions subject to appeal under § 3165.4(b) pending their appeal to IBLA. In addition, the final rule contains parallel language in § 3150.2(b) for decisions subject to appeal under § 3150.2(a).

Some comments stated that the BLM's responsibilities as a land managing agency charged with protection of public resources would be severely undermined by the rule, which the comment stated would elevate the interest of private enterprise over public values. This final rule does not negate BLM responsibility to protect the environment and/or public resources. The intent of the final rule is to attempt to balance the interests of potential appellants with the interests of other affected parties. Before making final decisions, BLM will continue to rely on and comply with requirements for coordination, public input, and environmental documentation in order

94-18-55. With this action, this proceeding is terminated.

EFFECTIVE DATE: November 5, 1992.

BILLING CODE 6712-01-M

47 CFR Part 73

Radio Broadcasting Services; Various Locations

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, on its own motion, amends the Table of FM Allotments to specify the correct classes of channels allotted to various communities. These amendments are necessary to reflect changes that have been authorized in response to applications filed by licensees and permittees operating on these channels. This action constitutes an editorial change in the Table of FM Allotments. Therefore, a public notice and comment proceeding is unnecessary. See 5 U.S.C. 553(b) (A) and (B). With this action, this proceeding is terminated.

FOR FURTHER INFORMATION CONTACT: Michael Ruger, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, adopted August 10, 1992, and released September 21, 1992. PART 73—[AMENDED]

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303.

§ 73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments under Arkansas, is amended by removing Channel 242C and adding Channel 242C1 at Blytheville, by removing Channel 275C and adding Channel 275C1 at Harrison, and by removing Channel 274C2 and adding Channel 274C3 at Van Buren.

3. Section 73.202(b), the Table of FM Allotments under Arizona, is amended by removing Channel 271C and adding Channel 271C1 at Clifton, by removing Channel 296C1 and adding Channel 296C3 at Colorado City, by removing Channels 260C1 and 290C and adding Channels 260C2 and 290C1 at Kingman, by removing Channel 266C and adding Channel 266C1 at Payson, by removing Channel 294C and adding Channel 294C1 at Pinetop, and by removing Channel 241C and adding Channel 241C1 at Window Rock.

4. Section 73.202(b), the Table of FM Allotments under California, is amended by removing Channel 222C and adding Channel 222C1 at Eureka, and by removing Channel 242C2 and adding Channel 242C3 at Susanville.

5. Section 73.202(b), the Table of FM Allotments under Colorado, is amended by removing Channel 289C2 and adding Channel 289C3 at Ouray.

6. Section 73.202(b), the FM Table of Allotments under Florida, is amended by removing Channels 254C and 258C and adding Channels 254C1 and 258C1 at Key West, and by removing Channel 223C and adding channel 223C1 at Panama City.

7. Section 73.202(b), the FM Table of Allotments under Hawaii, is amended by removing Channel 224C1 and adding Channel 224C3 at Hilo, and by removing Channel 268C and adding Channel 268C3 at Kealakekua.

8. Section 73.202(b), the FM Table of Allotments under Iowa, is amended by removing Channel 239C2 and adding Channel 239C3 at Webster City.

9. Section 73.202(b), the FM Table of Allotments under Idaho, is amended by removing Channel 223C and adding Channel 223A at Rupert.

10. Section 73.202(b), the FM Table of Allotments under Kansas, is amended by removing Channel 250C and adding Channel 250C1 at Colby, by removing Channel 273C and adding Channel 273C1 at Goodland, and by removing Channel 279C and adding Channel 279C1 at Wichita.

11. Section 73.202(b), the FM Table of Allotments under Kentucky, is amended by removing Channel 270C and adding Channel 270C1 at Central City, and by removing Channel 289B1 and adding Channel 289C3 at Greenup.

12. Section 73.202(b), the FM Table of Allotments under Louisiana, is amended by removing Channel 232C2 and adding Channel 232C3 at Galliano.

13. Section 73.202(b), the FM Table of Allotments under Maine, is amended by removing Channel 297B and adding Channel 297C2 at Old Town.

14. Section 73.202(b), the FM Table of Allotments under Michigan, is amended by removing Channel 242C and adding Channel 242C1 at Houghton, and by removing Channel 255C and adding Channel 255C1 at Petoskey.

15. Section 73.202(b), the FM Table of Allotments under Montana, is amended by removing Channel 269C and adding Channel 269C1 at Laurel.

16. Section 73.202(b), the FM Table of Allotments under North Dakota, is amended by removing Channel 300C and adding Channel 300C1 at Fargo.

17. Section 73.202(b), the FM Table of Allotments under New Mexico, is amended by removing Channel 281C and adding Channel 281C1 at Carlsbad, by removing Channel 265C2 and adding Channel 265A at Grants, and by removing Channel 263C and adding Channel 263C1 at Roswell.

18. Section 73.202(b), the FM Table of Allotments under New York, is amended by removing Channel 248C and adding Channel 248C1 at Watertown.

19. Section 73.202(b), the FM Table of Allotments under Oklahoma, is amended by removing Channel 291C2 and adding Channel 291C3 at Broken Bow, and by removing Channel 258C2 and adding Channel 258A at Lawton.

20. Section 73.202(b), the FM Table of Allotments under Oregon, is amended

by removing Channel 267C and adding Channel 267C1 at Altamont, by removing Channel 278C and adding Channel 278C1 at Medford, and by removing Channel 275C and adding Channel 275C1 at Redmond.

21. Section 73.202(b), the FM Table of Allotments under South Carolina, is amended by removing Channel 241C and adding Channel 241C1 at Hanahan.

22. Section 73.202(b), the FM Table of Allotments under Tennessee, is amended by removing Channel 283C and adding Channel 283C1 at Memphis.

23. Section 73.202(b), the FM Table of Allotments under Texas, is amended by removing Channel 286C and adding Channel 286C1 at Abilene, by removing Channels 245C and 270C and adding Channels 245C1 and 270C1 at Amarillo, by removing Channel 253C3 and adding Channel 253A at Clarksville, by removing Channel 240C3 and adding Channel 240A at Dalhart, by removing Channel 284C2 and adding Channel 284C3 at Llano, by removing Channel 291C2 and adding Channel 291C3 at Refugio, and by removing Channel 226C and adding Channel 226C1 at Tyler.

24. Section 73.202(b), the FM Table of Allotments under Washington, is amended by removing Channel 287C and adding Channel 287C1 at Edmonds, and by removing Channel 264C2 and adding Channel 264C3 at Walla.

25. Section 73.202(b), the FM Table of Allotments under Wisconsin, is amended by removing Channel 296C2 and adding Channel 296C3 at New Richmond.

26. Section 73.202(b), the FM Table of Allotments under Wyoming, is amended by removing Channel 225C and adding Channel 225C1 at Buffalo.

[MM Docket No. 89-416; RM-6700, RM-6858, RM-7207, RM-7208, RM-7209]

Radio Broadcasting Services; Metropolis, IL, Clinton and Wickliffe, KY; Camden, Dyer and Henderson, TN

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 252C2 for Channel 252A at Metropolis, Illinois, and modifies the license for Station WRIK(FM) accordingly; substitutes Channel 240A for Channel 252A at Camden, Tennessee, and modifies the license for Station WRJB(FM) to specify Channel 240A; and substitutes Channel 239A for Channel 240A at Henderson, Tennessee, modifies the license for Station WFKX(FM) to specify Channel 239A, at the request of Samuel K. Stratemeyer/Sun Media, Inc. In addition, this action also allots Channel 232A to Dyer, Tennessee, as a first local FM service. *See* 54 FR 40893, October 4, 1989, and Supplemental Information, *infra*.

DATES: Effective November 5, 1992. The window period for filing applications for Dyer, Tennessee, will open on November 6, 1992, and close on December 7, 1992.

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order MM Docket No. 89-416, adopted August 11, 1992, and released September 21, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW. Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1990 M Street, NW., suite 640, Washington, DC 20036.

Channel 252C2 can be allotted to Metropolis, Illinois, in compliance with the Commission's minimum distance separation requirements with a site restriction of 16.6 kilometers (10.3 miles) southeast. The coordinates are North Latitude 37-02-30 and West Longitude 88-36-00. Channel 240A can be allotted to Camden, Tennessee, in compliance with the Commission's minimum distance separation requirements and can be used at Station WRJB(FM)'s present transmitter site. The coordinates are North Latitude 36-03-25 and West Longitude 88-06-10. Channel 239A can be allotted to Henderson, Tennessee, in compliance with the Commission's minimum distance separation requirements and can be used at Station WFKX(FM)'s present transmitter site. The coordinates are North Latitude 35-29-52 and West Longitude 88-42-29. Channel 232A can be allotted to Dyer, Tennessee, in compliance with the Commission's minimum distance separation requirements with a site restriction of 8.5 kilometers (5.3 miles) northwest, at coordinates North Latitude 36-05-53 and West Longitude 89-04-41. With this action, this proceeding is terminated.

47 CFR Part 90

[PR Docket No. 89-552; DA 92-1234]

Use of the 220-222 MHz Band by the Private Land Mobile Radio Services

AGENCY: Federal Communications Commission.

ACTION: Technical amendment to final rule.

SUMMARY: The Commission has released a Second Erratum in PR Docket No. 89-552 (DA 92-1234). The purpose of the Second Erratum is to correct and clarify rule changes adopted in the Memorandum Opinion and Order in this proceeding. Certain of these rule changes were not consistent with the clear intention of the Commission expressed in the text of the Memorandum Opinion and Order. The rules relate to various procedures associated with the licensing of channels in the 220-222 MHz band.

EFFECTIVE DATE: October 20, 1992.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT: Marty Liebman, Private Radio Bureau, (202) 634-2443.

SUPPLEMENTARY INFORMATION: On April 17, 1991, the Commission released a Report and Order (FCC 91-74) in PR Docket No. 89-552. On July 16, 1992, the Commission released a Memorandum Opinion and Order (FCC 92-261), 57 FR

32448, July 22, 1992, addressing several issues raised on reconsideration of the Report and Order, as well as the issues presented in a Further Notice of Proposed Rule Making in this proceeding. On September 11, 1992, the Commission released a Second Erratum (DA 92-1234) correcting and clarifying rule changes adopted in the Memorandum Opinion and Order. The full text of this Second Erratum is available for inspection and copying during normal business hours in the FCC Dockets Branch, room 230, 1919 M St. NW., Washington, DC. The complete text may be purchased from the Commission's copy contractor, Downtown Copy Center, 1990 M St., NW., suite 640, Washington, DC 20036, telephone (202) 452-1422.

Amendatory Text

47 CFR part 90 is amended as follows:

1. The authority citation for part 90 continues to read as follows:

Authority: Sections 4, 303, 332, 48 Stat. 1066, 1082, as amended: 47 U.S.C. §§ 154, 303, and 332, unless otherwise noted.

2. 47 CFR 90.713 is amended by revising paragraphs (a)(4), (a)(5), (b), and (c)(3), and by adding a new paragraph (c)(4) to read as follows:

§ 90.713 Entry criteria.

(a) * * *

(4) Applicants for commercial nationwide channels must include an itemized estimate of the cost of constructing 40 percent of the system and operating the system during the first four years of the license term. Applicants for non-commercial nationwide channels must include an itemized estimate of the cost of constructing the entire system within five years and operating the system during the first five years of the license term.

(5) Applicants for commercial nationwide channels must include proof that the applicant has sufficient financial resources to construct 40 percent of the system and operate the proposed system for the first four years of the license term; i.e., that the applicant has net current assets sufficient to cover estimated costs or a firm financial commitment sufficient to cover estimated costs. Applicants for non-commercial nationwide channels must include proof that the applicant has sufficient financial resources to construct the entire system within five years of the license grant and operate the proposed system for the first five years of the license term; i.e., that the applicant has net current assets to cover estimated costs or a firm financial commitment sufficient to cover estimated costs.

* * * * *

(b) Applicants for commercial and non-commercial nationwide licensing relying on personal or internal resources for the showing required in paragraph (a) of this section must submit independently audited financial statements certified within one year of the date of the application showing net current assets sufficient to meet estimated construction and operating costs. Applicants for both commercial and non-commercial nationwide licensing must also submit an unaudited balance sheet, current within 60 days of the date of submission, that clearly shows the continued availability of sufficient net current assets to construct and operate the proposed system, and a certification by the applicant or an officer of the applicant organization attesting to the validity of the balance sheet.

(c) * * *

(3) Is willing, if the applicant is seeking a commercial nationwide license, to provide a sum to the applicant sufficient to cover the realistic and prudent estimated costs of construction of 40 percent of the system and operation of the system for the first four years of the license term; and

(4) Is willing, if the applicant is seeking a non-commercial nationwide license, to provide a sum to the applicant sufficient to cover the realistic and prudent estimated costs of construction of a minimum of at least one base station in at least 70 different geographic areas designated in the application within five years of receiving a license, and operation of the system for the first five years of the license term.

* * * * *

Federal Communications Commission.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018-AB67

Endangered and Threatened Wildlife and Plants; Correction to Final Rule Listing the Kanab Ambersnail as Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Correction to final regulation.

SUMMARY: The Fish and Wildlife Service corrects the final regulation published Friday, April 17, 1992 (57 FR 13657) that listed the Kanab ambersnail as an endangered species. An incomplete scientific name was given in the table entry at 57 FR 13661. A correction is provided.

EFFECTIVE DATE: September 25, 1992.

FOR FURTHER INFORMATION CONTACT: Dr. Larry R. Shannon, Chief, Division of Endangered Species, U.S. Fish and Wildlife Service (452-ARLSQ), Washington, DC 20240 (703-358-2171).

SUPPLEMENTARY INFORMATION:

Background

As published, the final regulation contains the scientific name of the full species, *Oxyloma haydeni*, although the preamble continuously refers to just the Kanab subspecies, *Oxyloma haydeni kanabensis*. This error could cause confusion and might prove misleading; a correction is provided below. Accordingly, the publication of April 17, 1992, of the final regulation amending 50 CFR 17.11(h), which was the subject of FR Doc. 92-8955, is corrected as follows:

§ 17.11 [Corrected]

At 57 FR 13661, in § 1711(h) the table entry under the "Scientific name" is corrected by adding the word "*kanabensis*" to read "*Oxyloma haydeni kanabensis*"; further, the numbers under "When listed" are revised to read "431E, 459, 477".

Dated: September 14, 1992.

Bruce Blanchard,

Acting Director, Fish and Wildlife Service.

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 285

[Docket No. 920407-2159]

Atlantic Tuna Fisheries; Bluefin Tuna

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Partial closure of general category set-aside fishing for large medium and giant Atlantic bluefin tuna.

SUMMARY: NMFS closes the fishery for Atlantic bluefin tuna conducted by vessels permitted in the General category and fishing for large medium and giant Atlantic bluefin tuna for the

waters between Cape Cod, Massachusetts and Long Island, New York. Closure of this segment of the fishery is necessary because it has been determined that the first half of the 40-metric ton (mt) set-aside amount, will be attained by September 23, 1992. Vessels permitted in the General category may continue to fish for and retain bluefin tuna for the remaining 20-mt of the 40-mt set-aside in the area that includes the waters west of a straight line originating at a point on the southern shore of Long Island, New York, at 72°50′ W. longitude and running SSE 150° true. The intent of this action is to prevent overharvest of the quota established for this fishery while providing a fishing opportunity in areas of the New York Bight and south.

EFFECTIVE DATES: The closure is effective from 0001 hours local time on September 24, 1992, through December 31, 1992.

FOR FURTHER INFORMATION CONTACT: Richard B. Stone, 301–713–2347.

SUPPLEMENTARY INFORMATION: Regulations promulgated under the authority of the Atlantic Tunas Convention Act (16 U.S.C. 971–971th regulating the harvest of Atlantic bluefin tuna by persons and vessels subject to U.S. jurisdiction appear at 50 CFR part 285.

Section 285.22(a) of the regulations provides for an annual quota of 531 mt of large medium and giant Atlantic bluefin tuna to be harvested from the Regulatory Area by vessels permitted in the General category. The Assistant Administrator for Fisheries, NOAA, (Assistant Administrator) is required under § 285.20(b)(1) to monitor the catch and landing statistics, and on the basis of these statistics, to project a date when the total catch of Atlantic bluefin tuna will equal any quota under § 285.22. The Assistant Administrator is further required under § 285.20(b)(1) to prohibit the fishing for, or retention of, Atlantic bluefin tuna by the category of gear subject to the quotas. In the case of the General category, under § 285.22(a) the Assistant Administrator may set aside an allocation for an identified area, not to exceed the greater of 40 mt or the maximum reported landings from the identified area in any of the preceding 3 years. This set-aside is made when the Assistant Administrator has determined, based on landings reports, that fishermen in an identified area will be precluded from harvesting their share of the quota due to variations is seasonable distribution, abundance, or migration patterns and the catch rate. In addition, the governing regulations require the daily catch limit for the identified area to be set at one large medium or giant Atlantic bluefin tuna per day per vessel.

Based on landings reports, the Assistant Administrator determined in a separate closure notice in the **Federal Register** (September 16, 1992) that the quota of Atlantic bluefin tuna allocated for the General category, minus a 40-mt set-aside amount, had been attained. Vessels permitted in the General category were allowed to continue to fish in the area that included the waters of Narragansett Bay, Buzzards Bay, Pleasant Bay, and all waters south of a straight line originating at a point on the southeastern shore of Cape Cod at 41°45′ N. latitude (near the north end of Pleasant Bay) and running East 90° true, until 20-mt of the 40-mt set aside were harvested and NMFS published a notice of closure for that 20-mt allocation. When the first 20-mt of the 40-mt set-aside was reached, it was stated that vessels permitted in the General category would be allowed to continue to fish for and retain the remaining 20-mt of the set-aside in the area west of a straight line originating at a point on the southern shore of Long Island at 72°50′ W. longitude (near the town of Moriches) and running SSE 150° true. The intent of this action was to prevent overharvest of the quota established for this fishery while providing a fishing opportunity in areas south of Cape Cod.

Based on landing reports, the Assistant Administrator has determined that the first half of the 40-mt set-aside has been attained. Vessels permitted in the General category are allowed to continue to fish in the area that includes the waters west of a straight line originating at a point on the southern shore of Long Island at 72°50′ W. longitude (near the town of Moriches) and running SSE 150° true. The intent of this action is to prevent overharvest of the quota established for this fishery while providing a fishing opportunity in areas south of Long Island.

Classification

Notice of this action will be faxed to Atlantic bluefin tuna dealers and fisherman, several industry publications, associations, and state agencies. This action is taken under the authority of 50 CFR 285.20, and is taken in compliance with E.O. 12291.

List of Subjects in 50 CFR Part 285

50 CFR Part 675

[Docket No. 911172–2021]

Groundfish of the Bering Sea and Aleutian Islands Area

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Closure of directed fishing.

SUMMARY: NMFS is closing the directed fishery for pollock by the inshore component in the Bering Sea subarea (BS) of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the total allowable catch (TAC) for pollock assigned to the inshore component in the BS.

EFFECTIVE DATE: Effective 12 noon, Alaska local time (A.l.t.), September 22, 1992, through 12 midnight, A.l.t., December 31, 1992.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, Resource Management Specialist, Fisheries Management Division, NMFS 907/586–7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the BSAI exclusive economic zone is managed by the Secretary of Commerce according to the Fishery Management Plan for the Groundfish Fishery of the BSAI (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 675.

The current allowance of pollock TAC to the inshore component in the BS is 247,390 metric tons (57 FR 32925, July 24, 1992).

The Director of the Alaska Region, NMFS (Regional Director), has determined, in accordance with § 675.20(a)(8), that the pollock allowance available for harvest by the inshore component in the BS will soon be reached. Therefore, NMFS is establishing a directed fishing allowance of 244,000 mt, and is setting aside the remaining 3,390 mt as bycatch to support other anticipated fisheries.

The Regional Director has determined that the directed fishing allowance has been reached. Consequently, NMFS is prohibiting directed fishing for pollock in the BS by the inshore component effective from 12 noon, A.l.t., September 22, 1992, through 12 midnight, A.l.t., December 31, 1992.

Directed fishing standards for applicable gear types may be found in the regulations at § 675.20(h).

Classification

This action is taken under 50 CFR 675.20 and is in compliance with E.O. 12291.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 57, No. 187
Friday, September 25, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 532

Prevailing Rate Systems

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The Office of Personnel Management (OPM) is proposing to amend the current regulations to emphasize the requirement for local Federal activities to cooperate with local wage survey committees and appoint and release employees to participate in Federal Wage System (FWS) surveys unless exceptional circumstances prohibit their appointment or release. Because of occasional difficulties encountered in releasing local employees from their normal work assignments to participate in the FWS wage survey process, members of the Federal Prevailing Rate Advisory Committee (FPRAC) expressed concern that local Federal activities do not understand the importance of FWS surveys. This OPM action clarifies the intent of the current regulations and documents some practices previously contained in Federal Personnel Manual (FPM) guidance.

DATES: Comments must be received on or before October 26, 1992.

ADDRESSES: Send or deliver written comments to Barbara L. Fiss, Assistant Director for Compensation Policy, Personnel Systems and Oversight Group, U.S. Office of Personnel Management, room 6H31, 1900 E Street, NW., Washington, DC 20415.

FOR FURTHER INFORMATION CONTACT: Brenda Roberts, (202) 606–2848.

SUPPLEMENTARY INFORMATION: Sections 5343(b) and (c)(2) of title 5, United States Code, require that local wage surveys for determining prevailing rates be conducted each year and that recognized employee organizations be allowed to participate at all levels of the process. Section 532.231 of title 5, Code of Federal Regulations, requires the heads of local activities in an FWS wage area to provide "wage survey committee members, data collectors, and any other assistance requested by the local wage survey committee." This includes the provision of both labor and agency representatives to serve as committee members and data collectors.

Recent difficulties have demonstrated that the heads of local activities were not always aware of their wage survey responsibilities and occasionally did not cooperate fully with local wage survey committees in selecting, appointing, and releasing employees to participate in the wage survey process. The labor members of FPRAC presented this problem to FPRAC and requested that the current regulations be revised to emphasize that data collectors should be excused from their normal work assignments to participate in the FWS wage survey process. OPM also has issued an Interagency Advisory Group memorandum to all personnel directors to address the problem and stress the importance of releasing employees to participate in the FWS wage survey process. After extended discussions, FPRAC, by consensus, recommended that OPM amend the existing regulations in §§ 532.229, 532.231, and 532.233 of title 5, Code of Federal Regulations, as indicated in these proposed regulations. The proposed regulations are not intended to change existing policy, but to clarify the intent of the regulations and document some practices previously contained in FPM guidance.

The primary purpose of this regulatory amendment is to emphasize that local activities must cooperate with local wage survey committees and appoint and release those employees nominated by the labor organizations and by Federal agencies to participate in wage surveys unless exceptional circumstances are encountered. Items considered in the selection and appointment process include the requirement in the prevailing rate law for labor and agency representatives to participate in the wage survey process, the qualifications of the nominated employees, the need of the employee' work units for their presence on the job, and the prudent management of available financial and human resources. Refusal to release appointees is to be based upon a demonstrated requirement, directly related to their work units' missions, for their presence on their regular jobs.

The regulations also clarify that when employees cannot be appointed to serve as data collectors or committee members because of exceptional circumstances, additional nominations must be provided expeditiously to avoid any delay in the survey process. FWS wage surveys occur within a restricted statutory timeframe that does not provide additional time for the resolution of internal disputes on releasing employees.

In addition, the proposed regulations describe the requirement for nominating and appointing alternate data collectors to supplement regular data collectors. This practice was previously documented only in the FPM.

E.O. 12291, Federal Regulation

I have determined that this is not a major rule as defined under section 1(b) of E.O. 12291, Federal Regulation.

Regulatory Flexibility Act

I certify that these regulations would not have a significant economic impact on a substantial number of small entities because they would affect only Federal agencies and employees.

List of Subjects in 5 CFR Part 532

Administrative practice and procedure, Government employees, Wages.

U.S. Office of Personnel Management.

Constance Berry Newman,

Director.

Accordingly, OPM proposes to amend 5 CFR part 532 as follows:

PART 532—PREVAILING RATE SYSTEMS

1. The authority citation for 5 CFR part 532 continues to read as follows:

Authority: 5 U.S.C. 5343, 5346; § 532.707 also issued under 5 U.S.C. 552, Freedom of Information Act, Pub. L. 92–502.

2. In § 532.229, new paragraphs (b)(5) and (6) are added to read as follows:

§ 532.229 Local wage survey committee.

* * * * *

(b) * * *

* * * * *

(5) In selecting and appointing employees recommended by labor organizations and by Federal agencies to serve as committee members, consideration shall be given to the requirement in the prevailing rate law for labor and agency representatives to participate in the wage survey process, the qualifications of the recommended employees, the need of the employees' work units for their presence on the job, and the prudent management of available financial and human resources. Employing agencies and activities shall cooperate and appoint the recommended employees unless exceptional circumstances prohibit their consideration. When the recommended employees cannot be appointed to serve as local wage survey committee members, the responsible lead agency or labor organization shall provide additional recommendations expeditiously to avoid any delay in the survey process.

(6) Employers shall cooperate and release appointed employees for committee proceedings unless the employers can demonstrate that exceptional circumstances directly related to the accomplishment of the work units' missions require their presence on their regular jobs. Employees serving as committee members are considered to be on official assignment to an interagency function, rather than on leave.

* * * * *

3. In § 532.231, paragraph (c)(2) is revised to read as follows:

§ 532.231 Responsibilities of participating organizations.

* * * * *

(c) * * *

(2) Heads of local activities. The head of each activity in a wage area is responsible for providing employment information, wage survey committee members, the prescribed number of data collectors, and any other assistance needed to conduct local wage survey committee functions.

* * * * *

4. In § 532.233, paragraph (e) is revised to read as follows:

§ 532.233 Preparation for full-scale wage surveys.

* * * * *

(e) Selection and appointment of data collectors.

(1) The local wage survey committee, after consultation with the lead agency, shall determine the number of regular and alternate data collectors needed for the survey based upon the estimated number and location of establishments to be surveyed.

(2) Wage data for appropriated fund surveys shall be collected by teams consisting of one local Federal Wage System employee recommended by the committee member representing the qualifying labor organization and one Federal employee recommended by Federal agencies. The data collectors shall be selected and appointed by their employing agency.

(3) Wage data for nonappropriated fund surveys shall be collected by teams, each consisting of one local nonappropriated fund employee recommended by the committee member representing the qualifying labor organization and one nonappropriated fund employee recommended by nonappropriated fund activities. The data collectors shall be selected and appointed by their employing agency.

(4) The local wage survey committee shall provide employers with the names of employees recommended by labor organizations and by Federal agencies to serve as data collectors and shall indicate the number of regular and alternate data collectors to be selected and appointed by the employers.

(5) In selecting and appointing employees recommended by labor organizations and by Federal agencies to serve as data collectors, consideration shall be given to the requirement in the prevailing rate law for labor and agency representatives to participate in the wage survey process, the qualifications of the recommended employees, the need of the employees' work units for their presence on the job, and the prudent management of available financial and human resources. Employing agencies and activities shall cooperate and appoint the recommended employees unless exceptional circumstances prohibit their consideration. When the required number of employees cannot be appointed to serve as data collectors from among those recommended, the local wage survey committee shall obtain additional recommendations expeditiously to avoid any delay in the survey process.

(6) Employers shall cooperate and release appointed employees to serve as data collectors throughout the duration of the data collection period unless the employers can demonstrate that exceptional circumstances directly related to the accomplishment of the work units' missions require their presence on their regular jobs. Employees serving as data collectors are considered to be on official assignment to an interagency function, rather than on leave.

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of reopened public hearing on proposed rulemaking.

SUMMARY: A hearing involving 29 markets that was held in the summer of 1991 is being reopened to consider the establishment of Class III–A pricing on an emergency basis in such markets. The hearing also will consider the appropriate nonfat dry milk price to be used in computing any Class III–A prices. The reopening was requested by a number of interested parties.

DATES: The hearing will reconvene at 9 a.m. local time on October 5, 1992.

ADDRESSES: The hearing will be held at the Ramada Hotel—Old Town, 901 N. Fairfax Street, Alexandria, Virginia 22314 (703) 683–6000.

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Chief, Order Formulation Branch, USDA/AMS/Dairy Division, Room 2968, South Building, P.O. Box 96456, Washington, DC 20090–6456, (202) 720–6274.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12291.

Actions under the Federal milk order program are subject to the Regulatory Flexibility Act (Pub. L. 96–354). This Act seeks to ensure that, within the statutory authority of a program, the regulatory and information requirements are tailored to the size and nature of small businesses. For the purpose of the Act, a dairy farm is a "small business; if it has an annual gross revenue of less than $500,000, and a daily products manufacturer is a "small business" if it has fewer than 500 employees. Most parties subject to a milk order are considered as a small business. Accordingly, interested parties are invited to present evidence on the probable regulatory and informational impact of the hearing issues on small businesses.

The amendments to the rules proposed herein have been reviewed under Executive Order 12778, Civil Justice Reform. They are not intended to have retroactive effect. If adopted, the proposed amendments would not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with these rules.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 8c(15)(A) of the Act (7 U.S.C. 608c(15)(A)), any handler subject to an order may file with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with the law and requesting a modification of an order or to be exempted from the order. A handler is afforded the opportunity for a hearing on the petition. After a hearing the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his/her principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after date of the entry of the ruling.

It is noted that the original hearing notice for this proceeding listed 31 milk orders. The initial number of markets involved has been reduced to 29 as a result of the consolidation of three southwest markets (Lubbock-Plainview, Rio Grande Valley and Texas Panhandle) into a new single order designated as the New Mexico-West Texas marketing area.

Prior documents in this proceeding:

Notice of Hearing: Issued July 16, 1991; published July 22, 1991 (56 FR 33396).

Tentative Decision: Issued December 10, 1991; published December 191, 1991 (56 FR 65801) and corrected December 23, 1991 (56 FR 66482).

Revised Tentative Decision: Issued December 24, 1991; published January 2, 1992 (57 FR 15).

Interim Amendment of Orders: Issued December 27, 1991; published January 3, 1992 (57 FR 173).

Notice of Reopened Hearing: Issued August 11, 1992; published August 14, 1992 (57 FR 36609).

Notice is hereby given of a reopened public hearing to be held in response to petitions from a number of interested parties. The reopened hearing will begin at 9 a.m. local time on October 5, 1992. The hearing will consider the establishment of Class III–A pricing for all of the markets involved in this processing. The hearing also will consider what nonfat dry milk price should be used to compute any Class III–A prices. As a result of recent difficulties in reporting separate Extra Grade and Grade A nonfat dry milk prices, Dairy Market News plans to combine the two separate prices. Evidence also will be taken to determine whether emergency marketing conditions exist to such an extent that expedited action is warranted.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the issues identified above and any appropriate modification to the tentative marketing agreements and the orders. There is no proposed amendment that has received the final approval of the Secretary of Agriculture.

This is the second reopening of a hearing that was initiated last summer to consider the establishment of a separate class and price (III–A) for milk used to make butter and nonfat dry milk under 31 orders. The intent of the original proposals by operating cooperatives was to price such milk on the basis of market prices for butter and nonfat dry milk rather than the currently used Minnesota-Wisconsin price.

The Department issued a tentative decision on this issue last December, adopting the new pricing for nonfat dry milk only and for just three orders—New England, Middle Atlantic, and Pacific Northwest. Because of the emergency nature of the issue, a tentative decision was issued so that the pricing changes could be implemented on an interim basis while public comments were being received on the decision.

The price changes were blocked, however, when a major cooperative in the Southeast obtained a temporary restraining order. On August 4, 1992, the U.S. District Court for the Western District of Kentucky at Louisville issued an opinion and order regarding the merits of the case and the continuation of the restraining order. The Court rules that the Department's adoption of the new Class III–A price for three orders was substantially valid, but that the Department erred in the manner in which it arrived at the yield factor that was incorporated in the Class III–A price formula.

On this basis, the Court enjoined the Department from implementing the price changes until all interested parties had been given a further opportunity to address the question of what the yield factor in the Class III–A price formula should be. The most practical way to accomplish the Court's instruction was to reopen the hearing. Since the proper yield factor was the only matter that the Court believed needed to be addressed, the reopened hearing that was held on August 20, 1992, was limited to this single issue of the three markets where pricing changes were tentatively adopted. A tentative decision on that matter is pending on the basis of the evidence presented at the reopened

hearing and may not be delayed pending this reopening.

A number of handlers and operating cooperatives from various sections of the country have requested the hearing be reopened to take additional evidence on all issues. Even in the three orders where an interim final rule was promulgated, the evidentiary basis has had an additional 14 months experience that could be considered. This reopening of the hearing will, thus, encompass all 29 orders and all issues.

Interested parties who wish to introduce exhibits at the reopened hearing should provide the Presiding Officer at the hearing with six copies of such exhibits for the Official Record.

Also, it would be helpful if additional copies are available for the use of other participants at the hearing.

List of Subjects in 7 CFR Parts 1001, 1002, 1004, 1005, 1007, 1011, 1030, 1033, 1036, 1040, 1044, 1046, 1049, 1065, 1068, 1079, 1093, 1094, 1096, 1097, 1098, 1099, 1106, 1108, 1124, 1126, 1131, 1135, 1138

Milk marketing orders.

The authority citation for the aforesaid 7 CFR parts continues to read as follows:

Authority: Sec. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674.

Copies of this reopened hearing notice may be obtained from any market administrator or from the Hearing Clerk, room 1083, South Building, United States Department of Agriculture, Washington, DC 20250, or may be inspected here.

Copies of the transcript of testimony taken at the hearing will not be available for distribution through the Hearing Clerk's Office. If you wish to purchase a copy, arrangements may be made with the reporter at the hearing.

From the time that a hearing notice is issued and until the issuance of a final decision in a proceeding, Department employees involved in the decisional process are prohibited from discussing the merits of the hearing issues on an ex parte basis with any person having an interest in the proceeding. For this particular proceeding, the prohibition applies to employees in the following organizational units:

Office of the Secretary of Agriculture
Office of the Administrator, Agricultural Marketing Service
Office of the General Counsel
Dairy Division, Agricultural Marketing Service (Washington office only)
Offices of the Market Administrators for the aforementioned Marketing Areas

Procedural matters are not subject to the above prohibition and may be discussed at any time.

Dated: September 22, 1992.

Daniel Haley,

Administrator.

BILLING CODE 3410–02–M

SMALL BUSINESS ADMINISTRATION

13 CFR Part 120

Business Loan Policy—Limitations on Loan Purposes

AGENCY: Small Business Administration (SBA)

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed regulation would formalize a longstanding SBA practice against making or guaranteeing a loan to an applicant under section 7(a) of the Small Business Act (the "Act") if the Agency had previously incurred a loss (which remains outstanding) in connection with an earlier section 7(a) loan or guaranty with respect to the applicant (or its predecessor) or to any business controlled by the same person(s) who controlled an applicant on which a loss was incurred.

DATES: Comments must be submitted on or before October 26, 1992.

ADDRESSES: Comments may be mailed to Charles R. Hertzberg, Assistant Administrator for Financial Assistance, Small Business Administration, 409 3rd Street SW., Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: Charles R. Hertzberg, 202/205–6490.

SUPPLEMENTARY INFORMATION: Presently, SBA will not make or guarantee a loan to an applicant under Section 7(a) of the Act if the Agency had incurred a loss (which remains outstanding) in connection with an earlier section 7(a) loan or guaranty with respect to the applicant or a business controlled by the same person(s) who controlled an applicant on which a loss was incurred. While this position represents longstanding Agency practice, SBA is concerned that it is not being implemented uniformly. The proposed regulation, if finalized, would ensure consistent application of this practice.

Under this proposed rule, SBA would not provide section 7(a) direct or guaranteed loan assistance to an applicant small business concern if the Agency had incurred a loss under section 7(a) of the Act on a prior loan to the applicant (or its predecessor) or to any business controlled by the same person(s) who controls the applicant. This prohibition would apply so long as the earlier loss remained outstanding on the books of SBA.

Under the regulation as proposed, "control" would mean the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a small business concern, whether through the ownership of voting shares, by contract, position, or otherwise. Control may be affirmative or negative and it would be immaterial whether it was exercised so long as the power to control existed. In addition to stock ownership, control could arise through the occupancy of director, officer or key employee positions; contractual or other business relations; or combinations of these and other factors. The Agency has had experience in interpretng this terminology because similar language appears in part 121 of SBA regulations (13 CFR part 121).

Under the proposed regulation a "loss" would mean the discrepancy between an amount owed to the Agency and the amount collected by the Agency and recognized by SBA when the Agency has not been fully reimbursed (1) from the sale or other disposition of collateral after a debtor's default on a direct SBA loan or after SBA has honored its guaranty with respect to a guaranteed 7(a) loan, (2) as a result of the execution of a compromise agreement, or (3) as a result of the bankruptcy of the debtor. When SBA makes payment under its guaranty with respect to a guaranteed 7(a) loan because of the debtor's default, it reflects such payment on its records and it then seeks to be reimbursed from the sale or other disposition of the underlying collateral. Similarly, when SBA makes a direct loan to a business and the debtor defaults on the loan SBA forecloses on the collateral and attempts to be reimbursed for its loss by the sale or other disposition of the property. To the extent that the proceeds from such sale or disposition do not reimburse the Agency in full for the direct loan or for the funds paid to honor its guaranty, it has incurred a loss. If SBA has entered into a compromise with a borrower, the Agency has agreed to accept an amount from the borrower less than that which would have fully reimbursed the Agency. (A compromise may excuse the business concern from making full payment on its existent financial obligation, but the Agency loss remains outstanding on its books). That the loss in such a situation has been the result of a contract makes it no less a loss which SBA must recognize. Similarly, in the case of a bankruptcy, the Agency sometimes is compelled by law to

accept less recompense then owed when business's debts are being discharged in bankruptcy, but the loss to the Agency would still be considered to exist on its books under this proposed regulation.

As a housekeeping function, by this rulemaking SBA is also proposing to eliminate the asterisk at the end of § 120.102, together with the editorial note to which it refers, since SBA plans no correction document as mentioned in the note.

Compliance With Executive Orders 12291 and 12612, the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., and the Paperwork Reduction Act, 44 U.S.C. cu. 35

For purposes of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, SBA certifies that this proposed rule, if promulgated in final form, will not have a significant impact on a substantial number of small entities.

SBA certifies that this proposed rule, if promulgated in final, will not constitute a major rule for the purposes of Executive Order 12291, since the proposed changes are not likely to result in an annual effect on the economy of $100 million or more.

The proposed rule, if promulgated in final, would not impose additional reporting or recordkeeping requirements which would be subject to the Paperwork Reduction Act, 44 U.S.C. chapter 35.

This proposed rule, if promulgated as final, would not have federalism implications warranting the preparation of a Federalism Assessment in accordance with Executive Order 12612.

Further, for purposes of Executive Order 12778, SBA certifies that this proposed rule, if promulgated in final, is drafted, to the extent practicable, in accordance with the standards set forth in section 2 of that Order.

List of Subjects in 13 CFR Part 120

Loan programs—business, Small businesses.

Pursuant to the authority contained in section 5(b)(6) of the Small Business Act (15 U.S.C. 634(b)(6)), SBA proposes to amend Part 120, Chapter I, Title 13, Code of Federal Regulations, as follows:

PART 120—BUSINESS LOAN POLICY

1. The authority citation for Part 120 would continue to read as follows:

Authority: 15 U.S.C. 634(b)(6) and 636 (a) and (h).

2. Section 120.102 would be amended by adding a new subsection 120.102–12 to read as follows:

§ 120.102 Limitations on loan purposes.

Small manufacturers, wholesalers, retailers, service concerns and other firms may borrow to finance construction, conversion or expansion; to purchase equipment, facilities, machinery, supplies or materials; to obtain working capital; or, at the discretion of SBA, to refinance outstanding notes payable. For additional special rules applicable to refinancing loans, see § 122.7–3(c). Financial Assistance shall not be granted if the direct or indirect purpose or result of granting the loan would be to:

* * * * *

§ 120.102–12 Loss previously incurred by SBA.

(a) *Loss on prior loan or guaranty.* Assist an applicant where SBA had incurred a loss on a prior direct or guaranteed loan (and that loss remains outstanding) to (1) The same applicant (whether a proprietorship, partnership or corporation) of its predecessor; (2) Any business entity in which a principal was a principal in an entity on which a previous loss was incurred; or (3) Any business entity controlled by the same person(s) who controlled a borrower on which SBA sustained a previous loss. This rule is applicable regardless of whether the loss incurred by SBA was attributable to a compromise agreement with SBA or to a voluntary or involuntary bankruptcy.

(b)(1) *Control.* For the purposes of this section, "control" means the possession, directly or indirectly, of the power to direct or cause the direction of the management and policies of a small business concern, whether through the ownership of voting shares, by contract, position, or otherwise. Control may be affirmative or negative and it is immaterial whether it is exercised so long as the power to control exists. Control can also arise through the occupancy of director, officer or key employee positions; contractual or other business relations; or combinations of these and other factors. For purposes of this section, any partner in a partnership shall be deemed to have a controlling interest.

(2) *Principal.* For purposes of this section, "principal" means any person who has at least a 20% ownership interest, whether direct or indirect, in a business concern.

(c) *Loss.* For the purposes of this section, "loss" means an amount incurred and recognized by SBA as a loss when SBA has not been reimbursed in full from the sale or other disposition of collateral which it has acquired after the debtor's default of a direct loan or after SBA has honored its guaranty with respect to a 7(a) loan, as a result of the execution of a compromise agreement, or as a result of the bankruptcy of the business.

(d) *Predecessor.* For the purposes of this section, "predecessor" means a business entity controlled by the same person(s) who controls the applicant.

National Oceanic and Atmospheric Administration

15 CFR Ch. IX

Natural Resource Damage Assessments Under the Oil Pollution Act of 1990

AGENCY: National Oceanic and Atmospheric Administration (NOAA), of the Department of Commerce.

ACTION: Extension of comment period.

SUMMARY: On June 1, 1992 (57 FR 23067), NOAA published an announcement of a public meeting and an extension of the comment period concerning the calculation of nonuse values as part of its promulgation of the natural resource damage assessment and restoration regulations required by the Oil Pollution Act of 1990 (OPA). Comments were to be received no later than October 1, 1992. Through this notice, NOAA extends the comment period to December 1, 1992.

DATES: Comments will be accepted through December 1, 1992.

ADDRESSES: Written comments are to be submitted to Randall Luthi, Project Manager, or Linda Burlington, Assistant Project Manager, Damage Assessment Regulations Team (DART), 6001 Executive Boulevard, room 422, Rockville, Maryland 20852.

FOR FURTHER INFORMATION CONTACT: Randall Luthi, Office of General Counsel, NOAA, telephone (202) 377–1400, or Linda Burlington, Office of General Counsel, DART, 6001 Executive Boulevard, room 422, Rockville, Maryland 20852, telephone (301) 227–6332.

SUPPLEMENTARY INFORMATION: The Oil Pollution Act of 1990 (OPA), 33 U.S.C. 2701 *et seq.*, provides for the prevention of, liability for, removal of and compensation for the discharge, or substantial threat of discharge, of oil into or upon the navigable waters of the United States, adjoining shorelines, or the Exclusive Economic Zone. Section 1006(e) requires the President, acting through the Under Secretary of Commerce for Oceans and Atmosphere, develop regulations establishing procedures for natural resource trustees in the assessment of damages for injury to, destruction of, loss of, or loss of use of natural resources covered by OPA. Section 1006(b) provides for the designation of Federal, State, Indian tribal and foreign natural resource trustees to determine resource injuries, assess natural resource damages (including the reasonable costs of assessing damages), present a claim, recover damages and develop and implement a plan for the restoration, rehabilitation, replacement, or acquisition of the equivalent of the natural resources under their trusteeship.

NOAA has published five **Federal Register** Notices, 55 FR 53478 (December 28, 1990), 56 FR 8307 (February 28, 1991), 57 FR 8964 (March 13, 1992), 57 FR 14524 (April 21, 1992), and 57 FR 23067 (June 1, 1992) requesting information and comments on approaches to developing damage assessment procedures. Throughout these various comment periods, NOAA has received numerous and often conflicting comments concerning the use of the contingent valuation methodology (CVM) in determining nonuse values of natural resources affected by a discharge of oil. To assure a thorough analysis of this issue, NOAA established a Contingent Valuation Panel to review the use of CVM to determine nonuse values. This panel conducted a public meeting in Washington, DC., on August 12, 1992, to assist in its review. In order to allow consideration of responses to that meeting, as well as other information that may be submitted, the comment period on the issue of CVM in measuring nonuse values is extended to December 1, 1992.

Dated: September 21, 1992.

Thomas A. Campbell,

General Counsel, National Oceanic and Atmospheric Administration.

[Regulations No. 16]

RIN 0960-AD41

Supplemental Security Income for the Aged, Blind, and Disabled; Exclusion of Earned Income Tax Credits From Income and Resources

AGENCY: Social Security Administration, HHS.

ACTION: Proposed rules.

SUMMARY: We are proposing rules to implement those provisions of section 11115 of the Omnibus Budget Reconciliation Act of 1990, Public Law 101-508, which exclude from income under the supplemental security income (SSI) program any refund of Federal income taxes due to the earned income tax credit (EITC) and any advance EITC payments from an employer. Such payments also are excluded by section 11115 of Public Law 101-508 from resources in the month following the month of receipt. In addition to implementing these statutory changes, the proposed rules also provide that SSI applicants and recipients are no longer required to file for EITC payments as a condition of SSI eligibility since such payments are excluded from income. The SSI provisions of section 11115 of Public Law 101-508 were effective January 1, 1991.

DATES: To be sure that your comments are considered, we must receive them no later than November 24, 1992.

ADDRESSES: Comments should be submitted in writing to the Commissioner of Social Security, Department of Health and Human Services, P.O. Box 1585, Baltimore, MD 21235, or delivered to 3-B-1 Operations Building, 6401 Security Boulevard, Baltimore, MD 21235, between 8 a.m. and 4:30 p.m. on regular business days. Comments received may be inspected during these same hours by making arrangements with the contact person shown below.

FOR FURTHER INFORMATION CONTACT: Henry D. Lerner, Legal Assistant, Office of Regulations, Social Security Administration, 6401 Security Blvd., Baltimore, MD 21235, (410) 965-1762.

SUPPLEMENTARY INFORMATION: These proposed regulations implement those provisions of section 11115 of the Omnibus Budget Reconciliation Act of 1990, Public Law 101-508, which amended sections 1612(b) and 1613(a) of the Social Security Act (the Act). As amended, section 1612(b) excludes from income, under title XVI, any refund of Federal income taxes due to an EITC and any advance EITC payments from an employer. Such payments also are excluded from resources, by section 1613(a) of the Act, in the month following the month of receipt. In addition, under the proposed regulations, SSI applicants and recipients are no longer required to file for EITC payments as a condition of SSI eligibility since such payments are excluded from income. The SSI provisions of section 11115 of Public Law 101-508 were effective January 1, 1991.

Prior to January 1, 1991, we counted EITC payments, received either as an advance or a refund, as earned income for purposes of assessing SSI eligibility and benefit amount. Any EITC payments retained into the month following the month of receipt were considered countable resources in that month. As a condition of SSI eligibility, an individual was required to file for any EITC payments for which he or she was eligible. These policies were based on section 1612(a)(1)(C) of the Act and regulations at §§ 416.210, 416.1110, 416.1111, and 416.1201.

Section 1612(a) of the Act defines income for purposes of the SSI program and section 1612(a)(1)(C) of the Act states that earned income includes any refund of Federal income taxes made by reason of section 32 of the Internal Revenue Code of 1954 (relating to earned income tax credit) and any payment made by an employer under section 3607 of such Code (relating to advance payment of earned income tax credit). However, income under section 1612(a) of the Act is subject to various exclusions set out in section 1612(b) of the Act, which, as noted above, was amended by section 11115 of Public Law 101-508 to exclude from income an EITC payment recieved through a refund of Federal income tax or as an advance payment from an employer.

Provisions of the Proposed Regulations

Effective January 1, 1991, we exclude from income under the proposed regulations any refund of Federal income taxes due to an EITC and any advance EITC payments from an employer, which an individual receives after December 31, 1990, regardless of the tax year involved.

The proposed regulations also provide that any unspent portion of an EITC advance or refund is excluded from resources in the month following the

month of receipt. This includes any unspent portion of an EITC advance or refund received in (but not earlier than) December 1990. Any unspent funds retained into the second month following the month of receipt are subject to resource counting rules at that time.

Under the proposed regulations, individuals are no longer required to file for EITC benefits as a condition of SSI eligibility since such payments are excluded from income.

Section 11115(e) of Public Law 101–508 states that the provision applies "* * * to determinations of income or resources made for any period after December 31, 1990." We interpret this to mean that only EITC payments received after December 31, 1990 are excluded from income. EITC payments received in November or December 1990 which are used in computing payments for January or February 1991 are not excluded from income. We believe that this interpretation correctly reflects the statute since section 11115(e) of Public Law 101–508 applies with respect to "determinations of income" rather than with respect to "benefits." If section 11115(e) had been effective with respect to benefit determinations made after December 31, 1990, retrospective monthly accounting (RMA) would require the consideration of EITCs received in November and December 1990 for the benefit calculations of January and February of 1991. But determinations of income for a particular month are simply the calculations of countable income for that month which will be used in benefit calculations 2 months later. Thus, "determinations of income" after December 31, 1990, would only cover income received after that date. An EITC payment received in December 1990 may be excluded from resources in January 1991 since resources by definition include any income that is retained in the month following the month of receipt.

Regulatory Procedures

Executive Order 12291

The Secretary has determined that these are not major rules under Executive Order 12291 since the costs are expected to be less than $100 million, and the threshold criteria for a major rule are not otherwise met. Therefore, a regulatory impact analysis is not required.

Paperwork Reduction Act of 1980

These regulations impose no new reporting or recordkeeping requirements subject to Office of Management and Budget clearance.

Regulatory Flexibility Act

We certify that these proposed regulations, if promulgated, will not have a significant economic impact on a substantial number of small entities because they affect only individuals and States. Therefore, a regulatory flexibility analysis as provided in Pub. L. 96–354, the Regulatory Flexibility Act, is not required.

Administrative Practice and Procedure, Aged, Blind, Disability benefits, Public assistance programs, Supplemental Security Income (SSI), Reporting and recordkeeping requirements.

Dated: March 27, 1992.

Gwendolyn S. King,

Commissioner of Social Security.

Approved: May 21, 1992.

Louis W. Sullivan,

Secretary of Health and Human Services.

Part 416 of chapter III of title 20 of the Code of Federal Regulations is amended as follows:

1. The authority citation for subpart B of part 416 continues to read as follows:

Authority: Secs. 1102, 1110(b), 1602, 1611, 1614, 1615(c), 1619(a), 1631, and 1634 of the Social Security Act; 42 U.S.C. 1302, 1310(b), 1381a, 1382, 1382c, 1382d(c), 1382h(a), 1383, and 1383c; secs. 211 and 212 of Pub. L. 93–66, 87 Stat. 154 and 155; sec. 502(a) of Pub. L. 94–241, 90 Stat. 268; and sec. 2 of Pub. L. 99–643, 100 Stat. 3574.

2. Section 416.210 is amended by revising paragraph (b) to read as follows:

§ 416.210 You do not apply for other benefits.

* * * * *

(b) *What "other benefits" includes:* "Other benefits" includes any payments for which you can apply that are available to you on an ongoing or one-time basis of a type that includes annuities, pensions, retirement benefits, or disability benefits. For example, "other benefits" includes veterans' compensation and pensions, workers' compensation payments, Social Security insurance benefits and unemployment insurance benefits.

* * * * *

3. The authority citation for subpart K of part 416 continues to read as follows:

Authority: Secs. 1102, 1602, 1611, 1612, 1613, 1614(f), 1621, and 1631 of the Social Security Act; 42 U.S.C. 1302, 1381a, 1382, 1382a, 1382b, 1382c(f), 1382j, and 1383; sec. 211 of Pub. L. 93–66, 87 Stat. 154; sec. 2639 of Pub. L. 98–369, 98 Stat. 1144.

§ 416.1111 [Amended]

4. Section 416.1111 is amended by removing paragraph (c) and redesignating paragraphs (d) and (e) as paragraphs (c) and (d).

5. The introductory text of paragraph (c) of § 416.1112 is republished, and paragraph (c) is amended by redesignating existing paragraphs (c)(1) through (c)(8) as paragraphs (c)(2) through (c)(9), removing the parenthesis at the end of redesignated paragraph (c)(6) and adding a new paragraph (c)(1) to read as follows:

§ 416.1112 Earned income we do not count.

* * * * *

(c) *Other earned income we do not count.* We do not count as earned income—

(1) Any refund of Federal income taxes you receive under section 32 of the Internal Revenue Code (relating to earned income tax credit) and any payment you receive from an employer under section 3507 of the Internal Revenue Code (relating to advance payment of earned income tax credit);

* * * * *

6. Paragraph (a) of § 416.1161 is amended by adding paragraph (a)(20) to read as follows:

§ 416.1161 Income of an ineligible spouse, ineligible parent, and essential person for deeming purposes.

* * * * *

(20) Refunds of Federal income taxes and advances made by an employer relating to an earned income tax credit, as provided in § 416.1112(c).

7. The authority citation for subpart L of part 416 continues to read as follows:

Authority: Secs. 1102, 1602, 1611, 1612, 1613, 1614(f), 1621, and 1631 of the Social Security Act; 42 U.S.C. 1302, 1381a, 1382, 1382a, 1382b, 1382c(f), 1382j, and 1383; sec. 211 of Pub. L. 93–66, 87 Stat. 154.

8. Section 416. 1210 is amended by removing the word "and" at the end of paragraph (h), replacing the periods at the end of paragraphs (l), (m), and (n) with semicolons, adding "and" at the end of paragraph (n) and by adding a new paragraph (o) to read as follows:

§ 416.1210 Exclusions from resources; general.

* * * * *

(o) Refunds of Federal income taxes and advances made by an employer relating to an earned income tax credit, as provided in § 416.1235.

9. Section 416.1235 is added to read as follows:

§ 416.1235 Exclusion of earned income tax credit.

In determining the resources of an individual (and spouse, if any), we exclude in the month following the month of receipt the unspent portion of any refund of Federal income taxes under section 32 of the Internal Revenue Code (relating to earned income tax credit) and the unspent portion of any payment from an employer under section 3507 of the Internal Revenue Code (relating to advance payment of earned income tax credit). Any unspent funds retained until the first moment of the second month following their receipt are subject to resource counting rules at that time.

BILLING CODE 4190-01-M

DEPARTMENT OF EDUCATION

34 CFR Part 612

RIN 1840-AB11

Drug Prevention Programs in Higher Education

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend regulations governing the Drug Prevention Programs in Higher Education. The proposed regulations would permit an eligible applicant to receive more than one current grant for an Analysis project. This would be accomplished by removing a reporting requirement. The Secretary proposes this change to increase the number of applications for Analysis projects.

DATES: Comments must be received on or before October 26, 1992.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Donald Fischer, Drug Prevention Programs in Higher Education, Fund for the Improvement of Postsecondary Education, U.S. Department of Education, 400 Maryland Avenue SW. (ROB-3, room 3100), Washington, DC 20202-5175.

FOR FURTHER INFORMATION CONTACT: Donald Fischer, Drug Prevention Programs in Higher Education, Fund for the Improvement of Postsecondary Education, U.S. Department of Education, 400 Maryland Avenue SW. (ROB-3, room 3100), Washington, DC 20202-5175. Telephone: (202) 708-5771. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (for calls from metropolitan Washington, DC Telephone (202) 708-9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION:

Background

Under Analysis and Dissemination competitions, the Secretary funds projects to analyze and disseminate successful project designs, policies, and results of projects funded under Institution-Wide Program competitions and Special Focus Program competitions. More specifically, Analysis projects have been funded to analyze overall results of Institution-Wide projects and cross-cutting features of Institution-Wide projects. Institution-Wide projects are comprehensive in scope. They are designed to prevent or eliminate the use of illegal drugs and alcohol by students in institutions of higher education. To that end, they provide training in drug abuse education and prevention to students, faculty, and staff. Special Focus projects address one or more specific approaches or problem areas related to drug abuse education and prevention for students enrolled in institutions of higher education.

The Secretary proposes revisions to existing regulations because of the low number of applications received under three previous competitions for Analysis awards and the desirability of increasing the number of applications submitted by knowledgeable applicants with previous experience in conducting Institution-Wide or Special Focus projects.

Under the existing § 612.2(c), an applicant that has received an award in a competition for Analysis projects is not eligible to receive a subsequent award in that competition until the applicant has submitted every report required under the prior project. The proposed regulations would remove the reporting requirement as an element of eligibility for subsequent Analysis projects.

Note, however, that under 34 CFR 75.217(d)(3) the Secretary determines the order in which applications are selected for grants by considering, among other factors, information concerning the applicant's use of funds under a previous award under this program. In applying this provision, the Secretary intends to ensure that an applicant that has an award for an existing Analysis project does not receive a new award for an identical Analysis project. However, in the case of an applicant conducting an Analysis project in which, for example, the final reports of a cohort of Institution-Wide projects are being analyzed, the Secretary's application of this provision would not prohibit the applicant from receiving a new award to analyze the final reports of a different cohort of Institution-Wide projects. The difference in cohorts would render these projects different and, therefore, allowable.

Summary of Significant Proposed Changes

Proposed Changes to Drug Prevention Programs in Higher Education

Section 612.2

The Secretary proposes to remove a requirement that prohibits an applicant from receiving another new grant for an Analysis project until all required reports for the prior project are submitted. This change would enable an applicant to receive a new grant for another Analysis project before completing the prior Analysis project. The Secretary proposes this change to encourage the submission of a greater number of applications. An applicant would still be limited to no more than one award in any competition in any fiscal year. No changes are being proposed that would affect competitions for Dissemination projects.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities. The small entities affected by these regulations would be institutions of higher education or consortia thereof. Based on analysis conducted by the Department, the Secretary has determined that these provisions would affect a minimal number of institutions.

Paperwork Reduction Act of 1980

These proposed regulations have been examined under the Paperwork Reduction Act of 1980 and have been found to contain no information collection requirements.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in room

3100, ROB–3 (GSA Building), 7th and D Streets, SW., Washington, DC, between the hours of 8:30 and 4:00 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Part 612

Colleges and universities, Drug abuse, Grant programs—education, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number: Drug Prevention Programs in Higher Education, 84.183)

Dated: September 18, 1992.

Lamar Alexander,

Secretary of Education.

The Secretary proposes to amend part 612 of chapter VI of title 34 of the Code of Federal Regulations as follows:

PART 612—DRUG PREVENTION PROGRAMS IN HIGHER EDUCATION

1. The authority citation for part 612 continues to read as follows:

Authority: 20 U.S.C. 3211.

2. Section 612.2 is amended by revising paragraph (c) to read as follows:

§ 612.2 Who is eligible to receive an award?

* * * * *

(c) If an applicant has received an award in a competition, the applicant may not receive a new award in that competition in a subsequent year until—

(1) The Secretary determines that the applicant will satisfactorily complete the project previously supported; and

(2) Except for analysis projects as described in § 612.21(d), the applicant has submitted every report that it must submit in connection with the prior project.

BILLING CODE 4000–01–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[OH19–1–5387; FRL–4510–5]

Approval and Promulgation of Implementation Plans; Ohio

AGENCY: United States Environmental Protection Agency (USEPA).

ACTION: Proposed rule.

SUMMARY: USEPA is proposing to approve a revision request to the ozone portion of the Ohio State Implementation Plan (SIP) for Ludlow Flexible Packaging, Inc. (Ludlow) in Mt. Vernon, Ohio. The revision was submitted by the Ohio Environmental Protection Agency (OEPA) as an emissions trade (bubble) with monthly averaging between a total of 22 printing and paper coating lines, which are subject to the control requirements contained in the Ohio Administrative Rules (OAC) 3745–21–09(Y) and 3745–21–09(F), and a compliance date extension to June 30, 1987.

USEPA is proposing to approve this revision because the source is located in Knox County. Knox County is currently designated as an attainment area for ozone and, thus, the existing control requirements are not required by the Clean Air Act. However, approval of this SIP revision will cancel the accommodative SIP for Knox County.

DATES: Comments on this proposed revision and on the proposed USEPA approval must be received by October 26, 1992.

ADDRESSES: Copies of the SIP revision request and USEPA's analysis are available for inspection at the following address: (It is recommended that you telephone Richard Schleyer at (312) 353–5089, before visiting the Region 5 Office.) U.S. Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Written comments should be sent to: William L. MacDowell, Chief, Regulation Development Section, Air Enforcement Branch (AE–17J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Richard Schleyer, Air Enforcement Branch, Regulation Development Section (AE–17J), U.S. Environmental Protection Agency, Region 5, Chicago, Illinois 60604, (312) 353–5089.

SUPPLEMENTARY INFORMATION:

I. Background

On September 30, 1983, the OEPA submitted a revision request to the ozone portion of the Ohio SIP for Ludlow. The revision consists of a bubble with monthly averaging between 10 printing lines (sources K001–K010) and 12 paper coating lines (sources K011–K022), and a compliance date extension to June 30, 1987, for all 22 lines.

The printing lines are subject to the control requirements contained in the Ohio Administration Rule (OAC) 3745–21–09(Y), and to the compliance schedule contained in OAC Rule 3745–21–04(C)(32). The paper coating lines are subject to the requirements contained in OAC Rule 3745–21–09(F), and to the compliance schedule contained in OAC Rule 3745–21–04(C)(5).

The terms and conditions for the variances and permits for these lines limit the VOC emissions to 0.27 pounds per pound of solids, as applied, as a monthly average. In addition, there is a limit of 4.8 pounds of VOC per pound of solids, as applied (based on 2.9 pounds of VOC per gallon of coating, excluding water) on a daily average for seven of the paper coating lines (K016–K022).

On January 13, 1987, the OEPA submitted additional information concerning this revision. In this submittal, the OEPA stated that several of the printing lines have been or will be permanently shut down and the remaining lines will be controlled by thermal incineration in accordance with OAC Rule 3745–21–09(Y), thereby removing the ten printing lines from the bubble. In addition, 4 of the 12 paper coating lines (K017–K019, K022) have been removed from the plant. Therefore, only 8 paper coating lines (K011–K016, K020–K021) remain under the bubble. The compliance date extension still applies to all 22 lines.

II. Current SIP

Under the existing federally approved SIP, Ludlow's printing lines are subject to the control requirements contained in the Ohio Administrative Code (OAC) Rule 3745–21–09(Y). This rule limits the volatile organic compound (VOC) content in the coatings and inks to 40 percent by volume, excluding water, or 25 percent by volume of the volatile content. Ludlow's paper coating lines are subject to the control requirements contained in OAC Rule 3745–21–09(F), which limits the VOC content to 4.8 pounds per pound of solids, as applied

(based on 2.9 pounds per gallon of coating, excluding water).[1]

III. Knox County Attainment Status

These lines are located in Knox County, Ohio. Knox County was originally designated as a nonattainment area of the NAAQS for ozone.[2] This designation was based on the assumption that nonattainment of the 0.08 ppm ozone standard (the level of the standard prior to 1979) was widespread around major urban areas. As requested by OEPA, USEPA designated Knox County as a nonattainment area although no in-county monitoring data was available. After the ozone standard was changed to 0.12 ppm, OEPA recognized that the assumption of widespread ozone nonattainment was no longer valid and initiated the redesignation of Knox County to attainment of the ozone standards. USEPA approved this request, and in 1984 redesignated Knox County as an attainment area for ozone.[3]

IV. USEPA's Evaluation of the SIP Revision Request

In order to have a revision to the ozone SIP approved as a plan that is equivalent to RACT, the revision must meet the criteria in USEPA's policies on bubbles and long-term averaging. The Ludlow revision does not meet these criteria. However, as discussed below, this revision request can be approved as a relaxation from the RACT requirements.

A compliance date extension for this facility can be approved because: (1) Ludlow is located in an area that is designated attainment for ozone; (2) a revision will not increase historical VOC emissions from the source; and (3) RACT is not required by USEPA in an area designated as attainment.

V. Compliance With the Clean Air Act Amendments of 1990

This request for a revision to the Ohio SIP for ozone has been reviewed for conformance with the provisions of the 1990 Clean Air Act Amendments (CAAA) enacted on November 15, 1990. It has been determined that this action does conform with the General Savings Clause stated in subpart 6, section 193 of the CAAA of 1990 which prohibits, in nonattainment areas, any relaxation of SIP requirements, without at least offsetting emission reductions. Ludlow is located in Knox County which is designated as an attainment area for ozone.

VI. Conclusion

Although the requested revision does not satisfy USEPA's bubble policy and monthly averaging requirements within the context of the RACT requirements, as stated above, the revision can still be approved as a relaxation from RACT requirements because Knox County is a rural attainment area for ozone. The revision will not cause an increase in actual historical VOC emissions from this source. Additionally, the Act does not require RACT level control in attainment areas.

However, approval of this revision will eliminate the accommodative ozone SIP in Knox County. This means that all new major VOC sources and major modifications in this county must comply with all the PSD monitoring requirements. This relaxation of RACT requirements is very limited in scope and will have no effect on nonattainment areas.

Note: the nearest nonattainment area, Columbus, Ohio, is 35 miles to the southwest.

Proposed Action

USEPA is proposing to approve this revision to the ozone portion of the Ohio SIP for Ludlow Flexible Packaging, Inc. This revision consists of a bubble for 8 paper coating lines with monthly averaging, and a compliance date extension for 22 paper and printing lines until June 30, 1987. This revision can be approved as a relaxation from the RACT requirements for Section 172 of the Act because the Act does not require RACT level control in areas designated as attainment of the NAAQS for ozone. Ludlow is located in Knox County, which is designated an attainment area for ozone. Also, approving this revision request will not cause an increase in actual emissions or interfere with the maintenance of the NAAQS.

However, approval of this SIP revision will cancel the accommodative SIP for Knox County.

Nothing in this action should be construed as permitting or allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

This action has been classified as a Table Three action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 22144–2225). On January 6, 1989, the Office of Management and Budget (OMB) waived Table Two and Three SIP revisions (54 2222) from the requirements of Section 3 of Executive Order 12291 for a period of 2 years. USEPA has submitted a request for a permanent waiver for Table 2 and Table 3 revisions. The Office of Management and Budget (OMB) has agreed to continue the temporary waiver until such time as it rules on USEPA's request.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 et. seq., USEPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, USEPA may certify that the rule will not have a significant impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less then 50,000.

SIP approvals under section 110 and subchapter I, Part D of the Act do not create any new requirements, but simply approve requirements that the State is already imposing. Therefore, because the Federal SIP approval does not impose any new requirements, I certify that it does not have a significant impact on any small entities affected. Moreover, due to the nature of the Federal-State relationship under the Act, preparation of a regulatory flexibility analysis would constitute Federal inquiry into the economic reasonableness of State action. This Act forbids USEPA to base its actions concerning SIPs on such grounds. *Union Electric Co.* v. *USEPA*, 427 U.S. 246, 256–66 (S. Ct. 1976); 42 U.S.C. 7410(a)(2).

Public comments are solicited on the requested SIP revision and on USEPA's proposal to approve. Public comments received by (30 days from date of publication) will be considered in the development of USEPA's final rulemaking action.

BILLING CODE 6560-50-M

DEPARTMENT OF THE INTERIOR

Office of the Secretary

43 CFR Part 4

RIN: 1092-AA10

Department Hearings and Appeals Procedures

AGENCY: Office of the Secretary, Interior.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend 43 CFR 4.21(a) to change the requirement that an appeal to one of the Department's Appeals Boards from a decision will suspend the effect of the decision appealed from pending the decision on appeal, unless the Director of the Office of Hearings and Appeals or an Appeals Board exercises discretion to provide that the decision appealed from shall be in full force and effect immediately. Under the proposed rule the decision appealed from will remain effective during the pendency of an appeal unless the director or an Appeals Board determines otherwise in accordance with specified standards. There will be a revision to § 4.21(b) to ensure conformity with the revision of § 4.21(a)..

DATES: Comments must be submitted by October 26, 1992.

ADDRESSES: Comments should be sent to Nadine Markham-Iteilag, Branch of Administrative Law and General Legal Services (DGL), room 6531, Main Interior Building, 1849 C Street NW., Washington, DC 20240. Comments will be available for public review at the above address during regular business hours (8:30 a.m. to 5 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Nadine Markham-Iteilag, (202) 208-5216.

SUPPLEMENTARY INFORMATION: The Department recently issued an Interim Final Rule and a Proposed Rule to amend 43 CFR 3150.2 and 43 CFR 3165.4 to allow an authorized officer's decision relating to onshore oil and gas geophysical exploration operations to remain in effect during the pendency of an appeal before the Interior Board of Land Appeals, unless the appellant demonstrates to the Board that a stay is necessary in accordance with standards generally used by courts in ruling on motions for a Temporary Restraining Order. The rule proposed here would extend this principle to all appeals before the Department's Appeals Boards, thus promoting consistency in the handling of appeals. The proposed rule promotes efficiency in that stays would no longer be automatic upon the filing of an appeal, but would be granted only after the Appeals Board is given the opportunity to make a determination whether the stay is warranted. This revision would not take away any substantive right of appeal that currently exists. It would require the appellant to be responsible for filing a petition for a stay pending appeal if the appellant desires a stay.

Executive Order 12291 and the Regulatory Flexibility Act

The Department of the Interior has determined under Executive Order 12291 that this revision is not a major rule. A major rule is any rule that is likely to result in an annual effect on the economy of $100 million or more, a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions, or significant adverse effects on competition, employment, investment, innovation, productivity, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets. In this instance there are no expected increases in costs or prices for consumers. Costs may actually decline because of a possible decrease in the number of appeals. There would be no need for increase in Federal, State, or local agency budgets or personnel requirements to implement this rule. The gross annual effect on the United States economy would not approach $100 million. For the above reasons, and because one of the effects of the proposed rule is to restore to small entities during the pendency of the appeal the authority to act that was granted by the Department, the Department has also determined under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) that the rule will not have a significant economic impact on a substantial number of small entities.

Executive Order 12630, Taking Implications Assessment

This proposed rule does not represent a governmental action capable of interference with constitutionally protected property rights. As it does not limit existing appeal rights, it would not infringe any private property rights. Therefore, as required by Executive Order 12630, the Department of the Interior has determined that the rule would not cause a taking of private property.

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

Environmental Effects

It has been determined that this proposed rule does not constitute a major Federal action significantly affecting the quality of the human environment, and that no detailed statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4332(2(C)) is required because the proposed revision itself would have no impact on any physical attributes of the public lands or any environmental resource values. In the event public lands issues or environmental resource values are involved in the appeal, applicable NEPA procedures already will have been followed.

Civil Justice Reform

The Department has certified to the Office of Management and Budget that these proposed rules meet the applicable standards provided in sections 2(a) and 2(b)(2) of Executive Order 12778.

Drafting Information

The author of this rule is Nadine Markham-Itteilag, Attorney-Advisor, Branch of Administrative Law and General Legal Services, Division of General Law, Office of the Solicitor, U.S. Department of the Interior, 1849 C Street NW., Washington, DC 20240.

List of Subjects in 43 CFR Part 4

Administrative Practice and Procedures, Civil Rights, Claims, Equal Access to Justice, Government contracts, Grazing lands, Indians, Lawyers, Mines, Penalties, Public lands, Surface mining.

The proposed rule is issued under authority of 43 U.S.C. 1201.

For the reasons stated in the preamble, part 4, subtitle A, of title 43 of the Code of Federal Regulations is proposed to be amended as set forth below.

1. The authority citation for part 4 continues to read as follows:

Authority: R.S. 2478, as amended, 43 U.S.C. sec. 1201, unless otherwise noted.

2. Section 4.21 is amended by revising paragraphs (a) and (b) to read as follows:

§ 4.21 General provisions.

(a) *Effect of decision pending appeal.* Except as otherwise provided by law or other pertinent regulation:

(1) A decision will not be effective during the time in which a person adversely affected may file a notice of appeal; when the public interest requires, however, the Director or an Appeals Board may provide that a decision, or any part of a decision, shall be in full force and effect immediately;

(2) A decision will become effective on the day after the expiration of the time during which a person adversely affected may file a notice of appeal unless a petition for a stay pending appeal is filed together with a timely notice of appeal;

(3) A petition for a stay of a decision pending appeal shall show the reasons for the relief requested, addressing:

(i) The relative harm to the parties if the stay is granted or denied,

(ii) The likelihood of the appellant's success on the merits,

(iii) The likelihood of immediate and irreparable harm if the stay is not granted, and

(iv) Whether the public interest favors granting the stay;

(4) The Director or an Appeals Board shall grant or deny a petition for a stay pending appeal, either in whole or in part, on the basis of the factors listed in paragraph (a)(3) of this section, within 45 calendar days of the expiration of the time for filing a notice of appeal;

(5) A decision, or that portion of a decision, for which a stay is not granted will become effective immediately after the Director or an Appeals Board denies or partially denies the petition for a stay, or fails to act on the petition within the time specified in paragraph (a)(4) of this section.

(b) *Exhaustion of administrative remedies.* No decision which at the time of its rendition is subject to appeal to the Director or an Appeals Board shall be considered final so as to be agency action subject to judicial review under 5 U.S.C. 704, unless a petition for a stay of decision has been timely filed and the decision being appealed has been made effective pending a decision by the Director or an Appeals Board in the manner provided in paragraph (a) of this section.

BILLING CODE 4310-RX-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 92-198, RM-8056]

Radio Broadcasting Services; Larose, Louisiana

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission requests comments on a petition for rule making filed by Electronics Unlimited, Inc., seeking the substitution of Channel 262C1 for Channel 262A at Larose, Louisiana, and the modification of Station KMZM–FM's construction permit to specify operation on the higher powered channel. Channel 262C1 can be allotted to Larose in compliance with the Commission's minimum distance separation requirements with a site restriction of 23.6 kilometers (14.7 miles) south to accommodate Electronics' desired site. The coordinates for Channel 262C1 are North Latitude 29–22–00 and West Longitude 90–26–50. In accordance with § 1.420(g) of the Commission's Rules, we will not accept competing expressions of interest in the use of Channel 262C1 at Larose or require the petitioner to demonstrate the availability of an additional equivalent class channel for use by such parties.

DATES: Comments must be filed on or before November 11, 1992, and reply comments on or before November 27, 1992.

ADDRESSES: Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner, or its counsel or consultant, as follows: Timothy K. Brady, Esq., P.O. Box 986, Brentwood, Tennessee 37027–0986 (Counsel for petitioner).

FOR FURTHER INFORMATION CONTACT: Pamela Blumenthal, Mass Media Bureau, (202) 634–6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Notice of Proposed Rule Making, MM Docket No. 92–198, adopted August 11, 1992, and released September 21, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, Downtown Copy Center, (202) 452–1422, 1990 M Street, NW., Suite 640, Washington, DC 20036.

Provisions of the Regulatory Flexibility Act of 1980 do not apply to this proceeding.

Members of the public should note that from the time a Notice of Proposed Rule Making is issued until the matter is no longer subject to Commission consideration or court review, all *ex parte* contacts are prohibited in Commission proceedings, such as this one, which involve channel allotments. See 47 CFR 1.1204(b) for rules governing permissible *ex parte* contacts.

For information regarding proper filing procedures for comments, see 47 CFR 1.415 and 1.420.

BILLING CODE 6712-01-M

47 CFR Part 73

[MM Docket No. 92-196, RM-8041]

Radio Broadcasting Services; Tallassee and Tuskegee, AL

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: This document request comments on a petition for rule making filed on behalf of Tiger Broadcasting Company, Inc., permittee of Station WACQ-FM, Channel 260A, Tuskegee, Alabama, seeking the reallotment of Channel 260A to Tallassee, Alabama, and modification of its permit accordingly. Coordinates for this proposal are 32–26–30 and 85–47–45.

Petitioner's modification proposal complies with the provisions of § 1.420(i) of the Commission's rules. Therefore, we will not accept competing expressions of interest in the use of Channel 260A at Tallassee, Alabama, or require the petitioner to demonstrate the availability of an additional equivalent class channel.

DATES: Comments must be filed on or before November 12, 1992, and reply comments on or before November 27, 1992.

ADDRESSES: Secretary, Federal Communications Commission, Washington, DC 20554. In addition to filing comments with the FCC, interested parties should serve the petitioner's counsel, as follows: M. Scott Johnson and Catherine M. Withers, Esqs.,

Gardner, Carton & Douglas, 1301 K Street, NW., suite 900, East Tower, Washington, DC 20005.

FRA Docket No. RSGC–5; Notice No. 3

[RIN 2130–AA70]

Timely Response to Grade Crossing Signal System Malfunctions Notice of Extension of Comment Period

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of Proposed Rulemaking; extension of comment period.

SUMMARY: FRA is issuing notice that the period for public comment in this proceeding is being extended to December 1, 1992, due to significant questions raised at the hearing and to permit further opportunity to submit data and comments regarding this issue. FRA is extending the comment.

DATES: Written comments must be received no later than December 1, 1992. Comments received after that date will be considered to the extent possible without incurring additional expense or delay.

ADDRESSES: Written comments should be submitted to the Docket Clerk, Office of Chief Counsel, FRA, 400 Seventh Street SW., Washington, DC 20590. Persons desiring to be notified that their written comments have been received by FRA should submit a stamped, self-addressed postcard with their comments. The Docket Clerk will indicate on the postcard the date on which the comments were received and will return the card to the addressee. Written comments will be available for examination during regular business hours in Room 8201 of the Nassif Building at the above address.

FOR FURTHER INFORMATION CONTACT: Bruce F. George, Chief, Highway-Rail Crossing and Trespasser Programs Division, Office of Safety, FRA, 400 Seventh Street SW., Washington, DC 20590 (telephone 202–366–0533), or Mark Tessler, Trial Attorney, Office of Chief Counsel, FRA, 400 Seventh Street, SW., Washington, DC 20590 (telephone 202–366–0628).

SUPPLEMENTARY INFORMATION: On June 29, 1992, FRA published a notice of proposed rulemaking regarding timely response to grade crossing signal system malfunctions. 57 FR 28819. A public hearing was held on September 15, 1992. Due to significant questions raised at the hearing and to permit further opportunity to submit data and comments regarding this issue, FRA is extending the comment period until December 1, 1992.

Issued in Washington, DC on September 22, 1992.

Gilbert E. Carmichael,

Administrator.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration (NOAA)

50 CFR Part 672

Groundfish of the Gulf of Alaska

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of availability of an amendment to a fishery management plan; request for comments.

SUMMARY: NMFS issues this notice that the North Pacific Fishery Management Council (Council) has submitted Amendment 26 to the Fishery Management Plan for Groundfish of the Gulf of Alaska (GOA) for Secretarial review and is requesting comments from the public. Copies of the amendment may be obtained from the Council (see **ADDRESSES**).

DATES: Comments on the FMP amendment should be submitted on or before November 20, 1992.

ADDRESSES: Comments on the FMP amendment should be submitted to Steven Pennoyer, Director, Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802 or delivered to the Federal Building Annex, Suite 6, 9109 Mendenhall Mall Road, Juneau, AK.

Copies of the amendment and the environmental assessment/regulatory impact review prepared for the amendment are available from the North Pacific Fishery Management Council, P.O. Box 103136, Anchorage, AK 99510 (telephone 907–271–2809).

FOR FURTHER INFORMATION CONTACT: Susan Salveson, Fishery Management Biologist, Alaska Region, NMFS at 907–586–7228.

SUPPLEMENTARY INFORMATION: The Magnuson Fishery Conservation and Management Act (Magnuson Act) (16 U.S.C. 1801 *et seq.*) requires that each Regional Fishery Management Council submit any fishery management plan or plan amendment it prepares to the Secretary of Commerce (Secretary) for review and approval, disapproval, or partial disapproval. The Magnuson Act also requires that the Secretary, upon receiving the plan or amendment, must immediately publish a notice that the plan or amendment is available for public review and comment. The Secretary will consider the public comments received during the comment period in determining whether to approve the plan or amendment.

Amendment 26 would provide the authority to continue to implement time/area closures around Kodiak Island to vessels using trawl gear other than pelagic trawl gear. Current regulations implementing these closures are scheduled to expire at the end of 1992. The continued imposition of these closures beyond 1992 under Amendment 26 is necessary to protect the habitat of depressed stocks of red king crab and Tanner crab.

Proposed regulations for continued closures based on this amendment are scheduled to be published within 15 days of this notice.

DEPARTMENT OF AGRICULTURE

Cooperative State Research Service

Agricultural Science And Technology Review Board; Meeting

According to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776), as amended, the Office of Grants and Program Systems, Cooperative State Research Service, announces the following meeting:

Name: Agricultural Science and Technology Review Board (hereafter referred to as the Review Board).

Date: September 24-25, 1992.

Time: 8:30 a.m.-4:30 p.m. Sept. 24; 8:30 a.m.-12 Noon, Sept. 25.

Place: Quality Hotel on Capitol Hill, Washington, DC.

Type of Meeting: Open to the public. Persons may participate in the meeting as time and space permit.

Comments: The public may file written comments before or after the meeting with the contact person named below.

Purpose: The purposes of the meeting are to: Review the missions and responsibilities of the Review Board; Determine activity priorities; Agree on approaches to address responsibilities; Establish agenda for next meeting; Elect Chair and other officers.

Contact Person for Agenda and More Information: Dr. Mark R. Bailey, Executive Secretary, Joint Council on Food and Agricultural Sciences, room 3M12, Annex Building, U.S. Department of Agriculture, Washington, DC 20250-2200; Telephone (202) 401-4662.

Done in Washington, D.C., this 21 day of September 1992.

John Patrick Jordan,

Administrator.

[FR Doc. 92-23276 Filed 9-24-92; 8:45 am]

BILLING CODE 3410-22-M

Forest Service

Northern Region; Fee Schedule for Communication Uses

AGENCY: Forest Service, USDA.

ACTION: Notice of availability.

SUMMARY: The Regional Forester, Northern Region, has modified the fee schedule for communication uses authorized on National Forest System lands located in the Montana, North Dakota, and parts of Idaho and South Dakota.

ADDRESSES: Copies of the schedule may be obtained by writing to the Regional Forester, Northern Region, USDA—Forest Service, Federal Building, P.O. Box 7669, Missoula, MT 59807.

FOR FURTHER INFORMATION CONTACT: Dave O'Brien (406) 329-3601 or Jim Hathaway (406) 329-3110, Lands and Minerals Staff.

SUPPLEMENTARY INFORMATION: On August 23, 1989, the Regional Forester for the Northern Region published a notice adopting a fee schedule for communications uses (54 FR 35023—35027). Congress delayed implementation of the fee schedule and directed the Forest Service to review and report to the Appropriations Committees on the ability of fee schedules to reflect values associated with local market conditions. The report was completed and sent to the Appropriations Committee on March 21, 1991. The restriction on fee schedule implementation was removed in 1992.

The fee schedule modifications are based on the findings of the report to Congress and additional Forest Service administrative review. Most of the modifications either reduce the fees adopted in 1989, or require appraisals or other sound business management principles be used to establish fees. The modified fee schedule reflects the fair market value of the authorized use as required by the Federal Land Policy and Management Act of 1976.

Dated: September 16, 1992.

John M. Hughes,

Deputy Regional Forester.

BILLING CODE 3410-KD-M

Proposed Posting of Stockyards

The Packers and Stockyards Administration, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act (7 U.S.C. 202), and should be made subject to the provisions of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*).

FL-134—The New Interstate Livestock Auction, Seffner, Florida

PA-156—Mel's Stable, New Holland, Pennsylvania

Pursuant to the authority under section 302 of the Packers and Stockyards Act, notice is hereby given that it is proposed to designate the stockyards named above as posted stockyards subject to the provisions of said Act.

Any person who wishes to submit written data, views or arguments concerning the proposed designation may do so by filing them with the Director, Livestock Marketing Division, Packers and Stockyards Administration, room 3408-South Building, U.S. Department of Agriculture, Washington, DC 20250 by October 3, 1992.

All written submissions made pursuant to this notice will be made available for public inspection in the office of the Director of the Livestock Marketing Division during normal business hours.

Done at Washington, DC this 18th day of September, 1992.

Harold W. Davis,

Director, Livestock Marketing Division.

BILLING CODE 3410-KD-M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 600]

Termination of Foreign-Trade Subzone 70-O; Trenton, MI

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a-81u), and the Foreign-Trade Zones Board Regulations (15 CFR part 400), the Foreign-Trade Zones Board has adopted the following order:

Whereas, on December 22, 1989, the Foreign-Trade Zones Board issued a grant of authority to the Greater Detroit Foreign-Trade Zone, Inc. (GDFTZ), authorizing the establishment of Foreign-Trade Subzone 70-O at Chrysler Corporation's auto components plant in Trenton, Michigan (Board Order 456, 54 FR 53667, 12/29/89);

Whereas, GDFTZ advised the Board on April 15, 1991 (FTZ Docket 18-91), that zone procedures were no longer needed at the facility and requested voluntary termination of Subzone 70-O;

Whereas, the request has been reviewed by the FTZ Staff and the Customs Service, and approval has been recommended;

Now, Therefore, the Foreign-Trade Zones Board terminates the subzone status of Subzone No. 70-O effective this date.

Signed at Washington, DC, this 18th day of September 1992.

Alan M. Dunn,

Assistant Secretary of Commerce for Import Administration, Chairman, Committee of Alternates, Foreign-Trade Zones Board.

Attest:

John J. Da Ponte, Jr.,

Executive Secretary.

BILLING CODE 3510-DS-M

International Trade Administration

Export Trade Certificate of Review

ACTION: Notice of issuance of an export trade certificate of review, application No. 92-00003.

SUMMARY: The Department of Commerce has issued an Export Trade Certificate of Review to The United States Apple and Pear Marketing Board, Inc. This notice summarizes the conduct for which certification has been granted.

FOR FURTHER INFORMATION CONTACT: George Muller, Director, Office of Export Trading Company Affairs, International Trade Administration, 202-377-5131. This is not a toll-free number.

SUPPLEMENTARY INFORMATION: Title III of the Export Trading Company Act of 1982 (15 U.S.C. 4001-21) authorizes the Secretary of Commerce to issue Export Trade Certificates of Review. The regulations implementing title III are found at 15 CFR part 325 (1991) (50 FR 1804, January 11, 1985).

The Office of Export Trading Company Affairs is issuing this notice pursuant to 15 CFR 325.6(b), which requires the Secretary of Commerce to publish a summary of a Certificate in the **Federal Register**. Under Section 305(a) of the Act and 15 CFR 325.11(a), any person aggrieved by the Secretary's determination may, within 30 days of the date of this notice, bring an action in any appropriate district court of the United States to set aside the determination on the ground that the determination is erroneous.

Description of Certified Conduct

Export Trade

1. Products

U.S. origin fresh, frozen and processed apples, pears, sweet cherries, and broccoli.

2. Services

Inspection, quality control, marketing and promotional services.

3. Technology Rights

Proprietary rights of all kinds of technology associated with Products or Services, including, but not limited to: patents, trademarks, service marks, trade names, copyrights (including neighboring rights), trade secrets, know-how, semiconductor mask works, utility models (including petty patents), plant breeders rights, industrial designs, and *sui generis* forms of biotechnology protection and computer software protection.

4. Export Trade Facilitation Services (as They Relate to the Export of Products, Services and Technology Rights)

All export trade-related facilitation services, including, but not limited to: Consulting and trade strategy; sales and marketing; export brokerage; foreign marketing research; foreign market development; overseas advertising and promotion; product research and design based on foreign buyer and consumer preferences; communication and processing of export orders; inspection and quality control; transportation; freight forwarding and trade documentation; insurance; billing of foreign buyers; collection (letters of credit and other financial instruments); provision of overseas sales and distribution facilities and overseas sales staff; legal, accounting and tax assistance; management information systems development and application; assistance and administration of government export assistance programs, such as the Export Enhancement and Market Promotion programs.

Export Markets

The Export Markets include all parts of the world except the United States (the fifty states of the United States, the District of Columbia, the

Commonwealth of Puerto Rico, the Virgin Islands, American Samoa, Guam, the Commonwealth of the Northern Mariana Islands and the Trust Territory of the Pacific Islands) and Canada.

Export Trade Activities and Methods of Operation

In connection with the promotion and sale of Members' Products into the Export Markets, the USAPMB may, on behalf of and with the advice and assistance of its Members:

(1) Design and execute foreign marketing strategies for its Export Markets;

(2) Prepare joint bids, establish export prices for Members' Products and Services and establish terms of sale in the Export Markets;

(3) Allocate export sales, international buyers and/or export markets among Members on the basis of each Member's independent commitment of Products, and/or its individual export marketing plan in relation to USAPMB's corporate plan;

(4) Grant sales and distribution rights for the Products, whether or not exclusive, into designated Export Markets to foreign agents or importers ("exclusive" meaning that the USAPMB and Members may agree not to sell the Products into the designated Export Markets through any other foreign distributor, and that the foreign distributor may agree to represent only USAPMB in the Export Markets and none of its competitors);

(5) Design, develop and market generic corporate labels;

(6) Engage in joint promotional activities directly targeted at developing the Export Markets, such as: Arranging trade shows and marketing trips; providing advertising services; providing brochures, industry newsletters and other forms of product, service and industry information; conducting international market and product research; procuring international marketing, advertising and promotional services; and sharing the cost of these joint promotional activities among the Members;

(7) Conduct product and packaging research and development exclusively for the export of the Products, such as meeting foreign regulatory requirements and foreign buyer specifications and identifying and designing for foreign buyer and consumer preferences;

(8) Negotiate and enter into agreements with governments and other foreign persons regarding non-tariff trade barriers in the Export Markets, such as packaging requirements, establishing and operating fumigation facilities and providing specialized packing operations and other quality control procedures to be followed by its Members in the export of Products into the Export Markets;

(9) Advise and cooperate with agencies of the U.S. Government in establishing procedures regulating the export of Members' Products, Services and/or Technology Rights into the Export Markets;

(10) Negotiate and enter into purchase agreements with buyers in the Export Markets regarding the export prices, quantities, type and quality of Products, time periods, and the terms and conditions of sale;

(11) Broker or take title to the products;

(12) Purchase Products from non-Member producers whenever necessary to fulfill specific sales obligations;

(13) Solicit non-Member producers to become Members;

(14) Communicate and process export orders;

(15) Assist each Member in maintaining the quality standards necessary to be successful in the Export Markets;

(16) Provide Export Trade Facilitation Services with respect to Products, Services and Technology Rights;

(17) Provide, procure, negotiate, contract and administer transportation services for Products in the course of export, including overseas freight transportation, inland freight transportation from the packing house to the U.S. port of embarkment, leasing of transportation equipment and facilities, storage and warehousing, stevedoring, wharfage and handling, insurance, forwarder services, trade documentation and services, customs clearance, financial instruments and foreign exchange;

(18) Negotiate freight rate contracts with individual carriers and carrier conferences either directly or indirectly through shippers associations and/or freight forwarders;

(19) Arrange financing through bank holding companies, governmental financial assistance programs and other arrangements;

(20) Bill and collect from foreign buyers and provide accounting, tax, legal and consulting assistance and services;

(21) Enter into exclusive agreements with Non-Members to provide Export Trade Services and Trade Facilitation Services;

(22) Design, implement and administer Foreign Sales Corporations in accordance with the Internal Revenue Code;

(23) Open and operate overseas sales and distribution offices and companies to facilitate the sales and distribution of the Products in the Export Markets;

(24) Apply for and utilize applicable export assistance and incentive programs which are available within the governmental and private sectors, such as the USDA Export Enhancement and Market Promotion programs;

(25) Negotiate and enter into agreements with governments and foreign persons to develop countertrade arrangements;

(26) Refuse to deal with or provide quotations to other Export Intermediaries for sales of the Members' Products into the Export Markets; and

(27) Exchange information with and among the Members as necessary to carry out the Export Trade Facilitation Services and Export Trade Activities and Methods of Operation, including:

(a) Information about sales and marketing efforts and strategies in the Export Markets, including pricing; projected demand in the Export Markets for Products; customary terms of sale, prices and availability of Products independently committed by Members for sales in the Export Markets; prices and sales of Products in the Export Markets; and specifications by buyers and consumers in the Export Markets;

(b) Information about the price, quality, quantity, source and delivery dates of Products available from the Members for export;

(c) Information about terms and conditions of contracts for sales in the Export Markets to be considered and/or bid on by the USAPMB;

(d) Information about joint bidding, selling arrangements for the Export Markets and the allocations of export sales resulting from such arrangements among the Members, including information regarding the allocation methods used and each member's percentage of the total committed volume of all Members;

(e) Information about expenses specific to exporting to and within the Export Markets, including transportation, transshipments, intermodal shipments, insurance, inland freight to port, port storage, commissions, export sales, documentation, financing and customs duties or taxes;

(f) Information about U.S. and foreign legislation and regulations, including Federal marketing order programs that may affect sales to the Export Markets; and

(g) Information about the USAPMB's or its Members' export operations, including sales and distribution networks established by the USAPMB or its Members in the Export Markets.

and prior export sales by Members, including export price information.

Each Member will independently determine the quantity of the Products that it will make available for direct sale into the Export Markets. Members will be responsible for advising the USAPMB in a timely manner regarding the Products to be made available for export, and the quantities and time periods in which they will be made available.

Members will grant the USAPMB the right of first refusal for all Products they plan to sell directly into the Export Markets. Members can obtain permission from the USAPMB to sell their Products through other Export Intermediaries if: (a) the Product does not meet the quality or packaging standards and requirements of the USAPMB; (b) the terms of sale are not acceptable to the Member; (c) the export price is not acceptable to the Member; (d) due to the perishability of the product, the Member must sell the Product immediately and USAPMB does not have a viable sales opportunity during the time necessary to ship; or (e) the proposed export sales are the outgrowth of business relationships existing before the date of this Certificate.

Members (Within the Meaning of Section 325.2(1) of the Regulations)

Appalachian Apple, Inc. (and the following member firms of this consortium: Fred L. Glaize Partnership; Moore and Dorsey, Co. Inc.; Ridgetop Orchards; Hearty Virginia, Inc.; Ikenberry Orchard; Buck Hill Orchard; Frederickson Orchard; Mount Clifton Orchard); Borton & Sons, Inc.; Douglas Fruit Company, Inc.; Eakin Fruit Company, Inc; Gold Digger Apples, Inc.; Green Valley Farms; Inland Fruit & Produce Company, Inc.; Jack Frost Company, Inc./Marley Orchard Corp.; Northwestern Fruit & Produce Company, Inc.; Price Cold Storage & Packing Company, Inc.; Rice Fruit Company, Inc.; Roche Fruit Company, Inc.; and Washington Apple and Pear Marketing Board.

A copy of each certificate will be kept in the International Trade Administration's Freedom of Information Records Inspection Facility, room 4102, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

Dated: September 21, 1992.

George Muller,

Director, Office of Export Trading Company Affairs.

BILLING CODE 3510-DR-M

Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651); 80 Stat. 897; 15 CFR part 301, we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with §§ 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 92-123. *Applicant:* The Graduate Hospital, 415 S. 19th Street, Philadelphia, PA 19146. *Instrument:* Muscle Research System, Model OPT1S. *Manufacturer:* Guth Scientific Instruments, Germany. *Intended Use:* The instrument will be used in experiments which are performed to determine the mechanism by which agonist activation increases myofilament calcium sensitivity in a G-protein dependent manner of vascular smooth muscle, small mesenteric arteries taken from rabbits. *Application Received by Commissioner of Customs:* September 1, 1992.

Docket Number: 92-129. *Applicant:* North Carolina State University, Campus Box 7212, Raleigh, NC 27695. *Instrument:* 2 Biological Nitrifying Filters for Aquaculture Use, Model 800. *Manufacturer:* Waterline, Canada. *Intended Use:* The instrument will be used to control ammonia nitrogen concentration in fish tanks. *Application Received by Commissioner of Customs:* August 26, 1992.

Docket Number: 92-130. *Applicant:* University of Oklahoma Health Sciences Center, Department of Medicine, BSEB 306, 941 S.L. Young Boulevard, Oklahoma City, OK 73104. *Instrument:* Mass Spectrometer, Model API III. *Manufacturer:* Sciex, Canada. *Intended Use:* The instrument will be used in conjunction with a high pressure liquid chromatograph to perform liquid chromatography/mass spectrometry at extremely low limits during the following research:

(1) Determination of the molecular weights of proteins and glycoproteins,

(2) Determination of the sites of glycosylation in glycoproteins,

(3) Structure determination of the carbohydrate portion of glycoproteins,

(4) Determination of the sites of phosphorylation in phosphoproteins,

(5) Molecular weight determination for oligonucleotides,

(6) Molecular weight determination for peptides, and

(7) Peptide sequencing.

Application Received by Commissioner of Customs: August 26, 1992.

Docket Number: 92-131. *Applicant:* Woods Hole Oceanographic Institution, Woods Hole, MA 02543. *Instrument:* Mass Spectrometer, Model 252. *Manufacturer:* Finnigan MAT, Germany. *Intended Use:* The instrument will be used for the study of calcium carbonate samples which will be analyzed for isotopic variations in order to determine past changes in the earth's climate. The objectives pursued in the research are to investigate and determine:

(1) The range of variability in the ocean-atmosphere-cryosphere systems;

(2) The causes of climate change on decadal to millennial time scales;

(3) The relationship between climate change and the carbon cycle system;

(4) The relationship between surface climate and deep water circulation.

In addition, the instrument will be used for educational purposes in the courses 12.721 (Special Problems in Marine Geology and Geophysics) and 12.WTH (Thesis Research) which are both related to pre-generals or pre-defense thesis research. *Application Received by Commissioner of Customs:* August 27, 1992.

Docket Number: 92-132. *Applicant:* Rutgers University, Department of Physics, P.O. Box 849, Piscataway, NJ 08855-0849. *Instrument:* Ion Source, Model ICS-3. *Manufacturer:* High Voltage Engineering, The Netherlands. *Intended Use:* The instrument will be used in conjunction with an existing ion accelerator which will be used for studies of the geometric structure of the following materials: Copper, nickel, gold, platinum and silicon materials. An experiment will be conducted to measure the energy and angle of the backscattered ions. *Application Received by Commissioner of Customs:* August 27, 1992.

Docket Number: 92-133. *Applicant:* Federal Highway Administration, Payments Division, 6300 Georgetown Pike, McLean, VA 22101-2296. *Instrument:* Asphalt Concrete Slab Wheel Track Tester. *Manufacturer:* Helmut Wind, Germany. *Intended Use:* The instrument will be used to test asphalt paving mixtures which are primarily composed of asphalt, aggregate, and possible certain modifiers such as polymers. If it is found

that the device can model in-service rutting and moisture damage, then the machine will be used in various research projects related to the study of the combined effects of rutting and stripping. *Application Received by Commissioner of Customs:* August 27, 1992.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

Notice of Applications for Duty-Free Entry of Scientific Instruments

Pursuant to section 6(c) of the Educational, Scientific and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897; 15 CFR Part 301), we invite comments on the question of whether instruments of equivalent scientific value, for the purposes for which the instruments shown below are intended to be used, are being manufactured in the United States.

Comments must comply with § 301.5(a) (3) and (4) of the regulations and be filed within 20 days with the Statutory Import Programs Staff, U.S. Department of Commerce, Washington, DC 20230. Applications may be examined between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 92-110. *Applicant:* University of California, Los Angeles, Department of Psychiatry & Behavioral Sciences, 760 Westwood Plaza, Los Angeles, CA 90024-1759. *Instrument:* Mass Spectrometer, Model API III-R. *Manufacturer:* Perkin-Elmer Sciex Instruments, Canada. *Intended Use:* The instrument will be used for peptide sequencing and molecular mass determination of peptides, glycopeptides, proteins, glycoproteins, oligonucleotides, oligosaccharides and related metabolites, drugs, and drug metabolites in tissues and biological fluids. *Application Received by Commissioner of Customs:* July 17, 1992.

Docket Number: 92-111. *Applicant:* Colorado State University, Department of Physics, Fort Collins, CO 80523. *Instrument:* Upgrade Package for Mass Spectrometer. *Manufacturer:* John Sandercock Ltd., Switzerland. *Intended Use:* This is an upgrade package for a mass spectrometer which is being used to investigate linear and nonlinear magnetic excitations in thin film materials. Specific work will focus on the fundamental properties and behavior of high frequency magnetic solitons in thin film structures, new device possibilities that may utilize such excitations, and the physics of chaos as it relates to nonlinear spin wave excitations. *Application Received by Commissioner of Customs:* July 17, 1992.

Docket Number: 92-112. *Applicant:* Pennsylvania State University, Materials Research Laboratory, University Park, PA 16802. *Instrument:* Grating Tuned CO_2 Laser, Model PL6. *Manufacturer:* Edinburgh Instruments, United Kingdom. *Intended Use:* The instrument will be used as a powerful heat source for a Laser Heated Pedestal Growth Station for the growth of single crystal fibers of various compositions. The single growth technique is used to study materials properties (phase transition characteristics, melting behavior, crystal growth phenomena, effects of chemical modifications, etc.). *Application Received by Commissioner of Customs:* July 22, 1992.

Docket Number: 92-113. *Applicant:* New York University, 1158 Brown Building, Washington Square, NY 10003. *Instrument:* (3) Glass Bead Sterilizers, Model STERI 350. *Manufacturer:* Simon Keller AG, Switzerland. *Intended Use:* The instrument will be used in the investigation of developmental root morphogenesis in *Arabadopsis thalia* as well as nitrogen metabolism in Arabadopsis and Tobacco. *Application Received by Commissioner of Customs:* July 22, 1992.

Docket Number: 92-114. *Applicant:* Charlotte-Mecklenburg Hospital Authority, d/b/a Carolinas Medical Center, Cannon Research Center, 1000 Blythe Boulevard, Charlotte, NC 28232-2861. *Instrument:* Electron Microscope, Model CM-10. *Manufacturer:* N.V. Philips, The Netherlands. *Intended Use:* The instrument will be used by faculty to study several areas of biomedical interest, including:

(1) Cellular and tumor immunology;

(2) Cartilage, connective tissue, and bone formation in tissue culture models;

(3) Bone formation and degradation in mice with x-linked hypophosphatemia;

(4) Cardiac muscle morphology;

(5) Vascular intimal changes following various types of angioplasties, and

(6) Vascular morphology related to atherosclerosis.

Application Received by Commissioner of Customs: July 22, 1992.

Docket Number: 92-115. *Applicant:* U.S. Department of Commerce, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, 28 Tarzwell Drive, Narragansett, RI 02992.

Instrument: Data Acquisition and Logging System for Underwater Towed Body and Continuous Plankton Recorder System.

Manufacturer: Chelsea Instruments Ltd., United Kingdom.

Intended Use: The instrument will be used for studies of physical, chemical and biological states of the marine environment off the northeast coast of the United States. The experiments are standardized monitoring over broad ocean areas using research and opportunistic vessels. The objectives of the investigations are to develop indices of the state of health of the ocean ecosystem for predictive and management purposes. *Application Received by Commissioner of Customs:* July 22, 1992.

Docket Number: 92-116. *Applicant:* Albert Einstein College of Medicine, 1300 Morris Park Avenue, Bronx, NY 10461. *Instrument:* High Intensity Xenon Flashlamp System, Model XF-10.

Manufacturer: Dr. Gert Rapp, Germany. *Intended Use:* The instrument will be used for studies of Paramecium ciliary movements as well as its ciliary dynein activities, which is used as a model system for studying human trachael ciliary activity and sperm motility. The objectives of the studies are to (1) quantify dynein mediated microtubule movements with transiently applied minimum amount of ATP and (ii) measure changes in speed or direction of microtubule movements in response to changes in ATP, cAMP and calcium concentrations. *Application Received by Commissioner of Customs:* July 22, 1992.

Docket Number: 92-117. *Applicant:* University of California, Davis, Davis, CA 95616. *Instrument:* Electrophoresis for Solid Particles in Suspension, Model MKII. *Manufacturer:* Rank Brothers, United Kingdom. *Intended Use:* The instrument will be used to examine the oxidation reduction behavior of aqueous chromium in the presence of manganese dioxide and low molecular weight organic acids such as oxalate. Experiments will be conducted to seek to examine the charge characteristics of the manganese dioxide in the presence of chromium and to investigate the mechanisms of Cr oxidation and reduction by manganese dioxide at various pH and organic acid levels. *Application Received by Commissioner of Customs:* July 23, 1992.

Docket Number: 92-118. *Applicant:* North Dakota State University, Biochemistry Department, Box 5456, Administration Building, Old Main, room 17, Fargo, ND 58105. *Instrument:* Spectrofluorimeter, Model DX.17MV. *Manufacturer:* Applied Photophysics, United Kingdom. *Intended Use:* The instrument will be used to investigate the molecular basis of enzyme catalyzed

reactions. The enzymes involved in these studies are fatty acyl CoA dehydrogenase, soybean lipoxygenase, glycogen phosphorylase, phosphorylase kinase, aldolase, phosphofructokinase and fructose biophosphatase. The instrument will be used to employ steady state and transient kinetic techniques to delineate the microscopic pathways of these enzymes. *Application Received by Commissioner of Customs:* July 28, 1992.

Docket Number: 92–119. *Applicant:* Howard Hughes Medical Institute, Box 9812, New Haven, CT 06536–0812. *Instrument:* Electron Microscope, Model CM10. *Manufacturer:* N.V. Philips, The Netherlands. *Intended Use:* The instrument will be used for analysis of biological specimens ranging from unicellular organisms to human tissues. The goal of the research will be to elucidate biological mechanisms at the cellular and subcellular levels. In addition, the instrument will be used to train pre and postdoctoral scientists in electron microscopy, in special courses in immunocytochemistry and electron microscopy in the Department of Cell Biology and in the course "Research Strategies in Molecular Genetics and Cell Biology." *Application Received by Commission of Customs:* July 28, 1992.

Docket Number: 92–120. *Applicant:* University of Virginia, Department of Pediatrics, Old Med School Hospital Drive, Charlottesville, VA 22908. *Instrument:* Automatic Karyotyping System, Model Cytoscan 3. *Manufacturer:* Applied Imaging International, United Kingdom. *Intended Use:* The instrument will be used for studies of chromosomes from cancer cells in order to identify recurring genetic changes characterizing human cancer cells. *Application Received by Commissioner of Customs:* July 28, 1992.

Docket Number: 92–121. *Applicant:* The Alexandria Hospital, 4300 Seminary Road, Alexandria, VA 22304. *Instrument:* Automatic Rapid Karyotyping System with Table, Model Cytoscan RK1. *Manufacturer:* Image Recognition Systems, United Kingdom. *Intended Use:* The instrument will be used to carry out automated computerized karyotyping of genetic specimens (amniocentesis, peripheral bloods, bone marrows and products of conception). It also will serve as a means by which documentation and storage of final result is achieved. *Application Received by Commissioner of Customs:* August 3, 1992.

Docket Number: 92–122. *Applicant:* County of Sacramento, 8521 Laguna Station Road, Elk Grove, CA 95758. *Instrument:* Mass Spectrometer, Model API III. *Manufacturer:* PE Sciex, Canada. *Intended Use:* The instrument will be used to identify and quantitate the organic and bio-organic chemicals present in wastewater and riverwater; the exact identities are not all known. A thorough study of the various wastewaters and riverwaters will be made with the intent to fully define the matrices involved as a means of establishing background data representing "normal" conditions; the current levels of industrial pollution should also result from this work. *Application Received by Commissioner of Customs:* August 5, 1992.

Docket Number: 92–124. *Applicant:* Louisiana State University Medical Center, Department of Anatomy, 1901 Perdido Street, New Orleans, LA 70112–1393. *Instrument:* Electron Microscope, Model JEM–1210EX. *Manufacturer:* JEOL Ltd., Japan. *Intended Use:* The instrument will be used for biomedical research to study the ultrastructure of tissue in the following proposed experiments:

(1) Localization of antibody labeling of various neurotransmitters and other neurochemicals within brain tissue,

(2) Localization of pathologies in cardiovascular tissue,

(3) Identification of pathology in retinal tissue after various retinal diseases, particularly retinitis pigmentosa and

(4) Characterization of defects in ultrastructure of tissue after various experimental manipulations.

In addition, the instrument will be used for training of graduate and medical students, postdoctoral fellows, medical residents and medical fellows. *Application Received by Commissioner of Customs:* August 5, 1992.

Docket Number: 92–125. *Applicant:* Lamont Doherty Geological, Observatory of Columbia University, Rt. 9W, Palisades, NY 10964. *Instrument:* ICP Mass Spectrometer, Model PQ2. *Manufacturer:* Vacuum General, United Kingdom. *Intended Use:* The instrument will be used in studies of geological rocks and minerals, solutions of sea water, riverwater, groundwater, atmospheric precipitation, sediments and their pore fluids, oceanic particulate materials, and other materials occurring on the surface and within the interior of the Earth. *Application Received by Commissioner of Customs:* August 5, 1992.

Docket Number: 92–126. *Applicant:* Texas A&M Research Foundation, Box 3758, University Drive and Wellborn Road, College Station, TX 77843. *Instrument:* Water Current Meter, Model SD–12. *Manufacturer:* Sensordata, Norway. *Intended Use:* The instrument will be used to measure three dimensional water velocity vectors in long-crested seas, short-crested seas and currents in the OTRC multi-directional wave/current model basin. *Application Received by Commissioner of Customs:* August 6, 1992.

Docket Number: 92–127. *Applicant:* Naval Hospital Oakland, Histopathology Laboratory, 8750 Mountain Boulevard, Building 500, Oakland, CA 94627–5000. *Instrument:* Electron Microscope, Model JEM–100CX. *Manufacturer:* JEOL, Japan. *Intended Use:* The instrument will be used to carry out high resolution investigations of kidney diseases (study of changes in glomerulous membranes) and various tumors especially the differential diagnosis of the various poorly differentiated anaplastic cancers. The instrument will also be used in the training of residents in the training program. *Application Received by Commissioner of Customs:* August 6, 1992.

Docket Number: 92–128. *Applicant:* University of California, Santa Barbara, Department of Geological Sciences, Santa Barbara, CA 93106. *Instrument:* Noble Mass Spectrometer, Model MAP 216. *Manufacturer:* Mass Analyzer Products, Ltd., United Kingdom. *Intended Use:* The instrument will be used to measure the isotopic composition of Ar in a variety of minerals and rocks in order to determine their geologic ages. *Application Received by Commissioner of Customs:* August 6, 1992.

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 92–23379 Filed 9–24–92; 8:45 am]

BILLING CODE 3510–DS–M

University of Arizona; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89–651; 80 Stat. 897; 15 CFR part 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington DC.

Docket Number: 92–082. *Applicant:* University of Arizona, Tucson, AZ 85721. *Instrument:* Mass Spectrometer, Model Sector 54. *Manufacturer:* VG Isotech, Ltd., United Kingdom. *Intended Use:* See notice at 57 FR 30471, July 9, 1992.

Comments: None received. *Decision:* Approved. No instrument of equivalent

scientific value to the foreign instrument, for such purposes as it is intended to be used, is being manufactured in the United States.
Reasons: The foreign instrument provides: (1) internal precisions to 0.001% for neodymium and strontium; 0.002% for lead; and 0.05% for osmium, (2) seven Faraday collectors and (3) a Daly detector. These capabilities are pertinent to the applicant's intended purpose and we know of no other instrument or apparatus of equivalent scientific value to the foreign instrument which is being manufactured in the United States.

Frank W. Creel,

Director, Statutory Import Programs Staff.

BILLING CODE 3510-DS-M

Virginia Polytechnic Institute and State University; Decision on Application for Duty-Free Entry of Scientific Instrument

This decision is made pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897; 15 CFR 301). Related records can be viewed between 8:30 a.m. and 5 p.m. in room 4211, U.S. Department of Commerce, 14th and Constitution Avenue, NW., Washington, DC.

Docket Number: 92-007R. *Applicant:* Virginia Polytechnic Institute and State University, Blacksburg, VA 24061. *Instrument:* Plasma Etcher, Model CSE-2120L. *Manufacturer:* ULVAC, Japan. *Intended Use:* See notice at 57 FR 6000, February 19, 1992.

Comments: None received. *Decision:* Denied. *Reasons:* The application was provisionally denied (DWOP) in accord with 15 CFR 301.5(e). The applicant requested duty-free entry on grounds that the foreign article was a gift and that no domestic manufacturer of similar equipment was likely to offer such a donation. The DWOP informed the applicant that neither cost nor insufficient funds to purchase can justify duty wavier, which must be based on the technical inadequacy of domestic instruments for specific research needs pursuant to 15 CFR 301.5(d)(1)(i). Consultants at the National Institute of Standards and Technology provided us a list of twelve domestic suppliers of comparable equipment potentially capable of fulfilling the applicant's requirements. The DWOP asked the applicant to describe why products of these manufacturers would be unacceptable for the intended uses.

The applicant's resubmission stated that:

> You are correct in that we could have purchased the equipment from a U.S. company. The cost for new equipment would be approximately $250,000; if the equipment were used it would have cost approximately $150,000. As it is we were able to obtain the equipment for the cost of shipping only, approximately $5,200.

Pursuant to 15 CFR 301.5(e)(7):

> The resubmission should address the specific deficiencies cited in the DWOP. The Director may draw appropriate inferences from the failure of an applicant to provide the information requested in the DWOP.

The resubmission merely amplified the applicant's original rationale and failed to provide any evidence, as requested, of deficiencies of products from the list of domestic vendors supplied by our consultants. The statement that "* * * we could have purchased the equipment from a U.S. company" without elaboration implies that such equipment would be satisfactory, albeit costly. We deny the application because the applicant failed to address the specific deficiencies cited in the DWOP in accordance with 15 CFR 301.5(e)(7).

Frank W. Creel,

Director, Statutory Import Programs Staff.

[FR Doc. 92-23376 Filed 9-24-92; 8:45 am]

BILLING CODE 3510-DS-M

National Oceanic and Atmospheric Administration

Coastal Zone Management; Federal Consistency Appeal by Niantic Dockominium Association from an Objection by the State of Connecticut

AGENCY: National Oceanic and Atmospheric Administration, Commerce.

ACTION: Notice of dismissal.

On July 9, 1992, the Under Secretary for Oceans and Atmosphere, United States Department of Commerce, dismissed the consistency appeal of Niantic Dockominium Association (Appellant) filed on January 10, 1991, with the Secretary of Commerce (Secretary) pursuant to section 307(c)(3)(A) of Coastal Zone Management Act of 1972 (CZMA), as amended 16 U.S.C. 1451 *et seq.*, and the Department of Commerce's implementing regulations at 15 CFR part 930, subpart H. The Appellant applied to the U.S. Army Corps of Engineers (Corps) for a permit to conduct a dredge and fill operation, involving 2,000 cubic yards of fill material, to relocate a section of the presently-authorized Federal channel in the Niantic River, in the Town of East Lyme, County of New London, Connecticut. The Appellant proposed to relocate the channel in order to maintain existing marine structures, parts of which purportedly encroach upon the Federal channel. In conjunction with the Federal permit application, the Appellant submitted to the Corps for review by the State of Connecticut Department of Environmental Protection (State), the State's coastal management agency, under section 307(c)(3)(A) of the CZMA, a certification that the proposed activity is consistent with the State's Federally-approved Coastal Management Program (CMP).

On August 21, 1990, the State objected to the Appellant's consistency certification for the proposed project on the ground that the proposed dredge and fill operation and channel realignment were not in accordance with the State's CMP policy that requires that structures in coastal water be designed, constructed and maintained so as to minimize adverse impacts on coastal resources.

The Federal regulations implementing the CZMA provide, in relevant part, that the Secretary may dismiss consistency appeals for "good cause," including "Secretarial receipt of a detailed comment from the Federal agency stating that the agency has disapproved the Federal license, permit or assistance applications." 15 CFR 930.138(c).

On May 6, 1992, the Corps issued a letter to the Appellant denying the Appellant's permit application. In that denial, the Corps District Engineer provided a detailed description of the location and extent of the proposed dredge and fill operation, and a summary of the basis for the permit denial, including a determination, in accordance with 33 CFR 320-330, that the project is contrary to the public interest.

In light of the Federal permitting agency's decision to deny the Appellant's permit application, the Under Secretary dismissed the appeal for good cause pursuant to 15 CFR 930.128(c). The Appellant may not file another appeal from the State's objection to this permit application.

FOR ADDITIONAL INFORMATION CONTACT: Brett R. Joseph, Attorney-Adviser, Office of the Assistant General Counsel for Ocean Services, National Oceanic and Atmospheric Administration, U.S. Department of Commerce, 1825 Connecticut Avenue, N.W., suite 603, Washington, DC 20235, (202) 606-4200.

(Federal Domestic Assistance Catalog No. 11.419 Coastal Zone Management Program Assistance)

Dated: September 18, 1992.

Thomas A. Campbell,

General Counsel.

BILLING CODE 3510-08-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Adjustment of an Import Limit for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Brazil

September 21, 1992.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs increasing a limit.

EFFECTIVE DATE: September 22, 1992.

FOR FURTHER INFORMATION CONTACT: Nicole Bivens Collinson, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 377-4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927-5850. For information on embargoes and quota re-openings, call (202) 377-3715.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The current limit for Category 225 is being increased by application of swing.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 56 FR 60101, published on November 27, 1991). Also see 57 FR 21971, published on May 26, 1992.

The letter to the Commissioner of Customs and the actions taken pursuant to it are not designed to implement all of the provisions of the bilateral agreement, but are designed to assist only in the implementation of certain of its provisions.

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

September 21, 1992.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: This directive amends, but does not cancel, the directive issued to you on May 19, 1992, by the Chairman, Committee for the Implementation of Textile Agreements. That directive concerns imports of certain cotton, wool and man-made fiber textile products, produced or manufactured in Brazil and exported during the twelve-month period which began on April 1, 1992 and extends through March 31, 1993.

Effective on September 22, 1992, you are directed to amend further the May 19, 1992 directive to increase the limit for Category 225 to 8,892,488 square meters [1], as provided under the terms of the current bilateral textile agreement between the Governments of the United States and the Federative Republic of Brazil.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception to the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Philip J. Martello,

Acting Chairman, Committee for the Implementation of Textile Agreements.

[FR Doc. 92-23290 Filed 9-24-92; 8:45 am]

BILLING CODE 3510-DR-F

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

Procurement List; Proposed Additions and Deletion

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed Additions to and Deletion from Procurement List.

SUMMARY: The Committee has received proposals to add to the Procurement List commodities to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and to delete a service previously furnished by such agencies.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 26, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed additions, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the commodities.

3. The action will result in authorizing small entities to furnish the commodities to the Government

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodities proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodities to the Procurement List:

Charcoal, Activated, Technical
6810-00-728-7944
Nonprofit Agency: Pittsburgh Blind Association, Pittsburgh, Pennsylvania

Flag, Signal
8345-00-935-3203
Nonprofit Agency: Northeastern Association of the Blind, Albany, New York

Deletion

It is proposed to delete the following service from the Procurement List:

Janitorial/Custodial
Charles E. Boston USARC

[1] The limit has not been adjusted to account for any imports exported after March 31, 1992.

Houma, Louisiana

Beverly L. Milkman,

Executive Director.

[FR Doc. 92-23355 Filed 9-24-92; 8:45 am]

BILLING CODE 6820-33-M

Procurement List; Proposed Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Proposed additions to procurement list.

SUMMARY: The Committee has received a proposal to add to the Procurement List commodities to be furnished by a nonprofit agency employing persons who are blind or have other severe disabilities.

COMMENTS MUST BE RECEIVED ON OR BEFORE: October 26, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 557-1145.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a)(2) and 41 CFR 51-2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed action. If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the commodities listed below from a nonprofit agency employing individuals who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities to the Government.

2. The action will result in authorizing a small entity to furnish the commodities to the Government.

3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodities proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

It is proposed to add the following commodities to the Procurement List:

Tube, Mailing and Filing
8110-00-244-7435
8110-00-271-1508
8110-00-271-1509
8110-00-291-0344
8110-00-291-0345
8110-00-291-0346
8110-00-291-0347
8110-00-291-0348
8110-00-725-1471
8110-00-298-2046
8110-00-969-5406
Nonprofit agency: Pinellas Association for Retarded Children, St. Petersburg, Florida.

Beverly L. Milkman,

Executive Director.

[FR Doc. 92-23356 Filed 9-24-92; 8:45 am]

BILLING CODE 6820-33-M

Procurement List; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to the Procurement List an arm and leg splint to be furnished by a nonprofit agency employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 26, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On July 24, 1992, the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (57 FR 32976) of the proposed addition of these splints to the Procurement List. During the development phase of this proposed addition to the Procurement List, the current contractor noted that it is a minority firm and indicated that the addition would cause it to lose sales and jobs, with negative effects on profitability and employee morale. The contractor did not provide details.

In light of the current contractor's total sales volume, the Committee does not consider the loss of sales caused by adding these splints to the Procurement List to constitute severe adverse impact. Moreover, the Committee took into account the impact of previous additions on the current contractor and noted that despite such additions, the annual sales volume had grown significantly. The Committee believes that the possible loss of jobs for minority employees, which has not been substantiated, is outweighed by the creation of employment for blind persons among whom unemployment is extremely high.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to produce the commodities, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the commodities listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities to the Government.

2. The action will not have a severe economic impact on current contractors for the commodities.

3. The action will result in authorizing small entities to furnish the commodities to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodities proposed for addition to the Procurement List.

Accordingly, the following commodities are hereby added to the Procurement List:

Splint, Arm, Pneumatic
6515-00-935-6592
Splint, Leg, Pneumatic
6515-00-935-6593

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,

Executive Director.

[FR Doc. 92-23357 Filed 9-24-92; 8:45 am]

BILLING CODE 6820-01-M

Procurement List; Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to procurement list.

SUMMARY: This action adds to the Procurement List a barracks trunk locker

to be furnished by a nonprofit agency employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 26, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman, (703) 557-1145.

SUPPLEMENTARY INFORMATION: On April 17, 1992, the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (57 FR 13715) of the proposed addition of this locker to the Procurement List. After the close of the comment period, comments were received from the current contractor and the Economic Development Department of the city in which the contractor is located. Both comments indicated that the Government sales of the trunk locker proposed for addition to the Procurement List constitute a large part of the contractor's total sales and that loss of these sales could cause the contractor to close, resulting in unemployment for 100 economically disadvantaged people.

In response to these comments and information about declining government demand for the trunk locker, the Committee has decided to reduce the portion of the Government requirement for the trunk to be added to the Procurement List to 10%. This action will enable the Committee to fulfill its mission of creating employment for people with severe disabilities without the potential of causing a severe adverse impact on the current contractor.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to produce the commodity, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.

2. The action will not have a severe economic impact on current contractors for the commodity.

3. The action will result in authorizing small entities to furnish the commodity to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodity proposed for addition to the Procurement List.

Accordingly, the following commodity is hereby added to the Procurement List:

Trunk Locker, Barracks
8460-00-243-3234
(10% of the Government requirement)

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,
Executive Director.

[FR Doc. 92-23358 Filed 9-24-92; 8:45 am]
BILLING CODE 6820-33-M

Procurement List; Addition

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Addition to procurement list.

SUMMARY: This action adds to the Procurement List a loop clamp to be furnished by a nonprofit agency employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 26, 1992.

ADDRESSES: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202-3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557-1145.

SUPPLEMENTARY INFORMATION: On July 31, 1992, the Committee for Purchase from the Blind and Other Severely Handicapped published a notice (57 FR 33943) of the proposed addition of this clamp to the Procurement List. While no comments were received during the public comment period, comments were received from the current contractor for this item in response to a Committee request for sales information related to another item under development for addition to the Procurement List. The President of the firm stated that in recent years sales had declined dramatically and that several employees had been laid off. He indicated that every order was needed and that laid off employees could not be rehired, or new employees hired, if the item were added as proposed. He pointed out that the firm was a small business and the vast majority of its sales were to the Federal Government.

The loop clamp being added to the Procurement List represents a small percentage of the contractor's total sales. Consequently, the Committee has concluded that the loss of this item will not have a severe adverse impact on the contractor, even considering the current state of the economy. The Committee believes that any potential loss of employment by the contractor's workers or its inability to rehire workers previously laid off is outweighed by the employment that this action will generate for persons with severe disabilities.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to produce the commodity, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the commodity listed below is suitable for procurement by the Federal Government under 41 U.S.C. 46-48c and 41 CFR 51-2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodity to the Government.

2. The action will not have a severe economic impact on current contractors for the commodity.

3. The action will result in authorizing small entities to furnish the commodity to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46-48c) in connection with the commodity proposed for addition to the Procurement List.

Accordingly, the following commodity is hereby added to the Procurement List:
Clamp, Loop, 5340-01-277-6184.

This action does not affect contracts awarded prior to the effective date of this addition or options exercised under those contracts.

Beverly L. Milkman,
Executive Director.

BILLING CODE 6820-33-M

Procurement List; Additions

AGENCY: Committee for Purchase from the Blind and Other Severely Handicapped.

ACTION: Additions to procurement list.

SUMMARY: This action adds to the Procurement List commodities and services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: October 26, 1992.

ADDRESS: Committee for Purchase from the Blind and Other Severely Handicapped, Crystal Square 3, suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3509.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 557–1145.

SUPPLEMENTARY INFORMATION: On June 12, 26, July 31, August 7 and 14, 1992, the Committee for Purchase from the Blind and Other Severely Handicapped published notices (57 FR 25023, 28658, 33943, 34912 and 36640) of proposed additions to the Procurement List. After consideration of the material presented to it concerning capability of qualified nonprofit agencies to produce the commodities and provide the services, fair market price, and impact of the addition on the current or most recent contractors, the Committee has determined that the commodities and services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities or services to the Government.

2. The action will not have a severe economic impact on current contractors for the commodities or services.

3. The action will result in authorizing small entities to furnish the commodities or services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities or services proposed for addition to the Procurement List.

Accordingly, the following commodities and services are hereby added to the Procurement List:

BILLING CODE 3710-08-M

Army Science Board; Open Meeting

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following Committee Meeting:

Name of the Committee: Army Science Board (ASB).

Dates of the Meetings: 13-14 October 1992.

Time: 0830-1700 Hours.

Place: Vicksburg, MS and vicinity.

Agenda: The Army Science Board's Infrastructure and Environment Panel will hold its fourth meeting on "Groundwater Modeling in the Army's Environmental Restoration Programs." This meeting will be open to the public. Any interested person may attend, appear before, or file statements with the committee at the time and in the manner permitted by the committee. The ASB Administrative Officer, Sally Warner, may be contacted for further information (703) 695-0781.

Sally A. Warner,

Administrative Officer, Army Science Board.

BILLING CODE 3710-08-M

DEPARTMENT OF EDUCATION

Advisory Committee on Student Financial Assistance; Meeting

AGENCY: Advisory Committee on Student Financial Assistance, Education.

ACTION: Notice of upcoming meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda of a forthcoming hearing sponsored by the Advisory Committee on Student Financial Assistance. This notice also describes the functions of the Committee. Notice of this meeting is required under section 10(a)(2) of the Federal Advisory Committee Act. This document is intended to notify the general public.

DATES AND TIMES: Friday, October 16, 1992, beginning at 9 a.m. and ending at 5 p.m.

ADDRESSES: Rayburn House Office Building, room 2175, Independence Avenue between South Capitol and First Street, SW., Washington DC 20515.

FOR FURTHER INFORMATION CONTACT: Dr. Brian K. Fitzgerald, Staff Director, Advisory Committee on Student Financial Assistance, room 4600, ROB-3, 7th & D Streets, SW., Washington, DC 20202-7582 (202) 708-7439.

SUPPLEMENTARY INFORMATION: The Advisory Committee on Student Financial Assistance is established under section 491 of the Higher Education Act of 1965 as amended by Public Law 100-50 (20 U.S.C. 1098). The Advisory Committee is established to provide advice and counsel to the Congress and the Secretary of Education on student financial aid matters, including providing technical expertise with regard to systems of need analysis and application forms, making recommendations that will result in the maintenance of access to postsecondary education for low- and middle-income students, and conducting a study of institutional lending in the Stafford Student Loan Program. The Congress has also directed the Advisory Committee to assist with a series of special assessments and produce an in-depth student loan simplification.

The Advisory Committee will meet in Washington, DC on October 16, 1992, from 9 a.m. to 5 p.m.

The proposed agenda includes discussion sessions on (a) the paperwork burden experienced by financial aid officers within the current structure of the loan program; (b) simplification and standardization of forms, procedures and other aspects of guaranty operations; (c) simplification of the bank repayment process; and (4) efficient utilization of loan programs. Those who cannot attend the hearing are invited to submit written testimony which will be presented to the Advisory Committee members and will become a part of the Committee's official records.

The intent of the Washington hearing is to involve as witnesses many of the education, financial aid and student loan associations. In addition, members of congressional staffs are being invited to share their views on the study and the loan program.

Records are kept of all Committee proceedings, and are available for public inspection at the Office of the Advisory Committee on Student Financial Assistance, room 4600, 7th and D Streets, SW., Washington, DC from the hours of 9 a.m. to 5:30 p.m., weekdays, except Federal holidays.

Dated: September 21, 1992.

Brian K. Fitzgerald,

Staff Director Advisory Committee on Student Financial Assistance.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. ER92-836-000, et al.]

PacifiCorp, et al.; Electric Rate, Small Power Production, and Interlocking Directorate Filings

Take notice that the following filings have been made with the Commission:

1. PacifiCorp

[Docket No. ER92-836-000]

September 17, 1992.

Take notice that PacifiCorp on September 11, 1992, tendered for filing in accordance with 18 CFR part 35 of the Commission's Rules and Regulations, a Letter Agreement between PacifiCorp and Western Area Power Administration (Western) dated September 10, 1992 (Agreement).

The Agreement provides for establishing the interconnection between PacifiCorp's and Western's electrical systems at Flaming Gorge as an interim Point of Interconnection under PacifiCorp Rate Schedule FERC No. 262.

PacifiCorp requests an effective date of September 14, 1992, the date Western schedules at the Flaming Gorge Point of Interconnection are to commence.

Copies of this filing were supplied to Western, the Public Utility Commission

of Oregon and the Utah Public Service Commission.

Comment date: September 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

2. Iowa Electric Light and Power Co.

[Docket No. ES92-57-000]

September 16, 1992.

Take notice that on September 10, 1992, Iowa Electric Light and Power Company filed an application with the Federal Energy Regulatory Commission under section 204 of the Federal Power Act requesting authorization to issue not more than $125 million of short-term notes with a final maturity date no later than December 31, 1996.

Comment date: October 9, 1992, in accordance with Standard Paragraph E at the end of this notice.

3. Inter-Power/AhlCon Partners, L.P.

[Docket No. QF87-632-002]

September 16, 1992.

On September 10, 1992, Inter-Power of Pennsylvania, Inc., on behalf of Inter-Power/AhlCon Partners, L.P. (Inter-Power/AhlCon) of Three Penn Center West, suite 401, Pittsburgh, Pennsylvania 15276, submitted for filing an application for recertification of a facility as a qualifying small power production facility pursuant to § 292.207(b) of the Commission's Regulations. No determination has been made that the submittal constitutes a complete filing.

The small power production facility will be located near the village of Clover, in Cambria County, Pennsylvania. The Commission previously certified the facility as a qualifying small power production facility, Inter-Power of Pennsylvania, Inc., 41 FERC ¶ 62,175 (1987), and recertified the facility as a qualifying small power production facility, Inter-Power/AhlCon Partners, L.P., 59 FERC ¶ 62,059 (1992), to reflect a change in the ownership, increase in the maximum net capacity of the facility, and inclusion of a transmission line that was to connect the facility with Pennsylvania Electric Company. The instant request for recertification is due to a sale-lease-back arrangement of the facility, a change in ownership structure of the lessee, Inter-Power/AhlCon, and in increase in the maximum net capacity of the facility to 102 MW.

Comment date: October 26, 1992, in accordance with Standard Paragraph E at the end of this notice.

4. Indianapolis Power & Light Co.

[Docket No. ES92-58-000]

September 16, 1992.

Take notice that on September 10, 1992, Indianapolis Power & Light Company filed an application with the Federal Energy Regulatory Commission under section 204 of the Federal Power Act requesting authorization to issue not more than $150 million of unsecured short-term promissory notes on or before December 31, 1994, with a final maturity date no later than December 31, 1994.

Comment date: October 9, 1992, in accordance with Standard Paragraph E at the end of this notice.

5. Old Dominion Electric Cooperative

[Docket No. ES92-58-000]

September 16, 1992.

Take notice that on September 11, 1992, Old Dominion Electric Cooperative filed an application with the Federal Energy Regulatory Commission under section 204 of the Federal Power Act requesting authorization to issue not more than $60.5 million of Tax-Exempt Debt Securities. Also, Old Dominion Electric Cooperative Requests exemption from the Commission's competitive bidding regulations.

Comment date: October 9, 1992, in accordance with Standard Paragraph E at the end of this notice.

6. Commonwealth Edison Co.

[Docket No. ER88-525-002]

September 16, 1992.

Take notice that on August 14, 1992, Commonwealth Edison Company tendered for filing its compliance filing in the above referenced docket.

Comment date: September 29, 1992, in accordance with Standard Paragraph E at the end of this notice.

7. Niagara Mohawk Power Corp.

[Docket No. ER92-413-000]

September 16, 1992.

Take notice that on August 28, 1992, Niagara Mohawk Power Corporation (Niagara) tendered for filing a supplemental filing in the above-referenced docket.

Comment date: September 29, 1992, in accordance with Standard Paragraph E at the end of this notice.

8. The Detroit Edison Co.

[Docket No. ER92-728-000]

September 17, 1992.

Take notice that The Detroit Edison Company (Detroit Edison) on September 1, 1992, tendered for filing (1) First Revised Sheet No. 10b to Detroit Edison's FERC Electric Tariff, Volume No. 1 which provides for the sale of experimental seasonal peaking capacity and energy, and (2) an executed service agreement between Detroit Edison and Wolverine Power Supply Cooperative, Inc. for the sale of such capacity and energy.

Detroit Edison requests an effective date of October 1, 1992 for both the service proposed under the rate schedule and the service agreement executed by Wolverine Power Supply Cooperative.

Comment date: September 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

9. Consumers Power Co.

[Docket No. ER92-816-000]

September 17, 1992.

Take notice that on September 1, 1992, Consumers Power Company (Consumers) tendered for filing a Service Agreement between Consumers and Wolverine Power Supply Cooperative, Inc. (Wolverine). Under the Service Agreement, Wolverine would receive transmission service under Consumers' FERC Electric Tariff, Original Volume No. 4. Copies of the filing were served on Wolverine and on the Michigan Public Service Commission.

Comment date: September 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

10. Pacific Gas and Electric Co.

[Docket Nos. EL89-34-005, EL89-34-003, ER88-107-001, ER88-120-001, E-7777-013 (Phase I), Project Nos. 137, No. 233-033, No. 1988-015, and No. 2735-027]

September 17, 1992.

Take notice that on August 26, 1992, pursuant to the Commission's May 12, 1992 letter, Pacific Gas and Electric Company (PG&E) advised the Commission of the Northern California Power Agency's (NCPA) election to discontinue the applicability of the Annual Non-Diablo Partial Requirements Demand Rate Adjustment Factor as defined in section IV.3(b) of appendix A of the Interconnection Agreement between PG&E and NCPA.

Copies of this filing have been served upon NCPA, the California Public Utilities Commission and the parties to the service list in the above referenced dockets.

Comment date: September 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

11. Philadelphia Electric Co.

[Docket No. ER92-833-000]

September 17, 1992.

Take notice that on September 10, 1992, Philadelphia Electric Company (PE) tendered for filing under Section 205 of the Federal Power Act and part 35 of the Regulations issued thereunder, an Agreement between PE and Delmarva Power & Light Company (Delmarva) dated September 3, 1992.

PE states that the Agreement sets forth the terms and conditions for the sale of system energy which it expects to have available for sale from time to time and the purchase of which will be economically advantageous to Delmarva. The Agreement supersedes an agreement between PE and Delmarva dated March 12, 1991, which is on file with the Commission as PE's Rate Schedule FERC No. 56. In order to optimize the economic advantage to both PE and Delmarva, PE requests that the Commission waive its customary notice period and permit the agreement to become effective on September 14, 1992.

PE states that a copy of this filing has been sent to Delmarva and will be furnished to the Pennsylvania Public Utility Commission, the Delaware Public Service Commission, the Maryland Public Service Commission, and the Virginia State Corporation Commission.

Comment date: September 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

12. Wisconsin Power and Light Co.

[Docket No. ER92-837-000]

September 17, 1992.

Take notice that on September 11, 1992, Wisconsin Power and Light Company tendered for filing with the Federal Energy Regulatory Commission two Letter Agreements between Wisconsin Power and Light Company (WP&L) and Interstate Power. Under the General Purpose Energy Agreement WP&L will make non-firm energy available to Interstate Power Company with terms and quantity to be arranged upon mutual agreement. Under the Negotiated Capacity Agreement WP&L will make capacity and energy available to Interstate Power Company with negotiated degrees of firmness, variable capacity charges, and variable time duration.

Comment date: September 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

13. United States Department of Energy—Boulder Canyon Project

[Docket No. EF91-5091-000]

September 17, 1992.

Take notice that on September 15, 1992, the Western Area Power Administration of the United States Department of Energy (Western) filed a document entitled "Settlement Agreement." Western describes the document as a fully executed settlement agreement and states that it has been served on all parties on the service list in this proceeding.

Comment date: October 5, 1992, in accordance with Standard Paragraph E at the end of this notice.

14. Northern States Power Co. (Minnesota Co.)

[Docket No. ER92-79-000]

September 17, 1992.

Take notice that on September 9, 1992, Northern States Power Company (Minnesota) [NSP-MN or NSP] tendered for filing an amendment supporting acceptance for filing of certain Joint Transmission Network Agreements dated January 31, 1991, between NSP-MN, Cooperative Power Association [CPA], and United Power Association [UPA].

The Joint Transmission Network [JTN] Agreements essentially provide that the Parties utilize, and share the costs of, a designed 345 kV Joint Transmission Network (JTN) to deliver electric power and energy to their respective transmission systems. The Parties intend to either own facilities, or compensate other Parties providing facilities so that each Party's investment contribution in the JTN is commensurate with its use of the JTN in accordance with the JTN Agreements. The Parties desire to specify compensatory obligations among them in order to achieve parity between each Party's investment contribution and use of the JTN as of the effective date of the JTN Agreement. The amendment contains certain explanatory materials describing the purpose, intent and implementation of the JTN Agreements.

NSP requests that the JTN Agreements be accepted for filing effective January 1, 1985, and requests waiver of Commission's notice requirements in order for the Agreement to be accepted for filing on that date. NSP requests that the Agreement be accepted as a supplement to Rate Schedule FERC No. 439, the original rate schedule for service to CPA and UPA.

Comment date: September 30, 1992, in accordance with Standard Paragraph E at the end of this notice.

15. Montaup Electric Co.

[Docket No. ER92-818-000]

September 17, 1992.

Take notice that on September 1, 1992, Montaup Electric Company (Montaup) filed a Notice of Cancellation of an agreement between itself and Massachusetts Wholesale Electric Company (MMWEC).

Under this Agreement Montaup agreed to sell to MMWEC capacity and energy from its Canal Electric Unit No. 2 for the period May 1, 1992 through October 31, 1992. On May 8, 1992, Montaup tendered for filing this unit sale agreement for the sales to commence May 1, 1992. By order of August 3, 1992, the Commission accepted the MMWEC filing and ordered refunds of amounts in excess of variable costs collected for service prior to July 7, 1992. On August 21, 1992, Montaup filed an Application for Rehearing requesting the Commission to revise its order to eliminate the refunds. No action has been taken on the Application for Rehearing.

The Agreement between Montaup and MMWEC expires by its own terms on October 31, 1992. Montaup hereby requests that the Amendment with MMWEC be terminated on that date.

Comment date: September 30,1992, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraphs

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

[FR Doc. 92-23282 Filed 9-24-92; 8:45 am]

BILLING CODE 6717-01-M

Application Filed With the Commission

September 21, 1992.

Take notice that the following hydroelectric application has been filed with the Federal Energy Regulatory Commission and is available for public inspection.

a. *Type of Application:* Conduit Exemption.

b. *Project No.:* 11050–001.

c. *Date Filed:* September 7, 1992.

d. *Applicant:* North Side Canal Company.

e. *Name of Project:* U–3.

f. *Location:* On the U Canal in Jerome County, Idaho, T. 7 S., R. 16 E., Sections 23, 24, and 25 (about 10 miles downstream from the head of the canal). The canal system originates from the Snake River near Milner Dam in the vicinity of Hazelton, Idaho.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Kip Runyan, Ida-West Energy Company, P.O. Box 7867, Boise, Idaho 83703, (208) 336–4254.

i. *FERC Contact:* Héctor M. Pérez at (202) 219–2843.

j. *Comment Date:* November 6, 1992.

k. *Description of Project:* The proposed project would consist of: (1) An intake structure within the canal embankment; (2) a 150-foot-long, 10-foot-high by 10-foot-wide reinforced concrete box-shaped penstock; (3) an 8-foot-high by 8-foot-wide box-shaped bypass line; (4) a powerhouse with a 3.2-megawatt generating unit; and (5) other appurtenances. The project would have an estimated average annual generation of 11,000 megawatthours.

l. Under § 4.32(b)(7) of the Commission's regulations (18 CFR), if any resource agency, Indian Tribe, or person believes that the applicant should conduct an additional scientific study to form an adequate factual basis for a complete analysis of the application on its merits, they must file a request for the study with the Commission, not later than 60 days after the application is filed, and must serve a copy of the request on the applicant.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. CP92–699–000, et al.]

Panhandle Eastern Pipe Line Co., et al.; Natural Gas Certificate Filings

Take notice that the following filings have been made with the Commissions:

1. Panhandle Eastern Pipe Line Co.

[Docket No. CP92–699–000]

September 15, 1992.

Take notice that on September 11, 1992, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642 Houston, Texas 77251–1642, filed in Docket No. CP92–699–000 a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate a new delivery point for service to United Cities Gas Company (United Cities), an existing jurisdictional sales customer, under Panhandle's blanket certificate issued in Docket No. CP83–83–000, all as more fully described in the request which is on file with the Commission and open to public inspection.

Panhandle requests authorization to install the proposed delivery point, to be known as Hannibal #2 and consisting of two 4-inch hot taps and appurtenant facilities on Panhandle's 10 and 12-inch Quincy laterals in Marion County, Missouri. It is stated that the delivery point is required to accommodate the delivery of gas to be sold by Panhandle to United Cities under Panhandle's Rate Schedule G–2 and pursuant to a sales agreement between Panhandle and United Cities dated September 9, 1992.

It is asserted that the delivery point would be used for the delivery of up to 11,500 Mcf on a peak day and that this volume would be added to the sales agreement between Panhandle and United Cities. It is further asserted that the volumes proposed for delivery at Hannibal #2 would not exceed United Cities' existing entitlement from Panhandle and that the proposal would have no impact on Panhandle's peak day or annual deliveries. The construction cost of the facilities is estimated at $209,000, for which Panhandle would be reimbursed by United Cities.

Comment date: October 30, 1992, in accordance with Standard Paragraph G at the end of this notice.

2. Alabama-Tennessee Natural Gas Co.

[Docket No. CP92–694–000]

September 15, 1992.

Take notice that on September 8, 1992, Alabama-Tennessee Natural Gas Company (Alabama-Tennessee), P.O. Box 918, Florence, Alabama 35631, filed in Docket No. CP92–694–000 a request pursuant to sections 7(b), 157.205 and 157.216 of the Commission's Regulations under the Natural Gas Act for authorization to abandon firm sales service of natural gas by Alabama-Tennessee to Amoco Chemical Corporation (Amoco) in Decatur, Alabama under its blanket certificate issued in Docket No. CP85–359–000, all as more fully set forth in the request on file with the Commission and open to public inspection.

Alabama-Tennessee states that it is seeking authorization to abandon direct sales service in the amount of 4,600 Mcf of natural gas per day presently dedicated on a firm basis to Amoco. Alabama-Tennessee states that the Commission authorized this service to Amoco under a certificate of public convenience and necessity which it issued on April 10, 1970 in Docket No. CP70–191. Alabama-Tennessee does not propose the abandonment of any facilities in connection with this request.

Alabama-Tennessee states that it has not made firm natural gas deliveries to Amoco under the subject certificate since October 31, 1988, when the underlying contract for the provision of direct sales service by Alabama-Tennessee to Amoco terminated. Alabama-Tennessee states that Amoco does not wish to continue, extend or renew this direct sales service, and that Amoco consents to this request for abandonment.

Comment date: October 30, 1992, in accordance with Standard Paragraph G at the end of this notice.

3. Panhandle Eastern Pipe Line Co.

[Docket No. CP92–700–000]

September 15, 1992.

Take notice that on September 11, 1992, Panhandle Eastern Pipe Line Company (Panhandle), P.O. Box 1642, Houston, Texas 77251–1642, filed in Docket No. CP92–700–000, a request pursuant to § 157.205 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to upgrade and operate its existing delivery meter and appurtenant facilities at the Cabot Corporation (Cabot) Plant M&R Station No. 9176 located in Douglas County, Illinois to increase the delivery pressure to Cabot under its blanket certificate issued in Docket No. CP83–83–000 pursuant to section 7 of the Natural Gas Act, all as more fully set forth in the request on file with the Commission and open to public inspection.

Panhandle states that it requests authority to increase the delivery pressure at Station 9176 from 25 psig to 350 psig. Panhandle further states that the total volumes to be delivered to Cabot will not exceed Cabot's existing contract demand. Panhandle estimates that the cost of construction would be approximately $30,000 which would be reimbursed to Panhandle by Cabot.

Comment date: October 30, 1992, in accordance with Standard Paragraph G at the end of this notice.

4. Tennessee Gas Pipeline Co.

[Docket No. CP92–701–000]

September 15, 1992.

Take notice that on September 11, 1992, Tennessee Gas Pipeline Company (Tennessee), P.O. Box 2511, Houston, Texas 77252, filed in Docket No. CP92–701–000 a request pursuant to §§ 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 175.212) for authorization to establish two new alternate interim delivery points to its existing firm transportation contract with Boston Gas Company (Boston Gas) under Tennessee's blanket certificate issued in Docket No. CP82–413–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Tennessee states that, pursuant to Boston Gas' request, it has agreed to utilize two existing delivery points on an alternate interim basis only, near Reading and Beverly-Salem, Massachusetts, under the provisions of the NET service agreement between Tennessee and Boston Gas. Tennessee further states that the two new points are needed for use on an alternate interim basis because the previously authorized firm delivery point (authorized at 53 FERC 61,194) that was to be constructed at Danvers, Massachusetts, has not yet been constructed. Tennessee explains that such delivery point is the subject of expressed adamant opposition by local residents and that Tennessee and Boston Gas are currently discussing other possible locations for the Danvers delivery point.

Comment date: October 30, 1992, in accordance with Standard Paragraph G at the end of this notice.

5. Northern Natural Gas Co.

[Docket No. CP92–707–000]

September 17, 1992.

Take notice that on September 15, 1992, Northern Natural Gas Company (Northern), 1111 South 103rd Street, Omaha, Nebraska 68124–1000, filed in Docket No. CP92–707–000 a request pursuant to § § 157.205 and 157.212 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205, 157.212) for authorization to increase deliveries of natural gas to Peoples Natural Gas Company, A Division of UtiliCorp United Inc. (Peoples), at an existing delivery point and to construct and operate related facilities under Northern's blanket certificate issued in Docket No. CP82–401–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

Northern proposes to deliver volumes amounting to 212 Mcf per day on a peak day basis, and 3,780 Mcf annually, at the East Big Marine Lake, Minnesota, delivery point. Northern states that the proposed volumes are within the currently authorized level of firm entitlements for Peoples. Northern explains that the deliveries of gas would be served from the total firm entitlements currently assigned to the community of Pine City. Northern states that Peoples has not requested that any firm entitlements be assigned to this delivery point. Northern advises that in addition to jurisdictional gas sales to Peoples under Northern's Rate Schedule CD–1, gas would be transported under Rate Schedule FT–1 for delivery to Peoples at the proposed delivery point. It is stated that the end use of the gas would be for residential, commercial, and industrial purposes. Northern estimates that the cost of upgrading the facilities would be $24,678, which would be reimbursed by Peoples.

Comment date: November 2, 1992, in accordance with Standard Paragraph G at the end of this notice.

6. Arkla Energy Resources, a division of Arkla, Inc.

[Docket No. CP92–696–000]

September 17, 1992.

Take notice that on September 11, 1992, Arkla Energy Resources, (AER), a division of Arkla, Inc. (Arkla), P.O. Box 21734, Shreveport, Louisiana 71151, filed in Docket No. CP92–696–000 a request pursuant to § § 157.205 and 157.211 of the Commission's Regulations under the Natural Gas Act (18 CFR 157.205) for authorization to construct and operate facilities in Oklahoma under its blanket certificate issued in Docket Nos. CP82–384–000 and CP92–384–001 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request that is on file with the Commission and open to public inspection.

AER states that it proposes to construct and operate one new delivery tap to EnMark Gas Corporation in Kay County, Oklahoma.

Comment date: November 2, 1992, in accordance with Standard Paragraph G at the end of this notice.

7. Northern Natural Gas Co.

[Docket No. CP92–702–000]

September 17, 1992.

Take notice that on September 14, 1992, Northern Natural Gas Company (Northern), P.O. Box 1188, Houston, Texas 77251–1188, filed in Docket No. CP92–702–000, a request pursuant to § 157.205 of the Commission's Regulations Under the Natural Gas Act (18 CFR 157.205) for authorization to upgrade an existing delivery point to accommodate increased natural gas deliveries to Peoples Natural Gas Company (Peoples), under the authorization issued in Docket No. CP82–401–000 pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

Northern states that it requests authority to upgrade the Schuyler TBS #2 delivery point located in Section 28, T17N, R3E, Colfax County, Nebraska to accommodate increased deliveries to Peoples under Northern's Rate Schedule IT–1. It is stated that Peoples has requested service at this delivery point starting with the 1992–93 heating season, due to the increased requirements within Peoples existing service area, primarily for Excel Packing Corporation, a beef processing operation.

Northern states that the estimated volume of natural gas to be delivered to Peoples at the Schuyler TBS #2 is expected to result in an increase in Northern's peak day deliveries of 960 Mcf per day and 132,000 Mcf per year on an annual basis. Further, it is estimated that the cost to upgrade the delivery point is $70,000.

Northern advises that the total volumes to be delivered to Peoples after the request do not exceed the total volumes authorized prior to the request. Northern further states that the proposed activity is not prohibited by its existing tariff and that it has sufficient capacity to accommodate the changes proposed herein without detriment or disadvantage to Northern's other customers.

Comment date: November 2, 1992, in accordance with Standard Paragraph G at the end of this notice.

8. K N Energy, Inc.

[Docket No. CP92–706–000]

September 17, 1992.

Take notice that on September 15, 1992, K N Energy, Inc. (K N), P.O. Box 281304, Lakewood, Colorado 80228, filed in Docket No. CP92–706–000, a request pursuant to § 157.205 of the Commission's Regulations Under the

Natural Gas Act (18 CFR 157.205) for authorization to add three new wholesale delivery points to The City of Colorado Springs, Colorado (The City) and to add two new wholesale delivery points to Public Service Company of Colorado (PSCo), both existing customers, under KN's blanket certificate, issued in Docket Nos. CP83–140–000 and CP84–140–001, pursuant to Section 7 of the Natural Gas Act, all as more fully set forth in the request which is on file with the Commission and open to public inspection.

K N states that The City and PSCo have requested new delivery points from K N at an existing point of interconnection between the facilities of Natural Gas Pipe Line Company and CIG in Beaver County, Oklahoma (Forgan Delivery Point) and at a point of interconnection to be established between the facilities of Northern Gas Company and CIG in Carbon County, Wyoming (Sinclair Delivery Point). In addition, K N states that The City has requested a new delivery point from K N at an existing point of interconnection between the facilities of Panhandle Eastern Pipeline Company and CIG in Adams County, Colorado (Wattenberg Delivery Point). CIG would transport the gas from the delivery points to the City and PSCo, it is stated.

K N states that there will be no change in the total volumes presently authorized for delivery to The City and to PSCo as a result of the addition of these delivery points. K N further states that there will be no adverse impact on K N's peak day and annual deliveries and that K N has sufficient capacity to accomplish the deliveries without detriment or disadvantage to K N's other customers.

Comment date: November 2, 1992, in accordance with Standard Paragraph G at the end of this notice.

G. Any person or the Commission's staff may, within 45 days after the issuance of the instant notice by the Commission, file pursuant to rule 214 of the Commission's Procedural Rules (18 CFR 385.214) a motion to intervene or notice of intervention and pursuant to § 157.205 of the Regulations under the Natural Gas Act (18 CFR 157.205) a protest to the request. If no protest is filed within the time allowed therefore, the proposed activity shall be deemed to be authorized effective the day after the time allowed for filing a protest. If a protest is filed and not withdrawn within 30 days after the time allowed for filing a protest, the instant request shall be treated as an application for authorization pursuant to section 7 of the Natural Gas Act.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. TQ93–1–20–000, TM93–2–20–000, TQ92–5–20–000]

Algonquin Gas Transmission Co.; Proposed Changes in FERC Gas Tariff

September 21, 1992.

Take notice that Algonquin Gas Transmission Company ("Algonquin") on September 16, 1992, tendered for filing proposed changed in its FERC Gas Tariff, Third Revised Volume No. 1, as set forth in the revised tariff sheets:

I. Proposed to be effective September 17, 1992

Primary Tariff Sheets
- 2 Sub 13 Rev Sheet No. 21
- 2 Sub 13 Rev Sheet No. 22
- 2 Sub 9 Rev Sheet No. 25
- 2 Sub 13 Rev Sheet No. 26
- 2 Sub 13 Rev Sheet No. 27
- 2 Sub 13 Rev Sheet No. 28
- 2 Sub 13 Rev Sheet No. 29

Alternate Tariff Sheets
- Alt 2 Sub 13 Rev Sheet No. 21
- Alt 2 Sub 13 Rev Sheet No. 22
- Alt 2 Sub 9 Rev Sheet No. 25
- Alt 2 Sub 13 Rev Sheet No. 26
- Alt 2 Sub 13 Rev Sheet No. 27
- Alt 2 Sub 13 Rev Sheet No. 28
- Alt 2 Sub 13 Rev Sheet No. 29

Algonquin states that the revised tariff sheets are being filed as part of Algonquin's Out of Cycle Quarterly Purchased Gas Adjustment ("PGA") and Transportation Cost Adjustment pursuant to sections 17 and 39 of the General Terms and Conditions of Algonquin's FERC Gas Tariff. The sales demand rate reflects an increase of $0.089 per MMBtu from the demand rate contained in Algonquin's last Quarterly PGA filing, which was made in Docket No. TQ92–4–20 on July 31, 1992 and approved by FERC in a Letter Order dated August 28, 1992.

Algonquin further states that the primary tariff sheets listed above are based on FERC approval of both National's compliance rates filed in Docket No. RP86–136 and Transco's motion rates filed in Docket No. RP92–137. The alternate sheets are based solely upon Transco's motion rates.

Algonquin is also filing as part of its FERC Gas Tariff the following sheets:

II. Proposed to be effective October 1, 1992

Primary Tariff Sheets
- 2 Sub 14 Rev Sheet No. 21
- 2 Sub 14 Rev Sheet No. 22
- 2 Sub 10 Rev Sheet No. 25
- 2 Sub 14 Rev Sheet No. 26
- 2 Sub 14 Rev Sheet No. 27
- 2 Sub 14 Rev Sheet No. 28
- 14 Rev Sheet No. 29

Secondary Tariff Sheets
- Alt 2 Sub 14 Rev Sheet No. 21
- Alt 2 Sub 14 Rev Sheet No. 22
- Alt 2 Sub 10 Rev Sheet No. 25
- Alt 2 Sub 14 Rev Sheet No. 26
- Alt 2 Sub 14 Rev Sheet No. 27
- Alt 2 Sub 14 Rev Sheet No. 28
- Alt 14 Rev Sheet No. 29

Algonquin states that National, on August 31, 1992, filed its quarterly PGA in Docket No. TQ92–8–16 to be effective October 1, 1992. In this filing National filed both primary and alternate sheets. Algonquin herein also files primary and alternate tariff sheets to track both Algonquin's primary and alternate sheets proposed to be effective September 17, 1992 and National's primary and alternate tariff sheets proposed to be effective October 1, 1992. Algonquin also states that the effect of the tariff sheets is to increase the demand rate by $0.014 per MMBtu.

III. Proposed to be effective October 1, 1992

Algonquin also stated that it is filing the above tariff sheet to reflect the reduction in Texas Eastern's ACA rate. Pursuant to section 4 of Rate Schedule ATAP, Algonquin is filing this tariff sheet to track the changes made by Texas Eastern to track the changes in the underlying rate. The effect is to reduce the commodity rates for ATAP transportation by $0.0001.

Algonquin notes that copies of this filing were served upon each affected party and interested state commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with §§ 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protest should be filed on or before September 28, 1992. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. RP91-161-000, RP91-160-000, et al.]

Columbia Gas Transmission Corp., Columbia Gulf Transmission Co, Informal Settlement Conference

September 21, 1992.

Take notice that an informal conference will be convened in this proceeding on Tuesday, September 29, 1992 and Wednesday, September 30, 1992, at 10 a.m. for the purpose of exploring the possible settlement of the above-referenced dockets. The conference will be held at the offices of the Federal Energy Regulatory Commission, 810 First Street, NE. Washington DC, 20426.

Any party, as defined by 18 CFR 385.102(c), or any participant, as defined by 18 CFR 385.102(b), is invited to attend. Persons wishing to become a party must move to intervene and receive intervenor status pursuant to the Commission's regulations (18 CFR 385.214).

For additional information, please contact Lorna J. Hadlock at (202) 208-0737 or David R. Cain at (202) 208-0917.

Office of Fossil Energy

[FE Docket No. 92-78-NG]

Louis Dreyfus Energy Corp.; Order Granting Blanket Authorization To Import and Export Natural Gas to Canada and Mexico and Vacating Existing Authorization

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of order.

SUMMARY: The Office of Fossil Energy of the Department of Energy gives notice that it has issued an order granting Louis Dreyfus Energy Corp. a blanket authorization to import up to 182.5 Bcf of natural gas from Canada, to export back to Canada up to 182.5 Bcf of imported Canadian gas, and to export up to 182.5 Bcf of domestically produced natural gas to Mexico and Canada, over a two-year term beginning on the date of first delivery. The order also vacates the authorization granted to L.D. Energy Corp. by DOE/FE Opinion and Order No. 409.

A copy of this order is available for inspection and copying in the Office of Fuels Programs Docket Room, 3F-056, Forrestal Building, 1000 Independence Avenue, SW., Washington, DC 20585, (202) 586-9478. The docket room is open between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

Issued in Washington, DC, September 21, 1992.

Charles F. Vacek,

Deputy Assistant Secretary for Fuels Programs, Office of Fossil Energy.

[FR Doc. 92-23372 Filed 9-24-92; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4511-7]

Lead Redesignation to Nonattainment; Hillsborough County, FL

AGENCY: Environmental Protection Agency (EPA).

ACTION: Information notice.

SUMMARY: Sections 107 (d)(3) and (d)(5) of the Clean Air Act, as amended by the Clean Air Act Amendments of 1990 (Pub. L. 101-549, Nov. 15, 1990) (the Act), authorizes EPA to require States to designate areas (or portions of areas) in the state as nonattainment, attainment, or unclassifiable for the National Ambient Air Quality Standard (NAAQS) for lead. On June 24, 1992, EPA notified the Governor of Florida that the lead designation for a portion of Hillsborough County, Florida, should be revised from unclassifiable to nonattainment, based upon a monitored violation of the NAAQS for lead.

EPA is giving notice to the public of this action as required by section 107(d)(3)(A) of the Act.

ADDRESSES: Copies of EPA's letter to the Governor are available for public inspection and copying during normal business hours at the following agencies:

Region IV Air Programs Branch, Environmental Protection Agency, 345 Courtland Street, Atlanta, Georgia 30365.

Air Resources Management Division, Florida Department of Environmental Regulation, Twin Towers Office Building, 2600 Blair Stone Road, Tallahassee, Florida 32399-2400.

FOR FURTHER INFORMATION CONTACT: Richard Schutt of the EPA Region IV Air Programs Branch at 404-347-2864 and at the above address.

SUPPLEMENTARY INFORMATION: On April 22, 1991, (56 FR 16274) EPA announced that it had notified the governors of affected states that they should proceed to designate as nonattainment areas those areas that had recorded violations of the National Ambient Air Quality Standard (NAAQS) for lead. EPA published a list of areas that the governors had been requested to designate as unclassifiable if they contained stationary lead sources which EPA believed to be capable of violating the lead NAAQS, but for which existing air quality data was insufficient to designate as attainment or nonattainment. Included in that list was Hillsborough County, Florida. However, a lead value of 2.27 micrograms per cubic meter was reported for the fourth quarter of 1991 by a monitor located in Hillsborough County. This value violates the current lead NAAQS of 1.5 micrograms per cubic meter as a quarterly average.

Lead nonattainment areas are generally defined by the county perimeter for the county in which the

ambient lead monitors recorded the violation of the lead NAAQS and/or in which a lead source is located. As an alternative, EPA has indicated that states may seek to define boundaries using certain techniques to justify the chosen boundary (56 FR 56694 and 56707, November 6, 1991).

EPA had approved, prior to the identification of the lead NAAQS violation, the following unclassifiable lead area (56 FR 56829, November 6, 1991), consisting of a portion of Hillsborough County:

An area encompassed within a radius of (5) kilometers centered at UTM coordinates: 364.0 East 3093.5 North, Zone 17 (in city of Tampa).

This area surrounds the secondary lead smelting operation of Gulf Coast Recycling, a battery recycling facility. EPA believes it is reasonable to rely on the current Hillsborough County unclassifiable boundary as the nonattainment area boundary since the State had previously demonstrated that this is the area impacted by Gulf Coast Recycling. However, any ultimate determination will be made after considering any comments from the State of Florida, and any comments submitted by the public. Under section 107(d)(3)(B) of the Act, the Governor must submit the lead designation for this area that he deems appropriate no later than 120 days after receipt of EPA's notification.

The EPA must then promulgate the redesignation proposal submitted by the Governor, making such modifications as it deems necessary, no later than 60 days after the aforementioned 120 day time period has expired. Whenever EPA intends to make a modification, the agency will notify the state and provide such state with an opportunity to demonstrate why any proposed modification is inappropriate. EPA shall give such notification no later than 60 days before the date the redesignation is promulgated, including any modification thereto. If the Governor fails to submit the list in whole or in part, EPA shall promulgate the redesignation that is deemed appropriate for the area (or portion thereof) not redesignated by the state.

Any State containing an area designated as nonattainment for lead must submit a State Implementation Plan (SIP) to EPA within 18 months of the nonattainment designation meeting the applicable requirements of Part D, Title I of the Act (Section 191(a), 42 U.S.C. 7514(a)). The SIP must provide for attainment of the lead standard as expeditiously as practicable, but no later than five (5) years from the date of the nonattainment designation (Section 192(a), 42 U.S.C. § 7514a(a)).

Authority: 42 U.S.C. 7401–7671(q).

Dated: September 10, 1992.

Patrick M. Tobin,

Acting Regional Administrator.

[FR Doc. 92–23324 Filed 9–24–92; 8:45 am]

BILLING CODE 6560–50–M

[FRL–4511–6]

Review of National Secondary Ambient Air Quality Standards for Sulfur Oxides; Proposed Consent Decree

AGENCY: Environmental Protection Agency.

ACTION: Notice of proposed consent decree; opportunity for public comment.

SUMMARY: Notice is hereby given of a proposed consent decree in litigation concerning review of the national secondary ambient air quality standards for sulfur oxides under the Clean Air Act ("Act"). As discussed more fully below, the Environmental Protection Agency ("EPA") is providing an opportunity for public comment on the proposed decree under section 113(g) of the Act.

DATES: Written comments on the proposed decree must be received by October 26, 1992.

ADDRESSES: Written comments should be sent, preferably in triplicate, to Gerald K. Gleason, Air and Radiation Division (LE–132A), Office of General Counsel, U.S. Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Copies of the proposed decree are available from Betty S. Mobley at the same address (telephone 202–260–7606).

FOR FURTHER INFORMATION CONTACT: John H. Haines (Program Officer), telephone 919–541–5533 or Gerald K. Gleason (Senior Attorney), telephone 202–260–7623.

SUPPLEMENTARY INFORMATION: In *Environmental Defense Fund* v. *Reilly*, No. 85 Civ. 9507 (S.D.N.Y.), the Environmental Defense Fund and other plaintiffs sued EPA under section 304 of the Act to compel review and revision of the national ambient air quality standards ("NAAQS") for sulfur oxides, codified at 40 CFR 50.4 and 50.5, under section 109(d) of the Act. EPA and the plaintiffs have moved to lodge with the U.S. District Court for the Southern District of New York a proposed consent decree intended as an alternative to further litigation in response to a decision of the U.S. Court of Appeals for the Second Circuit. *Environmental Defense Fund* v. *Thomas*, 870 F.2d 892 (2d Cir. 1989). The proposed decree would require EPA to take final action by April 15, 1993, on the secondary standards portion of a pending rulemaking (53 FR 14926, April 26, 1988) for review of the NAAQS for sulfur oxides.

Final approval and entry of the proposed decree are subject to section 113(g) of the Act, which requires notice and opportunity for comment on certain consent orders and settlement agreements to which the United States is a party. Accordingly, for a period of thirty (30) days following the date of publication of this notice, EPA will receive any written comments on the proposed decree. Under section 113(g), EPA or the Department of Justice may withhold or withdraw consent to the proposed decree if the comments disclose facts or circumstances indicating that such consent is inappropriate, improper, inadequate, or inconsistent with the requirements of the Act.

Dated: September 16, 1992.

Raymond B. Ludwiszewski,

Acting General Counsel.

[FR Doc. 92–23322 Filed 9–24–92; 8:45 am]

BILLING CODE 6560–50–M

[ER–FRL–4510–8]

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared September 07, 1992 Through September 11, 1992 pursuant to the Environmental Review Process (ERP), under Section 309 of the clean air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 260–5076.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 10, 1992 (57 FR 12499).

Draft EISs

ERP No. D–AFS–J02022–WY Rating EC2

Shoshone National Forest Oil and Gas Exploration and Development, Leasing, Fremont, Hot Springs Park, Sublette and Teton Counties, WY.

SUMMARY: EPA had environmental concerns with potential environmental impacts, particularly concerning the preservation of water quality, which should be avoided in order to fully protect the environment. EPA had significant concerns regarding the large

proportion of the forest classified as "High Soil and Water Hazard". Additionally, the DEIS does not contain sufficient information to fully assess environmental impacts that should be avoided and specific mitigation methods to minimize those impacts.

ERP No. D–AFS–J02025–CO Rating EC2

Routt National Forest Oil and Gas Exploration and Development, Approval and Leasing, Routt, Moffat, Jackson, Grand, Garfield and Rio Blanco Counties, CO.

SUMMARY: EPA had environmental concerns with potential environmental impacts, particularly concerning the preservation of air and water quality and the protection of wetland resources, which should be avoided in order to fully protect the environment.

ERP No. D–AFS–J65193–WY Rating LO

Strawberry Gulch Timber Sale, Timber Harvest and Road Construction, Implementation, Medicine Bow National Forest, Hayden Ranger District, Carbon County, WY.

SUMMARY: EPA had no environmental objections to the proposed project.

ERP No. D–AFS–K28017–CA Rating EC2

Running Springs Water District Wastewater Treatment Facilities Upgrading and Reclamation for Irrigation and Snow-Making at the Snow Valley Ski Resort, Approval, San Bernardino National Forest, San Bernardino County, CA.

SUMMARY: EPA expressed environmental concerns with the proposed project, including water quality, beneficial uses and air quality. EPA requested that the FEIS demonstrate that wastewater can be reclaimed without damaging existing water quality and beneficial uses. EPA requested further documentation of the projects's potential air quality impacts and consistency with efforts to maintain and improve regional air quality.

ERP No. D–FHW–E40745–NC Rating EC2

US 23/I–26 Corridor Transportation Improvements, NC–197/Barnardville Road to North Carolina-Tennessee State Line, Funding, COE Section 404 Permit and EPA National Pollutant Discharge Elimination System Permit, Buncombe and Madison Counties, NC.

SUMMARY: EPA's review found a potential for adverse water quality impacts related to construction activities in the mountainous region. Non-point source contributions and loss of upland habitats was also a concern. Additional information for controlling construction related impacts was requested.

ERP No. D–FHW–F40144–WI Rating EC2

WI–131 and WI–33 Transportation Improvement, Relocation and/or Reconstruction, between Village of Ontario and Community of Rockton, Funding and Possible COE 404 Permit, Vernon County, WI.

SUMMARY: EPA recommended that the Final EIS include an adequate wetland compensation plan. EPA also requested that additional information be provided on avoidance, minimization and compensation for the project's likely woodlands, park and natural areas impacts.

Final EISs

ERP No. F–AFS–J65180–UT

Deep Creek and Snow Bench Timber Sales, Approval and Implementation, Thousand Lake Mountain, Fishlake National Forest, Loa Ranger District, Wayne County, UT.

SUMMARY: EPA had no objections to the proposed action.

ERP No. F–AFS–J65186–MT

Bent Flat Timber Sale, Timber Harvest, Road Construction/ Reconstruction, Implementation, Flathead National Forest, Spotted Bear Ranger District, Flathead County, MT.

SUMMARY: EPA had no objections to the new preferred alternative.

ERP No. F–BLM–K60022–CA

Eagle Mountain Class III Nonhazardous Solid Waste Landfill Project and Specific Plan, Federal Land Exchange, Right-of-Way Approval and Section 404 Permit, Riverside County, CA.

SUMMARY: EPA expressed environmental concerns with potential impacts to groundwater, water quality, air quality and sensitive natural resources. EPA had special concern with the great difficulty in monitoring groundwater for possible releases of contaminants due to the faulted, fractured bedrock underlying the project site. EPA also expressed concerns whether hazardous waste would be illegally disposed with recyclable materials and whether a monitoring program could detect whether hazardous waste was being illegally disposed.

ERP No. F–FHW–F40292–IN

US 231/Wabash River Crossing Relocation and Construction, County Road 350S to West Lafayette, Funding and COE Section 404 Permit, Wabash River, Tippecanoe County, IN.

SUMMARY: EPA's concerns for avoidance/minimization of wetlands impacts, for prevention of undue water quality impacts and for noise impact mitigation have been satisfactorily addressed.

ERP No. F–FHW–K40180–AS

Territorial Route 50 in Pago Pago Park, Construction, Funding, U.S. Coast Guard Bridge Permit, and COE Section 10 and 404 Permits, Island of Tutuila, AS.

SUMMARY: Review of the Final EIS was not deemed necessary. No formal comment letter was sent to the preparing agency.

Dated: September 21, 1992.

William D. Dickerson,

Deputy Director, Office of Federal Activities.

[FRL–4511–8]

Wisconsin: Partial Program Adequacy Determination of State Municipal Solid Waste Permit Program

AGENCY: Region 5; Environmental Protection Agency.

ACTION: Notice of tentative determination on partial program application of Wisconsin for partial program adequacy determination, public hearing and public comment period.

SUMMARY: Section 4005(c)(1)(B) of the Resource Conservation and Recovery Act (RCRA), as amended by the Hazardous and Solid Waste Amendments (HSWA) of 1984, requires States to develop and implement permit programs to ensure that municipal solid waste landfills (MSWLFs) which may receive hazardous household waste or small quantity generator waste will comply with the revised Federal Criteria (40 CFR Part 258). RCRA section 4005(c)(1)(C) requires the Environmental Protection Agency (EPA) to determine whether States have adequate permit programs for MSWLFs, but does not mandate issuance of a rule for such determinations. The EPA has drafted and is in the process of proposing the State/Tribal Implementation Rule (STIR) that will allow both States and Tribes to apply for and receive approval of a partial permit program. The Agency intends to approve adequate State/Tribal MSWLF permit programs as final applications are submitted. Thus, these approvals are not dependent on final promulgation of the STIR. Prior to promulgation of STIR, adequacy determinations will be made based on the statutory authorities and requirements. In addition, States/Tribes may use the draft STIR as an aid in interpreting these requirements. The Agency believes that early approvals have an important benefit. Approved State/Tribal permit programs provide interaction between the State/Tribe and the owner/operator on site specific permit conditions. Only those owners/operators located in States/Tribes with approved permit programs can use the site-specific flexibility provided by 40 CFR Part 258 to the extent the State/Tribal permit program allows such flexibility.

Wisconsin applied for a partial determination of adequacy under section 4005 of RCRA. The EPA reviewed Wisconsin's application and made a tentative determination of adequacy for those portions of the State's MSWLF permit program that are adequate to assure compliance with the revised Federal Criteria. These portions are described later in this notice. The State plans to revise the remainder of its permit program to assure complete compliance with the revised Federal Criteria, and gain full program approval. Wisconsin's application for partial program adequacy determination is available for public review and comment.

If sufficient public interest is expressed during the comment period, a public hearing will be held to solicit comment and public opinion on Wisconsin's partial program application for a determination of adequacy.

DATES: All comments on Wisconsin's application for a partial determination of adequacy must be received by U.S. EPA Region 5 by the close of business on November 17, 1992. If a public hearing is held, it will be scheduled for November 17, 1992. Wisconsin will participate in the public hearing held by EPA on this subject.

ADDRESSES: Copies of Wisconsin's application for partial adequacy determination are available during 9 a.m. to 4 p.m. during normal working days at the following addresses for inspection and copying: Wisconsin Department of Natural Resources, 101 South Webster Street, Madison, Wisconsin, 53707, Attn: Ms. Lakshmi Sridharan; and U.S. EPA Region 5, 77 West Jackson Boulevard, Chicago, Illinois, 60604, Attn: Mr. Andrew Tschampa, mailcode HRP–8J. All written comments should be sent to the EPA Region 5 Office.

FOR FURTHER INFORMATION CONTACT: U.S. EPA Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, Attn: Mr. Andrew Tschampa, mailcode HRP–8J, telephone (312) 886–0976.

SUPPLEMENTARY INFORMATION:

A. Background

On October 9, 1991, EPA promulgated revised Federal Criteria for MSWLFs (40 CFR part 258). Subtitle D of RCRA, as amended by the Hazardous and Solid Waste Amendments of 1984 (HSWA), requires States to develop permitting programs to ensure that MSWLFs comply with the revised Federal Criteria. Subtitle D also requires that EPA determine the adequacy of State municipal solid waste landfill permit programs to ensure compliance with the revised Federal Criteria. To fulfill this requirement, the Agency has drafted and is in the process of proposing the State/Tribal Implementation Rule (STIR). The rule will specify the requirements which State/Tribal programs must satisfy to be determined adequate.

EPA intends to propose in STIR to allow partial approvals if: (1) The Regional Administrator determines that the State/Tribal permit program largely meets the requirements for ensuring compliance with 40 CFR part 258; (2) changes to a limited, narrow part(s) of the State/Tribal program are needed to meet these requirements; and (3) provisions not included in the partially approved portions of the State/Tribal permit program are a clearly identifiable and separable subset of 40 CFR Part 258. These requirements, if promulgated, will address the potential problems posed by the dual State and Federal programs that will come into effect in October 1993 in those States that still have only partial approvals of their MSWLF programs. On that date, Federal rules covering any portion of a State's program that has not received EPA approval will become enforceable. Owners and operators of MSWLFs subject to such dual programs must be able to understand which requirements apply and comply with them. Partial approval would allow the Agency to approve those provisions of the State/Tribal permit program that meet the requirements and provide the State/Tribe time to make necessary changes to the remaining portions of its program. As a result, owners/operators will be able to work with the State/Tribal permitting agency to take advantage of any flexibility allowed in those portions of the program that have been approved.

As provided in the revised Federal Criteria, EPA's national Subtitle D standards will take effect on October 9, 1993, in any State/Tribe that lacks an approved program. Consequently, any remaining portions of the Federal Criteria which are not included in an approved State/Tribal program by that

date would apply directly to the owner/operator.

EPA intends to propose to approve portions of State/Tribal MSWLF permit programs prior to the promulgation of STIR. EPA will ask State/Tribes that seek partial approvals to submit a narrative discussion of the structure of the State/Tribal program, as well as a summary of State/Tribal technical requirements that demonstrate technical comparability with the revised Federal Criteria. EPA is also requesting State/Tribes seeking partial program approval to provide a schedule for the submittal of all remaining portions of their MSWLF permit programs. EPA notes that it intends to propose to make submission of a schedule mandatory in STIR.

B. State of Wisconsin

On July 27, 1992, Wisconsin submitted an application for partial program adequacy determination. EPA has reviewed Wisconsin's application and has tentatively determined that the following portions of the State's subtitle D program will ensure compliance with the revised Federal Criteria.

1. Location restrictions for airport safety, floodplains, and wetlands (40 CFR 258.10, 258.11, and 258.12);

2. Operating criteria for cover materials, disease vector control, access, surface water, and liquids restrictions (40 CFR 258.21, 258.22, 258.25, 258.27, and 258.28);

3. Groundwater monitoring and corrective action criteria for groundwater monitoring systems, groundwater sampling and analysis requirements, assessment of corrective measures, selection of remedy, and implementation of the corrective action program (40 CFR 258.51, 258.53, 258.56, 258.57, and 258.58);

4. Closure and post-closure care requirements (40 CFR 258.60 and 258.61); and

5. Financial assurance requirements and allowable mechanisms for closure, post-closure care, and corrective action (40 CFR 258.71, 258.72, 258.73, and 258.74).

Not all States/Tribes will have existing permit programs through which they can ensure compliance with all provisions of the revised Federal Criteria. Were EPA to restrict a State/Tribe from submitting its application until it could ensure compliance with the entirety of 40 CFR part 258, many States/Tribes would need to postpone obtaining approval of their permit program for a significant amount of time. This delay in determining the adequacy of the State/Tribal permit program while the State/Tribe revises its statutes or regulations could impose a substantial burden on owners and operators of landfills because the State/Tribe would be unable to exercise the flexibility available to States/Tribes with permit programs which have been approved as adequate.

To ensure compliance with all of the revised Federal Criteria, Wisconsin needs to revise the following aspects of its permit program.

1. Wisconsin will revise its regulations to incorporate the Federal location restrictions for fault areas, seismic impact zones, and unstable areas in 40 CFR 258.13, 258.14, and 258.15.

2. Wisconsin will revise its regulations to incorporate the Federal operating requirements for the exclusion of hazardous waste, explosive gases control, run-on/run-off control systems, and recordkeeping in 40 CFR 258.20, 258.23. 258.26, and 258.29. Wisconsin will also seek to amend a State statute to meet the Federal operating requirements for air criteria in 40 CFR 258.24.

3. Wisconsin will revise its regulations to include a minimum composite liner design which consists of a 60-mil high density polyethylene geomembrane over 4 feet of compacted clay, which is more stringent than the Federal design requirements in 40 CFR 258.40(a).

4. The Federal Criteria require unfiltered groundwater samples to be used in laboratory analysis. Currently, Wisconsin requires samples to be filtered and preserved in the field in accordance with standard published procedures. The Agency intends to revisit this issue during a proposed rulemaking. If the proposed rulemaking upholds the ban on field filtering, the State will be required to come into compliance with the provisions in 40 CFR 258.53(b). In the meantime, the State will not be given approval of this requirement.

5. Wisconsin will revise its regulations to incorporate detection and assessment groundwater monitoring parameters that are consistent with the revised Federal Criteria, but take advantage of the flexibility provided in 40 CFR 258.54 and 258.55.

6. Wisconsin will seek to amend a State statute to fully meet the financial assurance requirements in 40 CFR 258.70(a).

Wisconsin submitted a schedule indicating that it will be able to complete these revisions and amendments by October 9, 1995. To allow the State to begin exercising some of the flexibility allowed in States/Tribes with adequate permit programs, EPA is proposing to approve those portions of the State's program that are ready for action today.

EPA reviewed the State's schedule and believes it is reasonable because of the complexity of Wisconsin's rulemaking process. The rulemaking process typically takes 18 months to complete. Wisconsin expects to begin revising the appropriate rules in January 1993. Additionally, Wisconsin must seek amendment of two State statutes. Requests to seek amendment of both the statutes have been placed in the preliminary draft of the Wisconsin Fiscal Year 1993–1995 Budget.

EPA cautions Wisconsin that it currently plans to propose in the STIR that all partial approvals will expire in October 1995 for States/Tribes that have not received final approval for all provisions of 40 CFR Part 258. Expiration of a partial approval would mean that the Federal Criteria would apply and the flexibility provided for approved States/Tribes by the Federal Criteria would no longer be available in the State/Tribe. EPA urges Wisconsin to work diligently to make all of the necessary revisions to those portions of its permit program that are not being proposed for approval today.

If there is sufficient public interest, the Agency will hold a public hearing on its tentative decision on November 17, 1992, from 9 a.m. to 12 p.m. at the Wisconsin Department of Natural Resources in Madison, Wisconsin. Comments can be submitted as transcribed from the discussion of the hearing or in writing at the time of the hearing. The public also may submit written comments on EPA's tentative determination until November 17, 1992. Copies of Wisconsin's application are available for inspection and copying at the location indicated in the "Addresses" section of this notice.

EPA will consider all public comments on its tentative determination that are received during the public comment period and the public hearing. Issues raised by those comments may be the basis for a determination of inadequacy for Wisconsin's program. EPA will make a final decision on whether or not to approve Wisconsin's program by December 31, 1992, and will give notice of it in the **Federal Register**. The notice will include a summary of the reasons for the final determination and a response to all major comments.

Section 4005(a) of RCRA provides that citizens may use the citizen suit provisions of Section 7002 of RCRA to enforce the revised Federal Criteria independent of any State enforcement program. As EPA explained in the preamble to the revised Federal Criteria, EPA expects that any owner or operator

complying with provisions in a State program approved by the EPA should be considered in compliance with the revised Federal Criteria.

Compliance With Executive Order 12291

The Office of Management and Budget has exempted this rule from the requirements of section 3 of Executive order 12291.

Certification Under the Regulatory Flexibility Act

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this tentative approval will not have a significant economic impact on a substantial number of small entities. It does not impose any new burdens on small entities. This proposed rule, therefore, does not require a regulatory flexibility analysis.

Authority: This notice is issued under the authority of section 4005 of the Solid Waste Disposal Act as amended 42 U.S.C. 6907, 6927, 6928, 6945, 6947, 6974(b).

Dated: September 18, 1992.

Valdas V. Adamkus,

Regional Administrator.

BILLING CODE 6560-50-M

[FRL-4511-5]

Public Meeting to Discuss Environmental Requirements on Local Governments and Small Communities

On October 8-9, 1992, EPA will meet with local and state officials, public interest groups and environmental groups to discuss environmental requirements for local governments and small communities. The purpose of the meetings is to gather additional facts and exchange information regarding problems discussed at a public meeting with these participants on September 10, 1992.

Participants will meet in workgroups on October 8 to discuss issues of financing local government environmental services and infrastructure; regulatory flexibility, intergovernmental coordination and priority-setting at the local level; and data and information on the costs and benefits of environmental regulation. Workgroup leaders are preparing discussion papers for distribution at the meetings. An agenda for the October 9 plenary will be developed based on workgroup proceedings.

All meetings will be held at the National Rural Electric Cooperative Association, 1800 Massachusetts Ave. NW., Washington, DC 20036. Workgroups will meet October 8 from 10-4:30. The Finance Workgroup will meet in the third floor conference room; the Data and Information Workgroup will meet in the fifth floor conference room; and the Flexibility/Priorities Workgroup will meet in Conference Center Three. The plenary will meet October 9 from 9-4 in the Board Room.

All interested persons and organizations are invited to attend. Meeting minutes will be available and can be obtained upon written request to the Agency in care of Mr. Kerestesy at the Office of Regional Operations and State/Local Relations, H-1501, U.S. EPA, 401 M Street SW., Washington, DC 20460.

Gerald Fill,

Acting Associate Administrator, Office of Regional Operations and State/Local Relations.

BILLING CODE 6560-50-M

[FRL-4510-9]

Massachusetts Marine Sanitation Device Standard; Determination

On June 19, 1992, notice was published that the State of Massachusetts had petitioned the Regional Administrator, Environmental Protection Agency, to determine that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for all the coastal waters of the Town of Nantucket, County of Nantucket, within the State of Massachusetts (57 FR 27465). The petition was filed pursuant to section 312(f)(3) of Public Law 92-500, as amended by Public Laws 95-217 and 100-4, for the purpose of declaring these waters a "no discharge area."

Section 312(f)(3) states:

After the effective date of the initial standards and regulations promulgated under this section, if any State determines that the protection and enhancement of the quality of some or all of the waters within such States require greater environmental protection, such State may completely prohibit the discharge from all vessels of any sewage, whether treated or not, into such waters, expect that no such prohibition shall apply until the Administrator determines that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for such water to which such prohibition would apply.

The information submitted to me by the State of Massachusetts certified that there are six pump-out facilities available to service vessels in Nantucket coastal waters. Five are located within Nantucket Harbor, and a sixth is located in Madaket Harbor, at the western end of the island.

There are four pump-out facilities at the Nantucket Boat Basin, which is located on the western shore of Nantucket Harbor adjacent to the downtown area of the Town of Nantucket. There are two stationary pump-out units and two portable units available for use by both Nantucket Boat Basin patrons and transient vessels. In addition, the Boat Basin dock is equipped with deck fittings plumbed directly into the town sewer system that are used in conjunction with the portable units. With the deck fittings, the Boat Basin can service 95 percent of its vessels in their slips. The remaining five percent have access to the two stationary pump-out units. These pump-out facilities will accommodate vessels with a draft of twelve feet, and are open from 7 a.m., to 7 p.m., seven days a week. Pump-out services are free to patrons and $10 for all others.

A fifth pump-out facility is located on the Nantucket Town Pier, which is located just to the south of the Nantucket Boat Basin on Nantucket Harbor, and is operated by the Town of Nantucket. This pump-out facility will accommodate vessels with a draft of twelve feet, and is open from 8 a.m. to 8 p.m., seven days a week. Pump-out services are free of charge to all vessels.

The sixth pump-out facility is operated by Madaket Marine, which is located on Hither Creek, in Madaket Harbor. This portable pump-out facility will accommodate vessels with a five foot draft, and is open from 8 a.m. to 4:30 p.m., seven days a week. There is a $10 fee per pump-out.

The State of Massachusetts certified that the five pump-out facilities in Nantucket Harbor discharge directly to the town sewer system. The State of Massachusetts further certified that sewage collected at Madaket Marine is discharged into an above-ground holding tank and periodically collected by a septage hauler for disposal at the town wastewater treatment plant. The Nantucket Waste Water Treatment Facility is located on South Shore Road. This facility provides primary treatment before discharging to groundwater and has consistently met or exceeded EPA and Massachusetts Department of Environmental Protection standards.

The maximum daily vessel population for the coastal waters of Nantucket is approximately 1725. This includes 1250 vessels on private seasonal moorings registered with the Town of Nantucket.

and an average of 475 transient vessels per day. None of these vessels will be excluded from using one or more of the existing pump-out facilities.

A single set of comments was received by the Agency on the merits of the petition prior to the deadline for receipt of comments; it was from a Mr. Alan Spackman of Houston, Texas. Mr. Spackman's comments neither supported nor opposed the petition, but questioned several of the statements made in the June 19 **Federal Register** "Notice of Receipt." His main concern is consistent with that of EPA. If has been determined that vessels in transit to and from other points outside the proposed no discharge area (all the coastal waters of Nantucket, three miles seaward of its coastline) may include vessels incapable of reaching the pump-out stations due to draft limitations and/or vessels which may only be in the proposed no discharge area for a limited period of time while in transit, and that prohibiting discharges from such vessels may be both impracticable and unenforceable.

Therefore, based on an examination of the petition and its supporting information, which included a site visit by EPA Region I staff, and in consideration of the single comment received pursuant to the June 19 **Federal Register** notice, I have determined that adequate facilities for the safe and sanitary removal and treatment of sewage from all vessels are reasonably available for that portion of Nantucket coastal waters that lie within a straight line between Great Point on Nantucket Island and the western tip of Muskeget Island (delineated on NOAA chart #13237 by LORAN-C line 9960-Y-43850) to the limits of the Territorial Sea, and within a straight line between the southeast point of Muskeget Island and the southwest point of Tuckernuck Island, and between the southwest point of Tuckernuck Island and Smith Point of Nantucket Island. The exclusion of those waters outside the Territorial Sea boundary from the no discharge area is intended to prevent any jurisdictional conflicts. This determination is made pursuant to Section 312(f)(3) of Public Law 92-500, as amended by Pubic Laws 95-217 and 100-4.

Dated: August 17, 1992.

Julie De Belga,

Regional Administrctor,

Proposed Assessment of Clean Water Act Class II Administrative Penalty to Cargill Incorporated and Opportunity to Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposal of a Clean Water Act Class II administrative penalty and notice of public comment period.

SUMMARY: Pursuant to 33 U.S.C. Section 1319(g), EPA is authorized to issue orders assessing civil penalties for various violations of the Act. EPA may issue such orders after the commencement of either a Class I or Class II penalty proceeding. EPA provides public notice of the proposed assessments pursuant to 33 U.S.C. section 1319(g)(4)(a).

Class II proceedings are conducted under EPA's Consolidated Rules of Practice Governing the Administrative Assessment of Civil Penalties and the Revocation and Suspension of Permits, 40 CFR part 22. The procedures through which the public may submit written comment on a proposed Class II order or participate in a Class II proceeding, and the procedures by which a Respondent may request a hearing, are set forth in the Consolidated Rules. The deadline for submitting public comment on a proposed Class II order is thirty days after publication of this notice.

On the date identified below, EPA commenced the following Class II proceeding for the assessment of penalties:

In the Matter of Cargill Incorporated (Cargill Resin Products Division), 2801 Lynwood Road, Lynwood, CA 90262; Docket No. IX-FY92-33; filed on 18 September 1992 with Steven Armsey, Regional Hearing Clerk, U.S. EPA, Region 9, 75 Hawthorne Street, San Francisco, California 94105, (415) 744-1389; proposed penalty of $125,000, for violations of pretreatment categorical standards.

FOR FURTHER INFORMATION CONTACT: Persons wishing to receive a copy of EPA's Consolidated Rules, review the complaint or other documents filed in this proceeding, comment upon a proposed assessment, or otherwise participate in the proceeding should contact the Regional Hearing Clerk identified above. The administrative record for this proceeding is located in the EPA Regional Office identified above, and the file will be open for public inspection during normal business hours. All information submitted by the respondent is available as part of the administrative record, subject to provisions of law restricting public disclosure of confidential information. In order to provide opportunity for public comment, EPA will issue no final order assessing a penalty in these proceedings prior to thirty days after the date of publication of this notice.

Dated: September 18, 1992.

Catherine Kuhlman,

Acting Director, Water Management Division.

BILLING CODE 6560-50-M

FEDERAL COMMUNICATIONS COMMISSION

Public Information Collection Requirements Submitted to Office of Management and Budget for Review

September 17, 1992.

The Federal Communications Commission has submitted the following information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1980 (44 U.S.C. 3507).

Copies of these submissions may be purchased from the Commission's copy contractor, Downtown Copy Center, 1990 M Street, NW., suite 640, Washington, DC 20036, (202) 452-1422. For further information on these submissions contact Judy Boley, Federal Communications Commission, (202) 632-7513. Persons wishing to comment on these information collections should contact Jonas Neihardt, Office of Management and Budget, room 3235 NEOB, Washington, DC 20503, (202) 395-4814.

OMB Number: 3060-0298

Title: Part 61—Tariffs (Other Than Review Plan)

Action: Revision of a currently approved collection

Respondents: Businesses or other for-profit

Frequency of Response: On occasion reporting

Estimated Annual Burden: 2,700 response, 258.11 hours average burden per response; 696,890 hours total annual burden

Needs and Uses: The attached Memorandum of Opinion and Order on Second Further Reconsideration, in CC Docket No. 89-79/CC Docket No. 87-313, addresses petitions seeking reconsideration of those portions of the Part 69/ONA Order concerning the new services test of the local exchange carrier (LEC) price cap rules. The Commission clarifies and modifies the cost support required to

tariff new services offered by price cap LECs. First, in cases where a LEC develops a lower-cost version of an existing service, the Commission clarifies that the LEC may price that new service at any level below the price of the existing service. Second, the Commission modifies its rules so that they no longer require LECs to satisfy the net revenue test as part of the cost showing for new services. The Commission also denies, in all other respects, the petitions for reconsideration of the Part 69/ONA Order to the extent that they address the price cap new services test generally. The information collected through a carrier's tariff is used by the Commission to determine whether the services offered are just and reasonable as the Act requires. The tariffs and any supporting documentation are examined in order to determine if the services are offered in a just and reasonable and nondiscriminatory manner. If tariffs were not filed, the Commission could not carry out its responsibilities as required by the Act.

OMB Number: 3060–0475

Title: Section 90.713, Non-commercial nationwide entry criteria (Memorandum of Opinion and Order, PR Docket No. 89–552)

Action: Revision of a currently approved collection

Respondents: Individuals or households, state or local governments, and businesses or other for-profit (including small businesses)

Frequency of Response: Other: One time requirement at initial application or assignment

Estimated Annual Burden: 34 responses; 25 hours average burden per response; 850 hours total annual burden

Needs and Uses: Section 90.713 requires applicants for non-commercial nationwide systems in the 220–222 MHz band to submit additional information demonstrating that they satisfy the entry criteria specified in § 90.713. Specifically, the rule changes require non-commercial nationwide applicants to submit (1) certification that they have the necessary financing to construct at least one base station in a minimum of 70 markets which five rather than ten years of licensing; (2) a five-year schedule detailing plans for construction of the proposed system; (3) an itemized estimate of the cost of constructing the entire system within five years; and (4) a certification demonstrating an actual presence or long-term business plan that necessitates internal communications capacity in the 70 or more markets identified in the license application. Under the prior rules, non-commercial nationwide applicants were required to include a certification that they have the necessary financing to construct at least one base station in a minimum of 70 markets within ten years of licensing, and were not required to submit a certification of an actual presence or long-term business plan necessitating internal communications capacity in the markets identified in the application. Licensing Division personnel will use the data to determine the eligibility of the applicant to hold a radio station authorization. Land Mobile and Microwave Division personnel will use the data for rulemaking proceedings. Compliance personnel in conjunction with field engineers will use the data for enforcement purposes.

Federal Communications Commission.

Donna R. Searcy,

Secretary.

BILLING CODE 6712–01–M

Applications for Consolidated Hearing

1. The Commission has before it the following mutually exclusive applications for renewal of license of Noncommercial Educational Station WBMR–FM, Telford, Pennsylvania and for a New Noncommercial Educational FM station at Doylestown, Pennsylvania:

Applicant, and city and State	File No.	MM docket No.
A. United Educational Broadcasting, Inc.; Telford, PA.	BRED–910401BB	92–208
B. Bux-Mont Educational Radio Association; Doylestown, PA.	BPED–910701MA	

2. Pursuant to section 309(e) of the Communications Act of 1934, as amended, the above applications have been designated for hearing in a consolidated proceeding upon the issues whose headings are set forth below. The text of each issue has been standardized and is set forth in its entirety under the corresponding headings at 51 FR 19347, published May 29, 1986. The letter shown before each applicant's name is used below to signify whether the issue applies to that particular applicant.

Issue Heading and Applicant

1. Environmental Impact, B

2. 307(b)—Noncommercial Educational, A, B

3. Ultimate, A, B

3. If there are any non-standardized issues in this proceeding, the full text of the issue and the applicants to which it applies are forth in the Appendix to this Notice. A copy of the complete HDO is this proceeding is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street, NW., Washington, DC 20554. The complete text may also be purchased from the Commission's duplicating contractor, Downtown Copy Center, 1114 21st St. NW., Washington, DC 20036 (Telephone (202) 452–1422).

W. Jan Gay,

Assistnat Chief, Audio Services Division, Mass Medic Bureau.

BILLING CODE 6210–01–M

FEDERAL TRADE COMMISSION

Granting of Request for Early Termination of the Waiting Period Under the Premerger Notification Rules

Section 7A of the Clayton Act, 5 U.S.C. 18a, as added by title II of the Hart-Scott-Rodina Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Federal Trade Commission and the Assistant Attorney

General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the **Federal Register.**

The following transactions were granted early termination of the waiting period provided by law and the premerger notification rules. The grants were made by the Federal Trade Commission and the Assistant Attorney General for the Antitrust Division of the Department of Justice. Neither agency intends to take any action with respect to these proposed acquisitions during the applicable waiting period.

TRANSACTIONS GRANTED EARLY TERMINATION BETWEEN: 083192 AND 091192

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Agency Forms Submitted to the Office of Management and Budget for Clearance

On Fridays, the Department of Health and Human Services, Office of the Secretary publishes a list of information collections it has submitted to the Office of Management and Budget (OMB) for clearance in compliance with the Paperwork Reduction Act (44 U.S.C. chapter 35). The following are those information collections recently submitted to OMB.

1. Medicare Beneficiary Surveys—0990-0981—Reinstatement—The Office of Inspector General plans to conduct both national and State specific surveys of Medicare beneficiaries to determine experience and satisfaction with Medicare services. The information is needed to identity program inefficiencies and monitor the effectiveness of corrective actions taken by the Department. Findings will be compared to those of previous surveys. *Respondents:* individuals; *Annual Number of Respondents:* 2090; *Frequency of Response:* once; *Average Burden per Response:* 20 minutes; Estimated Annual Burden: 697 hours. *OMB Desk Officer:* Allison Eydt.

Copies of the information collection packages listed above can be obtained by calling the OS Reports Clearance Officer on (202) 619-0511. Written comments and recommendations for the proposed information collection should be sent directly to the OMB desk officer designated above at the following address: OMB Reports Management Branch, New Executive Office Building, room 3208, Washington, DC 20503.

Dated: September 11, 1992

James F. Trickett,

Deputy Assistant Secretary for Management and Acquisition.

BILLING CODE 4150-04-M

Interest Rate on Overdue Debts

Section 30.13 of the Department of Health and Human Services' claims collection regulations (45 CFR part 30) provides that the Secretary shall charge an annual rate of interest as fixed by the Secretary of the Treasury after taking into consideration private consumer rates of interest prevailing on the date that HHS becomes entitled to recovery. The rate generally cannot be lower than the Department of Treasury's current value of funds rate or the applicable rate determined from the "Schedule of Certified Interest Rates with Range of Maturities." This rate may be revised quarterly by the Secretary of the Treasury and shall be published quarterly by the Department of Health and Human Services in the **Federal Register.**

The Secretary of the Treasury has certified a rate of 14% for the quarter ended September 30, 1992. This interest rate will remain in effect until such time as the Secretary of the Treasury notifies HHS of any change.

Dated: September 15, 1992.

William Topolewski,

Acting Deputy Assistant Secretary, Finance.

National Institutes of Health

National Institute on Deafness and Other Communication Disorders; Notice of Meeting of the Research Priorities Subcommittee of the National Deafness and Other Communication Disorders Advisory Board

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the Research Priorities Subcommittee of the National Deafness and Other Communication Disorders Board on October 14, 1992. The meeting will take place from 9 a.m. to 11:30 a.m. in Conference Room 7, Building 31C, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20892, and will be conducted as a telephone conference with the use of speaker phones.

The meeting, which will be open to the public from 9 a.m. to 11:10 a.m., is being held to discuss scientific advances in the field of balance and the vestibular system since the National Strategic Research Plan for that area was developed. Attendance by the public will be limited to the space available.

In accordance with the provisions set forth in section 552b(c)(6), title 5, U.S.C. and section 10(d) of Public Law 92–463, the meeting will be closed to the public from 11:10 a.m. to adjournment for the discussion and recommendation of individuals to serve as consultants to the Research Priorities Subcommittee. This discussion could reveal personal information concerning these individuals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Summaries of the Subcommittee's meeting and a roster of members may be obtained from Ms. Monica Davies, Executive Director, National Deafness and Other Communication Disorders Advisory Board, Building 31, room 3C08, National Institutes of Health, Bethesda, Maryland 20892, 301–402–1129, upon request.

Montana Off-Road Vehicle Designation

AGENCY: Bureau of Land Management—Valley Resource Area.

ACTION: Notice to limit off-road vehicle use on public lands.

SUMMARY: The Bureau of Land Management has entered into a Block Management Agreement with Page-Whitham Ranches of south Valley County, Montana, and the Montana Department of Fish, Wildlife and Parks. In accordance with this agreement, the following rules will be in effect within the designated area from October 1, 1992 to November 30, 1992.

—Vehicles must stay on existing roads/trails designated as open. Maps of the area boundary and of roads/trails designated open are available from the BLM and Montana Department of Fish, Wildlife & Parks offices in Glasgow, Montana and three field locations on the perimeter of the area boundary.
—Off-road vehicle use is allowed on public lands for game retrieval only.
—All gates should be left as signed.
—Open fires and littering is prohibited.

The block management area is described as all lands within the Square Creek, Desert Coulee, Taylor Coulee, Sheep Shed and Stone House pastures of the Carpenter Creek allotment. Legal description of the public lands within the block management area are as follows:

All or portions of the following sections in Valley County, Montana:

T. 25 N., R. 34 E., Sections 34 and 35
T. 25 N., R. 35 E., Sections 25 through 35
T. 25 N., R. 36 E., Sections 28 through 33
T. 24 N., R. 34 E., Sections 1, 2, 11, 12–14, 23
T. 24 N., R. 35 E., 1–5, 7–15, 17–20, 23–28, 33–35
T. 24 N., R. 36 E., 3–9, 17–18, 30–31
T. 23 N., R. 35 E., Sections 2, 3.

DATES: This designation will be in effect from October 1, 1992 through November 30, 1992.

FOR FURTHER INFORMATION CONTACT: Michael R. Holbert, Valley Resource Area, Area Manager, Route 1–4775, Glasgow, MT 59230–9798.

SUPPLEMENTARY INFORMATION: These regulations apply as found in 43 CFR 8364.1.

BILLING CODE 4310–DN–M

[ID–050–02–1540–11–G348]

Vehicle Use Restrictions; Idaho

AGENCY: Bureau of Land Management (BLM), Interior, Shoshone District Office.

ACTION: Restricted vehicle use, closure order.

SUMMARY: Notice is hereby given in accordance with 43 CFR 8341.2, that some land located in the Monument Resource Area is restricted to all vehicle use unless authorized. This will include 3- and 4-wheeled ATVs, dual purpose and off-road motorcycles, dune buggies or dune rails, cars, trucks, and mountain bicycles.

This emergency closure is necessary to protect watershed, vegetation, wildlife, and wilderness resources following four wild fires which burned approximately 205,000 acres in August, 1992. Interdisciplinary teams have prepared fire rehabilitation plans for the Ro, Black Ridge, Potter Butte, and Great Rift Fires. The Shoshone District Manager approved these plans on August 27, 1992.

Each of the four plans address the need for and locations of vehicle closures within the fire perimeters as part of fire rehabilitation efforts. BLM anticipates that the closures will gradually be lifted as vegetation recovers over a period of two to five years. At present, severe damage to the resources could result from vehicle use. Vehicle use would also conflict with, and reduce the effectiveness of, planned rehabilitation activities including seeding, road and trail repair, watershed protection structures, and interim management of wilderness study areas.

Restricted Areas

Ro Fire: The 25,000-acre Ro Fire is generally located immediately to the west of Bellevue and Hailey, Idaho, and is further described as follows:

T. 2 N., R. 17 E., Boise Meridian,
Portions of Sections: 33, 34, 35.
T. 1 N., R. 17 E., B.M.,
All of Section: 10;
Portions of Sections: 1, 2, 3, 4, 9, 11, 13, 15, 24.
T. 2 N., R. 18 E., B.M.,
Portions of Sections: 19, 20, 21, 22, 27, 28, 29, 30, 31, 32, 33, 34, 35.
T. 1 N., R. 18 E., B.M.,
All of Sections: 4, 5;
Portions of Sections: 2, 3, 6, 7, 8, 9, 10, 11, 12, 17, 18, 19, 20, 21, 29, 30.

All BLM-administered land within the Ro Fire perimeter, including all roads and trails, are hereby closed to all types of vehicles, year-around.

Black Ridge Fire: The 150,000-acre Black Ridge Fire is generally located seven miles east of Richfield, Idaho. The fire burned in four wilderness study areas (WSAs). The following burned areas within those WSAs are closed to all vehicles year-around: Raven's Eye WSA (ID–57–10)—24,267 acres, Sand Butte WSA (ID–57–8)—22,928 acres, Little Deer WSA (ID–57–11)—8,811 acres, and the Great Rift WSA (ID–33–1)—2,387 acres. These closure areas are further described as follows:

T. 2 S., R. 22 E., Boise Meridian,
Portions of Sections: 14, 15, 22, 23, 24, 25, 26, 27, 28, 29, 31, 32, 33, 34, 35.
T. 2 S., R. 23 E., B.M.,
Portions of Sections: 19, 30, 31.
T. 3 S., R. 21 E., B.M.,
All of Sections: 25, 35, 36;
Portions of Sections: 13, 14, 22, 23, 24, 26, 27, 34.
T. 3 S., R. 22 E., B.M.,
All of Sections: 2, 3, 4, 5, 9, 10, 11, 14, 15, 16, 17, 20, 21, 22, 23, 26, 27, 31, 35;
Portions of Sections: 1, 6, 7, 8, 12, 13, 18, 19, 24, 25, 28, 29, 30, 32, 33, 34.
T. 3 S., R. 23 E., B.M.,
All of Sections: 7, 18;
Portions of Sections: 5, 6, 8, 9, 16, 17, 19, 20, 21, 22, 23, 26, 27.
T. 3 S., R. 24 E., B.M.,
Portions of Section: 31.
T. 4 S., R. 21 E., B.M.,
All of Sections: 1, 2, 3, 11, 12;
Portions of Sections: 4, 10, 13, 14, 15, 24.
T. 4 S., R. 22 E., B.M.,
All of Sections: 2, 4, 5, 6, 7, 8, 9, 11, 16, 17, 18, 20, 21;
Portions of Sections: 1, 3, 10, 12, 13, 14, 15, 19, 22, 27, 28, 29, 33.
T. 4 S., R. 23 E., B.M.,
Portions of Sections: 1, 6, 7, 13, 24, 25, 36.
T. 4 S., R. 24 E., B.M.,
Portions of Sections: 15, 16, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33.
T. 5 S., R. 23 E., B.M.,
Portions of Sections: 1, 2, 10, 11, 12, 13, 14.
T. 5 S., R. 24 E., B.M.,
Portions of Sections: 4, 5, 6, 7, 8, 9, 16, 17, 18.

Great Rift Fire: The 10,000-acre Great Rift Fire is generally located 18 miles southeast of Carey, Idaho. The fire burned 2,357 acres in the Great Rift WSA. This area is closed to all vehicles, year-around and is further described as follows:

T. 3 S., R. 25 E., Boise Meridian,
Portions of Sections: 21, 22, 27, 28, 31, 32, 33.
T. 4 S., R. 24 E., B.M.,
Portions of Sections: 1, 2, 11, 12.
T. 4 S., R. 25 E., B.M.,
Portions of Sections: 5, 6, 7.

Potter Butte Fire: The 20,000-acre Potter Butte Fire is generally located 16 miles east of Carey, Idaho. The fire burned in two wilderness study areas (WSA). The following burned areas within those WSAs are closed to all vehicles year-around: Bear Den Butte WSA (ID–57–14)— 711 acres, and the Great Rift WSA—2,114 acres. These closure areas are further described as follows:

T. 2 S., R. 24 E., Boise Meridian,
Portion of Section: 34.
T. 3 S., R. 24 E., B.M.,
Portions of Sections: 1, 2, 11, 12.
T. 1 S., R. 25 E., B.M.,
Portions of Sections: 18, 19, 20, 29, 32.
T. 2 S., R. 25 E., B.M.,
Portions of Sections: 5, 8, 17, 19, 20, 30, 31.

Any BLM employee, agent, contractor and cooperator, while in the performance of official duty, is exempt from these closures. The BLM may authorize volunteers or other parties to enter the area for administrative, maintenance or other purposes.

An information handout has been developed for the public with a map

showing all of the vehicle closures. Signs have been placed to identify the boundaries of the closures. Official maps of the described areas are on file and available to the public at the Shoshone District Office.

EFFECTIVE DATE: This restricted vehicle use and closure order is effective immediately and shall remain in effect until revised, revoked or amended by the authorized officer pursuant to 43 CFR 8341.

FOR FURTHER INFORMATION CONTACT: Rick Vander Voet, Outdoor Recreation Planner, Monument Resource Area, Shoshone District Bureau of Land Management, 400 West "P" Street, PO Box 2–B, Shoshone, ID 83352, telephone (208) 886–2206.

Dated: September 18, 1992.

Janis L. VanWyhe,

Acting District Manager.

[G–910–G62–0101; 4320–08]

Intent To Prepare a Resource Management Plan Amendment/ Environmental Assessment (RMPA/ EA); New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to prepare an Amendment to the Taos Resource Management Plan (RMP) allowing cattle to graze in the Loop Road area. The plan amendment will be called the "Loop Pasture Amendment to the Taos RMP," and is specifically limited to this issue.

SUMMARY: The Taos Resource Area (TRA), Bureau of Land Management (BLM), proposes an amendment to the Taos RMP which was completed in 1988. The amendment would allow livestock use in the Loop pasture during the fall grazing season thereby minimizing conflict with recreational users.

The Taos RMP called for the elimination of livestock grazing in the Loop pasture. An agreement was negotiated with the grazing permittee to complete a brush treatment in an adjacent pasture to mitigate the loss of Animal Unit Months (AUM's). An Environmental Assessment (EA) was drafted and went out to the public for review and comment assessing impacts of controlling brush on an adjacent pasture. Due to the controversial nature of the proposed action, a herbicide treatment, many concerned citizens were heard from during the comment period.

The proposed amendment is a result of public comments. Many people felt that there is very little conflict between recreationists and fall cattle grazing.

Livestock grazing, with seasonal restrictions, is also compatible with other objectives of the Wild Rivers Recreation Area which include developed and undeveloped recreation, wildlife viewing, environmental education, and visual resource management.

The Loop pasture has been grazed primarily during the fall for many years and is in good condition. It would provide an excellent opportunity for environmental education, showing how a variety of grazing management prescriptions impact ecological conditions.

A team of interdisciplinary specialists with backgrounds in Wildlife Biology, Range Management, and Outdoor Recreation Planning will be involved in the preparation of the Plan Amendment/ EA.

DATES: Interested parties may submit comments regarding concerns or issues to be addressed in the plan amendment through October 15, 1992.

ADDRESSES: Comments should be sent to Area Manager, Bureau of Land Management, Taos Resource Area Office, 224 Cruz Alta Road, Taos, New Mexico 87571.

FOR FURTHER INFORMATION CONTACT: Richard Maggio, BLM, Taos Resource Area Office, 224 Cruz Alta Road, Taos, New Mexico 87571, 505–758–8851.

SUPPLEMENTARY INFORMATION: After the comment period in this Notice of Intent, the BLM will prepare and RMPA/EA. Following the preparation of the RMPA/ EA, a Record of Decision will be prepared. A Notice of Availability will announce the availability of the Plan Amendment/EA and Record of Decision in a subsequent **Federal Register**.

Dated: September 18, 1992.

Monte G. Jordan,

Associate State Director.

BILLING CODE 4310–FB–M

Fish and Wildlife Service

Availability of an Agency Draft Recovery Plan for White-Haired Goldenrod for Review and Comment

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability and public comment period.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces the availability for public review of an agency draft recovery plan for white-haired goldenrod. This species is found primarily on publicly owned lands in Menifee, Powell, and Wolfe Counties, Kentucky. The Service solicits review and comment from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before November 24, 1992, to receive consideration by the Service.

ADDRESSES: Persons wishing to review the draft recovery plan may obtain a copy by contacting the Field Supervisor, Asheville Field Office, U.S. Fish and Wildlife Service, 330 Ridgefield Court, Asheville, North Carolina 28806, telephone 704/665–1195. Written comments and materials regarding the plan should be addressed to the Field Supervisor at this address. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Mr. Robert R. Currie at the address and telephone number shown above.

SUPPLEMENTARY INFORMATION:

Background

Restoring endangered or threatened animals or plants to the point where they are again secure, self-sustaining members of their ecosystems is a primary goal of the Service's endangered species program. To help guide the recovery effort, the Service is working to prepare recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for recognizing the recovery levels for downlisting or delisting them, and estimate time and cost for implementing the recovery measures needed.

The Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) (Act), requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that a public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised recovery plan. The Service and other Federal agencies will also take these comments into account in the course of implementing approved recovery plans.

The agency draft recovery plan for white-haired goldenrod outlines a

mechanism that provides for the recovery and eventual delisting of this federally endangered species. White-haired goldenrod was listed as a threatened species primarily because of trampling of its habitat by hikers, campers, and archaeological looters. The plan requires that the Service and other cooperators in the recovery of this species determine the biological requirements of the species, determine the number of individuals that constitutes a viable population, and determine and implement the management actions needed to ensure the continued existence of at least 40 occurrences. This draft of the recovery plan was preceded by a technical review draft that was reviewed by species experts and by experts in the protection of rare plants. Comments and information provided during this review will be used in preparing the final recovery plan.

Public Comments Solicited

The Service solicits written comments on the recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: September 16, 1992.

Richard G. Biggins,

Acting Field Supervisor.

BILLING CODE 4310-55-M

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-335]

Decision Not To Review an Initial Determination Terminating Investigation With Prejudice

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

In the matter of Certain Dynamic Sequential Gradient Compression Devices and Component Parts Thereof.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has determined not to review an initial determination (ID) (Order No. 12) issued on August 31, 1992, by the presiding administrative law judge (ALJ) in the above-captioned investigation granting the motion of complainant The Kendall Company ("Kendall") to withdraw its complaint and terminate the investigation with prejudice.

FOR FURTHER INFORMATION CONTACT: Marc A. Bernstein, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-205-3087.

SUPPLEMENTARY INFORMATION: On January 10, 1992, Kendall filed a complaint under section 337 alleging unfair acts in the importation and sale of certain dynamic sequential gradient compression devices and component parts thereof. The complaint alleged, *inter alia*, importation and sale of articles infringing U.S. Letters Patent 4,029,087 ("the '087 patent"), owned by Kendall. Kendall concurrently moved for temporary relief. The Commission instituted an investigation of Kendall's complaint and provisionally accepted Kendall's motion for temporary relief on February 20, 1992. The notice of investigation named two respondents: Huntleigh Technology PLC, a British corporation, and Huntleigh Technology, Inc., a Delaware corporation. 57 FR 6126 (February 20, 1992). The notice of investigation was subsequently amended to add Huntleigh Medical Limited, a British corporation, as a respondent. 57 FR 32561 (July 22, 1992).

On May 15, 1992, the ALJ issued an ID denying Kendall's motion for temporary relief on the grounds that: (1) The pertinent claims of the '087 patent were likely invalid for obviousness under 35 U.S.C. 103, (2) these claims were likely not infringed by respondents, (3) Kendall was unlikely to establish the existence of a domestic industry with respect to the '087 patent, and (4) the balance of equities did not favor issuance of temporary relief. On June 15, 1992, the Commission vacated the ID's discussion of obviousness but did not modify or vacate the ID in any other respect. The Commission's action had the effect of denying Kendall's motion for temporary relief. 57 FR 27475 (June 19, 1992).

On July 17, 1992, Kendall filed an unopposed motion seeking leave to withdraw its complaint and to terminate the investigation with prejudice. The ALJ issued an ID granting the motion on August 31, 1992. No petitions for review of the ID were filed. This action is taken under the authority of section 337 of the Tariff Act of 1930, 19 U.S.C. 1337, and Commission interim rules 210.51 and 210.53(h), 19 CFR 210.51, 210.53(h).

Copies of the ID and all nonconfidential documents filed in connection with this investigation are available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202-205-2000. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on 202-205-1810.

Dated: September 21, 1992.

By order of the Commission.

Paul R. Bardos,

Acting Secretary.

BILLING CODE 7020-02-M

INTERSTATE COMMERCE COMMISSION

Agricultural Cooperative; Notice to the Commission of Intent to Perform Interstate Transportation for Certain Nonmembers

Date: September 22, 1992.

The following Notices were filed in accordance with section 10526(a)(5) of the Interstate Commerce Act. These rules provide that agricultural cooperatives intending to perform nonmember, nonexempt, interstate transportation must file the Notice, Form BOP 102, with the Commission within 30 days of its annual meeting each year. Any subsequent change concerning officers, directors, and location of transportation records shall require the filing of a supplemental Notice within 30 days of such change.

The name and address of the agricultural cooperative (1) and (2), the location of the records (3), and the name and address of the person to whom inquiries and correspondence should be addressed (4), are published here for interested persons. Submission of information which could have bearing upon the propriety of a filing should be directed to the Commission's Office of Compliance and Consumer Assistance, Washington, DC 20423. The Notices are in a central file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, DC.

BILLING CODE 2210–01–M

DEPARTMENT OF JUSTICE

Information Collections Under Review

The Office of Management and Budget (OMB) has been sent the following collection(s) of information proposals for review under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35) and the Paperwork Reduction Reauthorization Act since the last list was published. Entries are grouped into submission categories, with each entry containing the following information:

(1) The title of the form/collection;

(2) The agency form number, if any, and the applicable component of the Department sponsoring the collection;

(3) How often the form must be filled out or the information is collected;

(4) Who will be asked or required to respond, as well as a brief abstract;

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond;

(6) An estimate of the total public burden (in hours) associated with the collection; and,

(7) An indication as to whether section 3504(h) of Public Law 96–511 applies.

Comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the OMB reviewer, Ms. Lin Liu on (202) 395–7340 and to the Department of Justice's Clearance Officer, Mr. Don Wolfrey, on (202) 514–4115. If you anticipate commenting on a form/collection, but find that time to prepare such comments will prevent you from prompt submission, you should notify the OMB reviewer and the DOJ Clearance Officer of your intent as soon as possible. Written comments regarding the burden estimate or any other aspect of the collection may be submitted to Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503, and to Mr. Don Wolfrey, DOJ Clearance Officer, SPS/JMD/5031 CAB, Department of Justice, Washington, DC 20530.

Extension of the Expiration Date of a Currently Approved Collection Without any Change in the Substance or in the Method of Collection

(1) Aircraft/Vessel Report.
(2) I–92. Immigration and Naturalization Service.
(3) On occasion.
(4) Businesses or other for-profit. Federal agencies or employees. The I–92 information is used to fulfill manifest requirements and is used by other agencies for data collection and statistical analysis.
(5) 600,000 annual responses at .18 hours per response
(6) 108,000 annual burden hours.
(7) Not applicable under 3504(h).

(1) Application for Transfer of Petition for Naturalization.
(2) N–455. Immigration and Naturalization Service.
(3) On occasion.
(4) Individuals or households. The N–455 is used by the petitioner for naturalization to request a transfer of their petition to another court and is used by INS to make a recommendation to the court.
(5) 100 annual responses at .166 hours per response.
(6) 17 annual burden hours.
(7) Not applicable under 3504(h).

(1) Petition for Temporary Resident Status as a Replenishment Agricultural Worker (RAW).
(2) I–805. Immigration and Naturalization Service.
(3) Annually.
(4) Individuals or households. The I–805 is used by INS to determine whether a person is admissible to the United States as an immigrant and eligible for RAW status according to the eligibility requirements of the regulations.
(5) 300,000 annual responses at .5 hours per response.
(6) 150,000 annual burden hours.
(7) Not applicable under 3504(h).

Public comment on these items is encouraged.

Dated: September 22, 1992.

Don Wolfrey,

Department Clearance Officer, Department of Justice.

BILLING CODE 4410–10–M

DEPARTMENT OF LABOR

Office of the Secretary

Agency Recordkeeping/Reporting Requirements Under Review by the Office of Management and Budget (OMB)

Background: The Department of Labor, in carrying out its responsibilities under the Paperwork Reduction Act (44 U.S.C. Chapter 35), considers comments on the reporting/recordkeeping requirements that will affect the public.

List of Recordkeeping/Reporting Requirements Under Review: As necessary, the Department of Labor will publish a list of the Agency recordkeeping/reporting requirements under review by the Office of Management and Budget (OMB) since the last list was published. The list will have all entries grouped into new collections, revisions, extensions, or reinstatements. The Departmental Clearance Officer will, upon request, be able to advise members of the public of the nature of the particular submission they are interested in.

Each entry may contain the following information:

The Agency of the Department issuing this recordkeeping/reporting requirement.

The title of the recordkeeping/reporting requirement.

The OMB and/or Agency identification numbers, if applicable.

How often the recordkeeping/reporting requirement is needed.

Whether small businesses or organizations are affected.

An estimate of the total number of hours needed to comply with the recordkeeping/reporting requirements and the average hours per respondent.

The number of forms in the request for approval, if applicable.

An abstract describing the need for and uses of the information collection.

Comments and Questions: Copies of the recordkeeping/reporting requirements may be obtained by calling

the Departmental Clearance Officer, Kenneth A. Mills ((202) 523–5095). Comments and questions about the items on this list should be directed to Mr. Mills, Office of Information Resources Management Policy, U.S. Department of Labor, 200 Constitution Avenue, NW., room N–1301, Washington, DC 20210. Comments should also be sent to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for (BLS/DM/ESA/ETA/OLMS/MSHA/OSHA/PWBA/VETS), Office of Management and Budget, room 3001, Washington, DC 20503 ((202) 395–6880).

Any member of the public who wants to comment on recordkeeping/reporting requirements which have been submitted to OMB should advise Mr. Mills of this intent at the earliest possible date.

New

Bureau of Labor Statistics
Survey of Employer-Provided Training
BLS 9200

Form	Affected public	Respondents	Frequency	Average time per response
Mail quantity	Business or other for-profit	3,800	One time	20 minutes.
Follow-up quantity	Business or other for-profit	5,100	One time	30 minutes.

3,817 total hours.

The lack of nationally representative information on the provision of training in establishments is a serious handicap to the implementation of effective public policy. This survey will collect such information and report on the provision of training by industry and size of establishment.

BILLING CODE 4510–24–M

Employment Standards Administration

Wage and Hour Division; Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the Federal Register, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and

fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue NW., room S-3014, Washington, DC 20210.

New General Wage Determination Decisions

The numbers of the decisions added to the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" are listed by Volume, State, and page number(s).

Volume I

Florida:

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Goverment Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country. Subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402, (202) 783-3238.

When ordering subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the three separate volumes, arranged by State. Subscriptions include an annual edition (issued on or about January 1) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates will be distributed to subscribers.

Signed at Washington, DC this 18th day of September 1992.

Alan L. Moss,

Director, Division of Wage Determinations.

Employment and Training Administration

[TA-W-26, 958, et. al.]

Anschutz Corp.; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In the Matter of TA-W-26,958 Denver, Colorado, TA-W-26,958A, Houston, Texas, TA-W-26,958B Midland, Texas, and TA-W-26,958C Oklahoma City, Oklahoma.

In accordance with section 223 of the Trade Act of 1974 (19 U.S.C. 2273) the Department of Labor initially issued a Notice of Negative Determination on April 16, 1992. The denial notice was published in the **Federal Register** on May 22, 1992 (57 FR 21829). Subsequently, the Department reopened the investigation and issued a Revised Certification for Worker Adjustment Assistance on May 6, 1992 applicable to all workers of the subject firm in Denver, Colorado. The notice was published in the **Federal Register** on May 22, 1992 (57 FR 21829).

New information received from the company shows that several workers were separated in March 1991 from three other locations of the Anschutz Corporation. Accordingly, the Department is amending the revised certification to include workers at the Houston and Midland, Texas and the Oklahoma City, Oklahoma locations. A termination date of May 28, 1991 is established for the additional three locations since workers at these locations are covered under TA-W-27,360; TA-W-27,361 and TA-W-27,362 beginning on May 28, 1991.

The intent of the Department's certification is to include all workers of the Anschutz Corporation who were adversely affected by increased imports.

The amended notice applicable to TA-W-26,958 is hereby issued as follows:

"All workers of Anschutz Corporation, Denver, Colorado who became totally or partially separated from employment on or after February 1, 1991 and all workers of Anschutz Corporation, Houston, Texas:

Midland, Texas and Oklahoma City, Oklahoma who became totally or partially separated from employment on or after February 1, 1991 and before May 28, 1991 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974."

Signed at Washington, DC, this 14th day of September 1992.

Marvin M. Fooks,

Director, Office of Trade Adjustment Assistance.

[FR Doc. 92-23361 Filed 9-24-92; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-27,236]

Bates Fabrics, Inc., Lewiston, ME; Notice of Revised Determination on Reconsideration

On August 31, 1992, the Department issued an Affirmative Determination Regarding Application for Reconsideration for workers and former workers of the subject firm. The notice was published in the **Federal Register** on July 28, 1992 (57 FR 33367).

The Department's denial was based on the fact that the "contributed importantly" test of the Group Eligibility Requirements of the Trade Act was not met.

On reconsideration, the Department noted a late customer survey response from a major customer with increasing import purchases of bedspread while decreasing its purchases from Bates. Other findings on reconsideration show several customers of Bates increasing their indirect imports of bedspreads and reducing purchases from Bates in 1991 compared to 1990.

U.S. imports of bedspreads increased absolutely in 1991 compared to 1990 an in the twelve months ending in February 1992 compared to the same 12 month period ending in February 1991.

Sales and production of bedspreads at Bates decreased in 1991 compared to 1990 and in the first quarter of 1992 compared to the first quarter in 1991. Substantial worker separations occurred in 1991 and in 1992.

Conclusion

After careful consideration of the new facts obtained on reconsideration, it is concluded that workers at Bates Fabrics, Inc., in Lewiston, Maine were adversely affected by increased imports of articles that are like or directly competitive with the bedspreads produced at Bates Fabrics, Inc., in Lewiston, Maine. In accordance with the provisions of the Act, I make the following revised determination for workers of Bates Fabrics, Incorporated in Lewiston, Maine.

"All workers of Bates Fabrics, Incorporated in Lewiston, Maine who became totally or partially separated from employment on or after April 28, 1991 are eligible to apply for adjustment assistance under section 223 of the Trade Act of 1974."

Signed at Washington, D.C., this 15th day of September 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Service Unemployment Insurance Service.

[FR Doc. 92-23363 Filed 9-24-92; 8:45 am]

BILLING CODE 4510-30-M

[TA-W-27,418]

Tobin-Hamilton Company, Inc., Mansfield, MO; Notice of Affirmative Determination Regarding Application for Reconsideration

On September 2, 1992, one of the workers requested administrative reconsideration of the Department of Labor's Notice of Negative Determination Regarding Eligibility to Apply for Worker Adjustment Assistance for workers at the subject firm. The Department's Negative Determination was issued on August 7, 1992 and published in the **Federal Register** on August 28, 1992, (57 FR 39241).

Its claimed that the Department only investigated the transfer of production operations from Mansfield to overseas locations and never investigated whether the production and sales declines were the result of increased imports of children's shoes.

Conclusion

After careful review of the application, I conclude that the claim is of sufficient weight to justify reconsideration of the Department of Labor's prior decision. The application is, therefore, granted.

Signed at Washington, DC, this 11th day of September 1992.

Stephen A. Wandner,

Deputy Director, Office of Legislation & Actuarial Services, Unemployment Insurance Service.

BILLING CODE 4510-30-M

Job Training Partnership Act: Announcement of Proposed Noncompetitive Grant Awards

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice of intent to award a noncompetitive grant.

SUMMARY: The Employment and Training Administration (ETA) announces its intent to award a noncompetitive grant to the Southern Governors' Association, of Washington, DC, for the provision of specialized services under the authority of the Job Training Partnership Act (JTPA). The Southern Governors' Association has unique qualifications to perform this type of activity and their unsolicitated proposal is unique and has outstanding merit.

DATES: It is anticipated that this grant award will be executed by October 15, 1992, and will be funded for twelve months. Submit comments by 4:45 p.m. (Eastern Time), on October 13, 1992.

ADDRESSES: Submit comments regarding this proposed assistance award to: U.S. Department of Labor, Employment and Training Administration, room C-4305, 200 Constitution Avenue, NW., Washington, DC 20210, Attention: Charlotte Adams: Reference FR-DAA-006.

SUPPLEMENTARY INFORMATION: The Employment and Training Administration (ETA) announces its intent to award a noncompetitive grant to the Southern Governors' Association to implement school-to-work demonstration projects in five (5) member states of the Association's jurisdiction, and to produce a workforce case studies video. Funds for this activity are authorized by the Job Training Partnership Act, as amended, title IV—Federally administered Programs. The proposed funding is approximately $135,000 for twelve months.

Signed at Washington, DC on September 18, 1992.

Robert D. Parker,

ETA Grant Officer.

BILLING CODE 4510-30-M

Occupational Safety and Health Administration

Maryland State Standards; Notice of Approval

1. *Background*—Part 1953 of title 29, Code of Federal Regulations, prescribes procedures under section 18 of the Occupational Safety and Health Act of 1970 (hereinafter called the Act) by which the Regional Administrator for Occupational Safety and Health (hereinafter called the Regional Administrator), under a delegation of authority from the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter called the Assistant Secretary) (29 CFR 1953.4), will review

and approve standards promulgated pursuant to a State plan which has been approved in accordance with section 18(c) of the Act and 29 CFR part 1902. On July 5, 1973, notice was published in the Federal Register (38 FR 17834) of the approval of the Maryland State plan and the adoption of Subpart O to Part 1952 containing the decision.

The Maryland State plan provides for the adoption of all Federal standards as State standards after comments and public hearing. Section 1952.210 of Subpart O sets forth the State's schedule for the adoption of Federal standards. By letters dated May 26, June 29, and July 20, 1992, from Commissioner Henry Koellein, Jr., Maryland Division of Labor and Industry, to Linda R. Anku, Regional Administrator, and incorporated as part of the plan, the State submitted State standards identical to: (1) 29 CFR 1910.1030, pertaining to the Occupational Exposure to Bloodborne Pathogens Standard for General Industry as published in the Federal Register of December 6, 1991 (56 FR 64174); (2) 29 CFR 1910.1025, pertaining to amendments to the Occupational Exposure to Lead Standard for General Industry as published in the Federal Register of January 30, 1990 (55 FR 3166); and (3) 29 CFR 1910.119, pertaining to the Process Safety Management of Highly Hazardous Chemicals, Explosives, and Blasting Agents as published in the Federal Register of February 24, 1992 (57 FR 6403). These standards are contained in COMAR 09.12.31. Maryland occupational safety and health standards were promulgated after a public hearing March 31, February 5, and May 5, 1992, respectively. These standards became effective on May 31, June 8, and July 20, 1992, respectively.

2. *Decision*—Having reviewed the State submissions in comparison with the Federal standards, it has been determined that the State standards are identical to the Federal standards and, accordingly, are approved.

3. *Location of the Supplements for Inspection and Copying*—A copy of the standards supplements, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Regional Administrator, 3535 Market Street, Suite 2100, Philadelphia, Pennsylvania 19104; Office of the Commissioner of Labor and Industry, 501 St. Paul Place, Baltimore, Maryland 21202; and the OSHA Office of State Programs, U.S. Department of Labor, room N3700, 3rd Street and Constitution Avenue, NW., Washington, DC 20210.

4. *Public Participation*—Under 29 CFR 1953.2(c), the Assistant Secretary may prescribe alternative procedures to expedite the review process or for other good cause which may be consistent with applicable laws. The Assistant Secretary finds that good cause exists for not publishing the supplements to the Maryland State plan as a proposed change and making the Regional Administrator's approval effective upon publication for the following reasons:

a. The standard is identical to the Federal standard which was promulgated in accordance with Federal law including meeting requirements for public participation.

b. The standard was adopted in accordance with the procedural requirements of State law and further participation would be unnecessary.

This decision is effective September 25, 1992.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Philadelphia, Pennsylvania, this 27th day of August 1992.

Richard Soltan,

Deputy Regional Administrator.

BILLING CODE 4510-26-M

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice 92-51]

NASA Advisory Council; Minority Business Resource Advisory Committee; Establishment.

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Notice of establishment.

SUMMARY: Pursuant to section 14(b)(1) of the Federal Advisory Committee Act, Public Law 92-463, and after consultation with the Committee Management Secretariat, General Services Administration, the National Aeronautics and Space Administration has determined that establishment of the NASA Advisory Council Minority Business Resource Advisory Committee is in the public interest in connection with the performance of duties imposed upon NASA by law.

FOR FURTHER INFORMATION CONTACT: Dr. Sylvia K. Kraemer, National Aeronautics and Space Administration, Code ADA-2, Washington, DC 20546 (202/453-8766).

SUPPLEMENTARY INFORMATION: The function of the Minority Business Resource Advisory Committee is (1) to advise the NASA Administrator on the special needs and opportunities presented by the Nation's minority businesses, and (2) to assist NASA in identifying eligible minority businesses to participate in NASA procurement in support of the Nation's civil aeronautics and space research and development programs.

Dated: September 21, 1992.

BILLING CODE 7510–01–M

POSTAL RATE COMMISSION

[Docket No. MC92-1; Order No. 934]

Second-Class Eligibility; Notice and Order Provisionally Establishing Proceeding for Consideration of Modifying Format Requirement for Second Class and Requesting Comments

September 21, 1992.

Before Commissioners: George W. Haley, Chairman; Henry R. Folsom, Vice-Chairman; John W. Crutcher; W.H. "Trey" LeBlanc, III; H. Edward Quick, Jr.

Currently one of the requirements for use of second class, the mail class for newspapers and other periodical publications, is that the mail pieces be made of printed sheets. Domestic Mail Classification Schedule (DMCS) section 200.0102. With the new methods of disseminating information, such as diskettes used in computers, the Commission believes it might be useful to review the requirement of printed sheets to determine whether modification is appropriate, and what form any change should take.

Recently a joint study by the Postal Service and mailers recommended that second-class eligibility be extended to other publication formats, while maintaining the integrity of the class.[1] The purpose of second class can be found in section 200.0104 of the DMCS: "Second-class matter must be originated and published for the purpose of disseminating information of a public character, or devoted to literature, the sciences, art, or some special industry." With the changes in technology which have taken place, and are expected to continue, it is possible that formats other than printed paper could be useful additions to second class and further the goals for which that class exists.

There are many questions which must be answered before the Commission could recommend a classification change to include new publication formats.[2] Therefore, the Commission is establishing Docket No. MC92-1 provisionally and requesting that interested parties comment on the appropriateness of modifying the "printed sheets" requirement. In addition to comments on the desirability of considering such a change, interested parties are encouraged to provide as much information as possible about existing nonpaper publications as well as projections for the future.

Many questions will have to be answered if the Commission decides to go forward with the consideration of modifying the requirement of printed sheets. The possible effect on costs, and subsequently, rates, is a major question. Whether these types of publications are compatible with the existing class, and how any incompatibility should be handled, is another major concern. Existing second-class rate and classification schedules are based on mail pieces which have characteristics varying greatly from formats which do not meet the printed sheets requirement. It would be most helpful if commenters review the current second-class rate and classification schedules. Following that review, the inquiry would be aided by parties' comments on whether any of the rate elements in the rate schedule and the other existing DMCS provisions should be inapplicable to nonpaper publications, or whether further modifications (in addition to eliminating the printed sheets requirement) would be more appropriate.

The Commission will review all comments received and make a decision on whether to move forward with a classification case concerning this issue. However, any evidence the Commission ultimately relies on in issuing a recommendation must meet the evidentiary standards found in the Commission's rules of practice and procedure.

Stephen A. Gold, Director of the Commission's Office of the Consumer Advocate, is appointed to represent the interests of the general public in this inquiry, and any section 3624 proceedings therein. In this capacity, he will direct the activities of Commission personnel assigned to assist him and, at an appropriate time, supply their names for the record. Mr. Gold and the assigned personnel will participate in, or offer advice on, any Commission decision in this inquiry, only as described in 39 CFR 3001.8.

We are setting October 21, 1992, as the date for their submission. The Secretary of the Commission will maintain a service list for this inquiry. Parties may have their names included on the list by writing to the Secretary.

The Commission Orders

(A) Comments on consideration of modifying the requirement that second-class matter be formed of printed sheets are due on October 21, 1992. They should be sent to the Secretary, Postal Rate Commission, 1333 H Street, NW., suite 300, Washington, DC 20268-0001.

(B) Stephen A. Gold is appointed Officer of the Commission to represent the interests of the general public in this inquiry and any further section 3624 proceeding on this matter.

(C) The Secretary of the Commission will maintain a service list of those parties who request their names be included.

(D) The Secretary of the Commission will have this Notice and Order published in the Federal Register.

By the Commission.

Charles L. Clapp,

Secretary.

BILLING CODE 7710-FW-M

[1] In August 1992, the Competitive Services Task Force, made up of industry and postal representatives, issued a report with its recommendations of improvements for postal offerings. This recommendation is found on page 32.

[2] Under the statute the Commission can only recommend classification changes in cases which it initiates. Any rate associated with a new classification must be proposed by the Postal Service. 39 U.S.C. 3623.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-31204; File No. SR-NASD-92-34]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to Assessments and Fees on Members

September 18, 1992.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"), 15 U.S.C. 78s(b)(1), notice is hereby given that on September 4, 1992,[1] the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The NASD has designated this proposal as one establishing or changing a fee under section 19(b)(3)(A)(ii) of the Act, which renders the rule effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing a rule change to amend Schedule A to the NASD's By-Laws to modify the NASD's branch office fees. Below is the text of the proposed rule change. Proposed new

[1] The NASD originally submitted this filing on August 20, 1992. On September 4, 1992, the NASD filed Amendment No. 1 to SR-NASD-92-34. The amendment replaced the text of the proposed rule change originally filed, and modified the discussion of the proposed rule change to conform to the changes in the text.

language is italicized; proposed deletions are in brackets.

Schedule A

Section 2—Fees

(a) Each member shall be assessed a fee of $50 for *the registration of* each [registered] branch office, as defined in the By-Laws[.]. *Each member shall be assessed an annual fee for each branch office* [which is open during any part of the Association's fiscal year.] *in an amount equal to the lesser of (1) $50 per registered branch, or (2) the product of $50 and the number of registered representatives and registered principals associated with the member at the end of Association's fiscal year.*

II. Self-Regulatory Organization's Statement of the Purpose of and Statutory Basis for, the Proposed Rule Change

In its filing with the SEC, the Association included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in sections (A), (B), and (C) below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The NASD currently requires its members to pay an annual fee for each registered branch office pursuant to Schedule A, Section 2 to the By-Laws. The fee is imposed for each location of a member that meets the definition of "branch office," as defined in the By Laws,[2] and which is registered with the Association. The NASD is proposing to modify the language of the provision to clarify that (1) a fee is imposed upon the registration of each branch office; (2) each branch office is also subject to an annual fee; and (3) the annual fee is calculated at the end of each year based on the registered branch offices and registered principals at that time.

Because of inequities that could result from the imposition of branch office fees on a member that has a disproportionately large number of branch office locations relative to its size and number of registered persons, the NASD has determined that the branch office fee structure should be revised to eliminate this inequity. The NASD is therefore proposing to amend section 2 of Schedule A to impose an initial fee of $50 on the registration of a branch office and an annual charge equal to the lesser of $50 per branch or the product of $50 and the total number of the member's registered representatives and registered principals. Thus, where the number of registered branch offices of a member exceeds the combined number of that member's registered representatives and registered principals, the member would not be assessed branch office and renewal fees for the excess of branch offices over the amount of representative and principal registrations. Regardless of whether the annual fee is based on the number of the member's registered representatives and principals, members are still obligated to register each location that meets the definition of a branch office.

The NASD believes that the proposed rule change is consistent with section 15A(b)(5) of the Act, which requires that the rules of the Association provide for the equitable allocation of reasonable dues, fees, and other charges among members, in that it eliminates inequities in the imposition of branch office fees.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective upon filing pursuant to section 19(b)(3)(A)(ii) of the Act, and subparagraph (e) of Rule 19b–4 thereunder, in that it constitutes a due, fee, or other charge. At any time within 60 days of the filing of such rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by October 16, 1992.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority, 17 CFR 200.30–3(a)(12).

Margaret H. McFarland,

Deputy Secretary.

DEPARTMENT OF STATE

[Public Notice 1705]

Shipping Coordinating Committee, Subcommittee on Safety of Life at Sea, Working Group on Ship Design and Equipment and Working Group on Fire Protection; Meetings

Fire Protection Meeting

The U.S. Safety of Life at Sea Working Group on Fire Protection will conduct an open meeting on October 14, 1992 at 9:30 a.m. in room 2415 at U.S. Coast Guard Headquarters, 2100 Second Street SW., Washington, DC 20593. The purpose of the meeting will be to debrief on the discussions that took place at the 37th Session of the International Maritime Organization (IMO) Subcommittee on Fire Protection (FP), held on May 18–22, 1992.

The meeting will focus on the fire safety of commercial vessels. Specific discussion areas include: code of safety for dynamically supported craft, fire casualty records, fire-fighting systems, fire test procedures, guidelines for performance and testing criteria and surveys of foam concentrates, provisions for helicopter facilities on ships, phasing out of halons, automatic sprinkler systems, passenger vessel safety, preventing and mitigating marine

pollution incidents, role of the human element in maritime casualties, open top container ships, and smoke control research.

Members of the public may attend up to the seating capacity of the room. For further information regarding the meeting of the SOLAS Working Group on Fire Protection contact Mr. Jack Booth at (202) 267–2997.

Design and Equipment Meeting

The Working Group on Ship Design and Equipment of the Subcommittee on Safety of Life at Sea (SOLAS) will conduct an open meeting on October 14, 1992 at 1 p.m. in room 2415 at United States Coast Guard Headquarters, 2100 Second Street SW., Washington, DC.

The purpose of the meeting will be to prepare for the 36th Session of the International Maritime Organization (IMO) Subcommittee on Ship Design and Equipment (DE) scheduled for February 22 to 26, 1993. Items of discussion will include the following: Use on board ships of ozone-depleting substances other than halons; guidelines on standard calculations for anchor positioning systems for mobile offshore drilling units (MODUs); guidelines for dynamic positioning systems for MODUs and ships engaged in similar operations; maneuverability of ships and maneuvering standards; helicopter facilities offshore and on ships; extension of the code on alarms and indicators; ventilation of vehicle decks during loading and unloading; consideration of the introduction of the Harmonized System of Surveys and certification into the MODU Code; revision of the Code of Safety for Dynamically Supported Craft; fuel line failures; reduction of secondary sources of pollution by minimizing the source of general flooding and by improving control of equipment vital to safe operation of the vessel; development of safety standards for combined pusher tug-barges; structural integrity of tankers and bulk carriers; review of existing ships' safety standards; requirements for ships intended for operation in polar waters; guidelines for standardization of the layout of essential instrumentation on the bridge and in the engine room; feasibility study on voyage data recorders; coating requirements for ballast tanks; revision of towing requirements—resolution A.535(XIII); safety of passenger submersibles; introduction of a standard for ship construction into SOLAS 1974; and, the role of the human element in maritime casualties.

The IMO DE Subcommittee works to develop international agreements, guidelines, and standards for machinery, equipment, and systems as these relate to the marine industry. In most cases, these international agreements, guidelines, and standards form the basis for national standards/regulations and class society rules. The U.S. SOLAS Working Group supports the U.S. Representative to the IMO DE Subcommittee in developing the U.S. position on those issues raised at the IMO DE Subcommittee meetings. Because of the impact on domestic regulations through development of these international guidelines, standards, and regulations, the U.S. SOLAS Working Group serves as an excellent forum for the U.S. maritime industry to express their ideas. All shipping companies, shipyards, design firms, naval architects, marine engineers, and consultants are encouraged to send representatives to participate in the development of U.S. positions on those issues affecting your maritime industry and remain abreast of all activities ongoing within IMO DE. Since these meetings are open to the public, anyone may attend up to the seating capacity of the room.

For further information on the DE meeting contact Lieutenant Commander Roger Dent at (202) 267–2206, U.S. Coast Guard Headquarters (G–MTH–2), 2100 Second Street SW., Washington, DC 20593–0001.

Dated: September 22, 1992.

Geoffrey Ogden,

Chairman, Shipping Coordinating Committee.

BILLING CODE 4710–07–M

THRIFT DEPOSITOR PROTECTION OVERSIGHT BOARD

Regional Advisory Board Meetings, Regions 1–6

AGENCY: Thrift Depositor Protection Oversight Board.

ACTION: Meetings notice.

SUMMARY: In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is hereby published for the Series 10 Regional Advisory Board meetings for Regions 1 through 6. The meetings are open to the public.

DATES: The meetings are scheduled as follows:

1. October 14, 9 a.m. to 12:30 p.m., Newark, New Jersey, Region 1 Advisory Board.

2. October 27, 9 a.m. to 12:30 p.m., Fort Worth, Texas, Region 4 Advisory Board.

3. October 29, 9 a.m. to 12:30 p.m., Kansas City, Missouri, Region 2 Advisory Board.

4. November 6, 9 a.m. to 12:30 p.m., Albuquerque, New Mexico, Region 5 Advisory Board.

5. November 10, 9 a.m. to 12:30 p.m., Los Angeles, California, Region 6 Advisory Board.

6. November 18, 9 a.m. to 12:30 p.m., St. Paul, Minnesota, Region 3 Advisory Board.

ADDRESSES: The meetings will be held at the following locations:

1. Newark, New Jersey—Hilton Gateway, Ballroom, Lobby Level, Raymond Boulevard & Gateway Center.

2. Fort Worth, Texas—The Worthington Hotel, Great Lakes Room, Mezzanine Level, 200 Main Street.

3. Kansas City, Missouri—Allis Plaza Hotel, Basie Ballroom, Second Floor, 200 West Twelfth.

4. Albuquerque, New Mexico—Albuquerque Technical Vocational Institute, Smith Brasher Hall, Room 100, 717 University Boulevard, S.E.

5. Los Angeles, California—The Westin Bonaventure, Santa Barbara Room, Lobby Level, 404 South Figueroa Street.

6. St. Paul, Minnesota—Minnesota World Trade Center, Studio Theater, Third Level, 400 World Trade Center.

FOR FURTHER INFORMATION CONTACT: Jill Nevius, Committee Management Officer, Thrift Depositor Protection Oversight Board, 1777 F Street, NW., Washington, DC 20232, 202/786–9675.

SUPPLEMENTARY INFORMATION: Section 501(a) of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989, Public Law No. 101–73, 103 Stat. 183, 382–383, directed the Oversight Board to establish one national advisory board and six regional advisory boards.

PURPOSE: The Regional Advisory Boards provide the Resolution Trust Corporation (RTC) with recommendations on the policies and programs for the sale of RTC owned real property assets.

AGENDA: Topics to be addressed at the six regional meetings include: net recoveries by asset type and sales method, appraisal policies, SAMDA program incentives, bulk sales, RTC computer systems, environmentally significant property disposition, use of multiple investor funds for land disposition and affordable housing disposition performance reports. A detailed agenda will be available at the meeting.

STATEMENTS: Interested persons may submit to an advisory board written statements, data, information, or views

on the issues pending before the board prior to or at the meeting. The meeting will include a public forum for oral comments. Oral comments will be limited to approximately five minutes. Interested persons may sign up for the public forum at the meeting. All meetings are open to the public. Seating is available on a first come first served basis.

Dated: September 22, 1992.

Jill Nevius,

Committee Management Officer, Office of Advisory Board Affairs.

Redetermination of Fitness of Air Alpha, Inc.

AGENCY: Department of Transportation.

ACTION: Notice of Commuter Air Carrier Fitness Redetermination—Order 92-9-39, Order to Show Cause.

SUMMARY: The Department of Transportation is proposing to find that Air Alpha, Inc., is fit, willing, and able to resume operations as a commuter air carrier.

RESPONSES: All interested persons wishing to respond to the Department of Transportation's tentative fitness determination should file their responses with the Air Carrier Fitness Division, P-56, Department of Transportation, 400 Seventh Street, SW., room 6401, Washington, DC 20590, and serve them on all persons listed in Attachment A to the order. Responses shall be filed no later than October 5, 1992.

FOR FURTHER INFORMATION CONTACT: Ms. Delores King, Air Carrier Fitness Division (P-56, room 6401), U.S. Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590, (202) 366-2343.

Dated: September 18, 1992.

Patrick V. Murphy, Jr.,

Deputy Assistant Secretary for Policy and International Affairs.

[Notice No. 92-16]

Senior Executive Service Performance Review Boards (PRB) Membership

AGENCY: Department of Transportation (DOT).

ACTION: Notice.

SUMMARY: DOT publishes the names of the persons selected to serve on the various Departmental Performance Review Boards (PRB) established by DOT under the Civil Service Reform Act.

FOR FURTHER INFORMATION CONTACT: Glenda M. Tate, Director of Personnel, and Executive Secretary, DOT Executive Resources Board, (202) 366-4088.

SUPPLEMENTARY INFORMATION: Title 5 U.S.C. 4312 requires that each agency implement a performance appraisal system making senior executives accountable for organizational and individual goal accomplishment. As part of this system, 5 U.S.C. 4314(c) requires each agency to establish one or more PRBs, the function of which is to review and evaluate the initial appraisal of a senior executive's performance by the supervisor and to make recommendations to the final rating authority relative to the performance of the senior executive.

The persons named below have been selected to serve on one or more Departmental PRBs.

Issued in Washington, DC, on September 18, 1992.

Jon H. Seymour,

Assistant Secretary for Administration.

BILLING CODE 4910-62-M

Federal Highway Administration

Environmental Impact Statement: Missoula & Ravalli Counties, MT

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of intent.

SUMMARY: The FHWA is issuing this notice to advise the public that an environmental impact statement will be prepared for a proposed highway project in Missoula and Ravalli Counties, Montana.

FOR FURTHER INFORMATION CONTACT: Dale Paulson, Environmental Coordinator, Federal Highway Administration, 301 South Park, Drawer 10056, Helena, MT 59626-0056; Telephone: (406) 449-5310; or Mr. Doug Morgan, Consultant Design Engineer, Montana Department of Transportation, 2701 Prospect Street, Helena, MT 59620; Telephone: (406) 444-6251.

SUPPLEMENTARY INFORMATION: The FHWA, in cooperation with the Montana Department of Transportation will prepare an Environmental Impact Statement (EIS) on a proposal to develop a project or projects to improve travel between Hamilton and Lolo, Montana. The environmental studies will focus on US 93 from just north of Hamilton to its intersection with US 12 in Lolo, a distance of about 35 miles.

In addition to studying ways to improve the highway in response to traffic congestion and safety issues, alternatives to the single occupant vehicle such as commuter rail lines, bus service and van pools will be studied. Strategies to manage demand by encouraging and facilitating use of the corridor at times other than when use and congestion is the highest will be considered. The no action alternative will also be considered.

Letters describing the proposed action and soliciting comments will be sent to appropriate Federal, State and local agencies, and to private organizations and citizens who have previously expressed or are known to have interest in this proposal. A series of formal scoping meetings will be held in the project area beginning in late 1992. In addition, a public hearing will be held. Public notice will be given of the time and place of the meetings and hearing. The draft EIS will be available for public and agency review and comment prior to the public hearing.

To ensure that the full range of issues related to this proposed action are addressed and all significant issues are identified, comments and suggestions are invited from all interested parties. Comments and/or questions concerning this proposed action and the EIS should be directed to the FHWA at the address provided above.

Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.

Issued on: September 17, 1992.

Hank D. Honeywell,

Division Administrator, Montana Division, Helena.

BILLING CODE 4910-22-M

National Highway Traffic Safety Administration

Petition for Exemption From the Vehicle Theft Prevention Standard; Toyota

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Grant of petition for exemption.

SUMMARY: This notice grants the petition by Toyota Motor Corporate Services of North America, Inc. (Toyota) for exemption from the parts marking requirements of the vehicle theft prevention standard for a high theft car line (whose nameplate is confidential), pursuant to 49 CFR part 543, Exemption from Vehicle Theft Prevention Standard.

DATES: The exemption granted by this notice is effective beginning with the 1993 model year.

FOR FURTHER INFORMATION CONTACT: Ms. Barbara A. Gray, Office of Market Incentives, NHTSA, 400 Seventh Street, SW., Washington, DC 20590. Ms. Gray's telephone number is (202) 366–1740.

SUPPLEMENTARY INFORMATION: On April 29, 1992, the agency received a letter from Toyota Motor Corporate Services of North America, Inc. (Toyota) requesting an exemption from the theft prevention standard for a new car line to be introduced in Model year 1993. The letter was submitted pursuant to 49 CFR part 543, *Exemption from Vehicle Theft Prevention Standard.* Toyota requested an exemption from parts marking based on the installation of a theft deterrent system as standard equipment for the car line that is the subject of this notice. In a letter dated May 11, 1992, the agency granted Toyota's requests for confidential treatment of information, including the nameplate of the new car line, in its submission.

Upon review of Toyota's submission, the agency determined that the submission did not include certain information concerning reliability and durability testing of the antitheft system. (See 49 CFR 543.6(a)(3)(v).) The agency informed Toyota of the omission, and received the required information on June 15, 1992. The agency determined that, as of June 15, 1992, the information submitted by Toyota fulfilled the specific content requirements of § 543.6.

In its petition, Toyota provided a description of the identity, design, and location of the components of the antitheft device proposed for the car line that is the subject of this notice, inlcuding diagrams of the components and their location in the vehicle. Toyota stated that the proposed antitheft system incorporates an alarm function that monitors the vehicle's doors, hood, and trunk key cylinder, and prevents unauthorized operation of the engine.

Toyota stated that the proposed antitheft system is automatically activated by the normal locking of the vehicle door. In order to arm the system, the key must be removed from the ignition switch; all of the doors, trunk lid, and hood lid, must be closed; and the driver's or front passenger's door must be locked with or without the ignition key. Locking any door ensures that all doors, the hood, and trunk are locked.

If the system is armed and unauthorized entry is attempted, the antitheft system will be triggered, setting off audible and visual signals to attract attention. Additionally, the antitheft system will activate the starter-interrupt relay, preventing the starting of the engine from the ignition switch. Toyota stated that to prevent defeat of the antitheft system, all system components are in inaccessible locations. Toyota described further measures, including mechanical and body designs to deter forcible entrance into and movement of the vehicle, to prevent unauthorized operation of its new car line.

Toyota addressed the reliability and durability of its proposed antitheft system by describing redundant features in the system and by explaining the various quality assurance tests that were conducted on the system.

In discussing why it believes the antitheft system will be effective in reducing and deterring motor vehicle theft, Toyota stated that existing Toyota car lines have an antitheft system similar to that proposed for the car line that is the subject of this notice. Toyota stated that the theft rate for the existing Toyota car lines decreased for the first year that the antitheft system was included as standard equipment, and that its theft rates have remained lower than Toyota models that do not include the antitheft system. Toyota asserted that these theft data indicate the effectiveness of the antitheft system, and therefore, the system that is the subject of the petition is likely to be as effective as parts marking.

NHTSA believes that there is substantial evidence indicating that the antitheft system to be installed as standard equipment in the Toyota car line that is the subject of this notice, will likely be as effective in reducing and deterring motor vehicle theft as compliance with the requirements of the theft prevention standard (49 CFR part 541). This determination is based on the information Toyota submitted with its petition and on other available information. The agency believes that the device will provide all of the types of performance listed in § 543.6(a)(3): Promoting activation, preventing defeat or circumventing of the device by unauthorized persons, preventing operation of the vehicle by unauthorized entrants, and ensuring the reliability and durability of the device.

As required by section 605(b) of the statute and 49 CFR § 543.6(a)(4), the agency also finds that Toyota has provided adequate reasons for its belief that the antitheft device will reduce and deter theft. This conclusion is based on the information Toyota provided on its device. This information included a description of reliability and functional tests conducted by Toyota for the antitheft system and its components.

For the foregoing reasons, the agency hereby exempts the Toyota car line that is the subject to this notice, in whole from the requirements of 49 CFR part 541.

If Toyota decides not to use the exemption for the car line that is the subject of this notice, it should formally notify the agency. If such a decision is made, that car line must be fully marked according to the requirements under 49 CFR 541.5 and 541.6 (marking of major component parts and replacement parts).

The agency notes that the limited and apparently conflicting data on the effectiveness of the pre-standard parts marking programs continue to make it difficult to compare the effectiveness of an antitheft device with the effectiveness of compliance with the theft prevention standard. The statute clearly invites such a comparison, which the agency has made on the basis of the limited data available.

NHTSA notes that if Toyota wishes in the future to modify the device on which this exemption is based, the company may have to submit a petition to modify the exemption. Part 543.7(d) states that a part 543 exemption applies only to vehicles that belong to a line exempted under this part and equipped with the antitheft device on which the line's exemption is based. Further, § 543.9(c)(2) provides for the submission of petitions "(t)o modify an exemption to permit the use of an antitheft device similar to but differing from the one specified in that exemption."

The agency wishes to minimize the administrative burden which § 543.9(c)(2) could place on exempted vehicle manufacturers and itself. The agency did not intend in drafting Part 543 to require the submission of a modification petition for every change to the components or design of an antitheft device. The significance of many such changes could be *de minimis*. Therefore,

NHTSA suggests that if the manufacturer contemplates making any changes the effects of which might be characterized as *de minimis* then it should consult the agency before preparing and submitting a petition to modify.

Authority: 15 U.S.C. 2025; delegation of authority at 49 CFR 1.50.

Issued on: September 22, 1992.

Marion C. Blakey,

Acting Administrator.

BILLING CODE 4910-59-M

Research and Special Programs Administration

[Docket No. PDA-5(R)]

Application by Chemical Waste Transportation Institute for a Preemption Determination as to the Uniform Hazardous Waste Manifest Promulgated by the Illinois Environmental Protection Agency

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Public notice extending rebuttal comment period.

SUMMARY: The Chemical Waste Transportation Institute (CWTI) has applied for an administrative determination whether the Uniform Hazardous Waste Manifest promulgated by the Illinois Environmental Protection Agency (IEPA) is preempted by the Hazardous Materials Transportation Act (HMTA) and the Hazardous Materials Regulations issued under the HMTA. This notice clarifies that, to the extent that they remain relevant and appropriate, all comments previously submitted in RSPA's Docket No. IRA-51 will be considered with respect to CWTI's application. The period for rebuttal comments is being extended to assure all interested parties the opportunity to respond to comments previously submitted in Docket No. IRA-51.

DATES: Rebuttal comments received on or before October 30, 1992, will be considered before an administrative ruling is issued by RSPA's Associate Administrator for Hazardous Materials Safety. Rebuttal comments may discuss only those issues raised by comments already received (including any comments submitted in Docket No. IRA-51) and may not discuss new issues.

ADDRESSES: The application, CWTI's petition for an inconsistency ruling, comments on the petition in Docket No. IRA-51, and any comments submitted on the present application may be reviewed in the Dockets Unit, Research and Special Programs Administration, Room 8421, Nassif Building, 400 Seventh Street, SW, Washington, DC 20590-0001 (Tel. No. 202-366-4453). Rebuttal comments on the application may be submitted to the Docket Unit at the above address, and should include the Docket Number (PDA-5(R)). Three copies should be submitted. In addition, a copy of each rebuttal comment must also be sent to (a) Mr. Kevin Connors, Chairman, Chemical Waste Transportation Institute, 1730 Rhode Island Avenue, NW., suite 1000, Washington, DC 20036, and (b) Mr. William C. Child, Chief, Bureau of Land, Illinois Environmental Protection Agency, P.O. Box 19276, Springfield, Illinois 62796-9276. A certification that a copy has been sent to these persons must also be included with the comment. (The following format is suggested: "I hereby certify that copies of this comment have been sent to Messrs. Connors and Child at the addresses specified in the Federal Register.")

FOR FURTHER INFORMATION CONTACT: Frazer C. Hilder, Office of the Chief Counsel, Research and Special Programs Administration, U.S. Department of Transportation, Washington, DC 20590-0001 (Tel. No. 202-366-4400).

SUPPLEMENTARY INFORMATION: CWTI's application for a preemption determination is reproduced (without its attachments) as Appendix A to the July 21, 1992 Public Notice and Invitation to Comment, 57 FR 32360. In that document, CWTI briefly summarized the background of its present application including: (a) Its April 12, 1990 petition for an inconsistency ruling, assigned Docket No. IRA-51, (b) the subsequent change in the HMTA's preemption provisions by the enactment of the Hazardous Materials Transportation Uniform Safety Act of 1990 (Pub. L. 101-615), and (c) the fact that, within the past year, "IEPA has voluntarily addressed one of the concerns raised in the April 12th [1990] petition." 57 FR at 32361.

In response to a telephone inquiry, RSPA has advised IEPA that the comments previously submitted in Docket No. IRA-51 are a part of, and will be considered in connection with, the present proceeding. On that basis, IEPA has stated that it "reaffirms its previous comments."

To assure interested parties the opportunity to respond to all comments which are relevant and appropriate to the issues raised in CWTI's application, including those comments submitted by IEPA and others in Docket No. IRA-51, RSPA is providing public notice of its inclusion of those previously submitted comments in the docket of this proceeding (PDA-5(R)), and it is extending the period for rebuttal comments.

Rebuttal comments may discuss only those issues raised in comments already received (including any comments submitted in Docket No. IRA-51) and may not discuss new issues. As stated in the July 21, 1992 Notice, rebuttal comments on whether the IEPA Uniform Hazardous Waste Manifest is preempted by the HMTA should address (1) the "substantively the same," "dual compliance," and "obstacle" tests described in that Notice, and (2) whether the IEPA Uniform Hazardous Waste Manifest is "otherwise authorized by Federal law."

Persons intending to submit rebuttal comments should review the standards and procedures governing RSPA's consideration of applications for preemption determinations, set forth in 49 CFR 107.201-107.211.

Issued in Washington, DC on September 18, 1992.

Alan I. Roberts,

Associate Administrator for Hazardous Materials Safety.

[FR Doc. 92-23294 Filed 9-24-92; 8:45 am]

BILLING CODE 4910-60-M

[Notice No: 92-17]

Investment in the Infrastructure Commission Meeting

AGENCY: Department of Transportation.

ACTION: Notice of meeting of the Commission to Promote Investment in the Infrastructure.

SUMMARY: As required by the Federal Advisory Committee Act (FACA), the DOT is giving notice of an open meeting of the Commission to Promote Investment in America's Infrastructure.

DATES: The meetings will begin on Thursday, September 24, 1992 from 2 p.m. to 5 p.m. and continue on Friday, September 25, 1992 beginning at 10 a.m. and continuing until completed.

ADDRESSES: The meetings will be held in room 406 of the Dirksen Senate Office Building (2nd and C Streets, Washington, DC, 20510).

FOR FURTHER INFORMATION CONTACT: Honorable Daniel V. Flanagan, Chairman (703-522-4334) or Honorable Ralph L. Stanley, Secretary (703-771-9510) between 9 a.m. and 3:30 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION: Section 1081 of Public Law 102–240, the 1991 Intermodal Surface Transportation Efficiency Act (ISTEA) established the Commission to Promote Investment in America's Infrastructure. Recently, the final member of that Commission has been appointed and its charter has been filled. The notice for the meetings described above could not previously be published in the Federal Register due to the lack of a charter and the lack of a full compliment of members. On September 24 and 25, the Commission will be hearing from representatives of the financial and banking industries regarding issues relating to the structure and characteristics of investment securities necessary to attract pension fund investment and infrastructure projects.

DOT has agreed to sponsor the Commission subject to enactment of DOTs 1993 appropriation including the appropriation for the Commission.

All Commission meetings will be open to the public subject to space availability. In accordance to the requirement of FACA, the Commission will keep minutes of these meetings and these minutes will be available for public inspection at DOT (400 7th Street, SW).

Dated: September 22, 1992.

Daniel V. Flanagan, Jr.,

Chairman, Infrastructure Investment Commission.

BILLING CODE 6910–62–M

DEPARTMENT OF THE TREASURY

Customs Service

Application to Restrict Parallel Imports Bearing Genuine Trademarks

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Notice of Application to Restrict Parallel Imports Bearing Genuine Trademarks.

SUMMARY: This document seeks comments on an application submitted to prevent the importation of certain goods bearing genuine "Yamaha" trademarks under the terms of a district court injunction requiring the U.S. Customs Service to provide protection to trademarks meeting certain criteria.

DATES: Comments must be received on or before October 26, 1992.

ADDRESSES: Written comments should be addressed to U.S. Customs Service, Attention: Intellectual Property Rights Branch, 1301 Constitution Avenue, NW., room 2104, Washington, DC 20229. All documents submitted will be available for viewing by the public at the same address on weekdays between the hours of 8:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: John F. Atwood, Chief, Intellectual Property Rights Branch, 1301 Constitution Avenue, NW., room 2104, Washington, DC 20229 (202–927–0850).

SUPPLEMENTARY INFORMATION:

Background

On April 28, 1992, The United States District Court for the District of Columbia issued an amended order in *Lever Brothers Co.* v. *United States*, No. 86–3151 (HHG), which enjoined the U.S. Customs Service from allowing the importation of foreign-made goods otherwise admissible under 19 CFR 133.21(c)(2) that bear a trademark identical to a valid United States trademark but which are materially physically different. As a result of this court action and pending further action by a court of final resolution of *Lever Bros. Co.* v. *United States*, Appeal No. 92–5185, owners of recorded trademarks that are under common ownership or control with foreign companies that use the trademark on foreign-made goods with material physical differences can apply to Customs to stop the importation of those foreign-made goods.

In order to receive the protection as outlined by the court, applicants must first show that the trademark owner requesting the protection falls within the scope of § 133.21(c)(2) of the Customs Regulations, as opposed to § 133.21(c)(1). The District Court for the District of Columbia ordered Customs to provide protection only when goods would otherwise be admissible under § 133.21(c)(2), which applies to goods of a foreign trademark owner under common ownership or control with the U.S. trademark owner. Section (c)(1) applies to goods of a foreign trademark owner that also owns the U.S. trademark.

Applicants for protection under the terms of the court order must also show Customs that the foreign affiliate of the U.S. trademark owner uses the mark on goods with material physical differences. For this, applicants must show Customs that the goods are different, and also that the difference is "material". On June 26, 1992, by publication in the Federal Register (57 FR 28605), Customs invited trademark owners to notify Customs if they believe that the trademark owner and the goods bearing the trademark meet these criteria.

An application has been submitted pursuant to the June 26, 1992, Federal Register notice, for a restriction against the importation of goods bearing genuine "Yamaha" trademarks. Before final action is taken on the application, consideration will be given to any relevant data, views, or arguments submitted in writing by any person opposing the application. Notice of the action taken in response to the application will also be published in the Federal Register.

Dated: September 21, 1992.

Barry P. Miller,

Acting Chief, Intellectual Property Rights Branch.

Sunshine Act Meetings

Federal Register
Vol. 57, No. 187
Friday, September 25, 1992

This section of the FEDERAL REGISTER contains notices of meetings published under the "Government in the Sunshine Act" (Pub. L. 94-409) 5 U.S.C. 552b(e)(3).

COMMISSION ON NATIONAL AND COMMUNITY SERVICE

TIME AND DATE: Friday, October 2, 1992, from 8:00 a.m. to 4:00 p.m.

PLACE: San Antonio, TX.

STATUS: The meeting will be open to the public with the exception of the 12:00–1:30 p.m. session, which will be closed pursuant to the Privacy Act, in order for the Board of Directors to discuss personnel matters.

MATTERS TO BE CONSIDERED: The Board of Directors of the Commission on National and Community Service will meet on October 2, 1992 to discuss the Commission's progress and goals for next year, committee reports, the Commission's report to Congress, the fiscal year 1993 grant process, the reconsideration of proposals, and new proposal(s).

CONTACT PERSON FOR MORE INFORMATION: Terry Russell, General Counsel, Commission on National and Community Service, 529 14th Street, NW., Suite 452, Washington, DC 20045, (202) 724–0600.

Catherine Milton,

Executive Director, Commission on National and Community Service.

BILLING CODE 6829-BA-M

FEDERAL DEPOSIT INSURANCE CORPORATION

Notice of Agency Meeting

Pursuant to the provisions of subsection (e)(2) of the "Government in the Sunshine Act" (5 U.S.C. 552b(e)(2)), notice is hereby given that at 10:32 a.m. on Tuesday, September 22, 1992, the Board of Directors of the Federal Deposit Insurance Corporation met in closed session to consider the following:

Matters relating to the probable failure of certain insured banks.

Recommendations concerning administrative enforcement proceedings.

Matters relating to certain financial institutions.

Reports of the Office of Inspector General.

Matters relating to the Corporation's corporate activities.

In calling the meeting, the Board determined, on motion of Director C.C. Hope, Jr. (Appointive), seconded by Director T. Timothy Ryan, Jr. (Office of Thrift Supervision), and concurred in by Ms. Judith A. Walter, acting in the place and stead of Director Stephen R. Steinbrink (Acting Comptroller of the Currency), and Acting Chairman Andrew C. Hove, Jr., that Corporation business required its consideration of the matters on less than seven days' notice to the public; that no earlier notice of the meeting was practicable; that the public interest did not require consideration of the matters in a meeting open to public observation; and that the matters could be considered in a closed meeting by authority of subsections (c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10) of the "Government in the Sunshine Act" (5 U.S.C. 552b(c)(2), (c)(4), (c)(6), (c)(8), (c)(9)(A)(ii), (c)(9)(B), and (c)(10)).

The meeting was held in the Board Room of the FDIC Building located at 550–17th Street, NW., Washington, DC.

Dated: September 22, 1992.

Federal Deposit Insurance Corporation.

Robert E. Feldman,

Deputy Executive Secretary.

BILLING CODE 6714-01-M

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: 9:30 a.m., Wednesday, September 30, 1992.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, DC 20551.

STATUS: Open.

MATTERS TO BE CONSIDERED:

1. Proposed modifications to the Federal Reserve's payments system risk reduction program regarding pricing and measurement of daylight overdrafts, and proposed amendment to Regulation J (Collection of Checks and Other Items and Wire Transfers of Funds by Federal Reserve Banks). (Proposed earlier for public comment; Docket Nos. R–0668, 0721, and 0722.)

2. Publication for comment of proposed change in the Fedwire funds transfer service operating hours.

3. Proposed amendments to Regulation CC (Availability of Funds and Collection and Checks) to provide for same-day settlement for checks. (Proposed earlier for public comment; Docket No. R–0723.)

4. Any items carried forward from a previously announced meeting.

Note: This meeting will be recorded for the benefit of those unable to attend. Cassettes will be available for listening in the Board's Freedom of Information Office, and copies may be ordered for $5 per cassette by calling (202) 452–3684 or by writing to:

Freedom of Information Office, Board of Governors of the Federal Reserve System, Washington, DC 20551

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204.

Dated: September 23, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

[FR Doc. 92-23497 Filed 9-23-92; 2:35 pm]

BILLING CODE 6210-01-M

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

TIME AND DATE: Approximately 12:00 noon, Wednesday, September 30, 1992, following a recess at the conclusion of the open meeting.

PLACE: Marriner S. Eccles Federal Reserve Board Building, C Street entrance between 20th and 21st Streets, NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.

2. Any items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board; (202) 452–3204. You may call (202) 452–3207, beginning at approximately 5 p.m. two business days before this meeting, for a recorded announcement of bank and bank holding company applications scheduled for the meeting.

Dated: September 23, 1992.

Jennifer J. Johnson,

Associate Secretary of the Board.

BILLING CODE 6210-01-M

UNITED STATES POSTAL SERVICE BOARD OF GOVERNORS

Notice of Vote to Close Meeting

At its meeting on August 31, 1992, the Board of Governors of the United States Postal Service voted unanimously to close to public observation its meeting scheduled for October 5, 1992, in

Washington, DC. The members will consider 1) the July 17, 1992, Postal Rate Commission Opinion and Recommended Decision in Docket No. MC91–3, Second-Class Pallet Discount, 1991, and 2) a filing with the Postal Rate Commission to Establish a Bulk Small Parcel Service.

The meeting is expected to be attended by the following persons: Governors Alvarado, Daniels, del Junco, Griesemer, Mackie, Nevin, Pace, Setrakian and Winters; Postmaster General Runyon, Deputy Postmaster General Coughlin, Secretary to the Board Harris, and General Counsel Elcano.

The Board determined that pursuant to section 552b(c)(3) of Title 5, United States Code, and section 7.3(c) of Title 39, Code of Federal Regulations, this portion of the meeting is exempt from the open meeting requirement of the Government in the Sunshine Act [5 U.S.C. 552b(b)] because it is likely to disclose information in connection with proceedings under Chapter 36 of Title 39, United States Code (having to do with postal ratemaking, mail classification and changes in postal services), which is specifically exempted from disclosure by section 410(c)(4) of Title 39, United States Code.

The Board has determined further that pursuant to section 552b(c)(10) of Title 5, United States Code, and section 7.3(j) of Title 39, Code of Federal Regulations, the discussion exempt because it is likely to specifically concern participation of the Postal Service in a civil action or proceeding involving a determination on the record after opportunity for a hearing. The Board further determined that the public interest does not require that the Board's discussion of the matter be open to the public.

In accordance with section 552b(f)(1) of Title 5, United States Code, and section 7.6(a) of title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in her opinion the meeting may properly be closed to public observation pursuant to section 552b(c)(3) and (10) of Title 5, United States Code; section 410(c)(4) of Title 39, United States Code; and section 7.3 (c) and (j) of Title 39, Code of Federal Regulations.

Requests for information about the meeting should be addressed to the Secretary of the Board, David F. Harris at (202) 268–4800.

David F. Harris,

Secretary.

Part II

Department of Education

34 CFR Parts 785, 786 and 787
National Diffusion Network; Proposed Rule

DEPARTMENT OF EDUCATION

34 CFR Parts 785, 786 and 787

RIN 1850-AA42

National Diffusion Network

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes to amend the regulations for the National Diffusion Network. These amendments would establish Program Effectiveness Panel (PEP) review procedures for reapproval of exemplary programs, products, practices, and dissemination processes that have been previously approved by either the Joint Dissemination Review Panel (JDRP) or the PEP.

DATES: Comments must be received on or before October 26, 1992.

ADDRESSES: All comments concerning these proposed regulations should be addressed to Helen O'Leary, Office of Educational Research and Improvement, U.S. Department of Education, 555 New Jersey Avenue, NW., room 510, Washington, DC 20208-5645.

A copy of any comments that concern information collection requirements should also be sent to the Office of Management and Budget at the address listed in the Paperwork Reduction Act section of this preamble.

FOR FURTHER INFORMATION CONTACT: Helen O'Leary, (202) 219-2134. Deaf and hearing impaired individuals may call the Federal Dual Party Relay Service at 1-800-877-8339 (in the Washington, DC 202 area code, telephone 708-9300) between 8 a.m. and 7 p.m., Eastern time.

SUPPLEMENTARY INFORMATION: The National Diffusion Network (NDN) supports AMERICA 2000, the President's strategy for moving the Nation toward the National Education Goals, by promoting the nationwide dissemination of exemplary education programs, products, and practices. These programs, products, and practices have been developed at the local level by classroom teachers and other practitioners with funds provided by a variety of sources including school districts, private businesses, foundations, colleges, universities, State educational agencies, and Federal programs. The Program Effectiveness Panel of the Department of Education conducts a rigorous review of the results of local field testing and evaluation for each program, product, and practice submitted for review to determine the effectiveness and capacity of each for implementation. (The predecessor of the PEP was the Joint Dissemination Review Panel, which conducted these reviews until August 1987). The PEP approves a program, product, or practice for a period of six years. Once approved, the program, product, or practice is considered part of the NDN. The developer of a program, product, or practice that has current PEP or JDRP approval may compete for funding by the NDN to operate as: (1) A Developer Demonstrator (DD) project to disseminate the approved exemplary program, product, or practice nationwide; or (2) a Dissemination Process (DP) project to disseminate information, instructional materials, and services about content areas, areas of research, or fields of professional development.

Summary of Proposed Changes

The Secretary proposes to amend part 786 of the program regulations to establish separate criteria for the PEP review of a previously approved DD program, product, or practice. Under the existing regulations, a program, product, or practice submitted for reapproval is reviewed under the same criteria as those used for a new program, product, or practice submitted to the PEP for approval. Under the proposed criteria, the developer of a program, product, or practice must submit evidence of successful dissemination, implementation, and retention as well as evidence of continued effectiveness. These criteria were developed as the result of the recommendations of a committee composed of members of the PEP, representatives of the DD projects, and Department of Education staff.

The Secretary also proposes to amend part 787 to establish separate criteria for the PEP review of a previously approved DP project that will require the project developer to submit evidence of successful dissemination and evidence of the effectiveness of the information, instructional materials, and services that have been disseminated.

The Secretary also proposes to amend § 785.4 to update the list of applicable regulations.

Executive Order 12291

These proposed regulations have been reviewed in accordance with Executive Order 12291. They are not classified as major because they do not meet the criteria for major regulations established in the order.

Regulatory Flexibility Act Certification

The Secretary certifies that these proposed regulations would not have a significant economic impact on a substantial number of small entities.

The small entities that would be affected by these proposed regulations are small LEAs, private nonprofit organizations, and institutions of higher education that would receive Federal funds under this program. However, the regulations would not have a significant economic impact on the small entities because the regulations would not impose excessive regulatory burdens or require unnecessary Federal supervision. The regulations would impose minimal requirements to ensure the proper expenditure of program funds.

Paperwork Reduction Act of 1980

Sections 786.11, 786.17, 787.11, and 787.17 contain information collection requirements. As required by the Paperwork Reduction Act of 1980, the Department of Education will submit a copy of these sections to the Office of Management and Budget (OMB) for its review. (44 U.S.C. 3504(h))

State and local governments and nonprofit institutions are eligible to apply for grants under these regulations. The Department needs and uses this information to make grants.

Annual public reporting burden for this collection of information is estimated to average 24 hours per response for 50 respondents, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Organizations and individuals desiring to submit comments on the information collection requirements should direct them to the Office of Information and Regulatory Affairs, room 3002, New Executive Office Building, Washington, DC 20503; Attention: Daniel J. Chenok.

Intergovernmental Review

This program is subject to the requirement of Executive Order 12372 and the regulations in 34 CFR part 79. The objective of the Executive order is to foster an intergovernmental partnership and a strengthened federalism by relying on processes developed by State and local governments for coordination and review of proposed Federal financial assistance.

In accordance with the order, this document is intended to provide early notification of the Department's specific plans and actions for this program.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room 510, 555 New Jersey Avenue NW., Washington, DC, between the hours of 8:30 a.m. and 4 p.m., Monday through Friday of each week except Federal holidays.

To assist the Department in complying with the specific requirements of Executive Order 12291 and the Paperwork Reduction Act of 1980 and their overall requirement of reducing regulatory burden, the Secretary invites comment on whether there may be further opportunities to reduce any regulatory burdens found in these proposed regulations.

Assessment of Educational Impact

The Secretary particularly requests comments on whether the proposed regulations in this document would require transmission of information that is being gathered by or is available from any other agency or authority of the United States.

List of Subjects in 34 CFR Parts 785, 786 and 787

Dissemination, Education, Educational research, Grant programs—education, Reporting and recordkeeping requirements.

(Catalog of Federal Domestic Assistance Number 84.073—National Diffusion Network)

Dated: April 16, 1992.

Lamar Alexander,

Secretary of Education.

The Secretary proposes to amend parts 785, 786, and 787 of Title 34 of the Code of Federal Regulations as follows:

PART 785—NATIONAL DIFFUSION NETWORK: GENERAL PROVISIONS

1. The authority citation for part 785 continues to read as follows:

Authority: 20 U.S.C. 2982, unless otherwise noted.

2. Section 785.4 is amended by revising paragraph (a)(1) to read as follows:

§ 785.4 What regulations apply?

(a) * * *

(1) The Education Department General Administrative Regulations (EDGAR) in 34 CFR part 74 (Administration of Grants to Institutions of Higher Education, Hospitals, and Nonprofit Organizations), part 75 (Direct Grant Programs)—except § 75.650 (Participation of students enrolled in private schools), part 77 (Definitions that Apply to Department Regulations), part 79 (Intergovernmental Review of Department of Education Programs and Activities), part 80 (Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments), part 81 (General Education Provisions Act—Enforcement), part 82 (New Restrictions on Lobbying), part 85 (Governmentwide Debarment and Suspension (Nonprocurement) and Governmentwide Requirements for Drug-Free Workplace (Grants)), and part 86 (Drug-Free Schools and Campuses).

* * * * *

PART 786—NATIONAL DIFFUSION NETWORK: DEVELOPER DEMONSTRATOR PROJECTS

3. The authority citation for part 786 continues to read as follows:

Authority: 20 U.S.C. 2962, unless otherwise noted.

4. Section 786.11 is revised to read as follows:

§ 786.11 What must an applicant submit for review by the PEP?

(a) For PEP review of a program, product, or practice that has not been previously approved by the PEP or JDRP, an eligible applicant shall submit to the Secretary qualitative or quantitative evidence, or both, of the effectiveness of the program, product, or practice.

(b) For PEP review of a program, product, or practice that has been previously approved by the PEP or JDRP, an eligible applicant shall submit to the Secretary qualitative and quantitative evidence of dissemination, implementation, and continued effective results of the program, product, or practice.

(Authority: 20 U.S.C. 2982)

5. Section 786.12 is amended by revising the heading and paragraph (a) to read as follows:

§ 786.12 How does the PEP review a program, product, or practice that has not been previously approved by the PEP or the JDRP?

(a) The PEP reviews each program, product, or practice that has not been previously approved by the PEP or the JDRP for educational effectiveness on the basis of the criteria in paragraph (d) of this section.

* * * * *

6. A new § 786.17 is added to subpart B to read as follows:

§ 786.17 How does the PEP review an exemplary program, product, or practice that has been previously approved by the PEP or the JDRP?

(a) The PEP reviews each program, product, or practice that has been previously approved by the PEP or the JDRP for evidence of its successful dissemination, for evidence of its successful implementation, and for evidence of its educational effectiveness, on the basis of the criteria in paragraph (d) of this section.

(b) The PEP awards up to 100 points for these criteria.

(c) The maximum score for each criterion is indicated in parentheses following the criterion.

(d) In reviewing each program, product, or practice the PEP determines the following:

(1) *Dissemination.* (25 points) The PEP determines the extent to which the program, product, or practice demonstrates successful performance in serving educational needs in the field, on the basis of evidence of—

(i) The amount and types of information provided about the program, product, or practice;

(ii) The extent to which the program, product, or practice has been adopted; and

(iii) The number of participants trained to adopt the program, product, or practice.

(2) *Implementation and retention.* (25 points) The PEP determines the extent to which the program, product, or practice has been successfully implemented and retained by adoption sites on the basis of evidence of—

(i) The extent to which the program, product, or practice has been implemented in adoption sites with reasonable fidelity to the original elements of the program, product, or practice;

(ii) The extent to which the program, product, or practice has been continued, over time, in adoption sites with reasonable fidelity to the original elements;

(iii) The extent of the demonstrated understanding of and commitment to the program, product, or practice by personnel in adoption sites; and

(iv) The institutional commitment to continue the program, product, or practice as evidenced by such actions as the extension of training to additional sites or staff or the commitment of funding for continued implementation.

(3) *Effectiveness.* (50 points) The PEP determines the extent to which the program, product, or practice shows evidence from several adoption sites of continued effective results relative to

the original claims of effectiveness made for the program, product, or practice. The PEP considers qualitative or quantitative evidence of the effectiveness of the program, product, or practice, if the evidence is logically linked to the substance of the claims and evaluation design originally submitted to the PEP or the JDRP.

(Authority: 20 U.S.C. 2962)

7. A new § 786.18 is added to Subpart B to read as follows:

§ 786.18 How is PEP reapproval granted?

PEP reapproval is granted if the PEP has given the program, product, or practice a total score of at least 70 points for the criteria in § 786.17.

(Authority: 20 U.S.C. 2962)

8. A new § 786.19 is added to Subpart B to read as follows:

§ 786.19 How long does PEP reapproval last?

PEP reapproval remains in effect for six years from the date of reapproval.

(Authority: 20 U.S.C. 2962)

PART 787—NATIONAL DIFFUSION NETWORK; DISSEMINATION PROCESS PROJECTS

9. The authority citation for part 787 continues to read as follows:

Authority: 20 U.S.C. 2962, unless otherwise noted.

10. Section 787.2 is revised to read as follows:

§ 787.2 Who is eligible for an award?

(a) *New awards.* Any public or nonprofit private agency, organization, or institution that has in operation a dissemination process that has current Program Effectiveness Panel (PEP) approval may apply for a new Dissemination Process grant.

(b) *Continuation awards.* Any Dissemination Process grantee, otherwise eligible to apply for a continuation award, may apply for the continuation award even if either the PEP approval period or the JDRP approval period has expired.

(Authority: 20 U.S.C. 2962)

11. Section 787.11 is revised to read as follows:

§ 787.11 What must an applicant submit for review by the PEP?

(a) For PEP review of a dissemination process that has not been previously approved by the PEP or the JDRP, an eligible applicant shall submit to the Secretary—

(1) A description of its dissemination process;

(2) A description of the procedures and criteria for selecting information, materials, and services to be disseminated and for judging that they are educationally significant; and

(3) A description of the procedures and criteria for evaluating qualitative and quantitative evidence of the effectiveness of information, instructional materials, and services to be disseminated.

(b) For PEP review of a dissemination process that has been previously approved by the PEP or the JDRP, an eligible applicant shall submit to the Secretary—

(1) A description of its dissemination process;

(2) A description of the procedures and criteria for selecting information, materials, and services to be disseminated and for judging that they are educationally significant;

(3) A description of the procedures and criteria for evaluating qualitative and quantitative evidence of the effectiveness of information, instructional materials, and services to be disseminated;

(4) Information about the extent to which information, materials, and services have been disseminated; and

(5) Qualitative and quantitative evidence of the effectiveness of the information, instructional materials, and services that have been disseminated, based on the evaluation procedures and criteria described by the applicant in the previously approved PEP or JDRP submittal.

(Authority: 20 U.S.C. 2962)

12. Section 787.12 is amended by revising the heading and paragraph (a) to read as follows:

§ 787.12 How does the PEP review a Dissemination Process that has not been previously approved by the PEP or the JDRP?

(a) The PEP reviews each dissemination process that has not been previously approved by the PEP or the JDRP for educational effectiveness by examining the procedures and criteria for selecting information and instructional materials to be disseminated and for providing services according to the criteria in paragraph (d) of this section.

* * * * *

13. A new § 787.17 is added to Subpart B to read as follows:

§ 787.17 How does the PEP review a Dissemination Process that has been previously approved by the PEP or the JDRP?

(a) The PEP reviews each dissemination process that has been previously approved by the PEP or the JDRP for educational effectiveness by examining the information submitted according to the requirements described in § 787.11(b), on the basis of criteria in paragraph (d) of this section.

(b) The PEP awards up to 100 points for these criteria.

(c) The maximum score for each criterion is indicated in parentheses following the criterion.

(d) In reviewing each dissemination process the PEP determines the following:

(1) *Evaluation design.* (25 points) The PEP determines the extent to which the evaluation design continues to—

(i) Be appropriate for the program;

(ii) Be based on correct interpretation of relevant research and literature;

(iii) Demonstrate that a clear and attributable connection exists between the evidence of an educational effect and the program treatment; and

(iv) Address rival hypotheses.

(2) *Results.* (25 points) The PEP determines the extent to which the results indicate that the process has been and will continue to be particularly effective relative to similar processes.

(3) *Replication.* (50 points) The PEP determines the extent to which—

(i) The information, instructional materials, and services have been used at other sites;

(ii) The information, instructional materials, and services are used at other sites with reasonable fidelity to the original model; and

(iii) The information, instructional materials, and services will continue to be used at other sites with the likelihood of continuing to achieve similar results.

(Authority: 20 U.S.C. 2962)

14. A new § 787.18 is added to Subpart B to read as follows:

§ 787.18 How is PEP reapproval granted?

PEP reapproval is granted if the PEP has given the procedures and criteria a score of at least 20 points for the criterion in § 787.17(d)(2) (Results) and a total score of at least 70 points for all the procedures and the criteria in § 787.17.

(Authority: 20 U.S.C. 2962)

15. A new § 787.19 is added to Subpart B to read as follows:

§ 787.19 How long does PEP reapproval last?

PEP reapproval remains in effect for six years from the date of reapproval.

(Authority: 20 U.S.C. 2962)

Part III

Environmental Protection Agency

Final NPDES General Permits for Storm Water Discharges from Construction Sites; Notice

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4511-2]

Final NPDES General Permits for Storm Water Discharges From Construction Sites

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Final NPDES General Permits.

SUMMARY: The Regional Administrators of Regions I, II, III, IV, and IX (the "Regions" or the "Directors") are today issuing final National Pollutant Discharge Elimination System (NPDES) general permits for storm water discharges associated with industrial activity from construction sites in Florida (except from Indian lands), Massachusetts, the District of Columbia, Guam and American Samoa; on Indian lands in New York; and from Federal facilities in Delaware.

These general permits establish Notice of Intent (NOI) requirements, special conditions, requirements to develop and implement storm water pollution prevention plans, and requirements to conduct site inspections for facilities with discharges authorized by the permit.

DATES: These general permits shall be effective on November 25, 1992. This effective date is necessary to provide appropriate dischargers with the opportunity to comply with the October 1, 1992 deadline for submitting an NPDES application for storm water discharges associated with industrial by submitting a Notice of Intent (NOI) to be covered by the permits.

Deadlines for submittal of Notices of Intent (NOIs) are provided in Part II.A of the general permits. Today's general permits also provide additional dates for compliance with the terms of the permit.

ADDRESSES: Notices of Intent to be authorized to discharge under these permits should be sent to: Storm Water Notices of Intent, PO Box 1215, Newington, VA 22122.

Other submittals of information required under these permits or individual permit applications should be sent to the appropriate EPA Regional Office. The addresses of the Regional Offices and the name and phone number of the Storm Water Regional Coordinator is provided in Section II of the Fact Sheet.

The index to the administrative records for these permits is available at the appropriate Regional Office. The complete administrative record is located at EPA Headquarters, EPA Public Information Reference Unit, room 2402, 401 M Street SW., Washington, DC 20460. A reasonable fee may be charged for copying. Specific record information will be made available at the appropriate Regional Office as requested.

FOR FURTHER INFORMATION CONTACT: For further information on the final NPDES general permits and for copies of the Notice of Intent form (the Notice of Intent form in appendix C of this notice can be copied and submitted) contact the NPDES Storm Water Hotline at (703) 821–4823, or the appropriate EPA Regional Office. The name, address and phone number of the Regional Storm Water Coordinators are provided in Section II of the Fact Sheet.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. Regional Contacts
III. Section 401 Certification
IV. Economic Impact (Executive Order 12291)
V. Paperwork Reduction Act
VI. Regulatory Flexibility Act

Other submittals of information required under these permits or individual permit applications should be sent to the appropriate EPA Regional Office. The addresses of the Regional Offices and the name and phone number of the Storm Water Regional Coordinator is provided in Section II of the Fact Sheet.

The index to the administrative records for these permits is available at the appropriate Regional Office. The complete administrative record is located at EPA Headquarters, EPA Public Information Reference Unit, room 2402, 401 M Street SW, Washington DC 20460. A reasonable fee may be charged for copying. Specific record information will be made available at the appropriate Regional Office as requested.

I. Introduction

The Regional Administrators of the United States Environmental Protection Agency (EPA) are issuing final general permits for the majority of storm water discharges associated with industrial activity from construction activities as follows:

Region I—for the State of Massachusetts.

Region II—for Indian lands located in New York.

Region III—for the District of Columbia and for Federal facilities in Delaware.

Region IV—for the State of Florida.

Region IX—for Guam and American Samoa.

On August 16, 1991 (56 FR 40948), EPA requested public comment on draft National Pollutant Discharge Elimination System (NPDES) general permits that were the basis for today's final general permits. In addition to addressing storm water discharges from construction activities, the August 16, 1991, draft general permits addressed storm water discharges from other industrial activities. The permits in this notice only address storm water associated with construction activity.

EPA received over 125 comments on construction issues associated with the draft general permits. In addition, public hearings to discuss the draft general permits were held in Dallas, TX; Oklahoma City, OK; Baton Rouge, LA; Albuquerque, NM; Seattle, WA; Boise, ID; Juneau, AK; Pierre, SD; Phoenix, AZ; Orlando, FL; Tallahassee, FL; Augusta, ME; Boston, MA; and Manchester, NH.

On September 9, 1992 (57 FR 41176), EPA published final National Pollutant Discharge Elimination System (NPDES) general permits for storm water discharges associated with industrial activity from construction sites in 10 States (Alaska, Arizona, Idaho, Louisiana, Maine, New Hampshire, New Mexico, Oklahoma, South Dakota, and Texas); the Territories of Puerto Rico, Johnston Atoll, and Midway and Wake Islands; on Indian lands in Alaska, Arizona, California, Colorado, Florida, Idaho, Maine, Massachusetts, Mississippi, Montana, New Hampshire, Nevada, North Carolina, North Dakota, Nevada, Utah, Washington, and Wyoming; from Federal facilities in Colorado, and Washington; and from Federal facilities and Indian lands in Louisiana, New Mexico, Oklahoma, and Texas.

EPA is incorporating portions of the detailed fact sheet for the general permit for storm water discharges from construction activity published on September 9, 1992, as part of the final fact sheet and statement of basis for today's final permit. The sections of the fact sheet published on September 9, 1992 [1] being incorporated are Section I, Introduction; Section II, Coverage of General Permits; Section III, Summary of Options for Controlling Pollutants; Section IV, Summary of Permit Conditions; and Section V, Cost Estimates; and Appendix A—Summary

[1] The September 9, 1992, fact sheets incorporate portions of the draft general permits published on August 16, 1991 (56 FR 40948). These portions of the August 16, 1991, fact sheets are also incorporated into today's permits. Sections of the August 16, 1991, fact sheet being incorporated are section 1, Background; section 4, Summary of Options for Controlling Pollutants; and section 5, The Federal/Municipal Partnership: The Role of Municipal Operators of Large and Medium Municipal Separate Storm Sewers.

of Responses to Public Comments on the August 16, 1991, Draft General Permits.

Today's notice addresses final NPDES general permits for storm water discharges associated with industrial activity from construction sites in Florida (except from Indian lands), Massachusetts, District of Columbia, Guam and American Samoa; on Indian lands in New York; and from Federal facilities in Delaware. Today's notice contains four sets of appendices. Appendix A incorporates Appendix A—Summary of Responses to Public Comments on the August 16, 1991, Draft General Permits, of the September 9, 1992 permits. Appendix B provides the language of the final general permits. The permits in Appendix B are similar, and are similar to the final permits published on September 9, 1992. Except as provided in Part X of the permits. Parts I through IX apply to all permits. Part X of the permit contains conditions which only apply to dischargers in the State indicated. Appendix C is a copy of the Notice of Intent (NOI) form (and associated instructions) to be used by dischargers wanting to obtain coverage under the general permits. Appendix D is a copy of the Notice of Termination (NOT) form (and associated instructions) that can be used by dischargers wanting to notify EPA that their storm water dischargers have been terminated or that the permittee has transferred operation of the facility.

II. Regional Contacts

Notices of Intent to be authorized to discharge under these permits must be sent to: Storm Water Notices of Intent, PO Box 1215, Newington, VA 22122.

Other submittal of information required under these permits or individual permit applications or other written correspondence concerning discharges in any State, Indian land, or from any Federal Facility covered, should be sent to the appropriate EPA Regional Office listed below:

Massachusetts

United States EPA, Region I, Water Management Division (WCP–2109), Storm Water Staff, John F. Kennedy Federal Building, Room 2209, Boston, MA 02203, Contact: Veronica Harrington, (617) 565–3525

New York (Indian Lands)

United States EPA, Region II, Water Management Division (2WM–WPC), Storm Water Staff, 26 Federal Plaza, New York, NY 10278, Contact: Jose Rivera, (212) 264–2911

District of Columbia, Delaware (Federal Facilities)

United States EPA, Region III, Water Management Division (3WM55), 841 Chestnut Building, Philadelphia, PA 19107, Contact: Kevin Magerr, (215) 597–1651

Florida

United States EPA, Region IV, Water Management Division (FPB–3), Storm Water Staff, 345 Courtland Street, NE Atlanta, GA 30365, Contact: Chris Thomas, (404) 347–3012

Guam and American Samoa

United States EPA, Region IX, Water Management Division (W–5–1), Storm Water Staff, 75 Hawthorne Street, San Francisco, CA 94105, Contact: Eugene Bromley, (415) 744–1906

III. Section 401—Certification

Section 401 of the CWA provides that no Federal license or permit, including NPDES permits, to conduct any activity that may result in any discharge into navigable waters shall be granted until the State in which the discharge originates certifies that the discharge will comply with the applicable provisions of Sections 301, 302, 303, 306, and 307 of the CWA. The Section 401 certification process has been completed for all States, Indian lands and Federal facilities covered by today's general permits. The following summary indicates where additional permit requirements have been added as a result of the certification process.

Massachusetts

See the following and Part X.A of the general permit for 401 conditions. As a condition for certification under section 401 of the CWA, the Commonwealth of Massachusetts required inclusion of the following conditions necessary to ensure compliance with State water quality concerns.

Storm water discharges not eligible for coverage under this permit include new or increased storm water discharges to coastal water segments within Massachusetts designated as "Areas of Critical Environmental Concern (ACEC)" (for information on ACEC, please contact the Executive Office of Environmental Affairs, Coastal Zone Management at (617) 727–9530). In addition, new or increased discharges, as defined at 314 CMR 4.02(19), which meet the definition of "storm water discharge," as defined at 314 CMR 3.04(2)(a)(1) or (2)(b), to Outstanding Resource Waters which have not met the provisions of 314 CMR 4.04(3) and Part III C.1 of this permit (as amended by the special requirements for discharges in Massachusetts), are not eligible for coverage under this permit.

Permittees in Massachusetts are to submit NOIs to the following address: Storm Water Staff, Storm Water Notice of Intent, US EPA Region 1, MA, PO Box 1215, Newington, VA 22122. A copy of the NOI for all discharges to Outstanding Resource Waters shall be submitted to the Commonwealth of Massachusetts at the following address: Massachusetts Department of Environmental Protection, Storm Water Notice of Intent, BRP–WP 43, PO Box 4062, Boston, Massachusetts, 02211.

For details on filing for permits with MA DEP see 310 CMR 4.00, *Timely Action Schedule and Fee Provisions*. For other information call the MA DEP Information Services at (617) 338–2255 or the Technical Services Section of the DEP Division of Water Pollution Control at (508) 792–7470.

Massachusetts 401 certification requires the following best management practices. Storm water discharge outfall pipes to Outstanding Resource Waters shall be removed and the discharge set back from the receiving water when dischargers are seeking to increase the discharge or change the site drainage system; all new discharge outfalls must be set back from the receiving water. Receiving swales for outfall pipes shall be prepared to minimize erosion and maximize infiltration prior to discharge. The goal is to infiltrate as much as feasible; infiltration trenches and basins, filter media dikes and/or other BMPs shall be used to meet the goal. *Protecting Water Quality in Urban Areas* by the Minnesota Pollution Control Agency, Division of Water Quality is a reference for BMPs.

Storm water discharges to waters that are not classified as Outstanding Resource Waters shall be subject to the requirements of this permit. New discharge outfall pipes shall be designed to be set back from the receiving water when site conditions allow. For existing discharge outfall pipes, when the storm water drainage system is undergoing changes, outfall pipes shall be set back from the receiving water. A receiving swale, infiltration trench or basin, filter media dike or other BMP should be prepared with the goal to minimize erosion yet maximize infiltration or otherwise improve water quality prior to discharge.

All discharges to Outstanding Resource Waters authorized under this permit must be provided the best practical method of treatment to protect

and maintain the designated use of the outstanding resource.

Delaware

See the following discussion and Part X.C of the general permit for additional 401 conditions. As a condition for certification under section 401 of the CWA, the State of Delaware required inclusion of the following conditions necessary to insure compliance with State water quality concerns.

In addition to submitting all NOIs to the central NOI receiving office in Newington, VA, permittees in Delaware also must submit a copy of all NOIs to the State of Delaware at the following address: Water Pollution Control Branch, NPDES Storm Water Program, Delaware Department of Natural Resources and Environmental Control, 89 Kings Highway, P.O. Box 140, Dover, DE 19903. All Discharge Monitoring Reports (DMRs), pollution prevention plans, as well as subsequent revisions, must be submitted to the State of Delaware at this same address. DMRs also must be submitted to the NPDES Programs Director, U.S. EPA Region III, Water Management Division (3WM55), Storm Water Staff, 841 Chestnut Building, Philadelphia, PA 19107.

Delaware's general permit stipulates that all permittees comply with the requirements of 7 Delaware Code Chapter 40 and the Delaware Sediment and Storm Water Regulations (January, 1991).

Applicants are required to obtain a certification of consistency with the Delaware Coastal Management Program (CZMA 1972, 16 U.S.C. 1451).

District of Columbia

See the following discussion and Part X.D of the general permit for additional 401 conditions. As a condition for certification under section 401 of the CWA, the District of Columbia required inclusion of the following special conditions.

Any unpermitted discharges that are subject to the NPDES program, excluding discharges associated with construction activity, are not authorized by this permit.

Florida

See the following discussion and Part X.E of the general permit for additional 401 conditions.

As a condition for certification under section 401 of the CWA, the State of Florida required inclusion of the following conditions necessary to insure compliance with State water quality concerns.

In addition to the NOI requirements set forth in Part II of this permit, the State of Florida requires that prior to submitting an NOI, the owner of a storm water management system must receive a State of Florida storm water permit from either the Florida Department of Environmental Regulation (FDER) or a Florida Water Management District (FWMD).

The permittee shall submit a narrative statement certifying that the storm water pollution prevention plan for the facility provides compliance with approved State of Florida issued permits, erosion and sediment control plans and storm water management plans. In addition, the permittee also shall submit a copy of the cover page of the State permit issued by FDER or a FWMD to the facility for the storm water associated with construction activities.

Please note that facilities that discharge storm water associated with construction activities to a municipal separate storm sewer system within Broward, Dade, Duval, Escambia, Hillsborough, Orange, Palm Beach, Pinellas, Polk or Sarosota Counties shall submit a copy of the NOI to the operator of the municipal separate storm sewer system. Included within these counties, the Florida Department of Transportation (FDOT), incorporated municipalities and Chapter 298 Special Districts shall also be notified where they own or operate a municipal separate storm sewer system receiving storm water discharges associated with construction activity covered by this permit.

Florida's general permit stipulates that any non-storm water component (as defined at Part III (A)(2)(b)) of a facility's discharge must be in compliance with paragraph IV.D.5 and the storm water management system must be designed to accept these discharges and provide treatment of the non-storm water component sufficient to meet Florida water quality standards. Discharges resulting from ground water dewatering activities at construction sites are not covered by this permit. The applicant may seek coverage for these discharges under NPDES General Permit No. FLG830000, published on July 17, 1989 (54 FR 29988) and modified on August 29, 1991 (56 FR 42736).

Permittees must submit a copy of all pollution prevention plans to the State agency which issued the storm water permit, and shall make plans available upon request to the Director.

The permittee must amend the plan whenever there is a change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to the waters of the United States, including the addition of or change in location of storm water discharge points. Amendments to the plan must be submitted to the State agency which issued the State storm water permit.

In providing an estimate of the runoff coefficient of the site before, during and after construction, permittees must utilize the "C" from the Rational Method; also, permittees must provide an estimate of the size of the drainage area for each outfall.

All storm water management controls, required pursuant to Part IV of this permit, shall be consistent with the requirements set forth in State Water Policy of Florida (Chapter 17–40, Florida Administrative Code), the applicable storm water permitting requirements of the FDER or appropriate FWMD, and the guidelines contained in the Florida Development Manual: A Guide to Sound Land and Water Management (FDER, 1988) and any subsequent amendments.

Florida's general permit requires that site stabilization measures be initiated as soon as practicable in portions of the site where construction activities have temporarily or permanently ceased. Please note that paragraphs (a), (b) and (c), which provide exceptions to these required stabilization practices, have been deleted to meet Florida water quality concerns.

As part of the pollution prevention plan, permittees must provide a description of structural practices to divert flows from exposed soils, store flows or otherwise limit runoff and the discharge or pollutants from exposed areas of the site in accordance with the requirements set forth in Section 17–40, 420, F.A.C., and the applicable storm water regulations of the FDER or appropriate FWMD. Structural practices shall be placed on upland soils unless a State of Florida wetland resource management permit issued pursuant to Chapters 373 or 403, F.S., and the applicable regulations of the FDER or FWMD authorize otherwise.

The description of controls in Part IV of the permit shall be consistent with the requirements set forth in the State Water Policy of Florida (Chapter 17–40, F.A.C.), the applicable storm water permitting regulations of the FDER or appropriate FWMD, and the guidelines contained in the Florida Development Manual: A Guide to Sound Land and Water Management (FDER, 1988), and any subsequent amendments. Structural measures shall be placed on upland soils unless a State of Florida wetland resource management permit issued pursuant to Chapters 373 or 403, F.S., and the applicable regulations of the FDER or FWMD authorize otherwise.

The installation of these devices may be subject to section 404 of the CWA. This NPDES permit only addresses the installation of storm water management measures, and not the ultimate operation and maintenance of such structures after the construction activities have been completed and the site has undergone final stabilization. Permittees are only responsible for the installation and maintenance of storm water management measures prior to final stabilization of the site, and are not responsible for maintenance after storm water discharges associated with industrial activity have been eliminated from the site. However, all storm water management systems shall be operated and maintained in perpetuity after final site stabilization in accordance with the requirements set forth in the State of Florida storm water permit issued for the site.

Pursuant to the requirements of Section 17–40, 420, F.A.C., the storm water management system shall be designed to remove at least 80 percent of the average annual load of pollutants which cause or contribute to violations of water quality standards (95 percent if the system discharges to an Outstanding Florida Water).

Regarding velocity dissipation devices, equalization of the pre-development and post-development storm water peak discharge rate and volume shall be a goal in the design of the post-development storm water management system.

No solid materials, including building materials, shall be discharged to waters of the United States, except as authorized by a Section 404 permit and by a State of Florida wetland resource management permit issued pursuant to Chapters 373 or 403, F.S., and the applicable regulations of the FDER or FWMD.

The plan shall address the proper application rates and methods for the use of fertilizers and pesticides at the construction site and set forth how these procedures will be implemented and enforced.

Florida's general permit requires that qualified personnel (provided by the discharger) inspect all points of discharge into waters of the United States or to a municipal separate storm sewer system. In addition to those items required to be inspected under Part IV of this permit, designated personnel must also inspect storm water management systems.

Permittees must inspect disturbed areas and areas used for storage of materials that are exposed to precipitation for evidence of, or the potential for, pollutants entering the storm water management system. In addition, the storm water management system and erosion and sediment control measures identified in the plan must be observed to ensure that they are operating correctly. Where discharge locations or points are accessible, they must be inspected to ascertain whether erosion control and storm water management measures are effective in meeting the performance standards set forth in State Water Policy (Chapter 17–40, F.A.C.) and the applicable storm water permitting regulations of the FDER or appropriate FWMD.

Permittees must allow the Director or an authorized representative of EPA, the State, or a municipal separate storm sewer system, to sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the CWA, any substances or parameter at any location on the site.

A copy of the Notice of Termination shall be sent to the State agency which issued the State storm water permit for the site and, if the storm water management system discharges to a municipal separate storm sewer system within Broward, Dade, Duval, Escambia, Hillsborough, Orange, Palm Beach, Pinellas, Polk or Sarasota Counties, to the owner of that system. Included within these counties, the Florida Department of Transportation (FDOT), incorporated municipalities, and Chapter 298 Special Districts also shall be notified where they own or operate a municipal separate storm sewer system receiving storm water discharges associated with construction activity covered by this permit.

American Samoa

See the following discussion and Part X.F of the general permit for additional 401 conditions. As a condition for certification under section 401 of the CWA, the territory of American Samoa required inclusion of the following special conditions.

Permittees must submit a copy of all NOIs and pollution prevention plans to the American Samoa Environmental Protection Agency.

Guam

See the following and Part X.G for 401 conditions. As a condition for certification under section 401 of the CWA, the territory of Guam required inclusion of the following special conditions.

Permittees must submit a copy of all NOIs to the Guam Environmental Protection Agency at the following address: D–107 Harmon Plaza, 130 Rojas St., Harmon, Guam 95911, and to other appropriate Government of Guam agencies. All pollution prevention plans and discharge monitoring reports (DMRs) also must be submitted to Guam EPA.

IV. Economic Impact (Executive Order 12291)

EPA has submitted this notice to the Office of Management and Budget for review under Executive Order 12291.

V. Paperwork Reduction Act

EPA has reviewed the requirements imposed on regulated facilities in these final general permits under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq. EPA did not prepare an Information Collection Request (ICR) document for today's permits because the information collection requirements in these permits have already been approved by the Office of Management and Budget (OMB) in submissions made for the NPDES permit program under the provisions of the Clean Water Act.

VI. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, U.S.C. 601 et seq., EPA is required to prepare a Regulatory Flexibility Analysis to assess the impact of rules on small entities. No Regulatory Flexibility Analysis is required, however, where the head of the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities.

Today's permits provide small entities with an application option that is less burdensome than individual applications or participating in a group application. The other requirements have been designed to minimize significant economic impacts of the rule on small entities and does not have a significant impact on industry. In addition, the permits reduce significant administrative burdens on regulated sources. Accordingly, I hereby certify pursuant to the provisions of the Regulatory Flexibility Act, that these permits will not have a significant impact on a substantial number of small entities.

Appendix A—Summary of Response to Public Comments on the August 16, 1991, Draft General Permits

The Summary of responses to Public Comment on the August 16, 1991, draft general permits presented in Appendix A of the September 9, 1992, final general permits at 57 FR 41189, is hereby incorporated in Appendix A of today's notice.

Appendix B—NPDES General Permits for Storm Water Discharges From Construction Activities That are Classified as "Associated With Industrial Activity"

Authorization to Discharge Under the National Pollutant Discharge Elimination System

[Permit No. *MA*R100000]

In compliance with the provisions of the Clean Water Act, as amended (33 U.S.C. . . 1251 et. seq; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges from construction activities that are classified as "associated with industrial activity", located in the State of Massachusetts, are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges from construction activities within the general permit area who intend to be authorized by these permits must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 17th day of September 1992.

Larry Brill,

Acting Director, Water Management Division.

This signature is for the permit conditions in Parts I through IX and for any additional conditions in part X which apply to facilities located in the State of Massachusetts.

[NPDES Permit Number NYR10000F]

Authorization To Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended, (33 U.S.C. . . 1251 et. seq; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges from construction activities that are classified as "associated with industrial activity", located on Indian Lands in New York State are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges from construction activities within the general permit area who intend to be authorized by these permits must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 3rd day of September 1992.

Richard L. Caspe, P.E.,

Director, Water Management Division, U.S. Environmental Protection Agency, Region II.

[Permit No. — — R100000 or *DE* R100000F (for only Indian lands and/or Fed. fac)]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended, (33 U.S.C. . . 1251 et. seq; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges from construction activities that are classified as "associated with industrial activity", located in Federal Facilities in the state of Delaware, are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges from construction activities within the general permit area who intend to be authorized by these permits must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 18th day of September 1992

A.R. Morris,

(signature of Water Management Director or Regional Administrator).

[Permit No. *D/C* R100000 or — — R100000F (for only Indian lands and/or Fed. fac)]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended, (33 U.S.C. . . 1251 et. seq; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges from construction activities that are classified as "associated with industrial activity", located in the District of Columbia, are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges from construction activities within the general permit area who intend to be authorized by these permits must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 16th day of September 1992

A.R. Morris,

(signature of Water Management Director or Regional Administrator).

[General Permit Number FLR100000]

Region IV: Authorization To Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended (33 U.S.C. 1251 *et seq.*, the "Act"), except as provided in Part I.B.3 of this permit, operators of storm water discharges from construction activities that are classified as "associated with industrial

activity", located in the State of Florida are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges from construction activities within the general permit area who intend to be authorized by this permit must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and Issued: September 17, 1992.

Allan E. Antley,

Acting Director, Water Management Division.

This signature is for the permit conditions in Parts I through IX and for any additional conditions in Part X which apply to facilities located in the State of Florida.

[Storm Water General Permit for Construction Activities]

[Permit No. GUR100000]

Authorization To Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended (U.S.C. . . . 1251 et. seq.; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges from construction activities that are classified as "associated with industrial activity", located on the Island of Guam are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges from construction activities within the general permit area who intend to be authorized by this permit must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 16th day of September, 1992.

Catherine Kuhlman,

Acting Director, Water Management Division.

This signature is for the permit conditions in Parts I through IX and for any additional conditions in Part X which apply to facilities located onthe Island of Guam.

[Storm Water General Permit for Construction Activities]

[Permit No. ASR100000]

Authorization To Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended (U.S.C. . . . 1251 et. seq.; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges from construction activities that are classified as "associated with industrial activity", located on America Samoa are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges from construction activities within the general permit area who intend to be authorized by this permit must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 16th day of September, 1992.

Catherine Kuhlman,

Acting Director, Water Management Division.

This signature is for the permit conditions in Parts I through IX and for any additional conditions in Part X which apply to facilities located on American Samoa.

F. Guam

Preface

The Clean Water Act (CWA) provides that storm water discharges associated with industrial activity from a point source (including discharges through a municipal separate storm sewer system) to waters of the United States are unlawful, unless authorized by a National Pollutant Discharge Elimination System (NPDES) permit. The terms "storm water discharge associated with industrial activity", "point source" and "waters of the United States" are critical to determining whether a facility is subject to this requirement. Complete definitions of these terms are found in the definition section (Part IX) of this permit.

The United States Environmental Protection Agency (EPA) has established the Storm Water Hotline at (703) 821-4823 to assist the Regional Offices in distributing notice of intent forms and storm water pollution prevention plan guidance, and to provide information pertaining to the storm water regulations.

Part I. Coverage Under this Permit

A. *Permit Area.* The permit covers all areas of:

Region I—the State of Massachusetts.
Region II—Indian lands in New York.
Region III—the District of Columbia and Federal Facilities in the State of Delaware.
Region IV—the State of Florida.
Region IX—American Samoa and Guam.

B. Eligibility

1. This permit may authorize all discharges of storm water associated with industrial activity from construction sites, (those sites or common plans of development or sale that will result in the disturbance of five or more acres total land areas),[2] (henceforth referred to as storm water discharges from construction activities) occurring after the effective date of this permit (including discharges occurring after the effective date of this permit where the construction activity was initiated before the effective date of this permit), except for discharges identified under paragraph I.B.3.

2. This permit may only authorize a storm water discharge associated with industrial activity from a construction site that is mixed with a storm water discharge from an industrial source other than construction, where:

a. the industrial source other than construction is located on the same site as the construction activity;

b. storm water discharges associated with industrial activity from the areas of the site where construction activities are occurring are in compliance with the terms of this permit; and

c. storm water discharges associated with industrial activity from the areas of the site where industrial activity other than construction are occurring (including storm water discharges from dedicated asphalt plants and dedicated concrete plants) are covered by a different NPDES general permit or individual permit authorizing such discharges.

[2] On June 4, 1992, the United State Court of Appeals for the Ninth Circuit remanded the exemption for construction sites of less than five acres to the EPA for further rulemaking. (Nos. 90-70671) and 91-70200).

3. *Limitations on Coverage.* The following storm water discharges from construction sites are not authorized by this permit:

a. storm water discharges associated with industrial activity that originate from the site after construction activities have been completed and the site has undergone final stabilization.

b. discharges that are mixed with sources of non-storm water other than discharges which are identified in Part III.A of this permit and which are in compliance with Part IV.D.5 (non-storm water discharges) of this permit.

c. storm water discharges associated with industrial activity that are subject to an existing NPDES individual or general permit or which are issued a permit in accordance with paragraph VI.L (requiring an individual permit or an alternative general permit) of this permit. Such discharges may be authorized under this permit after an existing permit expires provided the existing permit did not establish numeric limitations for such discharges;

d. storm water discharges from construction sites that the Director (EPA) has determined to be or may reasonable be expected to be contributing to a violation of a water quality standard; and

e. storm water discharges from construction sites if the discharges may adversely affect a listed or proposed to be listed endangered or threatened species or its critical habitat.

C. Authorization

1. A discharger must submit a Notice of Intent (NOI) in accordance with the requirements of Part II of this permit, using a NOI form provided by the Director (or a photocopy thereof), in order for storm water discharges from construction sites to be authorized to discharge under this general permit.[3]

2. Where a new operator is selected after the submittal of an NOI under Part II, a new Notice of Intent (NOI) must be submitted by the operator in accordance with Part II, using a NOI form provided by the Director (or a photocopy thereof).

3. Unless notified by the Director to the contrary, dischargers who submit an NOI in accordance with the requirements of this permit are authorized to discharge storm water from construction sites under the terms and conditions of this permit 2 days after the date that the NOI is postmarked. The Director may deny coverage under this permit and require submittal of an application for an individual NPDES permit based on a review of the NOI or other information (see Part VI.L of this permit).

[3] A copy of the approved NOI form is provided in Appendix C of this notice.

Part II. Notice of Intent Requirements

A. Deadlines for Notification

1. Except as provided in paragraphs II.A.2, II.A.3, and II.A.4, individuals who intend to obtain coverage for storm water discharges from a construction site (where disturbances associated with the construction project commence before October 1, 1992), under this general permit shall submit a Notice of Intent (NOI) in accordance with the requirements of this Part on or before October 1, 1992;

2. Individuals who intend to obtain coverage under this general permit for storm water discharges from a construction site where disturbances associated with the construction project commence after October 1, 1992, shall submit a Notice of Intent (NOI) in accordance with the requirements of this Part at least 2 days prior to the commencement of construction activities (e.g. the initial disturbance of soils associated with clearing, grading, excavation activities, or other construction activities);

3. For storm water discharges from construction sites where the operator changes (including projects where an operator is selected after a NOI has been submitted under Parts II.A.1 or U.A.2) a NOI in accordance with the requirements of this Part shall be submitted at least 2 days prior to when the operator commences work at the site; and

4. EPA will accept an NOI in accordance with the requirements of this part after the dates provided in Parts II.A.1, 2 or 3 of this permit. In such instances, EPA may bring appropriate enforcement actions.

B. *Contents of Notice of Intent.* The Notice(s) of Intent shall be signed in accordance with Part VI.G of this permit by all of the entities identified in Part II.B.2 and shall include the following information:

1. The mailing address of the construction site for which the notification is submitted. Where a mailing address for the site is not available, the location of the approximate center of the site must be described in terms of the latitude and longitude to the nearest 15 seconds, or the section, township and range to the nearest quarter section;

2. The name, address and telephone number of the operator(s) with day to day operational control that have been identified at the time of the NOI submittal, and operator status as a

Federal, State, private, public or other entity. Where multiple operators have been selected at the time of the initial NOI submittal, NOIs must be attached and submitted in the same envelope. When an additional operator submits an NOI for a site with a preexisting NPDES permit, the NOI for the additional operator must indicate the number for the preexisting NPDES permit;

3. The name of the receiving water(s), or if the discharge is through a municipal separate storm sewer, the name of the municipal operator of the storm sewer and the ultimate receiving water(s);

4. The permit number of any NPDES permit(s) for any discharge(s) (including any storm water discharges or any non-storm water discharges) from the site;

5. An indication of whether the operator has existing quantitative data which describes the concentration of pollutants in storm water discharges (existing data should not be included as part of the NOI); and

6. An estimate of project start date and completion dates, estimates of the number of acres of the site on which soil will be disturbed, and a certification that a storm water pollution prevention plan has been prepared for the site in accordance with Part IV of this permit, and such plan provides compliance with approved State and/or local sediment and erosion plans or permits and/or storm water management plans or permits in accordance with Part IV.D.2.d of this permit. (A copy of the plans or permits should not be included with the NOI submission).

C. *Where to Submit*

1. Facilities which discharge storm water associated with industrial activity must use a NOI form provided by the Director (or photocopy thereof). The form in the **Federal Register** notice in which this permit was published may be photocopied and used. Forms are also available by calling (703) 821–4823. NOIs must be signed in accordance with Part VI.G of this permit. NOIs are to be submitted to the Director of the NPDES program in care of the following address: Storm Water Notice of Intent, P.O. Box 1215, Newington, VA 22122.

2. A copy of the NOI or other indication that storm water discharges from the site are covered under a NPDES permit, and a brief description of the project shall be posted at the construction site in a prominent place for public viewing (such as alongside a building permit).

D. *Additional Notification.* Facilities which are operating under approved State or local sediment and erosion plans, grading plans, or storm water management plans shall submit signed copies of the Notice of Intent to the State or local agency approving such plans in accordance with the datelines in Part II.A of this permit (or sooner where required by State or local rules), in addition to submitting the Notice of Intent to EPA in accordance with paragraph II.C.

E. *Renotification.* Upon issuance of a new general permit, the permittee is required to notify the Director of his intent to be covered by the new general permit.

Part III. Special Conditions, Management Practices, and Other Non-Numeric Limitations

A. *Prohibition on non-storm water discharges.*

1. Except as provided in paragraph I.B.2 and III.A.2, all discharges covered by this permit shall be composed entirely of storm water.

2. a. Except as provided in paragraph III.A.2.(b), discharges of material other than storm water must be in compliance with a NPDES permit (other than this permit) issued for the discharge.

b. The following non-storm water discharges may be authorized by this permit provided the non-storm water component of the discharge is in compliance with paragraph IV.D.5: discharges from fire fighting activities; fire hydrant flushings; waters used to wash vehicles or control dust in accordance with Part IV.D.2.c.(2); potable water sources including waterline flushings; irrigation drainage; routine external building washdown which does not use detergents; pavement washwaters where spills or leaks of toxic or hazardous materials have not occurred (unless all spilled material has been removed) and where detergents are not used; air conditioning condensate; springs; uncontaminated ground water; and foundation or footing drains where flows are not contaminated with process materials such as solvents.

B. *Releases in excess of Reportable Quantities.*

1. The discharge of hazardous substances or oil in the storm water discharge(s) from a facility shall be prevented or minimized in accordance with the applicable storm water pollution prevention plan for the facility. This permit does not relieve the permittee of the reporting requirements of 40 CFR part 117 and 40 CFR part 302. Where a release containing a hazardous substance in an amount equal to or in excess of a reporting quantity established under either 40 CFR 117 or 40 CFR 302, occurs during a 24 hour period:

a. The permittee is required to notify the National Response Center (NRC) (800–424–8802; in the Washington, DC metropolitan area 202–426–2675) in accordance with the requirements of 40 CFR 117 and 40 CFR 302 as soon as he or she has knowledge of the discharge;

b. The permittee shall submit within 14 calendar days of knowledge of the release a written description of: the release (including the type and estimate of the amount of material released), the date that such release occurred, the circumstances leading to the release, and steps to be taken in accordance with Part III.B.3 of this permit to the appropriate EPA Regional Office at the address provided in Part V.C (addresses) of this permit; and

c. The storm water pollution prevention plan required under Part IV of this permit must be modified within 14 calendar days of knowledge of the releases to: provide a description of the release, the circumstances leading to the release, and the date of the release. In addition, the plan must be reviewed to identify measures to prevent the reoccurrence of such releases and to respond to such releases, and the plan must be modified where appropriate.

2. *Spills.* This permit does not authorize the discharge of hazardous substances or oil resulting from an on-site spill.

Part IV. Storm Water Pollution Prevention Plans

A storm water pollution prevention plan shall be developed for each construction site covered by this permit. Storm water pollution prevention plans shall be prepared in accordance with good engineering practices. The plan shall identify potential sources of pollution which may reasonably be expected to affect the quality of storm water discharges from the construction site. In addition, the plan shall describe and ensure the implementation of practices which will be used to reduce the pollutants in storm water discharges associated with industrial activity at the construction site and to assure compliance with the terms and conditions of this permit. Facilities must implement the provisions of the storm water pollution prevention plan required under this part as a condition of this permit.

A. Deadlines for Plan Preparation and Compliance

The plan shall:

1. Be completed (including certifications required under Part IV.E) prior to the submittal of an NOI to be covered under this permit and updated as appropriate;

2. For construction activities that have begun on or before October 1, 1992, except for sediment basins required under Part IV.D.2.a.(2) (structural practices) of this permit, the plan shall provide for compliance with the terms and schedule of the plan beginning on October 1, 1992. The plan shall provide for compliance with sediment basins required under Part IV.D.2.a.(a) of this permit by no later than December 1, 1992;

3. For construction activities that have begun after October 1, 1992, the plan shall provide for compliance with the terms and schedule of the plan beginning with the initiation of construction activities.

B. Signature and Plan Review

1. The plan shall be signed in accordance with Part VI.G, and be retained on-site at the facility which generates the storm water discharge in accordance with Part V (retention of records) of this permit.

2. The permittee shall make plans available upon request to the Director; a State or local agency approving sediment and erosion plans, grading plans, or storm water management plans; or in the case of a storm water discharge associated with industrial activity which discharges through a municipal separate storm sewer system with an NPDES permit, to the municipal operator of the system.

3. The Director, or authorized representative, may notify the permittee at any time that the plan does not meet one or more of the minimum requirements of this Part. Such notification shall identify those provisions of the permit which are not being met by the plan, and identify which provisions of the plan requires modifications in order to meet the minimum requirements of this Part. Within 7 days of such notification from the Director, (or as otherwise provided by the Director), or authorized representative, the permittee shall make the required changes to the plan and shall submit to the Director a written certification that the requested changes have been made.

C. *Keeping Plans Current.* The permittee shall amend the plan whenever there is a change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to the waters of the United States and which has not otherwise been addressed in the plan or if the storm water pollution prevention plan proves to be ineffective in eliminating or significantly minimizing pollutants from sources identified under Part IV.D.2 of this permit, or in otherwise achieving the general objectives of controlling pollutants in storm water discharges associated with industrial activity. In addition, the plan shall be amended to identify any new contractor and/or subcontractor that will implement a measure of the storm water pollution prevention plan (see Part IV.E). Amendments to the plan may be reviewed by EPA in the same manner as Part IV.B above.

D. *Contents of Plan.* The storm water pollution prevention plan shall include the following items:

1. *Site Description.* Each plan shall provide a description of pollutant sources and other information as indicated:

a. A description of the nature of the construction activity;

b. A description of the intended sequence of major activities which disturb soils for major portions of the site (e.g. grubbing, excavation, grading);

c. Estimates of the total area of the site and the total area of the site that is expected to be disturbed by excavation, grading, or other activities;

d. An estimate of the runoff coefficient of the site after construction activities are completed and existing data describing the soil or the quality of any discharge from the site;

e. A site map indicating drainage patterns and approximate slopes anticipated after major grading activities, areas of soil disturbance, an outline of areas which may not be disturbed, the location of major structural and nonstructural controls identified in the plan, the location of areas where stabilization practices are expected to occur, surface waters (including wetlands), and locations where storm water is discharged to a surface water; and

f. The name of the receiving water(s), and areal extent of wetland acreage at the site.

2. *Controls.* Each plan shall include a description of appropriate controls and measures that will be implemented at the construction site. The plan will clearly describe for each major activity identified in Part IV.D.1.b appropriate control measures and the timing during the construction process that the measures will be implemented. (For example, perimeter controls for one portion of the site will be installed after the clearing and grubbing necessary for installation of the measure, but before the clearing and grubbing for the remaining portions of the site. Perimeter controls will be actively maintained until final stabilization of those portions of the site upward of the perimeter control. Temporary perimeter controls will be removed after final stabilization). The description and implementation of controls shall address the following minimum components:

a. *Erosion and Sediment Controls.*

(1). *Stabilization Practices.* A description of interim and permanent stabilization practices, including site-specific scheduling of the implementation of the practices. Site plans should ensure that existing vegetation is preserved where attainable and that disturbed portions of the site are stabilized. Stabilization practices may include: temporary seeding, permanent seeding, mulching, geotextiles, sod stabilization, vegetative buffer strips, protection of trees, preservation of mature vegetation, and other appropriate measures. A record of the dates when major grading activities occur, when construction activities temporarily or permanently cease on a portion of the site, and when stabilization measures are initiated shall be included in the plan. Except as provided in paragraphs IV.D.2.(a).(1).(a), (b), and (c) below, stabilization measures shall be initiated as soon as practicable in portions of the site where construction activities have temporarily or permanently ceased, but in no case more than 14 days after the construction activity in that portion of the site has temporarily or permanently ceased.

(a). Where the initiation of stabilization measures by the 14th day after construction activity temporarily or permanently cease is precluded by snow cover, stabilization measures shall be initiated as soon as practicable.

(b). Where construction activity will resume on a portion of the site within 21 days from when activities ceased, (e.g., the total time period that construction activity is temporarily ceased is less than 21 days) then stabilization measures do not have to be initiated on that portion of site by the 14th day after construction activity temporarily ceased.

(c). In arid areas (areas with an average annual rainfall of 0 to 10 inches) and semi-arid areas (areas with an average annual rainfall of 10 to 20 inches), where the initiation of stabilization measures by the 14th day after construction activity has temporarily or permanently ceased is precluded by seasonal arid conditions, stabilization measures shall be initiated as soon as practicable.

(2). *Structural Practices.* A description of structural practices to divert flows from exposed soils, store flows or otherwise limit runoff and the discharge of pollutants from exposed areas of the site to the degree attainable. Such

practices may include silt fences, earth dikes, drainage swales, sediment traps, check dams, subsurface drains, pipe slope drains, level spreaders, storm drain inlet protection, rock outlet protection, reinforced soil retaining systems, gabions, and temporary or permanent sediment basins. Structural practices should be placed on upland soils to the degree attainable. The installation of these devices may be subject to Section 404 of the CWA.

(a) For common drainage locations that serve an area with 10 or more disturbed acres at one time, a temporary (or permanent) sediment basin providing 3,600 cubic feet of storage per acre drained, or equivalent control measures, shall be provided where attainable until final stabilization of the site. The 3,600 cubic feet of storage area per acre drained does not apply to flows from offsite areas and flows from onsite areas that are either undisturbed or have undergone final stabilization where such flows are diverted around both the disturbed area and the sediment basin. For drainage locations which serve 10 or more disturbed acres at one time and where a temporary sediment basin providing 3,600 cubic feet of storage per acre drained, or equivalent controls is not attainable, smaller sediment basins and/or sediment traps should be used. At a minimum, silt fences, or equivalent sediment controls are required for all sideslope and downslope boundaries of the construction area.

(b) For drainage locations serving less than 10 acres, sediment basins and/or sediment traps should be used. At a minimum, silt fences or equivalent sediment controls are required for all sideslope and downslope boundaries of the construction area unless a sediment basin providing storage for 3,600 cubic feet of storage per acre drained is provided.

b. *Storm Water Management.* A description of measures that will be installed during the construction process to control pollutants in storm water discharges that will occur after construction operations have been completed. Structural measures should be placed on upland soils to the degree attainable. The installation of these devices may be subject to Section 404 of the CWA. This permit only addresses the installation of storm water management measures, and not the ultimate operation and maintenance of such structures after the construction activities have been completed and the site has undergone final stabilization. Permittees are only responsible for the installation and maintenance of storm water management measures prior to final stabilization of the site, and are not responsible for maintenance after storm water discharges associated with industrial activity have been eliminated from the site.

(1). Such practices may include: storm water detention structures (including wet ponds); storm water retention structures; flow attenuation by use of open vegetated swales and natural depressions; infiltration of runoff onsite; and sequential systems (which combine several practices). The pollution prevention plan shall include an explanation of the technical basis used to select the practices to control pollution where flows exceed predevelopment levels.

(2). Velocity dissipation devices shall be placed at discharge locations and along the length of any outfall channel for the purpose of providing a non-erosive velocity flow from the structure to a water course so that the natural physical and biological characteristics and functions are maintained and protected (e.g. no significant changes in the hydrological regime of the receiving water).

c. *Other Controls.*

(1). *Waste Disposal.* No solid materials, including building materials, shall be discharged to waters of the United States, except as authorized by a section 404 permit.

(2). Off-site vehicle tracking of sediments and the generation of dust shall be minimized.

(3). The plan shall ensure and demonstrate compliance with applicable State and/or local waste disposal, sanitary sewer or septic system regulations.

d. *Approved State or Local Plans.*

(1) Permittees which discharge storm water associated with industrial activity from construction activities must include in their storm water pollution prevention plan procedures and requirements specified in applicable sediment and erosion site plans or site permits, or storm water management site plans or site permits approved by State or local officials. Permittees shall provide a certification in their storm water pollution prevention plan that their storm water pollution prevention plan reflects requirements applicable to protecting surface water resources in sediment and erosion site plans or site permits, or storm water management site plans or site permits approved by State or local officials. Permittees shall comply with any such requirements during the term of the permit. This provision does not apply to provisions of master plans, comprehensive plans, non-enforceable guidelines or technical guidance documents that are not identified in a specific plan or permit that is issued for the construction site.

(2) Storm water pollution prevention plans must be amended to reflect any change applicable to protecting surface water resources in sediment and erosion site plans or site permits, or storm water management site plans or site permits approved by State or local officials for which the permittee receives written notice. Where the permittee receives such written notice of a change, the permittee shall provide a recertification in the storm water pollution plan that the storm water pollution prevention plan has been modified to address such changes.

(3) Dischargers seeking alternative permit requirements shall submit an individual permit application in accordance with Part VI.L of the permit at the address indicated in Part V.C of this permit for the appropriate Regional Office, along with a description of why requirements in approved State or local plans or permits, or changes to such plans or permits, should not be applicable as a condition of an NPDES permit.

3. *Maintenance.* A description of procedures to ensure the timely maintenance of vegetation, erosion and sediment control measures and other protective measures identified in the site plan in good and effective operating condition.

4. *Inspections.* Qualified personnel (provided by the discharger) shall inspect disturbed areas of the construction site that have not been finally stabilized, areas used for storage of materials that are exposed to precipitation, structural control measures, and locations where vehicles enter or exit the site at least once every seven calendar days and within 24 hours of the end of a storm that is 0.5 inches or greater. Where sites have been finally stabilized, or during seasonal arid periods in arid areas (areas with an average annual rainfall of 0 to 10 inches) and semi-arid areas (areas with an average annual rainfall of 10 to 20 inches) such inspection shall be conducted at least once every month.

a. Disturbed areas and areas used for storage of materials that are exposed to precipitation shall be inspected for evidence of, or the potential for, pollutants entering the drainage system. Erosion and sediment control measures identified in the plan shall be observed to ensure that they are operating correctly. Where discharge locations or points are accessible, they shall be inspected to ascertain whether erosion control measures are effective in

preventing significant impacts to receiving waters. Locations where vehicles enter or exit the site shall be inspected for evidence of offsite sediment tracking.

b. Based on the results of the inspection, the site description identified in the plan in accordance with paragraph IV.D.1 of this permit and pollution prevention measures identified in the plan in accordance with paragraph IV.D.2 of this permit shall be revised as appropriate, but in no case later than 7 calendar days following the inspection. Such modifications shall provide for timely implementation of any changes to the plan within 7 calendar days following the inspection.

c. A report summarizing the scope of the inspection, name(s) and qualifications of personnel making the inspection, the date(s) of the inspection, major observations relating to the implementation of the storm water pollution prevention plan, and actions taken in accordance with paragraph IV.D.4.b of the permit shall be made and retained as part of the storm water pollution prevention plan for at least three years from the date that the site is finally stabilized. Such reports shall identify any incidents of non-compliance. Where a report does not identify any incidents of non-compliance, the report shall contain a certification that the facility is in compliance with the storm water pollution prevention plan and this permit. The report shall be signed in accordance with Part VI.G of this permit.

5. *Non-Storm Water Discharges*—Except for flows from fire fighting activities, sources of non-storm water listed in Part III.A.2 of this permit that are combined with storm water discharges associated with industrial activity must be identified in the plan. The plan shall identify and ensure the implementation of appropriate pollution prevention measures for the non-storm water component(s) of the discharge.

E. Contractors

1. The storm water pollution prevention plan must clearly identify for each measure identified in the plan, the contractor(s) and/or subcontractor(s) that will implement the measure. All contractors and subcontractors identified in the plan must sign a copy of the certification statement in Part IV.E.2 of this permit in accordance with Part VI.G of this permit. All certifications must be included in the storm water pollution prevention plan.

2. *Certification Statement.* All contractors and subcontractors identified in a storm water pollution prevention plan in accordance with Part IV.E.1 of this permit shall sign a copy of the following certification statement before conducting any professional service identified in the storm water pollution prevention plan:

"I certify under penalty of law that I understand the terms and conditions of the general National Pollutant Discharge Elimination System (NPDES) permit that authorizes the storm water discharges associated with industrial activity from the construction site identified as part of this certification."

The certification must include the name and title of the person providing the signature in accordance with Part VI.G of this permit; the name, address and telephone number of the contracting firm; the address (or other identifying description) of the site; and the date the certification is made.

Part V. Retention of Records

A. The permittee shall retain copies of storm water pollution prevention plans and all reports required by this permit, and records of all data used to complete the Notice of Intent to be covered by this permit, for a period of at least three years from the date that the site is finally stabilized. This period may be extended by request of the Director at any time.

B. The permittee shall retain a copy of the storm water pollution prevention required by this permit at the construction site from the date of project initiation to the date of final stabilization.

C. *Addresses.* Except for the submittal of NOIs (see Part II.C of this permit), all written correspondence concerning discharges in any State, Indian land or from any Federal Facility covered under this permit and directed to the U.S. Environmental Protection Agency, including the submittal of individual permit applications, shall be sent to the address of the appropriate Regional Office listed below:

1. Massachusetts

United States EPA, Region I, Water Management Division, (WCP–2109), Storm Water Staff, John F. Kennedy Federal Building, room 2209, Boston, MA 02203

2. Indian Lands in New York

United States EPA, Region II, Water Management Division, (2WM–WPC), Storm Water Staff, 26 Federal Plaza, New York, NY 10278

3. District of Columbia, and Federal facilities in Delaware

United States EPA, Region III, Water Management Division, (3WM55), Storm Water Staff, 841 Chestnut Building, Philadelphia, PA 19107

4. Florida

United States EPA, Region IV, Water Management Division, (FPB–3), Storm Water Staff, 345 Courtland Street, NE, Atlanta, GA 30365

5. American Samoa and Guam

United States EPA, Region IX, Water Management Division, (W–5–1), Storm Water Staff, 75 Hawthorne Street, San Francisco, CA 94105

Part VI. Standard Permit Conditions

A. Duty to Comply

1. The permittee must comply with all conditions of this permit. Any permit noncompliance constitutes a violation of CWA and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

2. *Penalties for Violations of Permit Conditions.*

a. *Criminal*

(1). *Negligent Violations.* The CWA provides that any person who negligently violates permit conditions implementing sections 301, 302, 306, 307, 308, 318, or 405 of the Act is subject to a fine of not less than $2,500 nor more than $25,000 per day of violation, or by imprisonment for not more than 1 year, or both.

(2). *Knowing Violations.* The CWA provides that any person who knowingly violates permit conditions implementing Sections 301, 302, 306, 307, 308, 318, or 405 of the Act is subject to a fine of not less than $5,000 nor more than $50,000 per day of violation, or by imprisonment for not more than 3 years, or both.

(3). *Knowing Endangerment.* The CWA provides that any person who knowingly violates permit conditions implementing Sections 301, 302, 306, 307, 308, 318, or 405 of the Act and who knows at that time that he is placing another person in imminent danger of death or serious bodily injury is subject to a fine of not more than $250,000, or by imprisonment for not more than 15 years, or both.

(4). *False Statement.* The CWA provides that any person who knowingly makes any false material statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under the Act or who knowingly falsifies, tampers with, or renders inaccurate, any monitoring device or method required to be maintain under the Act, shall upon

conviction, be punished by a fine of not more than $10,000 or by imprisonment for not more than 2 years, or by both. If a conviction is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $20,000 per day of violation, or by imprisonment of not more than 4 years, or by both. (See Section 309.c.4 of the Clean Water Act).

b. *Civil Panalties*—The CWA provides that any person who violates a permit condition implementing Sections 301, 302, 306, 307, 308, 318, or 405 of the Act is subject to a civil penalty not to exceed $25,000 per day for each violation.

c. *Administrative Panalties*—The CWA provides that any person who violates a permit condition implementing Sections 301, 302, 306, 307, 308, 318, or 405 of the Act is subject to an administrative penalty, as follows:

(1). *Class I penalty.* Not to exceed $10,000 per violation nor shall the maximum amount exceed $25,000.

(2). *Class II penalty.* Not to exceed $10,000 per day for each day during which the violation continues nor shall the maximum amount exceed $125,000.

B. Continuation of the Expired General Permit

This permit expires on [insert date five years after publication date]. However, an expired general permit continues in force and effect until a new general permit is issued. Permittees must submit a new NOI in accordance with the requirements of Part II of this permit, using a NOI form provided by the Director (or photocopy thereof) between August 1, 1997 and [insert date five years after publication date] to remain covered under the continued permit after [insert date five years after publication date]. Facilities that had not obtained coverage under the permit by [insert date five years after publication date] cannot become authorized to discharge under the continued permit.

C. *Need to halt or reduce activity not a defense.* It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

D. *Duty to Mitigate.* The permittee shall take all reasonable steps to minimize or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

E. *Duty to Provide Information.* The permittee shall furnish to the Director; an authorized representative of the Director; a State or local agency approving sediment and erosion plans, grading plans, or storm water management plans; or in the case of a storm water discharge associated with industrial activity which discharges through a municipal separate storm sewer system with an NPDES permit, to the municipal operator of the system, any information which is requested to determine compliance with this permit or other information. .

F. *Other Information.* When the permittee becomes aware that he or she failed to submit any relevant facts or submitted incorrect information in the Notice of Intent or in any other report to the Director, he or she shall promptly submit such facts or information.

G. *Signatory Requirements.* All Notices of Intent, storm water pollution prevention plans, reports, certifications or information either submitted to the Director or the operator of a large or medium municipal separate storm sewer system, or that this permit requires be maintained by the permittee, shall be signed as follows:

1. All Notices of Intent shall be signed as follows:

a. For a corporation: by a responsible corporate officer. For the purpose of this section, a responsible corporate officer means: (1) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation; or (2) the manager of one or more manufacturing, production or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding $25,000,000 (in second-quarter 1980 dollars) if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

b. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or

c. For a municipality, State, Federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a Federal agency includes (1) the chief executive officer of the agency, or (2) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., Regional Administrators of EPA).

2. All reports required by the permit and other information requested by the Director or authorized representative of the Director shall be signed by a person described above or by a duly authorized representative of that person. A person is a duly authorized representative only if:

a. The authorization is made in writing by a person described above and submitted to the Director.

b. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of manager, operator, superintendent, or position of equivalent responsibility or an individual or position having overall responsibility for environmental matters for the company. (A duly authorized representative may thus be either a named individual or any individual occupying a named position).

c. *Changes to authorization.* If an authorization under paragraph II.B.3. is no longer accurate because a different operator has responsibility for the overall operation of the construction site, a new notice of intent satisfying the requirements of paragraph II.B must be submitted to the Director prior to or together with any reports, information, or applications to be signed by an authorized representative.

d. *Certification.* Any person signing documents under paragraph VI.G shall make the following certification:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

H. *Penalties for Falsification of Reports.* Section 309(c)(4) of the Clean Water Act provides that any person who knowingly makes any false material statement, representation, or certification in any record or other document submitted or required to be maintained under this permit, including reports of compliance or noncompliance shall, upon conviction, be punished by a fine or not more than $10,000, or by imprisonment for not more than 2 years, or by both.

I. *Oil and Hazardous Substance Liability.* Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or

may be subject under section 311 of the CWA or section 106 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA).

J. *Property Rights.* The issuance of this permit does not convey any property rights of any sort, nor any exclusive privileges, nor does it authorize any injury to private property nor any invasion of personal rights, nor any infringement of Federal, State or local laws or regulations.

K. *Severability.* The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.

L. *Requiring an individual permit or an alternative general permit.*

1. The Director may require any person authorized by this permit to apply for and/or obtain either an individual NPDES permit or an alternative NPDES general permit. Any interested person may petition the Director to take action under this paragraph. Where the Director requires a discharger authorized to discharge under this permit to apply for an individual NPDES permit, the Director shall notify the discharger in writing that a permit application is required. This notification shall include a brief statement of the reasons for this decision, an application form, a statement setting a deadline for the discharger to file the application, and a statement that on the effective date of issuance or denial of the individual NPDES permit or the alternative general permit as it applies to the individual permittee, coverage under this general permit shall automatically terminate. Applications shall be submitted to the appropriate Regional Office indicated in Part V.C of this permit. The Director may grant additional time to submit the application upon request of the applicant. If a discharger fails to submit in a timely manner an individual NPDES permit application as required by the Director under this paragraph, then the applicability of this permit to the individual NPDES permittee is automatically terminated at the end of the day specified by the Director for application submittal.

2. Any discharger authorized by this permit may request to be excluded from the coverage of this permit by applying for an individual permit. In such cases, the permittee shall submit an individual application in accordance with the requirements of 40 CFR 122.26(c)(1)(ii), with reasons supporting the request, to the Director at the address for the appropriate Regional Office indicated in Part V.C of this permit. The request may be granted by issuance of any individual permit or an alternative general permit if the reasons cited by the permittee are adequate to support the request.

3. When an individual NPDES permit is issued to a discharger otherwise subject to this permit, or the discharger is authorized to discharge under an alternative NPDES general permit, the applicability of this permit to the individual NPDES permittee is automatically terminated on the effective date of the individual permit or the date of authorization of coverage under the alternative general permit, whichever the case may be. When an individual NPDES permit is denied to an owner or operator otherwise subject to this permit, or the owner or operator is denied for coverage under an alternative NPDES general permit, the applicability of this permit to the individual NPDES permittee is automatically terminated on the date of such denial, unless otherwise specified by the Director.

M. *State/Environmental Laws.*

1. Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any applicable State law or regulation under authority preserved by section 510 of the Act.

2. No condition of this permit shall release the permittee from any responsibility or requirements under other environmental statutes or regulations.

N. *Proper Operation and Maintenance.* The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit and with the requirements of storm water pollution prevention plans. Proper operation and maintenance also includes adequate laboratory controls and appropriate quality assurance procedures. Proper operation and maintenance requires the operation of backup or auxiliary facilities or similar systems, installed by a permittee only when necessary to achieve compliance with the conditions of the permit.

O. *Inspection and Entry.* The permittee shall allow the Director or an authorized representative of EPA, the State, or, in the case of a construction site which discharges through a municipal separate storm sewer, an authorized representative of the municipal operator or the separate storm sewer receiving the discharge, upon the presentation of credentials and other documents as may be required by law, to:

1. Enter upon the permittee's premises where a regulated facility or activity is located or conducted or where records must be kept under the conditions of this permit;

2. Have access to and copy at reasonable times, any records that must be kept under the conditions of this permit; and

3. Inspect at reasonable times any facilities or equipment (including monitoring and control equipment).

P. *Permit Actions.* This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition.

Part VII. Reopener Clause

A. If there is evidence indicating potential or realized impacts on water quality due to any storm water discharge associated with industrial activity covered by this permit, the discharger may be required to obtain individual permit or an alternative general permit in accordance with Part I.C of this permit or the permit may be modified to include different limitations and/or requirements.

B. Permit modification or revocation will be conducted according to 40 CFR 122.62, 122.63, 122.64 and 124.5.

Part VIII. Termination of Coverage

A. *Notice of Termination.* Where a site has been finally stabilized and all storm water discharges from construction activities that are authorized by this permit are eliminated, or where the operator of all storm water discharges at a facility changes, the operator of the facility may submit a Notice of Termination that is signed in accordance with Part VI.G of this permit. The Notice of Termination shall include the following information:

1. The mailing address of the construction site for which the notification is submitted. Where a mailing address for the site is not available, the location of the approximate center of the site must be described in terms of the latitude and longitude to the nearest 15 seconds, or the section, township and range to the nearest quarter section;

2. The name, address and telephone number of the operator addressed by the Notice of Termination;

3. The NPDES permit number for the storm water discharge identified by the Notice of Termination;

4. An indication of whether the storm water discharges associated with industrial activity have been eliminated or the operator of the discharges has changed; and

5. The following certification signed in accordance with Part VI.G (signatory requirements) of this permit:

"I certify under penalty of law that all storm water discharges associated with industrial activity from the identified facility that are authorized by an NPDES general permit have been eliminated or that I am no longer the operator of the facility or construction site. I understand that by submitting this notice of termination, I am no longer authorized to discharge storm water associated with industrial activity under this general permit, and that discharging pollutants in storm water associated with industrial activity to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by a NPDES permit. I also understand that the submittal of this notice of termination does not release an operator from liability for any violations of this permit or the Clean Water Act."

For the purposes of this certification, elimination of storm water discharges associated with industrial activity means that all disturbed soils at the identified facility have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time, or that all storm water discharges associated with construction activities from the identified site that are authorized by a NPDES general permit have otherwise been eliminated.

B. *Addresses.* All Notices of Termination are to be sent, using the form provided by the Director (or a photocopy thereof),[4] to the following address: Storm Water Notice of Termination, PO Box 1185, Newington, VA 22122.

Part IX. Definitions

Best Management Practices (BMPs) means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the pollution of waters of the United States. BMPs also include treatment requirements, operating procedures, and practices to control plant site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage.

Commencement of Construction—The initial disturbance of soils associated with clearing, grading, or excavating activities or other construction activities.

CWA means the Clean Water Act or the Federal Water Pollution Control Act.

Dedicated portable asphalt plant—A portable asphalt plant that is located on or contiguous to a construction site and that provides asphalt only to the construction site that the plant is located on or adjacent to. The term dedicated portable asphalt plant does not include facilities that are subject to the asphalt emulsion effluent limitation guideline at 40 CFR 443.

Dedicated portable concrete plant—A portable concrete plant that is located on or contiguous to a construction site and that provides concrete only to the construction site that the plant is located on or adjacent to.

Director means the Regional Administrator of the Environmental Protection Agency or an authorized representative.

Final Stabilization means that all soil disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the cover for unpaved areas and areas not covered by permanent structures has been established or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.

Flow-weighted composite sample means a composite sample consisting of a mixture of aliquots collected at a constant time interval, where the volume of each aliquot is proportional to the flow rate of the discharge.

Large and Medium municipal separate storm sewer system means all municipal separate storm sewers that are either: (i) located in an incorporated place (city) with a population of 100,000 or more as determined by the latest Decennial Census by the Bureau of Census (these cities are listed in Appendices F and G of 40 CFR Part 122); or (ii) located in the counties with unincorporated urbanized populations of 100,000 or more, except municipal separate storm sewers that are located in the incorporated places, townships or towns within such counties (these counties are listed in Appendices H and I of 40 CFR Part 122); or (iii) owned or operated by a municipality other than those described in paragraph (i) or (ii) and that are designated by the Director as part of the large or medium municipal separate storm sewer system.

NOI means notice of intent to be covered by this permit (see Part II of this permit.)

NOT means notice of termination (see Part VIII of this permit).

Point Source means any discernible, confined, and discrete conveyance, including but not limited to, any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel or other floating craft from which pollutants are or may be discharges. This term does not include return flows from irrigated agriculture or agricultural storm water runoff.

Runoff coefficient means the fraction of total rainfall that will appear at the conveyance as runoff.

Storm Water means storm water runoff, snow melt runoff, and surface runoff and drainage.

Storm Water Associated with Industrial Activity means the discharge from any conveyance which is used for collecting and conveying storm water and which is directly related to manufacturing, processing or raw materials storage areas at an industrial plant. The term does not include discharges from facilities or activities excluded from the NPDES program. For the categories of industries identified in paragraphs (i) through (x) of this definition, the term includes, but is not limited to, storm water discharges from industrial plant years; immediate access roads and rail lines used or traveled by carriers of raw materials, manufactured products, waste material, or by-products used or created by the facility; material handling sites; refuse sites; sites used for the application or disposal of process waste waters (as defined at 40 CFR 401); sites used for the storage and maintenance of material handling equipment; sites used for residual treatment, storage, or disposal; shipping and receiving areas; manufacturing buildings; storage areas (including tank farms) for raw materials, and intermediate and finished products; and areas where industrial activity has taken place in the past and significant materials remain and are exposed to storm water. For the categories of industries identified in paragraph (xi) of this definition, the term includes only storm water discharges from all areas (except access roads and rail lines) listed in the previous sentence where material handling equipment or activities, raw materials, intermediate products, final products, waste materials, by-products, or industrial

[4] A copy of the approved NOT form is provided in Appendix D of this notice.

machinery *are exposed to storm water.* For the purposes of this paragraph, material handling activities include the: storage, loading and unloading, transportation, or conveyance of any raw material, intermediate product, finished product, by-product or waste product. The term excludes areas located on plant lands separate from the plant's industrial activities, such as office buildings and accompanying parking lots as long as the drainage from the excluded areas is not mixed with storm water drained from the above described areas. Industrial facilities (including industrial facilities that are Federally, State or municipally owned or operated that meet the description of the facilities listed in this paragraph (i)–(xi) of this definition) include those facilities designated under 122.26(a)(1)(v). The following categories of facilities are considered to be engaging in "industrial activity" for purposes of this subsection: (i) Facilities subject to storm water effluent limitations guidelines, new source performance standards, or toxic pollutant effluent standards under 40 CFR subchapter N (except facilities with toxic pollutant effluent standards which are exempted under category (xi) of this definition); (ii) Facilities classified as Standard Industrial Classifications 24 (except 2434), 26 (except 265 and 267), 28 (except 283), 29, 311, 32 (except 323), 33, 3441, 373; (iii) Facilities classified as Standard Industrial Classifications 10 through 14 (mineral industry) including active or inactive mining operations (except for areas of coal mining operations no longer meeting the definition of a reclamation area under 40 CFR 434.11(1) because the performance bond issued to the facility by the appropriate SMCRA authority has been released, or except for areas of non-coal mining operations which have been released from applicable State or Federal reclamation requirements after December 17, 1990) and oil and gas exploration, production, processing, or treatment operations, or transmission facilities that discharge storm water contaminated by contact with or that has come into contact with, any overburden, raw material, intermediate products, finished products, byproducts or waste products located on the site of such operations; inactive mining operations are mining sites that are not being actively mined, but which have an identifiable owner/operator;

(iv) Hazardous waste treatment, storage, or disposal facilities, including those that are operating under interim status or a permit under Subtitle C of RCRA;

(v) Landfills, land application sites, and open dumps that have received any industrial wastes (waste that is received from any of the facilities described under this subsection) including those that are subject to regulation under Subtitle D of RCRA;

(vi) Facilities involved in the recycling of materials, including metal scrapyards, battery reclaimers, salvage yards, and automobile junkyards, including but limited to those classified as Standard Industrial Classification 5015 and 5093;

(vii) Steam electric power generating facilities, including coal handling sites;

(viii) Transportation facilities classified as Standard Industrial Classifications 40, 41, 42 (except 4221–25), 43, 44, 45 and 5171 which have vehicle maintenance shops, equipment cleaning operations, or airport deicing operations. Only those portions of the facility that are either involved in vehicle maintenance (including vehicle rehabilitation, mechanical repairs, painting, fueling, and lubrication), equipment cleaning operations, airport deicing operations, or which are otherwise identified under paragraphs (i)–(vii) or (ix)–(xi) of this subsection are associated with industrial activity;

(ix) Treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage treatment, recycling, and reclamation of municipal or domestic sewage, including land dedicated to the disposal of sewage sludge that are located within the confines of the facility, with a design flow of 1.0 mgd or more, or required to have an approved pretreatment program under 40 CFR 403. Not included are farm lands, domestic gardens or lands used for sludge management where sludge is beneficially reused and which are not physically located in the confines of the facility, or areas that are in compliance with 40 CFR 503;

(x) Construction activity including clearing, grading and excavation activities except: operations that result in the disturbance of less than five acres of total land area which are not part of a larger common plan of development or sale;

(xi) Facilities under Standard Industrial Classifications 20, 21, 22, 23, 2434, 25, 265, 267, 27, 283, 285, 30, 31 (except 311), 323, 34 (except 3441), 35, 36, 37 (except 373), 38, 39, 4221–25, (and which are not otherwise included within categories (i)–(x)).[5]

Waters of the United States means:

(a) All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;

(b) All interstate waters, including interstate "wetlands";

(c) All other waters such as interstate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce including any such waters:

(1) Which are or could be used by interstate or foreign travelers for recreational or other purposes;

(2) From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or

(3) Which are used or could be used for industrial purposes by industries in interstate commerce;

(d) All impoundments of waters otherwise defined as waters of the United States under this definition;

(e) Tributaries of waters identified in paragraphs (a) through (d) of this definition;

(f) The territorial sea; and

(g) Wetlands adjacent to waters (other than waters that are themselves wetlands) identified in paragraphs (a) through (f) of this definition.

Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of CWA are not waters of the United States.

Part X. State Specific Conditions

The provisions of this Part provide modifications or additions to the applicable conditions of Parts I through IX of this permit to reflect specific additional conditions identified as part of the State section 401 certification process. The additional revisions and requirements listed below are set forth in connection with particular State, Indian lands and Federal facilities and only apply to the States and Federal facilities specifically referenced.

A. *Massachusetts.* Massachusetts 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read as follows:

[5] On June 4, 1992, the United States Court of Appeals for the Ninth Circuit remanded the exclusion for manufacturing facilities in category (xi) which do not have materials or activities exposed to storm water to the EPA for further rulemaking. (Nos. 90-70671 and 91-70200).

Part I. Coverage Under This Permit

A. *Permit Area.* This permit covers all areas of the Commonwealth of Massachusetts.

B. *Eligibility.*

* * * * *

3. *Limitations on Coverage.*

* * * * *

h. new or increased storm water discharges to coastal water segments within Massachusetts designated as "Areas of Critical Environmental Concern (ACEC)" (for information on ACEC, please contact the Executive Office of Environmental Affairs, Coastal Zone Management at (617) 727–9530);

i. new or increased discharges, as defined at 314 CMR 4.02(19), which meet the definition of "storm water discharge," as defined at 314 CMR 3.04(2)(a)(1) or (2)(b), to Outstanding Resource Waters which have not met the provisions of 314 CMR 4.04(3) and Part III C.1 of this permit.

* * * * *

2. Part II of the permit is revised to read as follows:

Part II. Notice of Intent Requirements

* * * * *

C. *Where to Submit.*

1. Facilities which discharge storm water associated with industrial activity must use a NOI form provided by the Director (or photocopy thereof). The form in the **Federal Register** notice in which this permit was published may be photocopied and used. Forms are also available by calling the Storm Water Hotline at (703) 821–4823, or the NPDES Programs Operations Section at US EPA Region 1 at (617) 565–3525. NOIs must be signed in accordance with Part VII.G (signatory requirements) of this permit. NOIs are to be submitted to the Director of the NPDES program in care of the following address: Storm Water Notice of Intent, US EPA Region 1, MA, PO Box 1215, Newington, VA 22122.

2. A copy of the NOI for all discharges to Outstanding Resource Waters shall be submitted to the Commonwealth of Massachusetts at the following address: Massachusetts Department of Environmental Protection, Storm Water Notice of Intent, BRP—WP 43, PO Box 4062, Boston, Massachusetts 02211.

For details on filing for permits with MA DEP see 310 CMR 4.00, *Timely Action Schedule and Fee Provisions.* For other information call the MA DEP Information Services Section at (617) 338–2255 or the Technical Services Section of the DEP Division of Water Pollution Control at (508) 792–7470.

* * * * *

3. Part III of the permit is revised to read as follows:

Part III. Special Conditions

* * * * *

C. *Set Backs and Best Management Practices*

1. Storm water discharge outfall pipes to public water supplies and other Outstanding Resource Waters shall be removed and set back when dischargers are seeking to increase the discharge or change the site storm water drainage system; all new discharge outfalls must be set back from the receiving water. Receiving swales for outfall pipes shall be prepared to minimize erosion and maximize infiltration prior to discharge. The goal is to infiltrate as much as feasible; infiltration trenches and basins, filter media dikes and/or other BMPs shall be used to meet the goal. Discharges shall employ Best Management Practices (BMPs) for controlling storm water. See *Protecting Water Quality in Urban Areas* by the Minnesota Pollution Control Agency, Division of Water Quality as a reference for BMPs.

2. Storm water discharges to waters that are not classified as Outstanding Resource Waters shall be subject to the requirements of this permit. New discharge outfall pipes shall be designed to be set back from the receiving water when site conditions allow. For existing discharge outfall pipes, when the storm water drainage system is undergoing changes, outfall pipes shall be set back from the receiving water. A receiving swale, infiltration trench or basin, filter media dikes or other BMPs should be prepared with the goal to minimize erosion yet maximize infiltration or otherwise improve water quality prior to discharge.

3. All discharges to Outstanding Resource Waters authorized under this permit must be provided the best practical method of treatment to protect and maintain the designated use of the outstanding resource.

B. *Delaware.* Delaware 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read:

Part I. Coverage Under This Permit

A. *Permit Area.* This permit covers all Federal facilities administered by Region 3 in the State of Delaware.

2. Part II of the permit is revised to read as follows:

Part II. Notice of Intent Requirements

* * * * *

C. *Where to Submit.*

1. Facilities which discharge storm water associated with industrial activity must use a NOI form provided by the Director (or photocopy thereof). The form in the **Federal Register** notice in which this permit was published may be photocopied and used. Forms are also available by calling (703) 821–4823. NOIs must be signed in accordance with Part VII.G (signatory requirements) of this permit. NOIs are to be submitted to the Director of the NPDES program in care of the following address: Storm Water Notice of Intent, PO Box 1215, Newington, VA 22122.

2. A copy of all Notices of Intent (NOIs) shall be submitted to the State of Delaware at the following address: Water Pollution Control Branch, NPDES Storm Water Program, Delaware Department of Natural Resources and Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, DE 19903.

3. The following section is added to Part III of the permit:

Part III. Special Conditions, Management Practices and Other Non-Numeric Limitations

* * * * *

C. *Special Conditions.* The permittee must comply with the requirements of 7 Delaware Code Chapter 40 and the Delaware Sediment and Storm Water Regulations (January, 1991).

4. Part IV of the permit is revised to read as follows:

Part IV. Storm Water Pollution Prevention Plan

* * * * *

B. *Signature and Plan Review*

* * * * *

1. The plan shall be signed in accordance with Part VII.G (signatory requirements), and be retained on-site at the facility which generates the storm water discharge in accordance with Part VI.E (retention of records) of this permit. A copy of the plan, as well as subsequent revisions, shall also be submitted to the State of Delaware at the following address: Water Pollution Control Branch, NPDES Storm Water Program, Delaware Department of Natural Resources and Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, DE 19903.

C. *District of Columbia.* District of Columbia 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read as follows:

Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all areas administered by Region 3 in the District of Columbia.

B. *Eligibility.*

* * * * *

3. Limitations on Coverage. The following storm water discharges from construction sites are not authorized by this permit:

* * * * *

f. unpermitted discharges that are subject to the NPDES program, excluding discharges associated with construction activity.

D. *Florida.* Florida 401 certification-special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read as follows:

Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all areas administered by Region 4 in the State of Florida.

2. Part II of the permit is modified to read as follows:

Part II. Notice of Intent Requirements

A. *Deadlines for Notification.*

* * * * *

2. Individuals who intend to obtain coverage under this general permit for storm water discharges from a construction site where disturbances associated with the construction project commence after October 1, 1992, shall submit a Notice of Intent (NOI) in accordance with the requirements of this Part at least 2 days prior to the commencement of construction activities (e.g. the initial disturbance of soils associated with clearing, grading, excavation activities, or other construction activities). Prior to submitting this NOI, the owner of a storm water management system must receive a State of Florida storm water permit from either the Florida Department of Environmental Regulation (FDER) or a Florida Water Management District (FWMD).

* * * * *

B. *Contents of Notice of Intent.*

* * * * *

6. An estimate of project start date and completion dates, estimates of the number of acres of the site on which soil will be disturbed, and a certification that a storm water pollution prevention plan has been prepared for the site in accordance with Part IV of this permit. (A copy of the plans or permits should not be included with the NOI submission). The applicant shall submit a narrative statement certifying that the storm water pollution prevention plan for the facility provides compliance with approved State of Florida issued permits, erosion and sediment control plans and storm water management plans. The applicant shall also submit a copy of the cover page of the State permit issued by FDER or a FWMD to the facility for the storm water associated with construction activities.

* * * * *

D. *Additional Notification.* Facilities which are operating under approved State or local sediment and erosion plans, grading plans, or storm water management plans shall submit signed copies of the Notice of Intent to the State or local agency approving such plans in accordance with the deadlines in Part II.A of this permit (or sooner where required by State or local rules), in addition to submitting the Notice of Intent to EPA in accordance with paragraph II.C. Facilities which discharge storm water associated with construction activities to a municipal separate storm water system within Broward, Dade, Duval, Escambia, Hillsborough, Orange, Palm Beach, Pinellas, Polk or Sarasota Counties shall submit a copy of the NOI to the operator of the municipal separate storm sewer system. Included within these counties, the Florida Department of Transportation (FDOT), incorporated municipalities and Chapter 298 Special Districts shall also be notified where they own or operate a municipal separate storm sewer system receiving storm water discharges associated with construction activity covered by this permit.

* * * * *

3. Part III of the permit is revised to read as follows:

Part III. Special Conditions, Management Practices and Other Non-Numeric Limitations

A. *Prohibition on Non-Storm Water Discharges*

* * * * *

2.

* * * * * * *

b. The following non-storm water discharges may be authorized by this permit provided the non-storm water component of the discharge is in compliance with paragraph IV.D.5 and the storm water management system is designed to accept these discharges and provide treatment of the non-storm water component sufficient to meet Florida water quality standards: discharges from fire fighting activities; fire hydrant flushings; waters used to wash vehicles or control dust in accordance with Part IV.D.2.c.(2); potable water sources including waterline flushing; irrigation drainage; routine external building washdown which does not use detergents; pavement washwaters where spills or leaks of toxic or hazardous materials have not occurred (unless all spilled material has been removed) and where detergents are not used; air conditioning condensate; springs; uncontaminated ground water; and foundation or footing drains where flows are not contaminated with process materials such as solvents. Discharges resulting from ground water dewatering activities at construction sites are not covered by this permit. The applicant may seek coverage for these discharges under NPDES General Permit No. FLG830000, published on July 17, 1989 (54 FR 29986) and modified on August 29, 1991 (56 FR 42736).

* * * * *

4. Part IV of the permit is revised to read as follows:

Part IV. Storm Water Pollution Prevention Plans

* * * * *

B. Signature and Plan Review

* * * * *

2. The permittee shall submit plans to the State agency which issued the storm water permit and shall make plans available upon request to the Director; a state or local agency approving sediment and erosion plans, grading plans, or storm water management plans; or in the case of a storm water discharge associated with industrial activity which discharges through a municipal separate storm sewer system with an NPDES permit, to the municipal operator of the system.

* * * * *

C. Keeping Plans Current

The permittee shall amend the plan whenever there is change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to the waters of the United States, including the addition of or change in location of storm water discharge points, and which has not otherwise been addressed in the plan or if the storm water pollution prevention plan proves to be ineffective in eliminating or significantly minimizing pollutants from sources identified under Part IV.D.2 of this permit, or in otherwise achieving the general objectives of controlling pollutants in storm water discharges associated with industrial activity. In addition, the plan shall be amended to identify any new contractor and/or subcontractor that will implement a measure of the storm water pollution prevention plan (see Part IV.E). Amendments to the plan may be reviewed by EPA in the same manner as Part IV.B above. Amendments to the

plan must be submitted to the State agency which issued the State storm water permit.

D. Contents of Plan

1. Site Description

* * * * *

d. An estimate of the runoff coefficient of the site before, during and after construction using "C" from the Rational Method, existing data describing the soil or the quality of any discharge from the site and an estimate of the size of the drainage area for each outfall;

* * * * *

2. Controls

Each plan shall include a description of appropriate controls and measures that will be implemented at the construction site. The plan will clearly describe for each major activity identified in Part IV.D.1.b appropriate control measures and the timing during the construction process that the measures will be implemented. (For example, perimeter controls for one portion of the site will be installed after the clearing and grubbing necessary for installation of the measure, but before the clearing and grubbing for the remaining portions of the site. Perimeter controls will be actively maintained until final stabilization of those portions of the site upward of the perimeter control. Temporary perimeter controls will be removed after final stabilization). All controls shall be consistent with the requirements set forth in the State Water Policy of Florida (Chapter 17–40, Florida Administrative Code), the applicable storm water permitting requirements of the FDER or appropriate FWMD, and the guidelines contained in the Florida Development Manual: A Guide to Sound Land and Water Management (FDER, 1988) and any subsequent amendments. The description and implementation of controls shall address the following minimum components:

a. Erosion and sediment controls

(1) *stabilization practices.* A description of interim and permanent stabilization practices, including site-specific scheduling of the implementation of the practices. Site plans should ensure that existing vegetation is preserved where attainable and that disturbed portions of the site are stabilized. Stabilization practices may include: temporary seeding, permanent seeding, mulching, geotextiles, sod stabilization, vegetative buffer strips, protection of trees, preservation of mature vegetation, and other appropriate measures. A record of the dates when major grading activities occur, when construction activities temporarily or permanently cease on a portion of the site, and when stabilization measures are initiated shall be included in the plan. Stabilization measures shall be initiated as soon as practicable in portions of the site where construction activities have temporarily or permanently ceased.

(a) paragraph deleted
(b) paragraph deleted
(c) paragraph deleted

(2) *Structural Practices.* A description of structural practices to divert flows from exposed soils, store flows or otherwise limit runoff and the discharge of pollutants from exposed areas of the site in accordance with the requirements set forth in Section 17–40, 420, F.A.C., and the applicable storm water regulations of the FDER or appropriate FWMD. Such practices may include silt fences, earth dikes, drainage swales, sediment traps, check dams, subsurface drains, pipe slope drains, level spreaders, storm drain inlet protection, rock outlet protection, reinforced soil retaining systems, gabions, and temporary or permanent sediment basins. Structural practices shall be placed on upland soils unless a State of Florida wetland resource management permit issued pursuant to Chapters 373 or 403, F.S., and the applicable regulations of the FDER or FWMD authorize otherwise. The installation of these devices may be subject to Section 404 of the CWA.

* * * * *

b. *Storm water management.* A description of measures that will be installed during the construction process to control pollutants in storm water discharges that will occur after construction operations have been completed. The description of controls shall be consistent with the requirements set forth in the State Water Policy of Florida (Chapter 17–40, F.A.C.), the applicable storm water permitting regulations of the FDER or appropriate FWMD, and the guidelines contained in the Florida Development Manual: A Guide to Sound Land and Water Management (FDER, 1988), and any subsequent amendments. Structural measures shall be placed on upland soils unless a State of Florida wetland resource management permit issued pursuant to Chapters 373 or 403, F.S., and the applicable regulations of the FDER or FWMD authorize otherwise. The installation of these devices may be subject to Section 404 of the CWA. This NPDES permit only addresses the installation of storm water management measures, and not the ultimate operation and maintenance of such structures after the construction activities have been completed and the site has undergone final stabilization. Permittees are only responsible for the installation and maintenance of storm water management measures prior to final stabilization of the site, and are not responsible for maintenance after storm water discharges associated with industrial activity have been eliminated from the site. However, all storm water management systems shall be operated and maintained in perpetuity after final site stabilization in accordance with the requirements set forth in the State of Florida storm water permit issued for the site.

(1) Such practices may include: storm water detention structures (including wet ponds); storm water retention structures; flow attenuation by use of open vegetated swales and natural depressions; infiltration of runoff onsite; and sequential systems (which combine several practices). Pursuant to the requirements of section 17–40, 420, F.A.C., the storm water management system shall be designed to remove at least 80 percent of the average annual load of pollutants which cause or contribute to violations of water quality standards (95 percent if the system discharges to an Outstanding Florida Water). The pollution prevention plan shall include an explanation of the technical basis used to select the practices to control pollution where flows exceed predevelopment levels.

(2) Velocity dissipation devices shall be placed at discharge locations and along the length of any outfall channel for the purpose of providing a non-erosive velocity flow from the structure to a water course so that the natural physical and biological characteristics and functions are maintained and protected. Equalization of the predevelopment and post-development storm water peak discharge rate and volume shall be a goal in the design of the post-development storm water management system.

c. Other controls

(1) *waste disposal.* No solid materials, including building materials, shall be discharged to waters of the United States, except as authorized by a section 404 permit and by a State of Florida wetland resource management permit issued pursuant to chapters 373 or 403, F.S., and the applicable regulations of the FDER or FWMD.

* * * * *

(4) The plan shall address the proper application rates and methods for the use of fertilizers and pesticides at the

construction site and set forth how these procedures will be implemented and enforced.

* * * * *

4. *Inspections.* Qualified personnel (provided by the discharger) shall inspect all points of discharge into waters of the United States or to a municipal separate storm sewer system and all disturbed areas of the construction site that have not been finally stabilized, areas used for storage of materials that are exposed to precipitation, structural control measures, storm water management systems, and locations where vehicles enter or exit the site at least once every seven calendar days and within 24 hours of the end of a storm that is 0.25 inches or greater. Where sites have been finally stabilized, or during seasonal arid periods in arid areas (areas with an average annual rainfall of 0 to 10 inches) and semi-arid areas (areas with an average annual rainfall of 10 to 20 inches) such inspection shall be conducted at least once every month.

a. Disturbed areas and areas used for storage of materials that are exposed to precipitation shall be inspected for evidence of, or the potential for, pollutants entering the storm water management system. The storm water management system and erosion and sediment control measures identified in the plan shall be observed to ensure that they are operating correctly. Where discharge locations or points are accessible, they shall be inspected to ascertain whether erosion control and storm water management measures are effective in meeting the performance standards set forth in State Water Policy (chapter 17–40, F.A.C.) and the applicable storm water permitting regulations of the FDER or appropriate FWMD. Locations where vehicles enter or exit the site shall be inspected for evidence of offsite sediment tracking.

* * * * *

5. Part VI of the permit is revised to read as follows:

Part VI. Standard Permit Conditions

* * * * *

O. Inspection and Entry

* * * * *

4. Sample or monitor at reasonable times, for the purposes of assuring permit compliance or as otherwise authorized by the CWA, any substances or parameter at any location on the site.

* * * * *

6. Part VIII of the permit is revised to read as follows:

Part VIII. Termination of Coverage

* * * * *

C. *Additional Notification.* A copy of the Notice of Termination shall be sent to the State agency which issued the State storm water permit for the site and, if the storm water management system discharges to a municipal separate storm sewer system within Broward, Dade, Duval, Escambia, Hillsborough, Orange, Palm Beach, Pinellas, Polk or Sarasota Counties, to the owner of that system. Included within these counties, the Florida Department of Transportation (FDOT), incorporated municipalities, and chapter 298 Special Districts also shall be notified where they own or operate a municipal separate storm sewer system receiving storm water discharges associated with construction activity covered by this permit.

E. *American Samoa.* American Somoa 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read:

Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all areas administered by EPA Region IX in American Samoa.

2. Part II of the permit is revised to read as follows:

Part II. Notice of Intent Requirements

* * * * *

C. Where to Submit

* * * * *

1. A copy of the NOI shall be submitted to American Samoa Environmental Protection Agency at the same time as submittal to the U.S. EPA.

3. The following paragraph is added to Part IV of the permit:

Part IV. Storm Water Pollution Prevention Plan

* * * * *

B. Signature and Plan Review

* * * * *

4. All pollution prevention plans for storm water discharges in American Samoa shall be submitted to the American Samoa Environmental Protection Agency for review and approval.

F. *Guam.* Guam 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read:

Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all areas administered by EPA Region IX in Guam.

2. Part II of the permit is revised to read as follows:

Part II. Notice of Intent Requirements

* * * * *

C. Where to Submit

1. Facilities which discharge storm water associated with industrial activity must use a NOI form provided by the Director (or photocopy thereof). The form in the **Federal Register** notice in which this permit was published may be photocopied and used. Forms are also available by calling (703) 821–4823. NOIs must be signed in accordance with part VII.G (signatory requirements) of this permit. NOIs are to be submitted to the Director of the NPDES program in care of the following address: Storm Water Notice of Intent, PO Box 1215, Newington, VA 22122.

2. A copy of the NOI also shall be submitted to appropriate Government of Guam agencies and the Guam Environmental Protection Agency at the following address: D–107 Harmon Plaza, 130 Rojas St., Harmon, Guam 96911.

* * * * *

3. Part IV of the permit is revised to read as follows:

Part IV. Storm Water Pollution Prevention Plan

* * * * *

B. Signature and Plan Review

1. The plan shall be signed in accordance with Part VII.G (signatory requirements), and be retained on-site at the facility which generates the storm water discharge in accordance with Part VI.E (retention of records) of this permit. A copy of the plan shall also be submitted to the Guam Environmental Protection Agency at the following address: D–107 Harmon Plaza, 130 Rojas St., Harmon, Guam 95911.

* * * * *

4. Part VI of the permit is revised to read:

Part VI. Monitoring and Reporting Requirements

* * * * *

D. Reporting: Where to Submit

1.

* * * * *

d. Signed copies of discharge monitoring reports required under Parts VI.D.1.a, VI.D.1.b, and VI.D.1.c, individual permit applications and all other reports required herein, shall be submitted to the Director of the NPDES program at the address of the appropriate Regional Office: United States EPA, Region IX, Water

Management Division, (W–5–1), Storm Water Staff, 75 Hawthorne Street, San Francisco, CA 94105, and to the Guam Environmental Protection Agency at the following address: D–107 Harmon Plaza, 130 Rojas St., Harmon, Guam 959911.

NPDES FORM

EPA

United States Environmental Protection Agency
Washington, DC 20460

Notice of Intent (NOI) for Storm Water Discharges Associated with Industrial Activity Under the NPDES General Permit

Submission of this Notice of Intent constitutes notice that the party identified in Section I of this form intends to be authorized by a NPDES permit issued for storm water discharges associated with industrial activity in the State identified in Section II of this form. Becoming a permittee obligates such discharger to comply with the terms and conditions of the permit. ALL NECESSARY INFORMATION MUST BE PROVIDED ON THIS FORM.

I. Facility Operator Information

Name: Phone: Status of Owner/Operator:

Address:

City: State: ZIP Code:

II. Facility/Site Location Information

Name: Is the Facility Located on Indian Lands? (Y or N)

Address:

City: State: ZIP Code:

Latitude: Longitude: Quarter: Section: Township: Range:

III. Site Activity Information

MS4 Operator Name:

Receiving Water Body:

If You are Filing as a Co-permittee, Enter Storm Water General Permit Number: Are There Existing Quantitative Data? (Y or N) Is the Facility Required to Submit Monitoring Data? (1, 2, or 3)

SIC or Designated Activity Code: Primary: 2nd: 3rd: 4th:

If This Facility is a Member of a Group Application, Enter Group Application Number:

If You Have Other Existing NPDES Permits, Enter Permit Numbers:

IV. Additional Information Required for Construction Activities Only

Project Start Date: Completion Date: Estimated Area to be Disturbed (in Acres): Is the Storm Water Pollution Prevention Plan in Compliance with State and/or Local Sediment and Erosion Plans? (Y or N)

V. Certification: I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

Print Name: Date:

EPA Form 3510-6 (8-92)

Instructions - EPA Form 3510-6
Notice Of Intent (NOI) For Storm Water Discharges Associated With Industrial Activity
To Be Covered Under The NPDES General Permit

Who Must File A Notice Of Intent (NOI) Form

Federal law at 40 CFR Part 122 prohibits point source discharges of storm water associated with industrial activity to a water body(ies) of the U.S. without a National Pollutant Discharge Elimination System (NPDES) permit. The operator of an industrial activity that has such a storm water discharge must submit a NOI to obtain coverage under the NPDES Storm Water General Permit. If you have questions about whether you need a permit under the NPDES Storm Water program, or if you need information as to whether a particular program is administered by EPA or a state agency, contact the Storm Water Hotline at (703) 821-4823.

Where To File NOI Form

NOIs must be sent to the following address:

Storm Water Notice of Intent
PO Box 1215
Newington, VA 22122

Completing The Form

You must type or print, using upper-case letters, in the appropriate areas only. Please place each character between the marks. Abbreviate if necessary to stay within the number of characters allowed for each item. Use one space for breaks between words, but not for punctuation marks unless they are needed to clarify your response. If you have any questions on this form, call the Storm Water Hotline at (703) 821-4823.

Section I Facility Operator Information

Give the legal name of the person, firm, public organization, or any other entity that operates the facility or site described in this application. The name of the operator may or may not be the same as the name of the facility. The responsible party is the legal entity that controls the facility's operation, rather than the plant or site manager. Do not use a colloquial name. Enter the complete address and telephone number of the operator.

Enter the appropriate letter to indicate the legal status of the operator of the facility.

F = Federal
S = State
M = Public (other than federal or state)
P = Private

Section II Facility/Site Location Information

Enter the facility's or site's official or legal name and complete street address, including city, state, and ZIP code. If the facility or site lacks a street address, indicate the state, the latitude and longitude of the facility to the nearest 15 seconds, or the quarter, section, township, and range (to the nearest quarter section) of the approximate center of the site.

Indicate whether the facility is located on Indian lands.

Section III Site Activity Information

If the storm water discharges to a municipal separate storm sewer system (MS4), enter the name of the operator of the MS4 (e.g., municipality name, county name) and the receiving water of the discharge from the MS4. (A MS4 is defined as a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) that is owned or operated by a state, city, town, borough, county, parish, district, association, or other public body which is designed or used for collecting or conveying storm water.)

If the facility discharges storm water directly to receiving water(s), enter the name of the receiving water.

If you are filing as a co-permittee and a storm water general permit number has been issued, enter that number in the space provided.

Indicate whether or not the owner or operator of the facility has existing quantitative data that represent the characteristics and concentration of pollutants in storm water discharges.

Indicate whether the facility is required to submit monitoring data by entering one of the following:

1 = Not required to submit monitoring data;
2 = Required to submit monitoring data;
3 = Not required to submit monitoring data; submitting certification for monitoring exclusion

Those facilities that must submit monitoring data (e.g., choice 2) are: Section 313 EPCRA facilities; primary metal industries; land disposal units/incinerators/BIFs; wood treatment facilities; facilities with coal pile runoff; and, battery reclaimers.

List, in descending order of significance, up to four 4-digit standard industrial classification (SIC) codes that best describe the principal products or services provided at the facility or site identified in Section II of this application.

For industrial activities defined in 40 CFR 122.26(b)(14)(i)-(xi) that do not have SIC codes that accurately describe the principal products produced or services provided, the following 2-character codes are to be used:

HZ = Hazardous waste treatment, storage, or disposal facilities, including those that are operating under interim status or a permit under subtitle C of RCRA [40 CFR 122.26 (b)(14)(iv)];
LF = Landfills, land application sites, and open dumps that receive or have received any industrial wastes, including those that are subject to regulation under subtitle D of RCRA [40 CFR 122.26 (b)(14)(v)];
SE = Steam electric power generating facilities, including coal handling sites [40 CFR 122.26 (b)(14)(vii)];
TW = Treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage, treatment, recycling, and reclamation of municipal or domestic sewage [40 CFR 122.26 (b)(14)(ix)]; or,
CO = Construction activities [40 CFR 122.26 (b)(14)(x)].

If the facility listed in Section II has participated in Part 1 of an approved storm water group application and a group number has been assigned, enter the group application number in the space provided.

If there are other NPDES permits presently issued for the facility or site listed in Section II, list the permit numbers. If an application for the facility has been submitted but no permit number has been assigned, enter the application number.

Section IV Additional Information Required for Construction Activities Only

Construction activities must complete Section IV in addition to Sections I through III. Only construction activities need to complete Section IV.

Enter the project start date and the estimated completion date for the entire development plan.

Provide an estimate of the total number of acres of the site on which soil will be disturbed (round to the nearest acre).

Indicate whether the storm water pollution prevention plan for the site is in compliance with approved state and/or local sediment and erosion plans, permits, or storm water management plans.

Section V Certification

Federal statutes provide for severe penalties for submitting false information on this application form. Federal regulations require this application to be signed as follows:

For a corporation: by a responsible corporate officer, which means: (i) president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding $25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

For a partnership or sole proprietorship: by a general partner or the proprietor; or

For a municipality, state, Federal, or other public facility: by either a principal executive officer or ranking elected official.

Paperwork Reduction Act Notice

Public reporting burden for this application is estimated to average 0.5 hours per application, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate, any other aspect of the collection of information, or suggestions for improving this form, including any suggestions which may increase or reduce this burden to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, or Director, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

NPDES FORM

EPA

United States Environmental Protection Agency
Washington, DC 20460

Notice of Termination (NOT) of Coverage Under the NPDES General Permit for Storm Water Discharges Associated with Industrial Activity

Submission of this Notice of Termination constitutes notice that the party identified in Section II of this form is no longer authorized to discharge storm water associated with industrial activity under the NPDES program. ALL NECESSARY INFORMATION MUST BE PROVIDED ON THIS FORM.

I. Permit Information

NPDES Storm Water General Permit Number:

Check Here if You are No Longer the Operator of the Facility: ☐

Check Here if the Storm Water Discharge is Being Terminated: ☐

II. Facility Operator Information

Name: Phone:

Address:

City: State: ZIP Code:

III. Facility/Site Location Information

Name:

Address:

City: State: ZIP Code:

Latitude: Longitude: Quarter: Section: Township: Range:

IV. Certification: I certify under penalty of law that all storm water discharges associated with industrial activity from the identified facility that are authorized by a NPDES general permit have been eliminated or that I am no longer the operator of the facility or construction site. I understand that by submitting this Notice of Termination, I am no longer authorized to discharge storm water associated with industrial activity under this general permit, and that discharging pollutants in storm water associated with industrial activity to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by a NPDES permit. I also understand that the submittal of this Notice of Termination does not release an operator from liability for any violations of this permit or the Clean Water Act.

Print Name: Date:

Signature:

Instructions for Completing Notice of Termination (NOT) Form

Who May File a Notice of Termination (NOT) Form

Permittees who are presently covered under the EPA issued National Pollutant Discharge Elimination System (NPDES) General Permit for Storm Water Discharges Associated with Industrial Activity may submit a Notice of Termination (NOT) form when their facilities no longer have any storm water discharges associated with industrial activity as defined in the storm water regulations at 40 CFR 122.26 (b)(14), or when they are no longer the operator of the facilities.

For construction activities, elimination of all storm water discharges associated with industrial activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time, or that all storm water discharges associated with industrial activity from the construction site that are authorized by a NPDES general permit have otherwise been eliminated. Final stabilization means that all soil-disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.

Where to File NOT Form

Send this form to the the following address:

Storm Water Notice of Termination
P.O. Box 1185
Newington, VA 22122

Completing the Form

Type or print, using upper-case letters, in the appropriate areas only. Please place each character between the marks. Abbreviate if necessary to stay within the number of characters allowed for each item. Use only one space for breaks between words, but not for punctuation marks unless they are needed to clarify your response. If you have any questions about this form, call the Storm Water Hotline at (703) 821-4823.

PLEASE SEE REVERSE OF THIS FORM FOR FURTHER INSTRUCTIONS

EPA Form 3510-7 (8-92)

Instructions - EPA Form 3510-7
Notice of Termination (NOT) of Coverage Under The NPDES General Permit for Storm Water Discharges Associated With Industrial Activity

Section I Permit Information

Enter the existing NPDES Storm Water General Permit number assigned to the facility or site identified in Section III. If you do not know the permit number, contact the Storm Water Hotline at (703) 821-4823.

Indicate your reason for submitting this Notice of Termination by checking the appropriate box:

If there has been a change of operator and you are no longer the operator of the facility or site identified in Section III, check the corresponding box.

If all storm water discharges at the facility or site identified in Section III have been terminated, check the corresponding box.

Section II Facility Operator Information

Give the legal name of the person, firm, public organization, or any other entity that operates the facility or site described in this application. The name of the operator may or may not be the same name as the facility. The operator of the facility is the legal entity which controls the facility's operation, rather than the plant or site manager. Do not use a colloquial name. Enter the complete address and telephone number of the operator.

Section III Facility/Site Location Information

Enter the facility's or site's official or legal name and complete address, including city, state and ZIP code. If the facility lacks a street address, indicate the state, the latitude and longitude of the facility to the nearest 15 seconds, or the quarter, section, township, and range (to the nearest quarter section) of the approximate center of the site.

Section IV Certification

Federal statutes provide for severe penalties for submitting false information on this application form. Federal regulations require this application to be signed as follows:

For a corporation: by a responsible corporate officer, which means: (i) president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions, or (ii) the manager of one or more manufacturing , production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding $25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

For a partnership or sole proprietorship: by a general partner or the proprietor; or

For a municipality, State, Federal, or other public facility: by either a principal executive officer or ranking elected official.

Paperwork Reduction Act Notice

Public reporting burden for this application is estimated to average 0.5 hours per application, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.. Send comments regarding the burden estimate, any other aspect of the collection of information, or suggestions for improving this form, including any suggestions which may increase or reduce this burden to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, or Director, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Part IV

Environmental Protection Agency

Final NPDES General Permits for Storm Water Discharges Associated With Industrial Activity; Notice

ENVIRONMENTAL PROTECTION AGENCY

[FRL-4511-1]

Final NPDES General Permits for Storm Water Discharges Associated With Industrial Activity

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Final NPDES General Permits.

SUMMARY: The Regional Administrator of Regions I, II, III, and IX (the "Regions" or the "Directors") are today issuing final National Pollutant Discharge Elimination System (NPDES) general permits for storm water discharges associated with industrial activity (except discharges from construction activity) in Massachusetts, Puerto Rico, District of Columbia, Guam and American Samoa; on Indian lands in New York; and from Federal facilities in Delaware.

These general permits establish Notice of Intent (NOI) requirements, prohibitions, requirements to develop and implement storm water pollution prevention plans, and requirements to conduct site inspections for facilities with discharges authorized by the permit. In addition, these general permits establish monitoring requirements for certain classes of facilities and a numeric effluent limitation for discharges of coal pile runoff subject to the general permits.

DATES: These general permits shall be effective on September 25, 1992. This effective date is necessary to provide appropriate dischargers with the opportunity to comply with the October 1, 1992 deadline for submitting an NPDES application for storm water discharges associated with industrial by submitting a Notice of Intent (NOI) to be covered by the permits.

Deadlines for submittal of Notices of Intent (NOIs) are provided in part II.A of the general permits. Today's general permits also provide additional dates for compliance with the terms of the permit and for submitting monitoring data where required.

ADDRESSES: Notices of Intent to be authorized to discharge under these permits should be sent to: Storm Water Notices of Intent, PO Box 1215, Newington, VA 22122.

Other submittals of information required under these permits or individual permit applications should be sent to the appropriate EPA Regional Office. The addresses of the Regional Offices and the name and phone number of the Storm Water Regional Coordinator is provided in section II of the Fact Sheet.

The index to the administrative records for these permits is available at the appropriate Regional Office. The complete administrative record is located at EPA Headquarters, EPA Public Information Reference Unit, room 2402, 401 M Street SW, Washington, DC 20460. A reasonable fee may be charged for copying. Specific record information will be made available at the appropriate Regional Office as requested.

FOR FURTHER INFORMATION CONTACT: For further information on the final NPDES general permits, contact the NPDES Storm Water Hotline at (703) 821–4823 or the appropriate EPA Regional Office. The name, address and phone number of the Regional Storm Water Coordinators are provided in Section II of the Fact Sheet.

SUPPLEMENTARY INFORMATION:

I. Introduction
II. Regional Contacts
III. Section 401 Certifications
IV. Economic Impact (Executive Order 12291)
V. Paperwork Reduction Act
VI. Regulatory Flexibility Act

I. Introduction

The Regional Administrators of the United States Environmental Protection Agency (EPA) are issuing final general permits for the majority of storm water discharges associated with industrial activity as follows:

Region I—For the State of Massachusetts.

Region II—For the Commonwealth of Puerto Rico and for Indian lands located in New York.

Region III—For the District of Columbia and for Federal Facilities in Delaware.

Region IX—For Guam and American Samoa.

On August 16, 1991, (56 FR 40948) EPA requested public comment on draft general permits forming the basis for today's final general permits. In addition to addressing those storm water discharges from industrial activity addressed in today's permits, the August 16, 1991, draft general permits addressed storm water discharges from construction activities. The permits in this notice only address storm water associated with industrial activity other than construction activities.

EPA received more than 330 comments on the August 16, 1991, draft general permits. In addition, public hearings to discuss the draft general permits were held in Dallas, TX; Oklahoma City, OK; Baton Rouge, LA; Albuquerque, NM; Seattle, WA; Boise, ID; Juneau, AK; Pierre, SD; Phoenix, AZ; Orlando, FL; Tallahassee, FL; Augusta, ME; Boston, MA; and Manchester, NH.

On September 9, 1992, (57 FR 41236), EPA published final National Pollutant Discharge Elimination System (NPDES) general permits for storm water discharges associated with industrial activity from construction sites in 11 States (Alaska, Arizona, Florida, Idaho, Louisiana, Maine, New Hampshire, New Mexico, Oklahoma, South Dakota, and Texas); the Territories of Johnston Atoll, and Midway and Wake Islands; on Indian lands in Alaska, Arizona, California, Colorado, Florida, Idaho, Maine, Massachusetts, Mississippi, Montana, New Hampshire, Nevada, North Carolina, North Dakota, Nevada, Utah, Washington, and Wyoming; from Federal facilities in Colorado, and Washington; and from Federal facilities and Indian lands in Louisiana, New Mexico, Oklahoma, and Texas.

EPA is incorporating portions of the detailed fact sheet for the general permit for storm water discharges associated with industrial activity (other than construction activity) published on September 9, 1992, as part of the final fact sheet and statement of basis for today's final permit. The sections of the fact sheet published on September 9, 1992 [1] being incorporated are section I, Introduction; Section II, Coverage of General Permits; Section III, Summary of Options for Controlling Pollutants; Section IV, Summary of Permit Conditions; and Section V, Cost Estimates; and Appendix A—Summary of Responses to Public Comments on the August 16, 1991, Draft General Permits.

Today's notice addresses final general permits for storm water discharges associated with industrial activity (except discharges from construction activity) in Massachusetts, Puerto Rico, District of Columbia, Guam and American Samoa; on Indian lands in New York; and from Federal facilities in Delaware. These permits may authorize the majority of storm water discharges associated with industrial activity to waters of the United States, including discharges through large and medium municipal separate storm sewer systems and through other municipal separate storm sewer systems. As discussed below, these permits do not authorize

[1] The September 9, 1992, fact sheets incorporate portions of the draft general permits published on August 16, 1991 (56 FR 40948). These portions of the August 16, 1991, fact sheets are also incorporated into today's permits. Sections of the August 16, 1991, fact sheet being incorporated are section 1, Background; section 4, Summary of Options for Controlling Pollutants; and section 5, The Federal/Municipal Partnership: The Role of Municipal Operators of Large and Medium Municipal Separate Storm Sewers.

storm water discharges associated with industrial activity from construction activities and several additional classes of storm water discharges.

Today's notice contains four appendices. Appendix A incorporates Appendix A—Summary of Responses to Public Comments on the August 16, 1991, Draft General Permits, of the September 9, 1992 permits. Appendix B provides the language of the final general permits. Except as provided in Part XI of the permits, Parts I through X apply to all permits. Part XI of the permit contains conditions which only apply to dischargers in the State indicated. Appendix C is a copy of the Notice of Intent (NOI) form (and associated instructions) for dischargers to obtain coverage under the general permits. Appendix D is a copy of the Notice of Termination (NOT) form (and associated instructions) that can be used by dischargers wanting to notify EPA that their storm water discharges associated with industrial activity have been terminated or that the permittee has transferred operation of the facility.

II. Regional Contacts

Notices of Intent to be authorized to discharge under these permits must be sent to: Storm Water Notices of Intent, PO Box 1215, Newington, VA 22122.

Other submittals of information required under these permits or individual permit applications or other written correspondence concerning discharges in any State, Indian land, or from any Federal facility covered, should be sent to the appropriate EPA Regional Office listed below:

Massachusetts

United States EPA, Region I—Water Management Division, (WCP–2109), Storm Water Staff, John F. Kennedy Federal Building, Room 2209, Boston, MA 02203, Contact: Veronica Harrington, (617) 565–3525.

New York (Indian lands), Puerto Rico

United States EPA, Region II—Water Management Division, (2WM–WPC), Storm Water Staff, 26 Federal Plaza, New York, NY 10278, Contact: Jose Rivera, (212) 264–2911.

District of Columbia, Delaware (Federal facilities)

United States EPA, Region III—Water Management Division, (3WM55), 841 Chestnut Building, Philadelphia, PA 19107, Contact: Kevin Magerr, (215) 597–1651.

Guam and American Samoa

United States EPA, Region IX—Water Management Division, (W–5–1), Storm Water Staff, 75 Hawthorne Street, San Francisco, CA 94105, Contact: Eugene Bromley, (415) 744–1906.

III. 401 Certification

Section 401 of the CWA provides that no Federal license or permit, including NPDES permits, to conduct any activity that may result in any discharge into navigable waters shall be granted until the State in which the discharge originates certifies that the discharge will comply with the applicable provisions of sections 301, 302, 303, 306, and 307 of the CWA. The section 401 certification process has been completed for all States, Indian lands and Federal facilities covered by today's general permits. The following summary indicates where additional permit requirements have been added as a result of the certification process and also provides a more detailed discussion of additional requirements for Massachusetts, Florida, and Puerto Rico.

Massachusetts

See the following and part X.A of the general permit for 401 conditions. As a condition for certification under section 401 of the CWA, the Commonwealth of Massachusetts required inclusion of the following conditions necessary to ensure compliance with State water quality concerns.

Storm water discharges not eligible for coverage under this permit include new or increased storm water discharges to coastal water segments within Massachusetts designated as "Areas of Critical Environmental Concern (ACEC)" (for information on ACEC, please contact the Executive Office of Environmental Affairs, Coastal Zone Management at (617) 727–9350). In addition, new or increased discharges, as defined at 314 CMR 4.02(19), which meet the definition of "storm water discharge," as defined at 314 CMR 3.04(2)(a)(1) or (2)(b), to Outstanding Resource Waters which have not met the provisions of 314 CMR 4.04(3) and part III C.1 of this permit (as amended by the special requirements for discharges in Massachusetts), are not eligible for coverage under this permit.

Permittees in Massachusetts are to submit NOIs to the following address: Storm Water Staff, Storm Water Notice of Intent, US EPA Region 1, MA, PO Box 1215, Newington, VA 22122. A copy of the NOI for all discharges to Outstanding Resource Waters shall be submitted to the Commonwealth of Massachusetts at the following address: Massachusetts Department of Environmental Protection, Storm Water Notice of Intent, BRP—WP 43, PO Box 4062, Boston, Massachusetts, 02211.

For details on filing for permits with MA DEP see 310 CMR 4.00, Timely Action Schedule and Fee Provisions. For other information call the MA DEP Information Services at (617) 338–2255 or the Technical Services Section of the DEP Division of Water Pollution Control at (508) 792–7470.

Massachusetts 401 certification requires the following best management practices. Storm water discharge outfall pipes to Outstanding Resource Waters shall be removed and the discharge set back from the receiving water when dischargers are seeking to increase the discharge or change the site drainage system; all new discharge outfalls must be set back from the receiving water. Receiving swales for outfall pipes shall be prepared to minimize erosion and maximize infiltration prior to discharge. The goal is to infiltrate as much as feasible; infiltration trenches and basins, filter media dikes and/or other BMPs shall be used to meet the goal. Protecting Water Quality in Urban Areas by the Minnesota Pollution Control Agency, Division of Water Quality is a reference for BMPs.

Storm water discharges to waters that are not classified as Outstanding Resource Waters shall be subject to the requirements of this permit. New discharge outfall pipes shall be designed to be set back from the receiving water when site conditions allow. For existing discharge outfall pipes, when the storm water drainage system is undergoing changes, outfall pipes shall be set back from the receiving water. A receiving swale, infiltration trench or basin, filter media dike or other BMP should be prepared with the goal to minimize erosion yet maximize infiltration or otherwise improve water quality prior to discharge.

All discharges to Outstanding Resource Waters authorized under this permit must be provided the best practical method of treatment to protect and maintain the designated use of the outstanding resource.

Delaware

See the following discussion and part X.C of the general permit for additional 401 conditions. As a condition for certification under section 401 of the CWA, the State of Delaware required inclusion of the following conditions necessary to insure compliance with State water quality concerns.

In addition to submitting all NOIs to the central NOI receiving office in Newington, VA, permittees in Delaware also must submit a copy of all NOIs to the State of Delaware at the following address: Water Pollution Control Branch, NPDES Storm Water Program, Delaware Department of Natural Resources and Environmental Control,

89 Kings Highway, P.O. Box 140, Dover, DE 19903. All Discharge Monitoring Reports (DMRs), pollution prevention plans, as well as subsequent revisions, must be submitted to the State of Delaware at this same address. DMRs also must be submitted to the NPDES Programs Director, U.S. EPA Region III, Water Management Division (3WM55), Storm Water Staff, 841 Chestnut Building, Philadelphia, PA 19107.

Commonwealth of Puerto Rico

See the following discussion and part X.B of the general permit for additional 401 conditions.

The Environmental Quality Board (EQB) of Puerto Rico issued on September 14, 1992 the General Water Quality Certificate (GWQC) in accordance with section 401 of the Clean Water Act for storm water discharges associated with industrial activity. This action was taken in response to the Region II Environmental Protection Agency's certification request of November 1, 1991.

The EQB's draft GWQC incorporated special conditions that must be met by all storm water discharges associated with industrial activity. A public notice was prepared including a notification to interested parties about the intention to issue a GWQC. The public notice provided a thirty (30) day public comment period. In addition, a public hearing was held on July 21, 1992.

The special conditions included in the GWQC are intended to assure that the general permit applicant will comply with the applicable requirements of the Commonwealth of Puerto Rico Law and sections 301(b)(1)(c) and 401(d) of the Clean Water Act. The GWQC contains, among others, the following special conditions:

- Quarterly Monitoring shall be performed. Parameters to be sampled are the following: a) For the industries identified in the final general permit applicable to Puerto Rico, the parameters established for each specific industry; and b) For all other industries, the parameters are: oil and grease, pH, biochemical oxygen demand, chemical oxygen demand, total suspended solids, total phosphorus, total Kjeldahl nitrogen, nitrate plus nitrite as nitrogen, and any pollutant limited in an effluent guideline to which the process wastewater stream at the facility is subject.
- Monitoring results must be submitted quarterly.
- If the construction of any treatment system for waters composed entirely of storm water is necessary, the permittee shall obtain the approval of the engineering report, plans and specifications from the EQB.
- The permittee shall operate all air pollution control equipment in compliance with the applicable provisions of the Regulation for the Control of Atmospheric Pollution, as amended, to avoid water pollution as a result of air pollution fallout.
- The permittee should install a rain gauge and keep daily records of the rain.
- Within 180 days of submitting the Notice of Intent (NOI), existing dischargers shall submit a Certification stating that the Storm Water Pollution Prevention Plan was developed.
- One year after submitting the NOI, existing dischargers shall submit a certification pertaining to the implementation of the Storm Water Pollution Prevention Plan.
- Within thirty (30) days of submission of the NOI, new dischargers shall submit a certification stating that the Storm Water Pollution Prevention Plan has been developed and implemented.
- The Storm Water Pollution Prevention Plan should be reviewed at least once every three (3) years to determine the need to update the Plan.
- Within forty-five (45) days after the effective date of the permit, the permittee shall submit to EQB with a copy to the EPA, the number of storm water discharges covered by this permit and a drawing indicating the drainage area of each storm water discharge and its respective sampling point.
- The discharges shall not cause the presence of an oil sheen in the receiving body of water.
- The storm water discharges associated with industrial activity will not cause a violation of the applicable water quality standards.

EPA has incorporated the terms of the EQB GWQC into the final general permit for Puerto Rico (PR) as described in Part XI of the general permit. A number of the EQB Conditions have simply been added to EPA's general permit (e.g., the condition that the discharge not cause presence of an oil sheen; the requirement for rain gauge; the requirement for EQB approval of plans and specifications, etc.)

A number of changes and additions are specified for part IV, Storm Water pollution Prevention Plans, in order to incorporate the EQB requirements regarding certification of the development and implementation of the Plans, and to ensure that the specific time periods specified by EQB were included.

In certain instances, conditions in EPA's general permit were expanded slightly in order to incorporate more detailed and specific EQB requirements (e.g. Part VII.O., Proper Operation and Maintenance, expansion of EPA's condition to include adequate funding, effective management, qualified operator staffing, etc.)

Review and appeals of special conditions attributable to the GWQC shall be made through the applicable procedures of the Commonwealth of Puerto Rico and may not be through EPA procedures. Copies of the GWQC may be obtained by writing to the EQB, P.O. Box 11488, Santurce, Puerto Rico, 00910, or by calling at (809) 767–8181.

Delaware (Federal facilities)

See the following and part XI.C of the general permit for 401 conditions. As a condition for certification under section 401 of the CWA, the State of Delaware required inclusion of the following conditions necessary to ensure compliance with State water quality concerns.

In addition to submitting all NOIs to the central NOI receiving office in Newington, VA, permittees in Delaware also must submit a copy of all NOIs to the State of Delaware at the following address: Water Pollution Control Branch, NPDES Storm Water Program, Delaware Department of Natural Resources and Environmental Control, 89 Kings Highway, P.O. Box 140, Dover, DE 19903. All Discharge Monitoring Reports (DMRs), pollution prevention plans, as well as subsequent revisions, also must be submitted to the State of Delaware at this same address.

In addition to the site inspection requirements discussed at part IV(D)(3)(d) of this permit, Delaware federal facilities shall conduct monthly inspections in areas where significant materials are stored to determine the exposure of such materials to storm water runoff. Where the permittee determines that exposure of significant materials to storm water has occurred, the storm water pollution prevention plan shall be amended appropriately to eliminate or reduce the exposure. Also, permittees must inspect all structural controls after every rainfall event to confirm that these controls are operating properly. If any structural control is not operating properly, the permittee must correct this situation or develop a time frame for its correction. Records of all inspections, amendments to the storm water pollution prevention plan and corrective actions must be maintained.

In addition to meeting the annual monitoring requirements for airports presented in EPA's baseline general permit, the special conditions for federal facilities in Delaware require that all

Federal airport facilities in the State of Delaware, not just airports with over 50,000 flight operations per year, sample for Total Petroleum Hydrocarbons (mg/L).

Applicants are required to obtain a certification of consistency with the Delaware Coastal Management Program (CZMA 1972, 16 U.S.C. 1451).

District of Columbia

See the following and part XI.D of the general permit for 401 conditions. As a condition for certification under section 401 of the CWA, the District of Columbia required inclusion of the following conditions necessary to ensure compliance with water quality concerns.

All Federal facility permittees covered under this permit must meet all applicable District of Columbia laws. The Director may notify any permittee that additional control measures are required in order to achieve the 40 percent reduction in nitrogen and phosphorus entering the main stem of the Chesapeake Bay by the year 2000, as mandated by the 1987 Chesapeake Bay Agreement.

Any discharge composed of coal pile runoff shall not exceed a maximum concentration for any time of 50 mg/l total suspended solids. Coal pile runoff shall not be diluted with storm water from other portions of the site or other flows in order to meet this limitation. The pH of such discharges shall be within the range of 6.0–8.5. Any untreated overflow from facilities designed, constructed and operated to treat the volume of coal pile runoff which is associated with a 10 year, 24 hour rainfall event shall not be subject to the 50 mg/l limitation for total suspended solids. Failure to demonstrate compliance with these limitations as expeditiously as practicable, but in no case later than October 1, 1995, will constitute a violation of this permit.

In addition to submitting the following to United States EPA Region III Office (as provided in parts I through X), signed copies of discharge monitoring reports required under Parts VI.D.1.a, VI.D.1.b, and VI.D.1.c, individual permit applications and all other reports required herein, shall be submitted to the District of Columbia at the following address: Government of the District of Columbia, Department of Consumer and Regulatory Affairs, Environmental Regulation Administration, 2100 Martin Luther King, Jr. Avenue SE., Washington, DC 20020.

American Samoa

See the following and part XI.E of the general permit for 401 conditions. As a condition for certification under section 401 of the CWA, the territory of American Samoa required inclusion of the following special conditions.

Permittees must submit a copy of all NOIs and pollution prevention plans to the American Samoa Environmental Protection Agency.

Guam

See the following and part XI.F of the general permit for 401 conditions. As a condition for certification under section 401 of the CWA, the territory of Guam required inclusion of the following special conditions.

Permittees must submit a copy of all NOIs to the Guam Environmental Protection Agency at the following address: D–107 Harmon Plaza, 130 Rojas St., Harmon, Guam 95911, and to other appropriate Government of Guam agencies. All pollution prevention plans and discharge monitoring reports (DMRs) also must be submitted to Guam EPA.

IV. Economic Impact (Executive Order 12291)

EPA has submitted this notice to the Office of Management and Budget for review under Executive Order 12291.

V. Paperwork Reduction Act

EPA has reviewed the requirements imposed on regulated facilities in these final general permits under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et. seq. EPA did not prepare an Information Collection Request (ICR) document for today's permits because the information collection requirements in these permits have already been approved by the Office of Management and Budget (OMB) in submissions made for the NPDES permit program under the provisions of the Clean Water Act.

VI. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, U.S.C. 601 et. seq., EPA is required to prepare a Regulatory Flexibility Analysis to assess the impact of rules on small entities. No Regulatory Flexibility Analysis is required, however, where the head of the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities.

Today's permits provide small entities with an application option that is less burdensome than individual applications or participating in a group application. The other requirements have been designed to minimize significant economic impacts of the rule on small entities and does not have a significant impact on industry. In addition, the permits reduce significant administrative burdens on regulated sources. Accordingly, I hereby certify pursuant to the provisions of the Regulatory Flexibility Act, that these permits will not have a significant impact on a substantial number of small entities.

Appendix A—Summary of Responses to Public Comments on the August 16, 1991, Draft General Permits

The summary of responses to Public Comment on the August 16, 1991, draft general permits presented in appendix A of the September 9, 1992 final general permits at 57 FR 41257, is hereby incorporated in appendix A of today's notice.

Appendix B—NPDES General Permits for Storm Water Discharges Associated with Industrial Activity

[Permit No. MAR000000]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended (33 U.S.C. 1251 et. seq; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges associated with industrial activity, located in the State of Massachusetts, are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges associated with industrial activity within the general permit area who intend to be authorized by these permits must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 17th day of September 1992.

Larry Brill,

Acting Director, Water Management Division.

This signature is for the permit conditions in parts I through X and for any additional conditions in part XI which apply to facilities located in the State of Massachusetts.

[NPDES Permit No. NYR00000F]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended (33 U.S.C. 1251 et seq.; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges "associated with industrial activity", located on Indian Lands in New York State are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges within the general permit area who intend to be authorized by these permits must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 3rd day of September 1992.

Richard L. Caspe, P.E.,

Director, Water Management Division, U.S. Environmental Protection Agency, Region II.

[NPDES Permit No. PRR000000]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended (33 U.S.C. 1251 et seq.; the Act), except as provided in part I.B.3 of this permit, operators of storm water discharges "associated with industrial activity", located in the Commonwealth of Puerto Rico are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges within the general permit area who intend to be authorized by these permits must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 16th day of September 1992.

Richard L. Caspe, P.E.,

Director, Water Management Division, U.S. Environmental Protection Agency, Region II.

This signature is for the permit conditions in Parts I through X and for any additional conditions in Part XI which apply to facilities located in the Commonwealth of Puerto Rico.

[Permit No. DC R000000]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended, (33 U.S.C. . . . 1251 et. seq.; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges associated with industrial activity, located in the District of Columbia, are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges associated with industrial activity within the general permit area who intend to be authorized by these permits must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 16th day of September, 1992.

A. R. Morris,

Water Management Director or Regional Administrator.

[Permit No. DE R000000F (for permits that are only for Indian lands and/or Fed. fac)]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended, (33 U.S.C. . . . 1251 et. seq.; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges associated with industrial activity, located in Federal Facilities in the state of Delaware, are authorized to discharge in accordance with the conditions and requirements set fourth herein.

Operators of storm water discharges associated with industrial activity within the general permit area who intend to be authorized by these permits must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 16th day of September, 1992

A.R. Morris,

Water Management Director or Regional Administrator.

Storm Water General Permit for Industrial Activity (Excluding Construction Activities)

[Permit No. GUR000000]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended, (33 U.S.C. . . . 1251 et. seq.; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges associated with industrial activity (excluding construction activity), located on the Island of Guam are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges associated with industrial activity within the general permit area who intend to be authorized by this permit must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 25, 1997.

Signed and issued this 16th day of September, 1992.

Catherine Kuhlman,

Acting Director, Water Management Division.

This signature is for the permit conditions in Parts I through X and for any additional conditions in Part XI which apply to facilities located on the Island of Guam.

Storm Water General Permit for Industrial Activity (Excluding Construction Activities)

[Permit No. ASR000000]

Authorization to Discharge Under the National Pollutant Discharge Elimination System

In compliance with the provisions of the Clean Water Act, as amended, (U.S.C. * * * 1251 et seq.; the Act), except as provided in Part I.B.3 of this permit, operators of storm water discharges associated with industrial activity (excluding construction activity), located on American Samoa are authorized to discharge in accordance with the conditions and requirements set forth herein.

Operators of storm water discharges associated with industrial activity within the general permit area who intend to be authorized by this permit must submit a Notice of Intent in accordance with Part II of this permit. Operators of storm water discharges associated with industrial activity who fail to submit a Notice of Intent in accordance with Part II of this permit are not authorized under this general permit.

This permit shall become effective on September 25, 1992.

This permit and the authorization to discharge shall expire at midnight, September 27, 1992.

Signed and issued this 16th day of September, 1992.

Catherine Kuhlman,

Acting Director, Water Management Division.

This signature is for the permit conditions in Parts I through IX and for any additional conditions in Part XI which apply to facilities located on American Samoa.

NPDES General Permit for Storm Water Discharges Associated With Industrial Activity

Table of Contents

Preface

Part I. Coverage Under This Permit

A. Permit Area.
B. Eligibility.
C. Authorization.

Part II. Notice of Intent Requirements

A. Deadlines for Notification.
B. Contents of Notice of Intent.
C. Where to Submit.
D. Additional Notification.
E. Renotification.

Part III. Special Conditions

A. Prohibition on non-storm water discharges.
B. Releases in excess of Reportable Quantities.

Part IV. Storm Water Pollution Prevention Plans

A. Deadlines for Plan Preparation and Compliance.
B. Signature and Plan Review.
C. Keeping Plans Current.
D. Contents of Plans.

Part V. Numeric Effluent Limitations

A. Coal Pile Runoff.

Part VI. Monitoring and Reporting Requirements

A. Failure to Certify.
B. Monitoring Requirements.
C. Toxicity testing.
D. Reporting: Where to Submit.
E. Retention of Records.

Part VII. Standard Permit Conditions

A. Duty to Comply.
B. Continuation of the Expired General Permit.
C. Need to halt or reduce activity not a defense.
D. Duty to Mitigate.
E. Duty to Provide Information.
F. Other Information.
G. Signatory Requirements.
H. Penalties for Falsification of Reports.
I. Penalties for Falsification of Monitoring Systems.
J. Oil and Hazardous Substance Liability.
K. Property Rights.
L. Severability.
M. Requiring an individual permit or an alternative general permit.
N. State/Environmental Laws.
O. Proper Operation and Maintenance.
P. Monitoring and records.
Q. Inspection and Entry.
R. Permit Actions.
S. Bypass of Treatment Facility.
T. Upset Conditions.

Part VIII. Reopener Clause

Part IX. Notice of Termination

A. Notice of Termination.
B. Addresses.

Part X. Definitions

Part XI. State Specific Conditions

A. Massachusetts
B. Puerto Rico
C. Delaware (Federal facilities)
D. District of Columbia
E. American Samoa
F. Guam

Addendum A—Pollutants Listed in Tables II and III of Appendix D of 40 CFR 122

Addendum B—Section 313 Water Priority Chemicals

Addendum C—Large and Medium Municipal Separate Storm Sewer Systems

Preface

The CWA provides that storm water discharges associated with industrial activity from a point source (including discharges through a municipal separate storm sewer system) to waters of the United States are unlawful, unless authorized by a National Pollutant Discharge Elimination System (NPDES) permit. The terms "storm water discharge associated with industrial activity", "point source" and "waters of the United States" are critical to determining whether a facility is subject to this requirement. Complete definitions of these terms are found in the definition section (Part X) of this permit. In order to determine the applicability of the requirement to a particular facility, the facility operator must examine its activities in relationship to the eleven categories of industrial facilities described in the definition of "storm water discharge associated with industrial activity".

Category (xi) of the definition, which addresses facilities with activities classified under Standard Industrial Classifications (SIC) codes 20, 21, 22, 23, 2434, 25, 265, 267, 27, 283, 31 (except 311), 34 (except 3441), 35, 36, 37 (except 373), 38, 39, 4221–25, (and which are not otherwise included within categories (i)–(x)), differs from other categories listed in that it only addresses storm water discharges where material handling equipment or activities, raw materials, intermediate products, final products, waste materials, by-products, or industrial machinery *are exposed to storm water.*[2]

The United States Environmental Protection Agency (EPA) has established the Storm Water Hotline at (703) 821–4823 to assist the Regional Offices in distributing notice of intent forms and storm water pollution prevention plan guidance, and to provide information pertaining to the NPDES storm water regulations.

Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all areas of:

[2] On June 4, 1992, the United States Court of Appeals for the Ninth Circuit remanded the exclusion of manufacturing facilities in category (xi) which do not have materials or activities exposed to storm water to the EPA for further rulemaking. (*Natural Resources Defense Council* v. *EPA*, Nos. 90–70671 and 91–70200).

Region I—the State of Massachusetts.
Region II—Puerto Rico and Indian lands in New York.
Region III—the District of Columbia and Federal facilities in the State of Delaware.
Region IX—American Samoa and Guam.

B. *Eligibility.*

1. This permit may cover all new and existing point source discharges of storm water associated with industrial activity to waters of the United States, except for storm water discharges identified under paragraph I.B.3.

2. This permit may authorize storm water discharges associated with industrial activity that are mixed with storm water discharges associated with industrial activity from construction activities provided that the storm water discharge from the construction activity is in compliance with the terms, including applicable notice of intent (NOI) or application requirements, of a different NPDES general permit or individual permit authorizing such discharges.

3. *Limitations on Coverage.* The following storm water discharges associated with industrial activity are not authorized by this permit:

a. Storm water discharges associated with industrial activity that are mixed with sources of non-storm water other than non-storm water discharges that are:

(i) In compliance with a different NPDES permit; or

(ii) Identified by and in compliance with Part III.A.2 (authorized non-storm water discharges) of this permit.

b. Storm water discharges associated with industrial activity which are subject to an existing effluent limitation guideline addressing storm water (or a combination of storm water and process water) [3];

c. Storm water discharges associated with industrial activity that are subject to an existing NPDES individual or general permit; are located at a facility where an NPDES permit has been terminated or denied; or which are issued in a permit in accordance with paragraph VII.M (requirements for individual or alternative general permits) of this permit. Such discharges may be authorized under this permit after an existing permit expires provided the existing permit did not establish numeric limitations for such discharges;

d. Storm water discharges associated with industrial activity from construction sites, except storm water discharges from portions of a construction site that can be classified as an industrial activity under 40 CFR 122.26(b)(14) (i) through (ix) or (xi) (including storm water discharges from mobile asphalt plant, and mobile concrete plants);

e. Storm water discharges associated with industrial activity that the Director (EPA) has determined to be or may reasonably be expected to be contributing to a violation of a water quality standard;

f. Storm water discharges associated with industrial activity that may adversely affect a listed or proposed to be listed endangered or threatened species or its critical habitat; and

g. Storm water discharges associated with industrial activity from inactive mining, inactive landfills, or inactive oil and gas operations occurring on Federal lands where an operator cannot be identified.

4. Storm water discharges associated with industrial activity which are authorized by this permit may be combined with other sources of storm water which are not classified as associated with industrial activity pursuant to 40 CFR 122.26(b)(14), so long as the discharger is in compliance with this permit.

C. *Authorization.*

1. Dischargers of storm water associated with industrial activity must submit a Notice of Intent (NOI) in accordance with the requirements of Part II of this permit, using a NOI form provided by the Director (or photocopy thereof), to be authorized to discharge under this general permit.[4]

2. Unless notified by the Director to the contrary, owners or operators who submit such notification are authorized to discharge storm water associated with industrial activity under the terms and conditions of this permit 2 days after the date that the NOI is postmarked.

3. The Director may deny coverage under this permit and require submittal of an application for an individual NPDES permit based on a review of the NOI or other information.

Part II. Notice of Intent Requirements

A. *Deadlines for Notification.*

1. Except as provided in paragraphs II.A.4 (rejected or denied municipal group applicants), II.A.5 (new operator) and II.A.6 (late NOIs), individuals who intend to obtain coverage for an existing storm water discharge associated with industrial activity under this general permit shall submit a Notice of Intent (NOI) in accordance with the requirements of this part on or before October 1, 1992;

2. Except as provided in paragraphs II.A.3 (oil and gas operations), II.A.4 (rejected or denied municipal group applicants), II.A.5 (new operator), and II.A.6 (late NOI) operators of facilities which begin industrial activity after October 1, 1992 shall submit a NOI in accordance with the requirements of this part at least 2 days prior to the commencement of the industrial activity at the facility;

3. Operators of oil and gas exploration, production, processing, or treatment operations or transmission facilities, that are not required to submit a permit application as of October 1, 1992 in accordance with 40 CFR 122.26(c)(1)(iii), but that after October 1, 1992 have a discharge of a reportable quantity of oil or a hazardous substance for which notification is required pursuant to either 40 CFR 110.6, 40 CFR 117.21 or 40 CFR 302.6, must submit a NOI in accordance with the requirements of Part II.C of this permit within 14 calendar days of the first knowledge of such release.

4. Storm water discharges associated with industrial activity from a facility that is owned or operated by a municipality that has participated in a timely Part 1 group application and where either the group application is rejected or the facility is denied participation in the group application by EPA, and that are seeking coverage under this general permit shall submit a NOI in accordance with the requirements of this part on or before the 180th day following the date on which the group is rejected or the denial is made, or October 1, 1992, whichever is later.

5. Where the operator of a facility with a storm water discharge associated with industrial activity which is covered by this permit changes, the new operator of the facility must submit an NOI in accordance with the requirements of this part at least 2 days prior to the change.

6. An operator of a storm water discharge associated with industrial activity is not precluded from submitting

[3] For the purpose of this permit, the following effluent limitation guidelines address storm water (or a combination of storm water and process water): cement manufacturing (40 CFR 411); feedlots (40 CFR 412); fertilizer manufacturing (40 CFR 418); petroleum refining (40 CFR 419); phosphate manufacturing (40 CFR 422); steam electric (40 CFR 423); coal mining (40 CFR 434); mineral mining and processing (40 CFR 436); ore mining and dressing (40 CFR 440); and asphalt emulsion (40 CFR 443 Subpart A). This permit may authorize storm water discharges associated with industrial activity which are not subject to an effluent limitation guideline even where a different storm water discharge at the facility is subject to an effluent limitation guideline.

[4] A copy of the approved NOI form is provided in Appendix C of this notice.

an NOI in accordance with the requirements of this part after the dates provided in Parts II.A.1, 2, 3, or 4 (above) of this permit. In such instances, EPA may bring appropriate enforcement actions.

B. *Contents of Notice of Intent.* The Notice of Intent shall be signed in accordance with Part VII.G (signatory requirements) of this permit and shall include the following information:

1. The street address of the facility for which the notification is submitted. Where a street address for the site is not available, the location of the approximate center of the facility must be described in terms of the latitude and longitude to the nearest 15 seconds, or the section, township and range to the nearest quarter section;

2. Up to four 4-digit Standard Industrial Classification (SIC) codes that best represent the principal products or for hazardous waste treatment, storage or disposal facilities, land disposal facilities that receive or have received any industrial waste, steam electric power generating facilities, or treatment works treating domestic sewage, a narrative identification of those activities;

3. The operator's name, address, telephone number, and status as Federal, State, private, public or other entity;

4. The permit number(s) of additional NPDES permit(s) for any discharge(s) (including non-storm water discharges) from the site that are currently authorized by an NPDES permit;

5. The name of the receiving water(s), or if the discharge is through a municipal separate storm sewer, the name of the municipal operator of the storm sewer and the ultimate receiving water(s) for the discharge through the municipal separate storm sewer;

6. An indication of whether the owner or operator has existing quantitative data describing the concentration of pollutants in storm water discharges (existing data should not be included as part of the NOI);

7. Where a facility has participated in Part 1 of an approved storm water group application, the number EPA assigned to the group application shall be supplied; and

8. For any facility that begins to discharge storm water associated with industrial activity after October 1, 1992, a certification that a storm water pollution prevention plan has been prepared for the facility in accordance with Part IV of this permit. (A copy of the plan should not be included with the NOI submission).

C. *Where to Submit.* Facilities which discharge storm water associated with industrial activity must use a NOI form provided by the Director (or photocopy thereof). The form in the **Federal Register** notice in which this permit was published may be photocopied and used. Forms are also available by calling (703) 821–4823. NOIs must be signed in accordance with Part VII.G (signatory requirements) of this permit. NOIs are to be submitted to the Director of the NPDES program in care of the following address: Storm Water Notice of Intent, PO Box 1215, Newington, VA 22122.

D. *Additional Notification.* Facilities which discharge storm water associated with industrial activity through large or medium municipal separate storm sewer systems (systems located in an incorporated city with a population of 100,000 or more, or in a county identified as having a large or medium system (see definition in Part X of this permit and Appendix E of this notice)) shall, in addition to filing copies of the Notice of Intent in accordance with paragraph II.D, also submit signed copies of the Notice of Intent to the operator of the municipal separate storm sewer through which they discharge in accordance with the deadlines in Part II.A (deadlines for notification) of this permit.

E. *Renotification.* Upon issuance of a new general permit, the permittee is required to notify the Director of their intent to be covered by the new general permit.

Part III. Special Conditions

A. *Prohibition on non-storm water discharges.*

1. Except as provided in paragraph III.A.2 (below), all discharges covered by this permit shall be composed entirely of storm water.

2. a. Except as provided in paragraph III.A.2.b (below), discharges of material other than storm water must be in compliance with a NPDES permit (other than this permit) issued for the discharge.

b. The following non-storm water discharges may be authorized by this permit provided the non-storm water component of the discharge is in compliance with paragraph IV.D.3.g.(2) (measures and controls for non-storm water discharges): discharges from fire fighting activities; fire hydrant flushings; potable water sources including waterline flushings; irrigation drainage; lawn watering; routine external building washdown which does not use detergents or other compounds; pavement washwaters where spills or leaks of toxic or hazardous materials have not occurred (unless all spilled material has been removed) and where detergents are not used; air conditioning condensate; springs; uncontaminated ground water; and foundation or footing drains where flows are not contaminated with process materials such as solvents.

B. *Releases in excess of Reportable Quantities.*

1. The discharge of hazardous substances or oil in the storm water discharge(s) from a facility shall be prevented or minimized in accordance with the applicable storm water pollution prevention plan for the facility. This permit does not relieve the permittee of the reporting requirements of 40 CFR part 117 and 40 CFR part 302. Except as provided in paragraph III.B.2 (multiple anticipated discharges) of this permit, where a release containing a hazardous substance in an amount equal to or in excess of a reporting quantity established under either 40 CFR 117 or 40 CFR 302, occurs during a 24 hour period:

a. The discharger is required to notify the National Response Center (NRC) (800–424–8802; in the Washington, DC metropolitan area 202–426–2675) in accordance with the requirements of 40 CFR 117 and 40 CFR 302 as soon as he or she has knowledge of the discharge;

b. The storm water pollution prevention plan required under part IV (storm water pollution prevention plans) of this permit must be modified within 14 calendar days of knowledge of the release to: provide a description of the release, the circumstances leading to the release, and the date of the release. In addition, the plan must be reviewed by the permittee to identify measures to prevent the reoccurrence of such releases and to respond to such releases, and the plan must be modified where appropriate; and

c. The permittee shall submit within 14 calendar days of knowledge of the release a written description of: the release (including the type and estimate of the amount of material released), the date that such release occurred, the circumstances leading to the release, and steps to be taken in accordance with paragraph III.B.1.b (above) of this permit to the appropriate EPA Regional Office at the address provided in part VI.D.1.d (reporting: where to submit) of this permit.

2. *Multiple Anticipated Discharges*—Facilities which have more than one anticipated discharge per year containing the same hazardous substance in an amount equal to or in excess of a reportable quantity established under either 40 CFR 117 or 40 CFR 302, which occurs during a 24 hour period, where the discharge is caused by events occurring within the

scope of the relevant operating system shall:

a. Submit notifications in accordance with part III.B.1.b (above) of this permit for the first such release that occurs during a calendar year (or for the first year of this permit, after submittal of an NOI); and

b. Shall provide in the storm water pollution prevention plan required under part IV (storm water pollution prevention plan) a written description of the dates on which all such releases occurred, the type and estimate of the amount of material released, and the circumstances leading to the release. In addition, the plan must be reviewed to identify measures to prevent or minimize such releases and the plan must be modified where appropriate.

3. *Spills.* This permit does not authorize the discharge of hazardous substances or oil resulting from an on-site spill.

Part IV. Storm Water Pollution Prevention Plans

A storm water pollution prevention plan shall be developed for each facility covered by this permit. Storm water pollution prevention plans shall be prepared in accordance with good engineering practices and in accordance with the factors outlined in 40 CFR 125.3(d) (2) or (3) as appropriate. The plan shall identify potential sources of pollution which may reasonably be expected to affect the quality of storm water discharges associated with industrial activity from the facility. In addition, the plan shall describe and ensure the implementation of practices which are to be used to reduce the pollutants in storm water discharges associated with industrial activity at the facility and to assure compliance with the terms and conditions of this permit. Facilities must implement the provisions of the storm water pollution prevention plan required under this part as a condition of this permit.

A. *Deadlines for Plan Preparation and Compliance.*

1. Except as provided in paragraphs IV.A.3 (oil and gas operations), 4 (facilities denied or rejected from participation in a group application), 5 (special requirements), and 6 (later dates) the plan for a storm water discharge associated with industrial activity that is existing on or before October 1, 1992:

a. Shall be prepared on or before April 1, 1993 (and updated as appropriate);

b. Shall provide for implementation and compliance with the terms of the plan on or before October 1, 1993;

2. a. The plan for any facility where industrial activity commences after October 1, 1992, but on or before December 31, 1992 shall be prepared, and except as provided elsewhere in this permit, shall provide for compliance with the terms of the plan and this permit on or before the date 60 calendar days after the commencement of industrial activity (and updated as appropriate);

b. The plan for any facility where industrial activity commences on or after January 1, 1993 shall be prepared, and except as provided elsewhere in this permit, shall provide for compliance with the terms of the plan and this permit, on or before the date of submission of a NOI to be covered under this permit (and updated as appropriate);

3. The plan for storm water discharges associated with industrial activity from an oil and gas exploration, production, processing, or treatment operation or transmission facility that is not required to submit a permit application on or before October 1, 1992 in accordance with 40 CFR 122.26(c)(1)(iii), but after October 1, 1992 has a discharge of a reportable quantity of oil or a hazardous substance for which notification is required pursuant to either 40 CFR 110.6, 40 CFR 117.21 or 40 CFR 302.6, shall be prepared and except as provided elsewhere in this permit, shall provide for compliance with the terms of the plan and this permit on or before the date 60 calendar days after the first knowledge of such release (and updated as appropriate);

4. The plan for storm water discharges associated with industrial activity from a facility that is owned or operated by a municipality that has participated in a timely group application where either the group application is rejected or the facility is denied participation in the group application by EPA,

a. Shall be prepared on or before the 365th day following the date on which the group is rejected or the denial is made, (and updated as appropriate);

b. Except as provided elsewhere in this permit, shall provide for compliance with the terms of the plan and this permit on or before the 545th day following the date on which the group is rejected or the denial is made; and

5. Portions of the plan addressing additional requirements for storm water discharges from facilities subject to Parts IV.D.7 (EPCRA Section 313 and IV.D.8 (salt storage) shall provide for compliance with the terms of the requirements identified in Parts IV.D.7 and IV.D.8 as expeditiously as practicable, but except as provided below, not later than either October 1, 1995. Facilities which are not required to report under EPCRA Section 313 prior to July 1, 1992, shall provide for compliance with the terms of the requirements identified in Parts IV.D.7 and IV.D.8 as expeditiously as practicable, but not later than three years after the date on which the facility is first required to report under EPCRA Section 313. However, plans for facilities subject to the additional requirements of Part IV.D.7 and IV.D.8, shall provide for compliance with the other terms and conditions of this permit in accordance with the appropriate dates provided in Part IV.1, 2, 3, or 5 of this permit.

6. Upon a showing of good cause, the Director may establish a later date in writing for preparing and compliance with a plan for a storm water discharge associated with industrial activity that submits a NOI in accordance with Part II.A.2 (deadlines for notification—new dischargers) of this permit (and updated as appropriate).

B. *Signature and Plan Review*

1. The plan shall be signed in accordance with Part VII.G (signatory requirements), and be retained on-site at the facility which generates the storm water discharge in accordance with Part VI.E (retention of records) of this permit.

2. The permittee shall make plans available upon request to the Director, or authorized representative, or in the case of a storm water discharge associated with industrial activity which discharges through a municipal separate storm sewer system, to the operator of the municipal system.

3. The Director, or authorized representative, may notify the permittee at any time that the plan does not meet one or more of the minimum requirements of this part. Such notification shall identify those provisions of the permit which are not being met by the plan, and identify which provisions of the plan requires modifications in order to meet the minimum requirements of this part. Within 30 days of such notification from the Director, (or as otherwise provided by the Director), or authorized representative, other permittee shall make the required changes to the plan and shall submit to the Director a written certification that the requested changes have been made.

C. *Keeping Plans Current.* The permittee shall amend the plan whenever there is a change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to the waters of the United States or if the storm water pollution prevention plan proves to be ineffective in eliminating or significantly minimizing pollutants from sources identified under

Part IV.D.2 (description of potential pollutant sources) of this permit, or in otherwise achieving the general objectives of controlling pollutants in storm water discharges associated with industrial activity. Amendments to the plan may be reviewed by EPA in the same manner as Part IV.B (above).

D. *Contents of Plan.* The plan shall include, at a minimum, the following items:

1. *Pollution Prevention Team*—Each plan shall identify a specific individual or individuals within the facility organization as members of a storm water Pollution Prevention Team that are responsible for developing the storm water pollution prevention plan and assisting the facility or plant manager in its implementation, maintenance, and revision. The plan shall clearly identify the responsibilities of each team member. The activities and responsibilities of the team shall address all aspects of the facility's storm water pollution prevention plan.

2. *Description of Potential Pollutant Sources.* Each plan shall provide a description of potential sources which may reasonably be expected to add significant amounts of pollutants to storm water discharges or which may result in the discharge of pollutants during dry weather from separate storm sewers draining the facility. Each plan shall identify all activities and significant materials which may potentially be significant pollutant sources. Each plan shall include, at a minimum:

a. *Drainage.*

(1) A site map indicating an outline of the portions of the drainage area of each storm water outfall that are within the facility boundaries, each existing structural control measure to reduce pollutants in storm water runoff, surface water bodies, locations where significant materials are exposed to precipitation, locations where major spills or leaks identified under Part IV.D.2.c (spills and leaks) of this permit have occurred, and the locations of the following activities where such activities are exposed to precipitation: fueling stations, vehicle and equipment maintenance and/or cleaning areas, loading/unloading areas, locations used for the treatment, storage or disposal of wastes, liquid storage tanks, processing areas and storage areas.

(2) For each area of the facility that generates storm water discharges associated with industrial activity with a reasonable potential for containing significant amounts of pollutants, a prediction of the direction of flow, and an identification of the types of pollutants which are likely to be present in storm water discharges associated with industrial activity. Factors to consider include the toxicity of chemical; quantity of chemicals used, produced or discharged; the likelihood of contact with storm water; and history of significant leaks or spills of toxic or hazardous pollutants. Flows with a significant potential for causing erosion shall be identified.

b. *Inventory of Exposed Materials.* An inventory of the types of materials handled at the site that potentially may be exposed to precipitation. Such inventory shall include a narrative description of significant materials that have been handled, treated, stored or disposed in a manner to allow exposure to storm water between the time of three years prior to the date of the issuance of this permit and the present; method and location of on-site storage or disposal; materials management practices employed to minimize contact of materials with storm water runoff between the time of three years prior to the date of the issuance of this permit and the present; the location and a description of existing structural and non-structural control measures to reduce pollutants in storm water runoff; and a description of any treatment the storm water receives.

c. *Spills and Leaks.* A list of significant spills and significant leaks of toxic or hazardous pollutants that occurred at areas that are exposed to precipitation or that otherwise drain to a storm water conveyance at the facility after the date of three years prior to the effective date of this permit. Such list shall be updated as appropriate during the term of the permit.

d. *Sampling Data.* A summary of existing discharge sampling data describing pollutants in storm water discharges from the facility, including a summary of sampling data collected during the term of this permit.

e. *Risk Identification and Summary of Potential Pollutant Sources.* A narrative description of the potential pollutant sources from the following activities: loading and unloading operations; outdoor storage activities; outdoor manufacturing or processing activities; significant dust or particulate generating processes; and on-site waste disposal practices. The description shall specifically list any significant potential source of pollutants at the site and for each potential source, any pollutant or pollutant parameter (e.g. biochemical oxygen demand, etc.) of concern shall be identified.

3. *Measures and Controls.* Each facility covered by this permit shall develop a description of storm water management controls appropriate for the facility, and implement such controls. The appropriateness and priorities of controls in a plan shall reflect identified potential sources of pollutants at the facility. The description of storm water management controls shall address the following minimum components, including a schedule for implementing such controls:

a. *Good Housekeeping*—Good housekeeping requires the maintenance of areas which may contribute pollutants to storm waters discharges in a clean, orderly manner.

b. *Preventive Maintenance*—A preventive maintenance program shall involve timely inspection and maintenance of storm water management devices (e.g. cleaning oil/water separators, catch basins) as well as inspecting and testing facility equipment and systems to uncover conditions that could cause breakdowns or failures resulting in discharges of pollutants to surface waters, and ensuring appropriate maintenance of such equipment and systems.

c. *Spill Prevention and Response Procedures*—Areas where potential spills which can contribute pollutants to storm water discharges can occur, and their accompanying drainage points shall be identified clearly in the storm water pollution prevention plan. Where appropriate, specifying material handling procedures, storage requirements, and use of equipment such as diversion valves in the plan should be considered. Procedures for cleaning up spills shall be identified in the plan and made available to the appropriate personnel. The necessary equipment to implement a clean up should be available to personnel.

d. *Inspections*—In addition to or as part of the comprehensive site evaluation required under Part IV.4 of this permit, qualified facility personnel shall be identified to inspect designated equipment and areas of the facility at appropriate intervals specified in the plan. A set of tracking or followup procedures shall be used to ensure that appropriate actions are taken in response to the inspections. Records of inspections shall be maintained.

e. *Employee Training*—Employee training programs shall inform personnel responsible for implementing activities identified in the storm water pollution prevention plan or otherwise responsible for storm water management at all levels of responsibility of the components and goals of the storm water pollution prevention plan. Training should address topics such as spill response, good housekeeping and material

management practices. A pollution prevention plan shall identify periodic dates for such training.

f. *Recordkeeping and Internal Reporting Procedures*—A description of incidents (such as spills, or other discharges), along with other information describing the quality and quantity of storm water discharges shall be included in the plan required under this part. Inspections and maintenance activities shall be documented and records of such activities shall be incorporated into the plan.

g. *Non-Storm Water Discharges*—

(1) The plan shall include a certification that the discharge has been tested or evaluated for the presence of non-storm water discharges. The certification shall include the identification of potential significant sources of non-storm water at the site, a description of the results of any test and/or evaluation for the presence of non-storm water discharges, the evaluation criteria or testing method used, the date of any testing and/or evaluation, and the on-site drainage points that were directly observed during the test. Certifications shall be signed in accordance with Part VII.G of this permit. Such certification may not be feasible if the facility operating the storm water discharge associated with industrial activity does not have access to an outfall, manhole, or other point of access to the ultimate conduit which receives the discharge. In such cases, the source identification section of the storm water pollution plan shall indicate why the certification required by this part was not feasible, along with the identification of potential significant sources of non-storm water at the site. A discharger that is unable to provide the certification required by this paragraph must notify the Director in accordance with Part VI.A (failure to certify) of this permit.

(2) Except for flows from fire fighting activities, sources of non-storm water listed in Part III.A.2 (authorized non-storm water discharges) of this permit that are combined with storm water discharges associated with industrial activity must be identified in the plan. The plan shall identify and ensure the implementation of appropriate pollution prevention measures for the non-storm water component(s) of the discharge.

h. *Sediment and Erosion Control*—The plan shall identify areas which, due to topography, activities, or other factors, have a high potential for significant soil erosion, and identify structural, vegetative, and/or stabilization measures to be used to limit erosion.

i. *Management of Runoff*—The plan shall contain a narrative consideration of the appropriateness of traditional storm water management practices (practices other than those which control the generation or source(s) of pollutants) used to divert, infiltrate, reuse, or otherwise manage storm water runoff in a manner that reduces pollutants in storm water discharges from the site. The plan shall provide that measures that the permittee determines to be reasonable and appropriate shall be implemented and maintained. The potential of various sources at the facility to contribute pollutants to storm water discharges associated with industrial activity (see Parts IV.D.2. (description of potential pollutant sources) of this permit) shall be considered when determining reasonable and appropriate measures. Appropriate measures may include: vegetative swales and practices, reuse of collected storm water (such as for a process or as an irrigation source), inlet controls (such as oil/water separators), snow management activities, infiltration devices, and wet detention/retention devices.

4. *Comprehensive Site Compliance Evaluation.* Qualified personnel shall conduct site compliance evaluations at appropriate intervals specified in the plan, but, except as provided in paragraph IV.D.4.d (below), in no case less than once a year. Such evaluations shall provide:

a. Areas contributing to a storm water discharge associated with industrial activity shall be visually inspected for evidence of, or the potential for, pollutants entering the drainage system. Measures to reduce pollutant loadings shall be evaluated to determine whether they are adequate and properly implemented in accordance with the terms of the permit or whether additional control measures are needed. Structural storm water management measures, sediment and erosion control measures, and other structural pollution prevention measures identified in the plan shall be observed to ensure that they are operating correctly. A visual inspection of equipment needed to implement the plan, such as spill response equipment, shall be made.

b. Based on the results of the inspection, the description of potential pollutant sources identified in the plan in accordance with Part IV.D.2 (description of potential pollutant sources) of this permit and pollution prevention measures and controls identified in the plan in accordance with paragraph IV.D.3 (measures and controls) of this permit shall be revised as appropriate within two weeks of such inspection and shall provide for implementation of any changes to the plan in a timely manner, but in no case more than twelve weeks after the inspection.

c. A report summarizing the scope of the inspection, personnel making the inspection, the date(s) of the inspection, major observations relating to the implementation of the storm water pollution prevention plan, and actions taken in accordance with paragraph IV.D.4.b (above) of the permit shall be made and retained as part of the storm water pollution prevention plan for at least one year after coverage under this permit terminates. The report shall identify any incidents of non-compliance. Where a report does not identify any incidents of non-compliance, the report shall contain a certification that the facility is in compliance with the storm water pollution prevention plan and this permit. The report shall be signed in accordance with Part VII.G (signatory requirements) of this permit.

d. Where annual site inspections are shown in the plan to be impractical for inactive mining sites due to the remote location and inaccessibility of the site, site inspections required under this part shall be conducted at appropriate intervals specified in the plan, but, in no case less than once in three years.

5. *Additional requirements for storm water discharges associated with industrial activity through municipal separate storm sewer systems serving a population of 100,000 or more.*

a. In addition to the applicable requirements of this permit, facilities covered by this permit must comply with applicable requirements in municipal storm water management programs developed under NPDES permits issued for the discharge of the municipal separate storm sewer system that receives the facility's discharge, provided the discharger has been notified of such conditions.

b. Permitters which discharge storm water associated with industrial activity through a municipal separate storm sewer system serving a population of 100,000 or more shall make plans available to the municipal operator of the system upon request.

6. *Consistency with other plans.* Storm water pollution prevention plans may reflect requirements for Spill Prevention Control and Countermeasure (SPCC) plans developed for the facility under section 311 of the CWA or Best Management Practices (BMP) Programs otherwise required by an NPDES permit for the facility as long as such

requirement is incorporated into the storm water pollution prevention plan.

7. *Additional requirements for storm water discharges associated with industrial activity from facilities subject to EPCRA Section 313 requirements.* In addition to the requirements of Parts IV.D. 1 through 4 of this permit and other applicable conditions of this permit, storm water pollution prevention plans for facilities subject to reporting requirements under EPCRA Section 313 for chemicals which are classified as 'section 313 water priority chemicals' in accordance with the definition in Part X of this permit, shall describe and ensure the implementation of practices which are necessary to provide for conformance with the following guidelines:

a. In areas where Section 313 water priority chemicals are stored, processed or otherwise handled, appropriate containment, drainage control and/or diversionary structures shall be provided. At a minimum, one of the following preventive systems or its equivalent shall be used:

(1) Curbing, culverting, gutters, sewers or other forms of drainage control to prevent or minimize the potential for storm water run-on to come into contact with significant sources of pollutants; or

(2) Roofs, covers or other forms of appropriate protection to prevent storage piles from exposure to storm water, and wind.

b. In addition to the minimum standards listed under Part IV.D.7.a (above) of this permit, the storm water pollution prevention plan shall include a complete discussion of measures taken to conform with the following applicable guidelines, other effective storm water pollution prevention procedures and applicable State rules, regulations and guidelines:

(1) *Liquid storage areas where storm water comes into contact with any equipment, tank, container, or other vessel used for Section 313 water priority chemicals.*

(a) No tank or container shall be used for the storage of a Section 313 water priority chemical unless its material and construction are compatible with the material stored and conditions of storage such as pressure and temperature, etc.

(b) Liquid storage areas for Section 313 water priority chemicals shall be operated to minimize discharges of Section 313 chemicals. Appropriate measures to minimize discharges of Section 313 chemicals may include secondary containment provided for at least the entire contents of the largest single tank plus sufficient freeboard to allow for precipitation, a strong spill contingency and integrity testing plan, and/or other equivalent measures.

(2) *Material storage areas for Section 313 water priority chemicals other than liquids.* Material storage areas for Section 313 water priority chemicals other than liquids which are subject to runoff, leaching, or wind shall incorporate drainage or other control features which will minimize the discharge of Section 313 water priority chemicals by reducing storm water contact with Section 313 water priority chemicals.

(3) *Truck and rail car loading and unloading areas for liquid Section 313 water priority chemicals.* Truck and rail car loading and unloading areas for liquid Section 313 water priority chemicals shall be operated to minimize discharges of Section 313 water priority chemicals. Protection such as overhangs or door skirts to enclose trailer ends at truck loading/unloading docks shall be provided as appropriate. Appropriate measures to minimize discharges of Section 313 chemicals may include: The placement and maintenance of drip pans (including the proper disposal of materials collected in the drip pans) where spillage may occur (such as hose connections, hose reels and filler nozzles) for use when making and breaking hose connections; a strong spill contingency and integrity testing plan; and/or other equivalent measures.

(4) *Areas where Section 313 water priority chemicals are transferred, processed or otherwise handled.* Processing equipment and materials handling equipment shall be operated so as to minimize discharges of Section 313 water priority chemicals. Materials used in piping and equipment shall be compatible with the substances handled. Drainage from process and materials handling areas shall minimize storm water contact with section 313 water priority chemicals. Additional protection such as covers or guards to prevent exposure to wind, spraying or releases from pressure relief vents from causing a discharge of Section 313 water priority chemicals to the drainage system shall be provided as appropriate. Visual inspections or leak tests shall be provided for overhead piping conveying Section 313 water priority chemicals without secondary containment.

(5) *Discharges from areas covered by paragraphs (1), (2), (3) or (4).*

(a) Drainage from areas covered by paragraphs (1), (2), (3) or (4) of this part should be restrained by valves or other positive means to prevent the discharge of a spill or other excessive leakage of Section 313 water priority chemicals. Where containment units are employed, such units may be emptied by pumps or ejectors; however, these shall be manually activated.

(b) Flapper-type drain valves shall not be used to drain containment areas. Valves used for the drainage of containment areas should, as far as is practical, be of manual, open-and-closed design.

(c) If facility drainage is not engineered as above, the final discharge of all in-facility storm sewers shall be equipped to be equivalent with a diversion system that could, in the event of an uncontrolled spill of Section 313 water priority chemicals, return the spilled material to the facility.

(d) Records shall be kept of the frequency and estimated volume (in gallons) of discharges from containment areas.

(6) *Facility site runoff other than from areas covered by (1), (2), (3) or (4).* Other areas of the facility (those not addressed in paragraphs (1), (2), (3) or (4)), from which runoff which may contain Section 313 water priority chemicals or spills of Section 313 water priority chemicals could cause a discharge shall incorporate the necessary drainage or other control features to prevent discharge of spilled or improperly disposed material and ensure the mitigation of pollutants in runoff or leachate.

(7) *Preventive maintenance and housekeeping.* All areas of the facility shall be inspected at specific intervals identified in the plan for leaks or conditions that could lead to discharges of Section 313 water priority chemicals or direct contact of storm water with raw materials, intermediate materials, waste materials or products. In particular, facility piping, pumps, storage tanks and bins, pressure vessels, process and material handling equipment, and material bulk storage areas shall be examined for any conditions or failures which could cause a discharge. Inspection shall include examination for leaks, wind blowing, corrosion, support or foundation failure, or other forms of deterioration or noncontainment. Inspection intervals shall be specified in the plan and shall be based on design and operational experience. Different areas may require different inspection intervals. Where a leak or other condition is discovered which may result in significant releases of Section 313 water priority chemicals to waters of the United States, action to stop the leak or otherwise prevent the significant release of Section 313 water priority chemicals to waters of the United States shall be immediately taken or the unit or process shut down until such action can be taken. When a

leak or noncontainment of a Section 313 water priority chemical has occurred, contaminated soil, debris, or other material must be promptly removed and disposed in accordance with Federal, State, and local requirements and as described in the plan.

(8) *Facility security.* Facilities shall have the necessary security systems to prevent accidental or intentional entry which could cause a discharge. Security systems described in the plan shall address fencing, lighting, vehicular traffic control, and securing of equipment and buildings.

(9) *Training.* Facility employees and contractor personnel that work in areas where Section 313 water priority chemicals are used or stored shall be trained in and informed of preventive measures at the facility. Employee training shall be conducted at intervals specified in the plan, but not less than once per year, in matters of pollution control laws and regulations, and in the storm water pollution prevention plan and the particular features of the facility and its operation which are designed to minimize discharges of Section 313 water priority chemicals. The plan shall designate a person who is accountable for spill prevention at the facility and who will set up the necessary spill emergency procedures and reporting requirements so that spills and emergency releases of Section 313 water priority chemicals can be isolated and contained before a discharge of a Section 313 water priority chemical can occur. Contractor or temporary personnel shall be informed of facility operation and design features in order to prevent discharges or spills from occurring.

(10) *Engineering Certification.*—The storm water pollution prevention plan for a facility subject to EPRCA Section 313 requirements for chemicals which are classified as "Section 313 water priority chemicals" shall be reviewed by a Registered Professional Engineer and certified to by such Professional Engineer. A Registered Professional Engineer shall recertify the plan every three years thereafter or as soon as practicable after significant modification are made to the facility. By means of these certifications the engineer, having examined the facility and being familiar with the provisions of this part, shall attest that the storm water pollution prevention plan has been prepared in accordance with good engineering practices. Such certifications shall in no way relieve the owner or operator of a facility covered by the plan of their duty to prepare and fully implement such plan.

8. *Additional Requirements for Salt Storage.*

Storage piles of salt used for deicing or other commercial or industrial purposes and which generate a storm water discharge associated with industrial activity which is discharged to waters of the United States shall be enclosed or covered to prevent exposure to precipitation, except for exposure resulting from adding or removing materials from the pile. Dischargers shall demonstrate compliance with this provision as expeditiously as practicable, but in no event later than October 1, 1995. Piles do not need to be enclosed or covered where storm water from the pile is not discharged to waters of the United States.

Part V. Numeric Effluent Limitations

A. *Coal Pile Runoff.* Any discharge composed of coal pile runoff shall not exceed a maximum concentration for any time of 50 mg/1 total suspended solids. Coal pile runoff shall not be diluted with storm water or other flows in order to meet this limitation. The pH of such discharges shall be within the range of 6.0–9.0. Any untreated overflow from facilities designed, constructed and operated to treat the volume of coal pile runoff which is associated with a 10 year, 24 hour rainfall event shall not be subject to the 50 mg/1 limitation for total suspended solids. Failure to demonstrate compliance with these limitations as expeditiously as practicable, but in no case later than October 1, 1995, will constitute a violation of this permit.

Part VI. Monitoring and Reporting Requirements

A. *Failure to Certify.*—Any facility that is unable to provide the certification required under paragraph IV.D.3.g.(1) (testing for non-storm water discharges), must notify the Director by October 1, 1993 or, for facilities which begin to discharge storm water associated with industrial activity after October 1, 1992, 180 days after submitting a NOI to be covered by this permit. If the failure to certify is caused by the inability to perform adequate tests or evaluations, such notification shall describe: the procedure of any test conducted for the presence of non-storm water discharges; the results of such test or other relevant observations; potential sources of non-storm water discharges to the storm sewer; and why adequate tests for such storm sewers were not feasible. Non-storm water discharges to waters of the United States which are not authorized by an NPDES permit are unlawful, and must be terminated or dischargers must submit appropriate NPDES permit application forms.

B. *Monitoring Requirements.*

1. *Limitations on Monitoring Requirements.*

a. Except as required by paragraph b., only those facilities with activities specifically identified in Parts VI.B.2 (semi-annual monitoring requirements) and VI.B.3 (annual monitoring requirements) of this permit are required to conduct sampling of their storm water discharges associated with industrial activity.

b. The Director can provide written notice to any facility otherwise exempt from the sampling requirements of Parts VI.B.2 (semi-annual monitoring requirements) or VI.B.3 (annual monitoring requirements), that it shall conduct the annual discharge sampling required by Part VI.B.3.d (additional facilities), or specify an alternative monitoring frequency or specify additional parameters to be analyzed.

2. *Semi-Annual Monitoring Requirements.* During the period beginning on the effective date and lasting through the expiration date of this permit, permittees with facilities identified in Parts VI.B.2.a through f must monitor those storm water discharges identified below at least semi-annually (2 times per year) except as provided in VI.B.5 (sampling waiver), VI.B.6 (representative discharge), and VI.C.1 (toxicity testing). Permittees with facilities identified in Parts VI.B.2.a through f (below) must report in accordance with Part VI.D (reporting: where to submit). In addition to the parameters listed below, the permittee shall provide the date and duration (in hours) of the storm event(s) sampled; rainfall measurements or estimates (in inches) of the storm event which generated the sampled runoff; the duration between the storm event sampled and the end of the previous measurable (greater than 0.1 inch rainfall) storm event; and an estimate of the total volume (in gallons) of the discharge sampled;

a. *Section 313 of EPCRA Facilities.* In addition to any monitoring required by Parts VI.B.2.b through f or Parts VI.B.3.a through d, facilities with storm water discharges associated with industrial activity that are subject to Section 313 of EPCRA for chemicals which are classified as 'Section 313 water priority chemicals' are required to monitor storm water that is discharged from the facility that comes into contact with any equipment, tank, container or other vessel or area used for storage of a Section 313 water priority chemical, or located at a truck or rail car loading or

unloading area where a Section 313 water priority chemical is handled for: Oil and Grease (mg/L); Five Day Biochemical Oxygen Demand (B0D5) (mg/L); Chemical Oxygen Demand (COD) (mg/L); Total Suspended Solids (mg/L); total Kjeldahl Nitrogen (TKN) (mg/L); Total Phosphorus (mg/L); pH; acute whole effluent toxicity; and any Section 313 water priority chemical for which the facility is subject to reporting requirements under section 313 of the Emergency Planning and Community Right to Know Act of 1986.

b. *Primary Metal Industries.* Facilities with storm water discharges associated with industrial activity classified as Standard Industrial Classification (SIC) 33 (Primary Metal Industry) are required to monitor such storm water that is discharged from the facility for: oil and grease (mg/L); chemical oxygen demand (COD) (mg/L); total suspended solids (mg/L); pH; acute whole effluent toxicity; total recoverable lead (mg/L); total recoverable cadmium (mg/L); total recoverable copper (mg/L); total recoverable arsenic (mg/L); total recoverable chromium (mg/L); and any pollutant limited in an effluent guideline to which the facility is subject. Facilities that are classified as SIC 33 only because they manufacture pure silicon and/or semiconductor grade silicon are not required to monitor for total recoverable cadmium, total recoverable copper, total recoverable arsenic, total recoverable chromium or acute whole effluent toxicity, but must monitor for other parameters listed above.

c. *Land Disposal Units/Incinerators/BIFs.* Facilities with storm water discharges associated with industrial activity from any active or inactive landfill, land application sites or open dump without a stabilized final cover that has received any industrial wastes (other than wastes from a construction site); and incinerators (including Boilers and Industrial Furnaces (BIFs)) that burn hazardous waste and operate under interim status or a permit under Subtitle C of RCRA, are required to monitor such storm water that is discharged from the facility for: Magnesium (total recoverable) (mg/L), Magnesium (dissolved) (mg/L), Total Kjeldahl Nitrogen (TKN) (mg/L), Chemical Oxygen Demand (COD) (mg/L), Total Dissolved Solids (TDS) (mg/L), Total Organic Carbon (TOC) (mg/L), oil and grease (mg/L), pH, total recoverable arsenic (mg/L), Total recoverable Barium (mg/L), Total recoverable Cadmium (mg/L), Total recoverable Chromium (mg/L), Total Cyanide (mg/L), Total recoverable Lead (mg/L), Total Mercury (mg/L), Total recoverable Selenium (mg/L), Total recoverable Silver (mg/L), and acute whole effluent toxicity.

d. *Wood Treatment.* Facilities with storm water discharges associated with industrial activity from areas that are used for wood treatment, wood surface application or storage of treated or surface protected wood at any wood preserving or wood surface facilities are required to monitor such storm water that is discharged from the facility for: oil and grease (mg/L), pH, COD (mg/L), and TSS (mg/L). In addition, facilities that use chlorophenolic formulations shall measure pentachlorophenol (mg/L) and acute whole effluent toxicity; facilities which use creosote formulations shall measure acute whole effluent toxicity; and facilities that use chromium-arsenic formulations shall measure total recoverable arsenic (mg/L), total recoverable chromium (mg/L), and total recoverable copper (mg/L).

e. *Coal Pile Runoff.* Facilities with storm water discharges associated with industrial activity from coal pile runoff are required to monitor such storm water that is discharged from the facility for: oil and grease (mg/L), pH, TSS (mg/L), total recoverable copper (mg/l), total recoverable nickel (mg/l) and total recoverable zinc (mg/l).

f. *Battery Reclaimers.* Facilities with storm water discharges associated with industrial activity from areas used for storage of lead acid batteries, reclamation products, or waste products, and areas used for lead acid battery reclamation (including material handling activities) at facilities that reclaim lead acid batteries are required to monitor such storm water that is discharged from the facility for: Oil and Grease (mg/L); Chemical Oxygen Demand (COD) (mg/L); Total Suspended Solids (TSS) (mg/L); pH; total recoverable copper (mg/l); and total recoverable lead (mg/l).

3. *Annual Monitoring Requirements.* During the period beginning on the effective date and lasting through the expiration date of this permit, permittees with facilities identified in Parts VI.B.3. a through d. (below) must monitor those storm water discharges identified below at least annually (1 time per year) except as provided in VI.B.5 (sampling waiver), and VI.B.6 (representative discharge). Permittees with facilities identified in Parts VI.B.3. a through d. (below) are not required to submit monitoring results, unless required in writing by the Director. However, such permittees must retain monitoring results in accordance with Part VI.E (retention of records). In addition to the parameters listed below, the permittee shall provide the date and duration (in hours) of the storm event(s) sampled; rainfall measurements or estimates (in inches) of the storm event which generated the sampled runoff; the duration between the storm event sampled and the end of the previous measurable (greater than 0.1 inch rainfall) storm event; and an estimate of the total volume (in gallons) of the discharge sampled;

a. *Airports.* At airports with over 50,000 flight operations per year, facilities with storm water discharges associated with industrial activity from areas where aircraft or airport deicing operations occur (including runways, taxiways, ramps, and dedicated aircraft deicing stations) are required to monitor such storm water that is discharged from the facility when deicing activities are occurring for: Oil and Grease (mg/L); Five Day Biochemical Oxygen Demand (BOD5) (mg/L); Chemical Oxygen Demand (COD) (mg/L); Total Suspended Solids (TSS) (mg/L); pH; and the primary ingredient used in the deicing materials used at the site (e.g. ethylene glycol, urea, etc.).

b. *Coal-fired Steam Electric Facilities.* Facilities with storm water discharges associated with industrial activity from coal handling sites at coal fired steam electric power generating facilities (other than discharges in whole or in part from coal piles subject to storm water effluent guidelines at 40 CFR 423—which are not eligible for coverage under this permit) are required to monitor such storm water that is discharged from the facility for: Oil and grease (mg/L), pH, TSS (mg/L), total recoverable copper (mg/l), total recoverable nickel (mg/l) and total recoverable zinc (mg/l).

c. *Animal Handling/Meat Packing.* Facilities with storm water discharges associated with industrial activity from animal handling areas, manure management (or storage) areas, and production waste management (or storage) areas that are exposed to precipitation at meat packing plants, poultry packing plants, and facilities that manufacture animal and marine fats and oils, are required to monitor such storm water that is discharged from the facility for: Five Day Biochemical Oxygen Demand (B0D5) (mg/L); oil and grease (mg/L); Total Suspended Solids (TSS) (mg/L); Total Kjeldahl Nitrogen (TKN) (mg/L); Total Phosphorus (mg/L); ph; and fecal coliform (counts per 100 mL).

d. *Additional Facilities.* Facilities with storm water discharges associated with industrial activity that:

(i) Come in contact with storage piles for solid chemicals used as raw materials that are exposed to precipitation at facilities classified as SIC 30 (Rubber and Miscellaneous Plastics Products) or SIC 28 (Chemicals and Allied Products);

(ii) Are from those areas at automobile junkyards with any of the following: (A) over 250 auto/truck bodies with drivelines (engine, transmission, axles, and wheels), 250 drivelines, or any combination thereof (in whole or in parts) are exposed to storm water; (B) over 500 auto/truck units (bodies with or without drivelines in whole or in parts) are stored exposed to storm water; or (C) over 100 units per year are dismantled and drainage or storage of automotive fluids occurs in areas exposed to storm water;

(iii) Come into contact with lime storage piles that are exposed to storm water at lime manufacturing facilities;

(iv) Are from oil handling sites at oil fired steam electric power generating facilities;

(v) Are from cement manufacturing facilities and cement kilns (other than discharges in whole or in part from material storage piles subject to storm water effluent guidelines at 40 CFR 411—which are not eligible for coverage under this permit);

(vi) Are from ready-mixed concrete facilities; or

(vii) Are from ship building and repairing facilities;

are required to monitor such storm water discharged from the facility for: Oil and Grease (mg/L); Chemical Oxygen Demand (COD) (mg/L); Total Suspended Solids (TSS) (mg/L); pH; and any pollutant limited in an effluent guideline to which the facility is subject.

4. *Sample Type.* For discharges from holding ponds or other impoundments with a retention period greater than 24 hours, (estimated by dividing the volume of the detention pond by the estimated volume of water discharged during the 24 hours previous to the time that the sample is collected) a minimum of one grab sample may be taken. For all other discharges, data shall be reported for both a grab sample and a composite sample. All such samples shall be collected from the discharge resulting from a storm event that is greater than 0.1 inches in magnitude and that occurs at least 72 hours from the previously measurable (greater than 0.1 inch rainfall) storm event. The grab sample shall be taken during the first thirty minutes of the discharge. If the collection of a grab sample during the first thirty minutes is impracticable, a grab sample can be taken during the first hour of the discharge, and the discharger shall submit with the monitoring report a description of why a grab sample during the first thirty minutes was impracticable. The composite sample shall either be flow-weighted or time-weighted. Composite samples may be taken with a continuous sampler or as a combination of a minimum of three sample aliquots taken in each hour of discharge for the entire discharge or for the first three hours of the discharge, with each aliquot being separated by a minimum period of fifteen minutes. Grab samples only must be collected and analyzed for the determination of pH, cyanide, whole effluent toxicity, fecal coliform, and oil and grease.

5. *Sampling Waiver.* When a discharger is unable to collect samples due to adverse climatic conditions, the discharger must submit in lieu of sampling data a description of why samples could not be collected, including available documentation of the event. Adverse weather conditions which may prohibit the collection of samples includes weather conditions that create dangerous conditions for personnel (such as local flooding, high winds, hurricane, tornadoes, electrical storms, etc.) or otherwise make the collection of a sample impracticable (drought, extended frozen conditions, etc.). Dischargers are precluded from exercising this waiver more than once during a two year period.

6. *Representative Discharge.* When a facility has two or more outfalls that, based on a consideration of industrial activity, significant materials, and management practices and activities within the area drained by the outfall, the permittee reasonable believes discharge substantially identical effluents, the permittee may test the effluent of one of such outfalls and report that the quantitative data also applies to the substantially identical outfalls provided that the permittee includes in the storm water pollution prevention plan a description of the location of the outfalls and explaining in detail why the outfalls are expected to discharge substantially identical effluents. In addition, for each outfall that the permittee believes is representative, an estimate of the size of the drainage area (in square feet) and an estimate of the runoff coefficient of the drainage area (e.g. low (under 40 percent), medium (40 to 65 percent) or high (above 65 percent)) shall be provided in the plan. Permittees required to submit monitoring information under Parts VI.D.1.a, b or c of this permit shall include the description of the location of the outfalls, explanation of why outfalls are expected to discharge substantially identical effluents, and estimate of the size of the drainage area and runoff coefficient with the Discharge Monitoring Report.

7. *Alternative Certification.* A discharger is not subject to the monitoring requirements of parts VI.B. 2 or 3 of this permit provided the discharger makes a certification for a given outfall, on an annual basis, under penalty of law, signed in accordance with part VII.G (signatory requirements), that material handling equipment or activities, raw materials, intermediate products, final products, waste materials, by-products, industrial machinery or operations, significant materials from past industrial activity, or, in the case of airports, deicing activities, that are located in areas of the facility that are within the drainage area of the outfall are not presently exposed to storm water and will not be exposed to storm water for the certification period. Such certification must be retained in the storm water pollution prevention plan, and submitted to EPA in accordance with part VI.D of this permit.

8. *Alternative to WET Parameter.* A discharger that is subject to the monitoring requirements of parts VI.B.2. a through d may, in lieu of monitoring for acute whole effluent toxicity, monitor for pollutants identified in Tables II and III of Appendix D of 40 CFR 122 (see Addendum A of this permit) that the discharger knows or has reason to believe are present at the facility site. Such determinations are to be based on reasonable best efforts to identify significant quantities of materials or chemicals present at the facility. Dischargers must also monitor for any additional parameter identified in parts VI.B.2. a through d.

C. *Toxicity Testing.* Permittees that are required to monitor for acute whole effluent toxicity shall initiate the series of tests described below within 180 days after the issuance of this permit or within 90 days after the commencement of a new discharge.

1. *Test Procedures.*

a. The permittee shall conduct acute 24 hour static toxicity tests on both an appropriate invertebrate and an appropriate fish (vertebrate) test species (EPA/600/4–90–027 Rev. 9/91, Section 6.1.) [2]. Freshwater species must be used for discharges to freshwater water bodies. Due to the non-saline nature of rainwater, freshwater test species should also be used for discharges to estuarine, marine or other naturally saline waterbodies.

b. All test organisms, procedures and quality assurance criteria used shall be in accordance with *Methods for Measuring the Acute Toxicity of Effluents and Receiving Waters to Freshwater and Marine Organisms*, EPA/600/4–90–027 (Rev. September 1991). EPA has proposed to establish regulations regarding these test methods (December 4, 1989, 53 *FR* 50216).

c. Tests shall be conducted semiannually (twice per year) on a grab sample of the discharge. Tests shall be conducted using 100 effluent (no dilution) and a control consisting of synthetic dilution water. Results of all tests conducted with any species shall be reported according to EPA/600/4–90–027 (Rev. September 1991), Section 12, Report Preparation, and the report submitted to EPA with the Discharge Monitoring Reports (DMR's). On the DMR, the permittee shall report "0" if there is no statistical difference between the control mortality and the effluent mortality for each dilution. If there is statistical difference (exhibits toxicity), the permittee shall report "1" on the DMR.

2. If acute whole effluent toxicity (statistically significant difference between the 100% dilution and the control) is detected on or after October 1, 1995, in storm water discharges, the permittee shall review the storm water pollution prevention plan and make appropriate modifications to assist in identifying the source(s) of toxicity and to reduce the toxicity of their storm water discharges. A summary of the review and the resulting modifications shall be provided in the plan.

D. *Reporting: Where to Submit.*

1. a. Permittees which are required to conduct sampling pursuant to Parts VI.B.2.(a) (EPCRA Section 313), and (d) (Wood Treatment facilities), shall monitor samples collected during the sampling periods running from January to June and during the sampling period from July to December. Such permittees shall submit monitoring results obtained during the reporting period running from January to December on Discharge Monitoring Report Form(s) postmarked no later than the 28th day of the following January. A separate Discharge Monitoring Report Form is required for each sampling period. The first report may include less than twelve months of information.

b. Permittees which are required to conduct sampling pursuant to Parts VI.B.2.(b) (Primary Metal facilities), (e) (Coal Pile Runoff), and (f) (Battery Reclaimers) shall monitor samples collected during the sampling period running from March to August and during the sampling period running from September to February. Such permittees shall submit monitoring results obtained during the reporting period running from April to March on Discharge Monitoring Report Form(s) postmarked no later than the 28th day of the following April. A separate Discharge Monitoring Report Form is required for each event sampling period. The first report may include less than twelve months of information.

c. Permittees which are required to conduct sampling pursuant to Parts VI.B.2.(c) (Land Disposal facilities), shall monitor samples collected during the sampling period running from October to March and during the sampling period running from April to September. Such permittees shall submit monitoring results obtained during the reporting period running from October to September on Discharge Monitoring Report Form(s) postmarked no later than the 28th day of October. A separate Discharge Monitoring Report Form is required for each sampling period. The first report may include less than twelve months of information.

d. Signed copies of discharge monitoring reports required under Parts VI.D.1.a, VI.D.1.b, and VI.D.1.c, individual permit applications and all other reports required herein, shall be submitted to the Director of the NPDES program at the address of the appropriate Regional Office:

1. *Massachusetts*

United States EPA, Region I—Water Management Division (WCP–2109), Storm Water Staff, John F. Kennedy Federal Building, Room 2209, Boston, MA 02203

2. *Indian lands in New York, Puerto Rico*

United States EPA, Region II—Water Management Division (2WM–WPC), Storm Water Staff, 26 Federal Plaza, New York, NY 10278

3. *District of Columbia, Federal facilities in Delaware*

United States EPA, Region III—Water Management Division (3WM55), Storm Water Staff, 841 Chestnut Building, Philadelphia, PA 19107

4. *Florida*

United States EPA, Region IV—Water Management Division (FPB–3), Storm Water Staff, 345 Courtland Street, NE, Atlanta, GA 30365

5. *Guam, American Samoa*

United States EPA, Region IX—Water Management Division (W–5–1), Storm Water Staff, 75 Hawthorne Street, San Francisco, CA 94105

e. Permittees with facilities identified in Parts VI.B.3 (annual monitoring) are not required to submit monitoring results, unless required in writing by the Director.

2. *Additional Notification.* In addition to filing copies of discharge monitoring reports in accordance with Part VI.D.1 (reporting: where to submit), facilities with at least one storm water discharge associated with industrial activity through a large or medium municipal separate storm sewer (systems serving a population of 100,000 or more) must submit signed copies of discharge monitoring reports to the operator of the municipal separate storm sewer system in accordance with the dates provided in paragraph VI.D.1 (reporting: where to submit). Facilities not required to report monitoring data under Part VI.B.3 (annual monitoring requirements), and facilities that are not otherwise required to monitor their discharges, need not comply with this provision.

E. *Retention of Records.* 1. The permittee shall retain the pollution prevention plan developed in accordance with Part IV (storm water pollution prevention plans) of this permit until at least one year after coverage under this permit terminates. The permittee shall retain all records of all monitoring information, copies of all reports required by this permit, and records of all data used to complete the Notice of Intent to be covered by this permit, until at least one year after coverage under this permit terminates. This period may be explicitly modified by alternative provisions of this permit (see paragraph VI.E.2 (below) of this permit) or extended by request of the Director at any time.

2. For discharges subject to sampling requirements pursuant to Part VI.B (monitoring requirements), in addition to the requirements of paragraph VI.E.1 (above), permittees are required to retain for a six year period from the data of sample collection or for the term of this permit, which ever is greater, records of all monitoring information collected during the term of this permit. Permittees must submit such monitoring results to the Director upon the requests of the Director, and submit a summary of such results as part of renotification requirements in accordance with Part II.F (renotification).

Part VIII.—Standard Permit Conditions

A. *Duty to Comply.*

1. The permittee must comply with all conditions of this permit. Any permit noncompliance constitutes a violation of CWA and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application.

2. *Penalties for Violations of Permit Conditions.*

a. *Criminal. (1). Negligent Violations.* The CWA provides that any person who negligently violates permit conditions implementing Sections 301, 302, 306, 307, 308, 318, or 405 of the Act is subject to a fine of not less than $2,500 nor more than $25,000 per day of violation, or by imprisonment for not more than 1 year, or both.

(2). *Knowing Violations.* The CWA provides that any person who knowingly violates permit conditions implementing Sections 301, 302, 306, 307, 308, 318, or 405 of the Act is subject to a fine of not less than $5,000 nor more than $50,000 per day of violation, or by imprisonment for not more than 3 years, or both.

(3). *Knowing Endangerment.* The CWA provides that any person who knowingly violates permit conditions implementing Sections 301, 302, 306, 307, 308, 318, or 405 of the Act and who knows at that time that he is placing another person in imminent danger of death or serious bodily injury is subject to a fine of not more than $250,000, or by imprisonment for not more than 15 years, or both.

(4). *False Statement.* The CWA provides that any person who knowingly makes any false material statement, representation, or certification in any application, record, report, plan, or other document filed or required to be maintained under the Act or who knowingly falsifies, tampers with, or renders inaccurate, any monitoring device or method required to be maintained under the Act, shall upon conviction, be punished by a fine of not more than $10,000 or by imprisonment for not more than 2 years, or by both. If a conviction is for a violation committed after a first conviction of such person under this paragraph, punishment shall be by a fine of not more than $20,000 per day of violation, or by imprisonment of not more than 4 years, or by both. (See Section 309(c)(4) of the Clean Water Act).

b. *Civil Penalties*—The CWA provides that any person who violates a permit condition implementing Sections 301, 302, 306, 307, 308, 318, or 405 of the Act is subject to a civil penalty not to exceed $25,000 per day for each violation.

c. *Administrative Penalties*—The CWA provides that any person who violates a permit condition implementing Sections 301, 302, 306, 307, 308, 318, or 405 of the Act is subject to an administrative penalty, as follows:

(1). *Class I penalty.* Not to exceed $10,000 per violation nor shall the maximum amount exceed $25,000.

(2). *Class II penalty.* Not to exceed $10,000 per day for each day during which the violation continues nor shall the maximum amount exceed $125,000.

B. *Continuation of the Expired General Permit.* This permit expires on October 1, 1997. However, an expired general permit continues in force and effect until a new general permit is issued. Permittees must submit a new NOI in accordance with the requirements of Part II of this permit, using a NOI form provided by the Director (or photocopy thereof) between August 1, 1997 and September 29, 1997 to remain covered under the continued permit after October 1, 1997. Facilities that had not obtained coverage under the permit by October 1, 1997 cannot become authorized to discharge under the continued permit.

C. *Need to halt or reduce activity not a defense.* It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

D. *Duty to Mitigate.* The permittee shall take all reasonable steps to minimize or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

E. *Duty to Provide Information.* The permittee shall furnish to the Director, within a time specified by the Director, any information which the Director may request to determine compliance with this permit. The permittee shall also furnish to the Director upon request copies of records required to be kept by this permit.

F. *Other Information.* When the permittee becomes aware that he or she failed to submit any relevant facts or submitted incorrect information in the Notice of Intent or in any other report to the Director, he or she shall promptly submit such facts or information.

G. *Signatory Requirements.* All Notices of Intent, Notices of Termination, storm water pollution prevention plans, reports, certifications or information either submitted to the Director (and/or the operator of a large or medium municipal separate storm sewer system), or that this permit requires be maintained by the permittee, shall be signed.

1. All Notices of Intent shall be signed as follows: a. For a corporation: by a responsible corporate officer. For the purpose of this section, a responsible corporate officer means: (1) a president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation; or (2) the manager of one or more manufacturing, production or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding $25,000,000 (in second-quarter 1980 dollars) if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

b. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively; or

c. For a municipality, State, Federal, or other public agency: by either a principal executive officer or ranking elected official. For purposes of this section, a principal executive officer of a Federal agency includes (1) the chief executive officer of the agency, or (2) a senior executive officer having responsibility for the overall operations of a principal geographic unit of the agency (e.g., Regional Administrators of EPA).

2. All reports required by the permit and other information requested by the Director shall be signed by a person described above or by a duly authorized representative of that person. A person is a duly authorized representative only if:

a. The authorization is made in writing by a person described above and submitted to the Director.

b. The authorization specifies either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of manager, operator, superintendent, or position of equivalent responsibility or an individual or position having overall responsibility for environmental matters for the company. (A duly authorized representative may thus be either a named individual or any individual occupying a named position.)

c. *Changes to authorization.* If an authorization under paragraph VII.G.2. is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new notice of intent satisfying the requirements of paragraph II.C must be submitted to the Director prior to or together with any reports, information, or applications to be signed by an authorized representative.

d. *Certification.* Any person signing documents under this section shall make the following certification: "I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the

system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for known violations."

H. *Penalties for Falsification of Reports.* Section 309(c)(4) of the Clean Water Act provides that any person who knowingly makes any false material statement, representation, or certification in any record or other document submitted or required to be maintained under this permit, including reports of compliance or noncompliance shall, upon conviction, be punished by a fine of not more than $10,000, or by imprisonment for not more than 2 years, or by both.

I. *Penalties for Falsification of Monitoring Systems.* The CWA provides that any person who falsifies, tampers with, or knowingly renders inaccurate any monitoring device or method required to be maintained under this permit shall, upon conviction, be punished by fines and imprisonment described in section 309 of the CWA.

J. *Oil and Hazardous Substance Liability.* Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties to which the permittee is or may be subject under section 311 of the CWA or section 106 of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA).

K. *Property Rights.* The issuance of this permit does not convey any property rights of any sort, nor any exclusive privileges, nor does it authorize any injury to private property nor any invasion of personal rights, nor any infringement of Federal, State or local laws or regulations.

L. *Severability.* The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.

M. *Requiring an Individual Permit or an Alternative General Permit.*-1. The Director may require any person authorized by this permit to apply for and/or obtain either an individual NPDES permit or an alternative NPDES general permit. Any interested person may petition the Director to take action under this paragraph. The Director may require any owner or operator authorized to discharge under this permit to apply for an individual NPDES permit only if the owner or operator has been notified in writing that a permit application is required. This notice shall include a brief statement of the reasons for this decision, an application form, a statement setting a deadline for the owner or operator to file the application, and a statement that on the effective date of issuance or denial of the individual NPDES permit or the alternative general permit as it applies to the individual permittee, coverage under this general permit shall automatically terminate. Individual permit applications shall be submitted to the address of the appropriate Regional Office shown in part VI.D.1.d (reporting: where to submit) of this permit. The Director may grant additional time to submit the application upon request of the applicant. If an owner or operator fails to submit in a timely manner an individual NPDES permit application as required by the Director, then the applicability of this permit to the individual NPDES permittee is automatically terminated at the end of the day specified for application submittal.

2. Any owner or operator authorized by this permit may request to be excluded from the coverage of this permit by applying for an individual permit. The owner or operator shall submit an individual application (Form 1 and Form 2F) with reasons supporting the request to the Director. Individual permit applications shall be submitted to the address of the appropriate Regional Office shown in Part VI.D.1.c. of this permit. The request may be granted by the issuance of any individual permit or an alternative general permit if the reasons cited by the owner or operator are adequate to support the request.

3. When an individual NPDES permit is issued to an owner or operator otherwise subject to this permit, or the owner or operator is authorized for coverage under an alternative NPDES general permit, the applicability of this permit to the individual NPDES permittee is automatically terminated on the effective date of the individual permit or the date of authorization of coverage under the alternative general permit, whichever the case may be. When an individual NPDES permit is denied to an owner or operator otherwise subject to this permit, or the owner or operator is denied for coverage under an alternative NPDES general permit, the applicability of this permit to the individual NPDES permittee is automatically terminated on the date of such denial, unless otherwise specified by the Director.

N. *State/Environmental Laws.* 1. Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, or penalties established pursuant to any applicable State law or regulation under authority preserved by section 510 of the Act.

2. No condition of this permit shall release the permittee from any responsibility or requirements under other environmental statutes or regulations.

O. *Proper Operation and Maintenance.* The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit and with the requirements of storm water pollution prevention plans. Proper operation and maintenance also includes adequate laboratory controls and appropriate quality assurance procedures. Proper operation and maintenance requires the operation of backup or auxiliary facilities or similar systems, installed by a permittee only when necessary to achieve compliance with the conditions of the permit.

P. *Monitoring and records.* 1. Samples and measurements taken for the purpose of monitoring shall be representative of the monitored activity.

2. The permittee shall retain records of all monitoring information including all calibration and maintenance records and all original strip chart recordings for continuous monitoring instrumentation, copies of the reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least 6 years from the date of the sample, measurement, report or application. This period may be extended by request of the Director at any time.

3. *Records Contents.* Records of monitoring information shall include:

a. The date, exact place, and time of sampling or measurements;

b. The initials or name(s) of the individual(s) who performed the sampling or measurements;

c. The date(s) analyses were performed;

d. The time(s) analyses were initiated;

e. The initials or name(s) of the individual(s) who performed the analyses;

f. References and written procedures, when available, for the analytical techniques or methods used; and

8. The results of such analyses, including the bench sheets, instrument readouts, computer disks or tapes, etc., used to determine these results.

4. Monitoring must be conducted according to test procedures approved under 40 CFR Part 136, unless other test procedures have been specified in this permit.

Q. *Inspection and Entry.* The permittee shall allow the Director or an authorized representative of EPA, the State, or, in the case of a facility which discharges through a municipal separate storm sewer, an authorized representative of the municipal operator or the separate storm sewer receiving the discharge, upon the presentation of credentials and other documents as may be required by law, to:

1. Enter upon the permittee's premises where a regulated facility or activity is located or conducted or where records must be kept under the conditions of this permit;

2. Have access to and copy at reasonable times, any records that must be kept under the conditions of this permit; and

3. Inspect at reasonable times any facilities or equipment (including monitoring and control equipment).

R. *Permit Actions.* This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance does not stay any permit condition.

S. *Bypass of Treatment Facility.* 1. Notice:

a. Anticipated bypass. If a permittee subject to the numeric effluent limitation of Part V.A of this permit knows in advance of the need for a bypass, he or she shall submit prior notice, if possible, at least ten days before the date of the bypass; including an evaluation of the anticipated quality and effect of the pass.

b. Unanticipated bypass. The permittee subject to the numeric effluent limitation of Part V.A of this permit shall submit notice of an unanticipated bypass. Any information regarding the unanticipated bypass shall be provided orally within 24 hours from the time the permittee became aware of the circumstances. A written submission shall also be provided within 5 days of the time the permittee became aware of the circumstances. The written submission shall contain a description of the bypass and its cause; the period of the bypass; including exact dates and times, and if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass.

2. Prohibition of bypass: a. Bypass is prohibited and the Director may take enforcement action against a permittee for a bypass. Unless:

(1) The bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

(2) There were no feasible alternatives to the bypass, such as the use of auxiliary facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if the permittee should, in the exercise of reasonable engineering judgment, have installed adequate backup equipment to prevent a bypass which occurred during normal periods of equipment downtime or preventive maintenance; and

(3) The permittee submitted notices of the bypass.

b. The Director may approve an anticipated bypass after considering its adverse effects, if the Director determines that it will meet the three conditions listed in Part VII.S.2.a.

T. *Upset Conditions.* 1. An upset constitutes an affirmative defense to an action brought for noncompliance with technology-based numeric effluent limitations in Part V.A of this permit if the requirements of paragraph 2 below are met. No determination made during administrative review of claims that noncompliance was caused by upset, and before an action for noncompliance, if final administrative action subject to judicial review.

2. A permittee who wishes to establish the affirmative defense of an upset shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence, that:

a. An upset occurred and that the permittee can identify the specific cause(s) of the upset:

b. The permitted facility was at the time being properly operated; and

c. The permittee provided oral notice of the upset to EPA within 24 hours from the time the permittee became aware of the circumstances. A written submission shall also be provided within 5 days of the time the permittee became aware of the circumstances. The written submission shall contain a description of the upset and its cause; the period of the upset; including exact dates and times, and if the upset has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the upset.

3. In any enforcement proceeding the permittee seeking to establish the occurrence of an upset has the burden of proof.

Part VIII. Reopener Clause

A. If there is evidence indicating potential or realized impacts on water quality due to any storm water discharge associated with industrial activity covered by this permit, the owner or operator of such discharge may be required to obtain individual permit or an alternative general permit in accordance with Part VII.M (requiring an individual permit or alternative general permit) of this permit or the permit may be modified to include different limitations and/or requirements.

B. Permit modification or revocation will be conducted according to 40 CFR 122.62, 122.63, 122.64 and 124.5.

Part IX. Termination of Coverage

A. *Notice of Termination.* Where all storm water discharges associated with industrial activity that are authorized by this permit are eliminated, or where the operator of storm water discharges associated with industrial activity at a facility changes, the operator of the facility may submit a Notice of Termination that is signed in accordance with Part VII.G (signatory requirements) of this permit. The Notice of Termination shall include the following information:

1. Name, mailing address, and location of the facility for which the notification is submitted. Where a street address for the site is not available, the location of the approximate center of the site must be described in terms of the latitude and longitude to the nearest 15 seconds, or the section, township and range to the nearest quarter section;

2. The name, address and telephone number of the operator addressed by the Notice of Termination;

3. The NPDES permit number for the storm water discharge associated with industrial activity identified by the Notice of Termination;

4. An indication of whether the storm water discharges associated with industrial activity has been eliminated or the operator of the discharges has changed; and

5. The following certification signed in accordance with Part VII.G (signatory requirements) of this permit: "I certify under penalty of law that all storm water discharges associated with industrial activity from the identified facility that are authorized by a NPDES general permit have been eliminated or that I am no longer the operator of the industrial activity. I understand that by submitting this notice of termination,

that I am no longer authorized to discharge storm water associated with industrial activity under this general permit, and that discharging pollutants in storm water associated with industrial activity to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by a NPDES permit. I also understand that the submittal of this notice of termination does not release an operator from liability for any violations of this permit or the Clean Water Act."

B. *Address.* All Notices of Termination are to be sent, using the form provided by the Director (or a photocopy thereof) [a], to the Director of the NPDES program in care of the following address: Storm Water Notice of Termination, PO Box 1185, Newington, VA 22122.

Part X. Definitions

Best Management Practices ("BMPs") means schedules of activities, prohibitions of practices, maintenance procedures, and other management practices to prevent or reduce the pollution of waters of the United States. BMPs also include treatment requirements, operating procedures, and practices to control facility site runoff, spillage or leaks, sludge or waste disposal, or drainage from raw material storage.

Bypass means the intentional diversion of waste streams from any portion of a treatment facility.

Coal pile runoff means the rainfall runoff from or through any coal storage pile.

CWA means Clean Water Act (formerly referred to as the Federal Water Pollution Control Act or Federal Water Pollution Control Act Amendments of 1972).

Director means the Regional Administrator or an authorized representative.

Flow-weighted composite sample means a composite sample consisting of a mixture of aliquots collected at a constant time interval, where the volume of each aliquot is proportional to the flow rate of the discharge.

Landfill means an area of land or an excavation in which wastes are placed for permanent disposal, and which is not a land application unit, surface impoundment, injection well, or waste pile.

Land application unit means an area where wastes are applied onto or incorporated into the soil surface (excluding manure spreading operations) for treatment or disposal.

Large and Medium municipal separate storm sewer system means all municipal separate storm sewers that are either: (i) located in an incorporated place (city) with a population of 100,000 or more as determined by the latest Decennial Census by the Bureau of Census (these cities are listed in Appendices F and G of 40 CFR Part 122); or (ii) located in the counties with unincorporated urbanized populations of 100,000 or more, except municipal separate storm sewers that are located in the incorporated places, townships or towns within such counties (these counties are listed in Appendices H and I of 40 CFR 122); or (iii) owned or operated by a municipality other than those described in paragraph (i) or (ii) and that are designated by the Director as part of the large or medium municipal separate storm sewer system.

NOI means notice of intent to be covered by this permit (see Part II of this permit.)

NOT means notice of termination (see Part II of this permit.)

Point Source means any discernible, confined, and discrete conveyance, including but not limited to, any pipe, ditch, channel, tunnel, conduit, well, discrete fissure, container, rolling stock, concentrated animal feeding operation, landfill leachate collection system, vessel or other floating craft from which pollutants are or may be discharges. This term does not include return flows from irrigated agriculture or agricultural storm water runoff.

Section 313 water priority chemical means a chemical or chemical-categories which are: (1) are listed at 40 CFR 372.65 pursuant to Section 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA) (also known as Title III of the Superfund Amendments and Reauthorization Act (SARA) of 1986); (2) are present at or above threshold levels at a facility subject to EPCRA Section 313 reporting requirements; and (3) that meet at least one of the following criteria: (i) are listed in Appendix D of 40 CFR 122 on either Table II (organic priority pollutants), Table III (certain metals, cyanides, and phenols) or Table V (certain toxic pollutants and hazardous substances); (ii) are listed as a hazardous substance pursuant to section 311(b)(2)(A) of the CWA at 40 CFR 116.4; or (iii) are pollutants for which EPA has published acute or chronic water quality criteria. See Addendum B of this permit.

Significant materials includes, but is not limited to: raw materials; fuels; materials such as solvents, detergents, and plastic pellets; finished materials such as metallic products; raw materials used in food processing or production; hazardous substances designated under section 101(14) of CERCLA; any chemical the facility is required to report pursuant to EPCRA Section 313; fertilizers; pesticides; and waste products such as ashes, slag and sludge that have the potential to be released with storm water discharges.

Significant spills includes, but is not limited to: releases of oil or hazardous substances in excess of reportable quantities under section 311 of the Clean Water Act (see 40 CFR 110.10 and CFR 117.21) or section 102 of CERCLA (see 40 CFR 302.4).

Storm Water means storm water runoff, snow melt runoff, and surface runoff and drainage.

Storm Water Associated with Industrial Activity means the discharge from any conveyance which is used for collecting and conveying storm water and which is directly related to manufacturing, processing or raw materials storage areas at an industrial plant. The term does not include discharges from facilities or activities excluded from the NPDES program. For the categories of industries identified in paragraphs (i) through (x) of this definition, the term includes, but is not limited to, storm water discharges from industrial plant yards; immediate access roads and rail lines used or traveled by carriers of raw materials, manufactured products, waste material, or by-products used or created by the facility; material handling sites; refuse sites; sites used for the application or disposal of process waste waters (as defined at 40 CFR 401); sites used for the storage and maintenance of material handling equipment; sites used for residual treatment, storage, or disposal; shipping and receiving areas; manufacturing buildings; storage areas (including tank farms) for raw materials, and intermediate and finished products; and areas where industrial activity has taken place in the past and significant materials remain and are exposed to storm water. For the categories of industries identified in paragraph (xi) of the definition, the term includes only storm water discharges from all areas (except access roads and rail lines) listed in the previous sentence where material handling equipment or activities, raw materials, intermediate products, final products, waste materials, by-products, or industrial machinery *are exposed to storm water.* For the purposes of this paragraph, material handling activities include the: storage, loading and unloading, transportation, or conveyance of any

[a] A copy of the approved NOT form is provided in Appendix D of this notice.

raw material, intermediate product, finished product, by-product or waste product. The term excludes areas located on plant lands separate from the plant's industrial activities, such as office buildings and accompanying parking lots as long as the drainage from the excluded areas is not mixed with storm water drained from the above described areas. Industrial facilities (including industrial facilities that are Federally, State or municipally owned or operated that meet the description of the facilities listed in this paragraph (i)–(xi) of this definition) include those facilities designated under 122.26(a)(1)(v). The following categories of facilities are considered to be engaging in "industrial activity" for purposes of this subsection:

(i) Facilities subject to storm water effluent limitations guidelines, new source performance standards, or toxic pollutant effluent standards under 40 CFR subchapter N (except facilities with toxic pollutant effluent standards which are exempted under category (xi) of this definition);

(ii) Facilities classified as Standard Industrial Classifications 24 (except 2434), 26 (except 265 and 267), 28 (except 283 and 285), 29, 311, 32 (except 323), 33, 3441, 373;

(iii) Facilities classified as Standard Industrial Classifications 10 through 14 (mineral industry) including active or inactive mining operations (except for areas of coal mining operations no longer meeting the definition of a reclamation area under 40 CFR 434.11(l) because the performance bond issued to the facility by the appropriate SMCRA authority has been released, or except for areas of non-coal mining operations which have been released from applicable State or Federal reclamation requirements after December 17, 1990) and oil and gas exploration, production, processing, or treatment operations, or transmission facilities that discharge storm water contaminated by contact with or that has come into contact with, any overburden, raw material, intermediate products, finished products, byproducts or waste products located on the site of such operations; inactive mining operations are mining sites that are not being actively mined, but which have an identifiable owner/operator;

(iv) Hazardous waste treatment, storage, or disposal facilities, including those that are operating under interim status or a permit under Subtitle C of RCRA;

(v) Landfills, land application sites, and open dumps that have received any industrial wastes (waste that is received from any of the facilities described under this subsection) including those that are subject to regulation under Subtitle D of RCRA;

(vi) Facilities involved in the recycling of materials, including metal scrapyards, battery reclaimers, salvage yards, and automobile junkyards, including but limited to those classified as Standard Industrial Classification 5015 and 5093;

(vii) Steam electric power generating facilities, including coal handling sites;

(viii) Transportation facilities classified as Standard Industrial Classifications 40, 41, 42 (except 4221–25), 43, 44, 45 and 5171 which have vehicle maintenance shops, equipment cleaning operations, or airport deicing operations. Only those portions of the facility that are either involved in vehicle maintenance (including vehicle rehabilitation, mechanical repairs, painting, fueling, and lubrication), equipment cleaning operations, airport deicing operations, or which are otherwise identified under paragraphs (i)–(vii) or (ix)–(xi) of this subsection are associated with industrial activity;

(ix) Treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage treatment, recycling, and reclamation of municipal or domestic sewage, including land dedicated to the disposal of sewage sludge that are located within the confines of the facility, with a design flow of 1.0 mgd or more, or required to have an approved pretreatment program under 40 CFR 403. Not included are farm lands, domestic gardens or lands used for sludge management where sludge is beneficially reused and which are not physically located in the confines of the facility, or areas that are in compliance with 40 CFR 503;

(x) Construction activity including clearing, grading and excavation activities except: operations that result in the disturbance of less than five acres of total land area which are not part of a larger common plan or development of sale;

(xi) Facilities under Standard Industrial Classifications 20, 21, 22, 23, 2434, 25, 265, 267, 27, 283, 285, 30, 31 (except 311), 323, 34 (except 3441), 35, 36, 37 (except 373), 38, 39, 4221–25, (and which are not otherwise included within categories (i)–(x)) [6].

Time-weighted composite means a composite sample consisting of a mixture of equal volume aliquots collected at a constant time interval.

Upset means an exceptional incident in which there is unintentional and temporary noncompliance with the numeric effluent limitations of Part V of this permit because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

Waste pile means any noncontainerized accumulation of solid, nonflowing waste that is used for treatment or storage.

Waters of the United States means:

(a) All waters which are currently used, were used in the past, or may be susceptible to use in interstate or foreign commerce, including all waters which are subject to the ebb and flow of the tide;

(b) All interstate waters, including interstate "wetlands";

(c) All other waters such as interstate lakes, rivers, streams (including intermittent streams), mudflats, sandflats, wetlands, sloughs, prairie potholes, wet meadows, playa lakes, or natural ponds the use, degradation, or destruction of which would affect or could affect interstate or foreign commerce including any such waters:

(1) Which are or could be used by interstate or foreign travelers for recreational or other purposes;

(2) From which fish or shellfish are or could be taken and sold in interstate or foreign commerce; or

(3) Which are used or could be used for industrial purposes by industries in interstate commerce;

(d) All impoundments of waters otherwise defined as waters of the United States under this definition;

(e) Tributaries of waters identified in paragraphs (a) through (d) of this definition;

(f) The territorial sea; and

(g) Wetlands adjacent to waters (other than waters that are themselves wetlands) identified in paragraphs (a) through (f) of this definition.

Waste treatment systems, including treatment ponds or lagoons designed to meet the requirements of CWA are not waters of the United States.

Part XI. State Specific Conditions

The provisions of this part provide modifications or additions to the applicable conditions of Parts I through IX of this permit. The additional revisions and requirements listed below are set forth in connection with particular State, Indian lands and

[6] On June 4, 1992, the United States Court of Appeals for the Ninth Circuit remanded the exclusion for manufacturing facilities in category (xi) which do not have materials or activities exposed to storm water to the EPA for further rulemaking. (Nos. 90–70671 and 91–70200).

Federal facilities and only apply to the States and Federal facilities specifically referenced.

A. *Massachusetts.* Massachusetts 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read as follows:

Part I. Coverage Under This Permit

A. *Permit Area.* This permit covers all areas of the Commonwealth of Massachusetts.

B. *Eligibility.*

* * * * *

3. *Limitations on Coverage.*

* * * * *

h. new or increased storm water discharges to coastal water segments within Massachusetts designated as "Areas of Critical Environmental Concern (ACEC)" (for information on ACEC, please contact the Executive Office of Environmental Affairs, Coastal Zone Management at (617) 727–9530);

i. new or increased discharges, as defined at 314 CMR 4.02(19), which meet the definition of "storm water discharge," as defined at 314 CMR 3.04(2)(a)(1) or (2)(b), to Outstanding Resource Waters which have not met the provisions of 314 CMR 4.04(3) and Part III C.1 of this permit.

* * * * *

2. Part II of the permit is revised to read as follows:

Part II. Notice of Intent Requirements

* * * * *

C. *Where to Submit.*

1. Facilities which discharge storm water associated with industrial activity must use a NOI form provided by the Director (or photocopy thereof). The form in the Federal Register notice in which this permit was published may be photocopied and used. Forms are also available by calling the Storm Water Hotline at (703) 821–4823, or the NPDES Programs Operations Section at US EPA Region 1 at (617) 565–3525. NOIs must be signed in accordance with Part VII.G (signatory requirements) of this permit. NOIs are to be submitted to the Director of the NPDES program in care of the following address: Storm Water Notice of Intent, US EPA Region 1, MA, PO Box 1215, Newington, VA 22122.

2. A copy of the NOI for all discharges to Outstanding Resource Waters shall be submitted to the Commonwealth of Massachusetts at the following address: Massachusetts Department of Environmental Protection, Storm Water Notice of Intent, BRP–WP 43, PO Box 4062, Boston, Massachusetts 02211.

For details on filing for permits with MA DEP see 310 CMR 4.00, *Timely Action Schedule and Fee Provisions.* For other information call the MA DEP Information Services Section at (617) 338–2255 or the Technical Services Section of the DEP Division of Water Pollution Control at (508) 792–7470.

* * * * *

3. Part III of the permit is revised to read as follows:

Part III. Special Conditions

* * * * *

C. *Set Backs and Best Management Practices*

1. Storm water discharge outfall pipes to public water supplies and other Outstanding Resource Waters shall be removed and set back when dischargers are seeking to increase the discharge or change the site storm water drainage system; all new discharge outfalls must be set back from the receiving water. Receiving swales for outfall pipes shall be prepared to minimize erosion and maximize infiltration prior to discharge. The goal is to infiltrate as much as feasible; infiltration trenches and basins, filter media dikes and/or other BMPs shall be used to meet the goal. Discharges shall employ Best Management Practices (BMPs) for controlling storm water. See *Protecting Water Quality in Urban Areas* by the Minnesota Pollution Control Agency, Division of Water Quality as a reference for BMPs.

2. Storm water discharges to waters that are not classified as Outstanding Resource Waters shall be subject to the requirements of this permit. New discharge outfall pipes shall be designed to be set back from the receiving water when site conditions allow. For existing discharge outfall pipes, when the storm water drainage system is undergoing changes, outfall pipes should be set back from the receiving water. A receiving swale, infiltration trench or basin, filter media dikes or other BMPs should be prepared with the goal to minimize erosion yet maximize infiltration or otherwise improve water quality prior to discharge.

3. All discharges to Outstanding Resource Waters authorized under this permit must be provided the best practical method of treatment to protect and maintain the designated use of the outstanding resource.

B. *Puerto Rico.* Puerto Rico 401 certification special permit conditions revise the permit as follows:

1. Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all areas administered by EPA Region II in the Commonwealth of Puerto Rico.

* * * * *

2. Part III. Special Conditions

* * * * *

B. *Releases in Excess of Reportable Quantities.*

1.

* * * * *

c. The permittee shall submit within 14 calendar days of knowledge of the release a written description of the release (including the type and estimate of the amount of material released), the date that such release occurred, the circumstances leading to the release, and steps to be taken in accordance with paragraph III.B.1.b (above) of this permit to the appropriate EPA Regional Office at the address provided in Part VI.D.1.c (reporting: where to submit) of this permit.

* * * * *

C. *Commonwealth Special Conditions.*

1. If the construction of any treatment system of waters composed entirely of storm water is necessary, the permittee shall obtain the approval from the Environmental Quality Board (EQB) of the engineering report, plans and specifications.

2. The permittee shall operate all air pollution control equipment in compliance with the applicable provisions of the Regulation for the Control of Atmospheric Pollution, as amended, to avoid water pollution as a result of air pollution fallout.

3. The permittee shall submit to EQB with a copy to the Regional Office, the following information regarding its storm water discharge associated with industrial activity: The number of storm water discharges associated with industrial activity covered by this permit, and a drawing indicating the drainage area of each storm water discharge associated with industrial activity outfall and its respective sampling point:

a. For industrial activities that have begun on or before October 1, 1992, the permittee is required to submit the information listed above no later than November 16, 1992.

b. For industrial activities that have begun after October 1, 1992, the permittee is required to submit the information listed above within forty five (45) days of submission of the NOI.

4. The sampling point(s) for the storm water discharges associated with industrial activity shall be labeled with a 18 in. x 12 in. (minimum dimensions) sign that reads as follows: *Punto de Muestreo de Agua de Lluvia.*

3. Part IV. Storm Water Pollution Prevention Plans

* * * * *

A. *Deadlines for Plan Preparation and Compliance.*

1. Except as provided in paragraphs IV.A.3 (oil and gas operations), 4 (facilities denied or rejected from participation in a group application), 5 (special requirements) and 6 (later dates) the plan for a storm water discharge associated with industrial activity that is existing on or before October 1, 1992:

a. shall be prepared on or before April 1, 1993 (and updated as appropriate);

i. No later than April 1, 1993, the permittee shall submit to the EQB with a copy to the Regional Office, a certification stating that the Plan was *developed* in accordance with the requirements established in this permit. All certification, except those prepared by professional engineer licensed in Puerto Rico, shall be submitted with a sworn statement attesting to the professional qualifications of the individual who developed the Plan.

b. shall provide for implementation and compliance with the terms of the plan on or before October 1, 1993;

i. No later than October 1, 1993, the permittee shall submit to EQB with a copy to the Regional Office, a certification stating that the Plan was *implemented* in accordance with the conditions and requirements established in this permit. The certification should be signed by the person who fulfills the signatory requirements in accordance with Part VII.G of this permit.

2. a. The plan for any facility where industrial activity commences after October 1, 1992 shall be prepared, and except as provided elsewhere in this permit, shall provide for compliance with the terms of the plan and this permit on or before the date 30 calendar days after the commencement of industrial activity (and updated as appropriate);

i. Within thirty (30) days of the commencement of industrial activity, the permittee shall submit to EQB with a copy to the Regional Office, a certification stating that the Plan has been *developed and implemented* in accordance with the conditions and requirements established in this permit. The certification should be signed by the person who fulfills the signatory requirements in accordance with Part VII.G of this permit.

3. The plan for storm water discharges associated with industrial activity from an oil and gas exploration, production, processing, or treatment operation or transmission facility that is not required to submit a permit application on or before October 1, 1992, in accordance with 40 CFR 122.26(c)(1)(iii), but after October 1, 1992, has a discharge of a reportable quantity of oil or a hazardous substance for which notification is required pursuant to either 40 CFR 110.6, 40 CFR 117.21 or 40 CFR 302.6, shall be prepared and except as provided elsewhere in this permit, shall provide for compliance with the terms of the plan and this permit on or before the date 30 calendar days after the first knowledge of such release (and updated as appropriate);

a. Within thirty (30) days of the first knowledge of such release, the permittee shall submit to EQB with a copy to the Regional Office, a certification stating that the Plan has been *developed and implemented* in accordance with the conditions and requirements established in this permit. The certification should be signed by the person who fulfills the signatory requirements in accordance with Part VII.G of this permit.

* * * * *

C. *Keeping Plans Current.*

1. The permittee shall amend the plan whenever there is a change in design, construction, operation, or maintenance, which has a significant effect on the potential for the discharge of pollutants to the waters of the United States or if the storm water pollution prevention plan proves to be ineffective in eliminating or significantly minimizing pollutants from sources identified under Part IV.D.2 (description of potential pollutant sources) of this permit, or in otherwise achieving the general objectives of controlling pollutants in storm water discharges associated with industrial activity. Amendments to the plan may be reviewed by EPA in the same manner as Part IV.B (above).

2. In addition to Part IV.C.1 (above), the Plan should be reviewed at least once every three (3) years to determine the need to update the Plan:

a. If no event occurs which requires the modification of the Plan, the engineer or qualified professional who performs the corresponding review must submit to EQB with a copy to the Regional Office, a certification stating the Plan has been reviewed and based upon such review no modification of the Plan has been necessary, or;

b. If events have occurred which require the modification of the Plan, the engineer or qualified professional who performs the corresponding revision must submit to EQB with a copy to the Regional Office, a certification stating the modifications performed to the Plan. As soon as the modifications performed to the Plan are implemented, the person who fulfills the signatory requirements in accordance with Part VII.G of this permit, shall submit to EQB with a copy to the Regional Office, a certification stating that the modifications of the Plan have been implemented.

c. All certification, except those prepared by a professional engineer licensed in Puerto Rico, shall be submitted with a sworn statement attesting to the professional qualifications of the individual who developed the Plan.

* * * * *

4. Part V. Numeric and Narrative Effluent Limitations

* * * * *

B. *All Permittees.* The discharge(s) composed entirely of storm water shall not cause the presence of oil sheen in the receiving body of water.

C. *All Permittees.* The storm water discharges associated with industrial activity covered by this permit, will not cause violation to the applicable water quality standard in the receiving body of water.

5. Part VI. Monitoring and Reporting Requirements

* * * * *

B. *Monitoring Requirements.*

1. *Rain Gauge.*

a. All permittees with storm water discharges associated with industrial activity that have begun on or before October 1, 1992, should install a rain gauge by November 1, 1992.

b. For permittees where industrial activity has begun after October 1, 1992, the rain gauge must be installed on or before the date of submission of the NOI.

c. The permittee must keep daily records of the rain, indicating the date and amount of rainfall (inches in 24 hours). A copy of these records shall be submitted to EQB with a copy to the Regional Office, in accordance with Part VI.D (reporting: where to submit) of this permit. The reports are due the 28th day of January, April, July and October. The first report may cover less than three months and shall be attached to the Discharge Monitoring Reports (DMRs).

2. *Monitoring Requirements.* During the period beginning on the effective date and lasting through the expiration date of this permit, permittees with facilities identified in Parts VI.B.2. a through j. must monitor those storm water discharges identified below at least *quarterly* (4 times per year) except as provided in VI.B.5 (sampling waiver), VI.B.6 (representative discharge), and VI.C.1 (toxicity testing). Permittees with facilities identified in Parts VI.B.2. a through j. (below) must report in accordance with Part VI.D (reporting: where to submit). In addition to the parameters listed below, the permittee

shall provide the date and duration (in hours) of the storm event(s) sampled; rainfall measurements or estimates (in inches) of the storm event which generated the sampled runoff; the duration between the storm event sampled and the end of the previous measurable (greater than 0.1 inch rainfall) storm event; an estimate of the size of the drainage area (in square feet); an estimate of the runoff coefficient of the drainage area (e.g. low (under 40%), medium (40% to 65%) or high (above 65%)); and the total volume (in gallons) of the discharge sampled.

a. *Section 313 of EPCRA Facilities.* In addition to any monitoring required by Parts VI.B.2.b through j., facilities with storm water discharges associated with industrial activity that are subject to Section 313 of EPCRA for chemicals which are classified as "Section 313 water priority chemicals" are required to monitor storm water that is discharged from the facility that comes into contact with any equipment, tank, container or other vessel or area used for storage of a Section 313 water priority chemical, or located at a truck or rail car loading or unloading area where a Section 313 water priority chemical is handled for: Oil and Grease (mg/L); Five Day Biochemical Oxygen Demand (B0D5) (mg/L); Chemical Oxygen Demand (COD) (mg/L); Total Suspended Solids (mg/L); Total Kjeldahl Nitrogen (TKN) (mg/L); Total Phosphorus (mg/L); pH; acute whole effluent toxicity; and any Section 313 water priority chemical for which the facility is subject to reporting requirements under section 313 of the Emergency Planning and Community Right to Know Act of 1986. These facilities are not required to submit the estimate of the size of the drainage area and the estimate of the runoff coefficient of the drainage area.

* * * * *

g. *Airports.* At airports with over 50,000 flight operations per year, facilities with storm water discharges associated with industrial activity from areas where aircraft or airport deicing operations occur (including runways, taxiways, ramps, and dedicated aircraft deicing stations) are required to monitor such storm water that is discharged from the facility when deicing activities are occurring for: Oil and Grease (mg/L); Five Day Biochemical Oxygen Demand (B0D5) (mg/L); Chemical Oxygen Demand (COD) (mg/L); Total Suspended Solids (TSS) (mg/L); pH; and the primary ingredient used in the deicing materials used at the site (e.g. ethylene glycol, urea, etc.).

h. *Coal-fired Steam Electric Facilities.* Facilities with storm water discharges associated with industrial activity from coal handling sites at coal fired steam electric power generating facilities (other than discharges in whole or in part from coal piles subject to storm water effluent guidelines at 40 CFR 423—which are not eligible for coverage under this permit) are required to monitor such storm water that is discharged from the facility for: Oil and grease (mg/L), pH, TSS (mg/L), total recoverable copper (mg/l), total recoverable nickel (mg/l) and total recoverable zinc (mg/l).

i. *Animal Handling/Meat Packing.* Facilities with storm water discharges associated with industrial activity from animal handling areas, manure management (or storage) areas, and production waste management (or storage) areas that are exposed to precipitation at meat packing plants, poultry packing plants, and facilities that manufacture animal and marine fats and oils, are required to monitor such storm water that is discharged from the facility for: Five Day Biochemical Oxygen Demand (B0D5) (mg/L); oil and grease (mg/L); Total Suspended Solids (TSS) (mg/L); Total Kjeldahl Nitrogen (TKN) (mg/L); Total Phosphorus (mg/L); ph; and fecal coliform (counts per 100 Ml).

j. *Additional Facilities.* Facilities with storm water discharges associated with industrial activity described below are subject to storm water monitoring requirements for the following parameters: Oil and Grease (mg/L); Chemical Oxygen Demand (COD) (mg/L); Total Suspended Solids (TSS) (mg/L); pH; and any pollutant limited in an effluent guideline to which the facility is subject. Facilities include those that:

(i) come in contact with storage piles for solid chemicals used as raw materials that are exposed to precipitation at facilities classified as SIC 30 (Rubber and Miscellaneous Plastics Products) or SIC 28 (Chemicals and Allied Products);

(ii) Are from those areas at automobile junkyards with any of the following: (A) over 250 auto/truck bodies with drivelines (engine, transmission, axles, and wheels), 250 drivelines, or any combination thereof (in whole or in parts) are exposed to storm water; (B) over 500 auto/truck units (bodies with or without drivelines in whole or in parts) are stored exposed to storm water; or (C) over 100 units per year are dismantled and drainage or storage of automotive fluids occurs in areas exposed to storm water;

(iii) Come into contact with lime storage piles that are exposed to storm water at lime manufacturing facilities;

(iv) Are from oil handling sites at oil fired steam electric power generating facilities;

(v) Are from cement manufacturing facilities and cement kilns (other than discharges in whole or in part from material storage piles subject to storm water effluent guidelines at 40 CFR 411—which are not eligible for coverage under this permit);

(vi) Are from ready-mixed concrete facilities; or

(vii) Are from ship building and repairing facilities.

3. *Monitoring Requirements for All Other Industries.* During the period beginning on the effective date and lasting through the expiration date of this permit, permittees with facilities that are not identified in Parts VI.B.2. a through j. (above) must monitor those storm water discharges at least *quarterly* (4 times per year) except as provided in VI.B.5 (sampling waiver), and VI.B.6 (representative discharge). Permittees identified in this paragraph are required to monitor such storm water discharges from the facility for: Oil and Grease (mg/L); pH; Five Day Biochemical Oxygen Demand; Biological Oxygen Demand (mg/l); Chemical Oxygen Demand (mg/l) (mg/L); Total Suspended Solids (mg/L); Total Phosphorous (mg/l); Total Kjeldahl Nitrogen (mg/l), Nitrate plus Nitrite as Nitrogen (mg/l); and any pollutant limited in an effluent limitation guideline to which the process wastewater stream at the facility is subject to. Permittees identified in this paragraph must report in accordance with Part VI.D (reporting: where to submit). In addition to the parameters listed in this paragraph, the permittee shall provide the date and duration (in hours) of the storm event(s) sampled; rainfall measurements or estimates (in inches) of the storm event which generated the sampled runoff; the duration between the storm event sampled and the end of the previous measurable (greater than 0.1 inch rainfall) storm event; an estimate of the size of the drainage area (in square feet); and an estimate of the runoff coefficient of the drainage area {e.g. low (under 40%), medium (40% to 65%) or high (above 65%)}.

4. *Sample Type.* Facilities should sample the discharge during normal business hours. In the event that the discharge commences during normal business hours, the permittee shall attempt to meet the sampling requirements specified in this permit even if this requires sampling after

normal business hours. For discharges from holding ponds or other impoundments with a retention period greater than 24 hours, (estimated by dividing the volume of the detention pond by the estimated volume of water discharged during the 24 hours previous to the time that the sample is collected) a minimum of one grab sample may be taken. For all other discharges, data shall be reported for both a grab sample and a composite sample. All such samples shall be collected from the discharge resulting from a storm event that is greater than 0.1 inches in magnitude and that occurs at least 72 hours from the previously measurable (greater than 0.1 inch rainfall) storm event. The grab sample shall be taken during the first thirty minutes of the discharge. If the collection of a grab sample during the first thirty minutes is impracticable, a grab sample can be taken during the first hour of the discharge, and the discharger shall submit with the monitoring report a description of why a grab sample during the first thirty minutes was impracticable. The composite sample shall either be flow-weighted or time-weighted. Composite samples may be taken with a continuous sampler or as a combination of a minimum of three sample aliquots taken in each hour of discharge for the entire discharge or for the first three hours of the discharge, with each aliquot being separated by a minimum period of fifteen minutes. Grab samples only must be collected and analyzed for the determination of pH, cyanide, whole effluent toxicity, fecal coliform, and oil and grease. The permittee must document the conditions under which the storm water samples were taken, how many manual grab samples were taken for the composite sample, and the date of sampling, and must attach this documentation to the sampling results. The permittee should attempt to meet the above protocol and collect samples beginning on the first day of the reporting period in order to ensure compliance with the specified sampling protocol and requirements.

* * * * *

7. *Alternative to WET Parameter.* A discharger that is subject to the monitoring requirements of Parts VI.B.2. a through d. may, in lieu of monitoring for acute whole effluent toxicity, monitor for pollutants identified in Tables II and III of Appendix D of 40 CFR 122 (see Addendum A of this permit) that the discharger knows or has reason to believe are present at the facility site. Such determinations are to be based on reasonable best efforts to identify significant quantities of materials or chemicals present at the facility. Dischargers must also monitor for any additional parameter identified in Parts VI.B.2. a through d.

C.

* * * * *

2.

* * * * *

D. *Reporting: Where to Submit.*

1.

a. Permittees which are required to conduct sampling pursuant to Parts VI.B.2. a through j., or Part VI.B.3, shall monitor samples collected during the sampling periods on a quarterly basis:

i. The first sampling period runs from October 1 through December 31;

ii. The second sampling period runs from January 1 through March 31;

iii. The third sampling period runs from April 1 through June 30; and

iv. The fourth sampling period runs from July 1 through September 30.

b. Such permittees shall submit monitoring results obtained during the reporting period on Discharge Monitoring Report Form(s) postmarked no later than the 28th day of the month following the sampling period. A separate Discharge Monitoring Report Form is required for each sampling period. The first report may cover less than three (3) months.

c. Signed copies of Discharge Monitoring Reports required, individual permit applications and all other reports required herein, shall be submitted to the Director of the NPDES program at the following address: United States EPA, Region II, Water Management Division, (2WM–WPC), Storm Water Staff, 26 Federal Plaza, New York, NY 10278.

2. *Additional Notification.* Signed copies of discharge monitoring reports required, individual permit applications and all other reports required herein, shall be submitted to the following Commonwealth Agency: Water Quality Area, P.R. Environmental Quality Board, P.O. Box 11488, Santurce, Puerto Rico 00910.

* * * * *

6. Part VII. Standard Permit Conditions

* * * * *

G. *Signatory Requirements.* All Notices of Intent, Notices of Termination, storm water pollution prevention plans, reports, certifications or information either submitted to the Director or EQB (and/or the operator of a large or medium municipal separate storm sewer system), or that this permit requires be maintained by the permittee, shall be signed.

* * * * *

2. All reports required by the permit and other information requested by the Director or EQB shall be signed by a person described above or by a duly authorized representative of that person. A person is a duly authorized representative only if:

* * * * *

O. *Proper Operation and Maintenance.* The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit and with the requirements of storm water pollution prevention plans. Proper operation and maintenance also includes adequate laboratory controls and appropriate quality assurance procedures. Proper operation and maintenance requires the operation of backup or auxiliary facilities or similar systems, installed by a permittee only when necessary to achieve compliance with the conditions of the permit. Also, proper operation and maintenance includes, but is not limited, to effective performance based on designed facility removals, adequate funding, effective management, qualified operator staffing, adequate training, adequate laboratory and process controls.

* * * * *

C. *Delaware.* Delaware 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read:

Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all Federal facilities administered by EPA Region 3 in the State of Delaware.

2. Part II of the permit is revised to read as follows:

Part II. Notice of Intent Requirements

* * * * *

C. *Where to Submit.*

1. Facilities which discharge storm water associated with industrial activity must use a NOI form provided by the Director (or photocopy thereof). The form in the Federal Register notice in which this permit was published may be photocopied and used. Forms are also available by calling (703) 821–4823. NOIs must be signed in accordance with Part VII.G (signatory requirements) of this permit. NOIs are to be submitted to the Director of the NPDES program in care of the following address: Storm Water Notice of Intent, PO Box 1215, Newington, VA 22122.

2. A copy of all Notices of Intent (NOIs) shall be submitted to the State of

Delaware at the following address: Water Pollution Control Branch, NPDES Storm Water Program, Delaware Department of Natural Resources and Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, DE 19903.

* * * * *

3. Part IV of the permit is revised to read as follows:

Part IV. Storm Water Pollution Prevention Plan

* * * * *

B. *Signature and Plan Review.*

1. The plan shall be signed in accordance with Part VII.G (signatory requirements), and be retained on-site at the facility which generates the storm water discharge in accordance with Part VI.E (retention of records) of this permit. A copy of the plan, as well as subsequent revisions, shall also be submitted to the State of Delaware at the following address: Water Pollution Control Branch, NPDES Storm Water Program, Delaware Department of Natural Resources and Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, DE 19903.

* * * * *

D. *Contents of the Plan.*

* * * * *

3. Measures and Controls.

* * * * *

d. *Inspections.* In addition to or as part of the comprehensive site evaluation required under Part IV.4 of this permit, qualified facility personnel shall be identified to inspect designated equipment and areas of the facility. The areas where significant materials are stored shall be inspected once per month to determine the availability of significant materials to be contributed to storm water runoff. If it is determined that storm water or storm water runoff is coming in contact with significant materials, the storm water pollution prevention plan shall be amended appropriately to eliminate or reduce the exposure. Also, all structural controls shall be inspected after every rainfall event that results in runoff to confirm that these controls are operating properly. If any structural control is not operating properly, this situation shall be corrected immediately or a time frame developed for this situation. Records of all inspections, amendments to the storm water pollution prevention plan and corrective actions shall be maintained.

4. Part VI of the permit is revised to read:

Part VI. Monitoring and Reporting Requirements

* * * * *

B. *Monitoring Requirements.*

* * * * *

3. *Annual Monitoring Requirements.*

* * * * *

a. *Airports.* At airports with over 50,000 flight operations per year and at all Federal airport facilities in the State of Delaware, storm water discharges associated with industrial activity from areas where aircraft or airport deicing operations occur (including runways, taxiways, ramps, and dedicated aircraft deicing stations) are required to monitor such storm water that is discharged from the facility when deicing activities are occurring for: Oil and Grease (mg/L; Five Day Biochemical Oxygen Demand (BOD5) (mg/L); Chemical Oxygen Demand (COD) (mg/L); Total Suspended Solids (TSS) (mg/L); Ph; Total Petroleum Hydrocarbons (mg/L); and the primary ingredient used in the deicing materials used at the site (e.g. ethylene glycol, urea, etc.).

* * * * *

D. *Reporting: Where to Submit.*

* * * * *

1.

* * * * *

d. Signed copies of discharge monitoring reports required under Parts VI.D.1.a, VI.D.1.b, and VI.D.1.c, individual permit applications and all other reports required herein, shall be submitted to the Director of the NPDES program at the address of the appropriate Regional Office:

Region 3. *DE, DC, MD, PA, VA, WV,* United States EPA, Region III, Water Management Division, (3WM55), Storm Water Staff, 841 Chestnut Building, Philadelphia, PA 19107.

and to the State of Delaware at the following address:

Water Pollution Control Branch, NPDES Storm Water Program, Delaware Department of Natural Resources and Environmental Control, 89 Kings Highway, P.O. Box 1401, Dover, DE 19903.

D. *District of Columbia.* District of Columbia 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read:

Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all areas administered by EPA Region 3 in the District of Columbia.

2. The following sections are added to Part III of the permit:

Part III. Special Conditions

* * * * *

C. *Applicability of District of Columbia Laws.* All Federal facility permittees covered under this permit must meet all applicable District of Columbia laws.

D. *Nitrogen and Phosphorus Removal.* The Director may notify any permittee that additional control measures are required in order to achieve the 40 percent reduction in nitrogen and phosphorus entering the main stem of the Chesapeake Bay by the year 2000, as mandated by the 1987 Chesapeake Bay Agreement.

3. Part V of the permit is revised to read:

Part V. Numeric Effluent Limitations

A. *Coal Pile Runoff.* Any discharge composed of coal pile runoff shall not exceed a maximum concentration for any time of 50 mg/l total suspended solids. Coal pile runoff shall not be diluted with storm water or other flows in order to meet this limitation. The Ph of such discharges shall be within the range of 6.0–8.5. Any untreated overflow from facilities designed, constructed and operated to treat the volume of coal pile runoff which is associated with a 10 year, 24 hour rainfall event shall not be subject to the 50 mg/l limitation for total suspended solids. Failure to demonstrate compliance with these limitations as expeditiously as practicable, but in no case later than October 1, 1995, will constitute a violation of this permit.

4. Part VI of the permit is revised to read:

Part VI. Monitoring and Reporting Requirements

* * * * *

D. *Reporting: Where to Submit.*

* * * * *

1.

* * * * *

d. Signed copies of discharge monitoring reports required under Parts VI.D.1.a, VI.D.1.b, and VI.D.1.c, individual permit applications and all other reports required herein, shall be submitted to the Director of the NPDES program at the address of the appropriate Regional Office:

3. *DE, DC, MD, PA, VA, WV:*

United States EPA, Region III, Water Management Division, (3WM55), Storm Water Staff, 841 Chestnut Building, Philadelphia, PA 19107.

and to the District of Columbia at the address below:

Government of the District of Columbia, Department of Consumer and Regulatory Affairs, Environmental Regulation Administration, 2100 Martin Luther King, Jr. Avenue S.E., Washington, DC 20020.

E. *American Samoa.* American Samoa 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read:

Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all areas administered by EPA Region IX in American Samoa.

2. Part II of the permit is revised to read as follows:

Part II. Notice of Intent Requirements

* * * * *

C. *Where to Submit.*

1. Facilities which discharge storm water associated with industrial activity must use an NOI form provided by the Director (or photocopy thereof). The form in the **Federal Register** notice in which this permit was published may be photocopied and used. Forms are also available by calling (703) 821–4823. NOIs must be signed in accordance with Part VII.G (signatory requirements) of this permit. NOIs are to be submitted to the Director of the NPDES program in care of the following address: Storm Water Notice of Intent, PO Box 1215, Newington, VA 22122.

2. A copy of the NOI shall be submitted to American Samoa Environmental Protection Agency at the same time as submittal to the U.S. EPA.

3. Part IV of the permit is revised to read as follows:

Part IV. Storm Water Pollution Prevention Plan

* * * * *

B. *Signature and Plan Review.*

1. The plan shall be signed in accordance with Part VII.G (signatory requirements), and be retained on-site at the facility which generates the storm water discharge in accordance with Part VI.E (retention of records) of this permit. A copy of the plan shall also be submitted to the American Samoa Environmental Protection Agency for review and approval.

F. *Guam.* Guam 401 certification special permit conditions revise the permit as follows:

1. Part I of the permit is revised to read:

Part I. Coverage Under This Permit

A. *Permit Area.* The permit covers all areas administered by EPA Region IX in Guam.

2. Part II of the permit is revised to read as follows:

Part II. Notice of Intent Requirements

* * * * *

C. *Where to Submit.*

1. Facilities which discharge storm water associated with industrial activity must use an NOI form provided by the Director (or photocopy thereof). The form in the **Federal Register** notice in which this permit was published may be photocopied and used. Forms are also available by calling (703) 821–4823. NOIs must be signed in accordance with Part VII.G (signatory requirements) of this permit. NOIs are to be submitted to the Director of the NPDES program in care of the following address: Storm Water Notice of Intent, PO Box 1215, Newington, VA 22122.

2. A copy of the NOI also shall be submitted to appropriate Government of Guam agencies and the Guam Environmental Protection Agency at the following address: D–107 Harmon Plaza, 130 Rojas St., Harmon, Guam 95911

* * * * *

3. Part IV of the permit is revised to read as follows:

Part IV. Storm Water Pollution Prevention Plan

* * * * *

B. *Signature and Plan Review.*

1. The plan shall be signed in accordance with Part VII.G (signatory requirements), and be retained on-site at the facility which generates the storm water discharge in accordance with Part VI.E (retention of records) of this permit. A copy of the plan shall also be submitted to the Guam Environmental Protection Agency at the following address: D–107 Harmon Plaza, 130 Rojas St., Harmon, Guam 95911.

* * * * *

4. Part VI of the permit is revised to read:

Part VI. Monitoring and Reporting Requirements

* * * * *

D. *Reporting: Where to Submit.*

1.

* * * * *

d. Signed copies of discharge monitoring reports required under Parts VI.D.1.a, VI.D.1.b, and VI.D.1.c, individual permit applications and all other reports required herein, shall be submitted to the Director of the NPDES program at the address of the appropriate Regional Office: United States EPA, Region IX, Water Management Division, (W–5–1), Storm Water Staff, 75 Hawthorne Street, San Francisco, CA 94105, and to the Guam Environmental Protection Agency at the following address: D–107 Harmon Plaza, 130 Rojas St., Harmon, Guam 95911.

NPDES FORM

EPA

United States Environmental Protection Agency
Washington, DC 20460

Notice of Intent (NOI) for Storm Water Discharges Associated with Industrial Activity Under the NPDES General Permit

Submission of this Notice of Intent constitutes notice that the party identified in Section I of this form intends to be authorized by a NPDES permit issued for storm water discharges associated with industrial activity in the State identified in Section II of this form. Becoming a permittee obligates such discharger to comply with the terms and conditions of the permit. ALL NECESSARY INFORMATION MUST BE PROVIDED ON THIS FORM.

I. Facility Operator Information

Name: Phone:

Address: Status of Owner/Operator:

City: State: ZIP Code:

II. Facility/Site Location Information

Name: Is the Facility Located on Indian Lands? (Y or N)

Address:

City: State: ZIP Code:

Latitude: Longitude: Quarter: Section: Township: Range:

III. Site Activity Information

MS4 Operator Name:

Receiving Water Body:

If You are Filing as a Co-permittee, Enter Storm Water General Permit Number: Are There Existing Quantitative Data? (Y or N) Is the Facility Required to Submit Monitoring Data? (1, 2, or 3)

SIC or Designated Activity Code: Primary: 2nd: 3rd: 4th:

If This Facility is a Member of a Group Application, Enter Group Application Number:

If You Have Other Existing NPDES Permits, Enter Permit Numbers:

IV. Additional Information Required for Construction Activities Only

Project Start Date: Completion Date: Estimated Area to be Disturbed (in Acres): Is the Storm Water Pollution Prevention Plan in Compliance with State and/or Local Sediment and Erosion Plans? (Y or N)

V. Certification: I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

EPA Form 3510-6 (8-92)

Instructions - EPA Form 3510-6
Notice Of Intent (NOI) For Storm Water Discharges Associated With Industrial Activity
To Be Covered Under The NPDES General Permit

Who Must File A Notice Of Intent (NOI) Form

Federal law at 40 CFR Part 122 prohibits point source discharges of storm water associated with industrial activity to a water body(ies) of the U.S. without a National Pollutant Discharge Elimination System (NPDES) permit. The operator of an industrial activity that has such a storm water discharge must submit a NOI to obtain coverage under the NPDES Storm Water General Permit. If you have questions about whether you need a permit under the NPDES Storm Water program, or if you need information as to whether a particular program is administered by EPA or a state agency, contact the Storm Water Hotline at (703) 821-4823.

Where To File NOI Form

NOIs must be sent to the following address:

Storm Water Notice of Intent
PO Box 1215
Newington, VA 22122

Completing The Form

You must type or print, using upper-case letters, in the appropriate areas only. Please place each character between the marks. Abbreviate if necessary to stay within the number of characters allowed for each item. Use one space for breaks between words, but not for punctuation marks unless they are needed to clarify your response. If you have any questions on this form, call the Storm Water Hotline at (703) 821-4823.

Section I Facility Operator Information

Give the legal name of the person, firm, public organization, or any other entity that operates the facility or site described in this application. The name of the operator may or may not be the same as the name of the facility. The responsible party is the legal entity that controls the facility's operation, rather than the plant or site manager. Do not use a colloqual name. Enter the complete address and telephone number of the operator.

Enter the appropriate letter to indicate the legal status of the operator of the facility.

F = Federal
S = State
M = Public (other than federal or state)
P = Private

Section II Facility/Site Location Information

Enter the facility's or site's official or legal name and complete street address, including city, state, and ZIP code. If the facility or site lacks a street address, indicate the state, the latitude and longitude of the facility to the nearest 15 seconds, or the quarter, section, township, and range (to the nearest quarter section) of the approximate center of the site.

Indicate whether the facility is located on Indian lands.

Section III Site Activity Information

If the storm water discharges to a municipal separate storm sewer system (MS4), enter the name of the operator of the MS4 (e.g., municipality name, county name) and the receiving water of the discharge from the MS4. (A MS4 is defined as a conveyance or system of conveyances (including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, man-made channels, or storm drains) that is owned or operated by a state, city, town, borough, county, parish, district, association, or other public body which is designed or used for collecting or conveying storm water.)

If the facility discharges storm water directly to receiving water(s), enter the name of the receiving water.

If you are filing as a co-permittee and a storm water general permit number has been issued, enter that number in the space provided.

Indicate whether or not the owner or operator of the facility has existing quantitative data that represent the characteristics and concentration of pollutants in storm water discharges.

Indicate whether the facility is required to submit monitoring data by entering one of the following:

1 = Not required to submit monitoring data;
2 = Required to submit monitoring data;
3 = Not required to submit monitoring data; submitting certification for monitoring exclusion

Those facilities that must submit monitoring data (e.g., choice 2) are: Section 313 EPCRA facilities; primary metal industries; land disposal units/incinerators/BIFs; wood treatment facilities; facilities with coal pile runoff; and, battery reclaimers.

List, in descending order of significance, up to four 4-digit standard industrial classification (SIC) codes that best describe the principal products or services provided at the facility or site identified in Section II of this application.

For industrial activities defined in 40 CFR 122.26(b)(14)(i)-(xi) that do not have SIC codes that accurately describe the principal products produced or services provided, the following 2-character codes are to be used:

HZ = Hazardous waste treatment, storage, or disposal facilities, including those that are operating under interim status or a permit under subtitle C of RCRA [40 CFR 122.26 (b)(14)(iv)];
LF = Landfills, land application sites, and open dumps that receive or have received any industrial wastes, including those that are subject to regulation under subtitle D of RCRA [40 CFR 122.26 (b)(14)(v)];
SE = Steam electric power generating facilities, including coal handling sites [40 CFR 122.26 (b)(14)(vii)];
TW = Treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage, treatment, recycling, and reclamation of municipal or domestic sewage [40 CFR 122.26 (b)(14)(ix)]; or,
CO = Construction activities [40 CFR 122.26 (b)(14)(x)].

If the facility listed in Section II has participated in Part 1 of an approved storm water group application and a group number has been assigned, enter the group application number in the space provided.

If there are other NPDES permits presently issued for the facility or site listed in Section II, list the permit numbers. If an application for the facility has been submitted but no permit number has been assigned, enter the application number.

Section IV Additional Information Required for Construction Activities Only

Construction activities must complete Section IV in addition to Sections I through III. Only construction activities need to complete Section IV.

Enter the project start date and the estimated completion date for the entire development plan.

Provide an estimate of the total number of acres of the site on which soil will be disturbed (round to the nearest acre).

Indicate whether the storm water pollution prevention plan for the site is in compliance with approved state and/or local sediment and erosion plans, permits, or storm water management plans.

Section V Certification

Federal statutes provide for severe penalties for submitting false information on this application form. Federal regulations require this application to be signed as follows:

For a corporation: by a responsible corporate officer, which means: (i) president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision making functions, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding $25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;

For a partnership or sole proprietorship: by a general partner or the proprietor; or

For a municipality, state, Federal, or other public facility: by either a principal executive officer or ranking elected official.

Paperwork Reduction Act Notice

Public reporting burden for this application is estimated to average 0.5 hours per application, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate, any other aspect of the collection of information, or suggestions for improving this form, including any suggestions which may increase or reduce this burden to: Chief, Information Policy Branch, PM-223, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, or Director, Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503.

Appendix D—Notice of Termination and Instructions

Please See Instructions Before Completing This Form

Form Approved. OMB No. 2040-0086 Approval expires: 8-31-95

NPDES FORM

EPA

United States Environmental Protection Agency
Washington, DC 20460

Notice of Termination (NOT) of Coverage Under the NPDES General Permit for Storm Water Discharges Associated with Industrial Activity

Submission of this Notice of Termination constitutes notice that the party identified in Section II of this form is no longer authorized to discharge storm water associated with industrial activity under the NPDES program. ALL NECESSARY INFORMATION MUST BE PROVIDED ON THIS FORM.

I. Permit Information

NPDES Storm Water General Permit Number: _____

Check Here if You are No Longer the Operator of the Facility: ☐

Check Here if the Storm Water Discharge is Being Terminated: ☐

II. Facility Operator Information

Name: _____ Phone: _____

Address: _____

City: _____ State: _____ ZIP Code: _____

III. Facility/Site Location Information

Name: _____

Address: _____

City: _____ State: _____ ZIP Code: _____

Latitude: _____ Longitude: _____ Quarter: _____ Section: _____ Township: _____ Range: _____

IV. Certification: I certify under penalty of law that all storm water discharges associated with industrial activity from the identified facility that are authorized by a NPDES general permit have been eliminated or that I am no longer the operator of the facility or construction site. I understand that by submitting this Notice of Termination, I am no longer authorized to discharge storm water associated with industrial activity under this general permit, and that discharging pollutants in storm water associated with industrial activity to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by a NPDES permit. I also understand that the submittal of this Notice of Termination does not release an operator from liability for any violations of this permit or the Clean Water Act.

Print Name: _____ Date: _____

Signature: _____

Instructions for Completing Notice of Termination (NOT) Form

Who May File a Notice of Termination (NOT) Form

Permittees who are presently covered under the EPA issued National Pollutant Discharge Elimination System (NPDES) General Permit for Storm Water Dicharges Associated with Industrial Activity may submit a Notice of Termination (NOT) form when their facilities no longer have any storm water discharges associated with industrial activity as defined in the storm water regulations at 40 CFR 122.26 (b)(14), or when they are no longer the operator of the facilities.

For construction activities, elimination of all storm water discharges associated with industrial activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time, or that all storm water discharges associated with industrial activity from the construction site that are authorized by a NPDES general permit have otherwise been eliminated. Final stabilization means that all soil-disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geotextiles) have been employed.

Where to File NOT Form

Send this form to the the following address:

Storm Water Notice of Termination
P.O. Box 1185
Newington, VA 22122

Completing the Form

Type or print, using upper-case letters, in the appropriate areas only. Please place each character between the marks. Abbreviate if necessary to stay within the number of characters allowed for each item. Use only one space for breaks between words, but not for punctuation marks unless they are needed to clarify your response. If you have any questions about this form, call the Storm Water Hotline at (703) 821-4823.

PLEASE SEE REVERSE OF THIS FORM FOR FURTHER INSTRUCTIONS

EPA Form 3510-7 (8-92)

Instructions - EPA Form 3510-7
Notice of Termination (NOT) of Coverage Under The NPDES General Permit for Storm Water Discharges Associated With Industrial Activity

Section I Permit Information

Enter the existing NPDES Storm Water General Permit number assigned to the facility or site identified in Section III. If you do not know the permit number, contact the Storm Water Hotline at (703) 821-4823.

Indicate your reason for submitting this Notice of Termination by checking the appropriate box:

If there has been a change of operator and you are no longer the operator of the facility or site identified in Section III, check the corresponding box.

If all storm water discharges at the facility or site identified in Section III have been terminated, check the corresponding box.

Section II Facility Operator Information

Give the legal name of the person, firm, public organization, or any other entity that operates the facility or site described in this application. The name of the operator may or may not be the same name as the facility. The operator of the facility is the legal entity which controls the facility's operation, rather than the plant or site manager. Do not use a colloquial name. Enter the complete address and telephone number of the operator.

Section III Facility/Site Location Information

Enter the facility's or site's official or legal name and complete address, including city, state and ZIP code. If the facility lacks a street address, indicate the state, the latitude and longitude of the facility to the nearest 15 seconds, or the quarter, section, township, and range (to the nearest quarter section) of the approximate center of the site.

Part V

Department of the Interior

Fish and Wildlife Service

50 CFR Part 20

Migratory Bird Hunting: Regulations on Certain Federal Indian Reservations and Ceded Lands for the 1992-93 Late Season; Final Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

RIN 1018-AA24

Migratory Bird Hunting: Migratory Bird Hunting Regulations on Certain Federal Indian Reservations and Ceded Lands for the 1992-93 Late Season

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: This rule prescribes special late season migratory bird hunting regulations for certain tribes on Federal Indian reservations, off-reservation trust lands and ceded lands. This is in response to tribal requests for Service recognition of their authority to regulate hunting under established guidelines. This rule is necessary to allow establishment of season bag limits and, thus, harvest at levels compatible with populations and habitat conditions.

EFFECTIVE DATE: This rule takes effect on September 26, 1992.

ADDRESSES: Comments received on the tribal proposals and special hunting regulations are available for public inspection during normal business hours in Room 634—Arlington Square Building, 4401 N. Fairfax Drive, Arlington, VA. Communications regarding the documents should be addressed to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, room 634-Arlington Square, Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Dr. Keith A. Morehouse, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, room 634—Arlington Square, Washington, DC 20240 (703/358-1714).

SUPPLEMENTARY INFORMATION: The Migratory Bird Treaty Act of July 3, 1918 (40 Stat. 755; 16 U.S.C. 703 *et seq.*), authorizes and directs the Secretary of the Interior, having due regard for the zones of temperature and for the distribution, abundance, economic value, breeding habits, and times and lines of flight of migratory game birds, to determine when, to what extent, and by what means such birds or any part, nest or egg thereof may be taken, hunted, captured, killed, possessed, sold, purchased, shipped, carried, exported or transported.

In the August 7, 1992, **Federal Register** (57 FR 35446), the U.S. Fish and Wildlife Service (Service) proposed special migratory bird hunting regulations for the 1992-93 hunting season for certain Indian tribes, under the guidelines described in the June 4, 1985, **Federal Register** (50 FR 23467). The guidelines were developed in response to tribal requests for Service recognition of their reserved hunting rights, and for some tribes, recognition of their authority to regulate hunting by both tribal members and nonmembers on their reservations. The guidelines include possibilities for: (1) On-reservation hunting by both tribal members and nonmembers, with hunting by nontribal members on some reservations to take place within Federal frameworks but on dates different from those selected by the surrounding State(s); (2) on-reservation hunting by tribal members only, outside of usual Federal frameworks for season dates and length, and for daily bag and possession limits; and (3) off-reservation hunting by tribal members on ceded lands, outside of usual framework dates and season length, with some added flexibility in daily bag and possession limits. In all cases, the regulations established under the guidelines would have to be consistent with the March 10-September 1 closed season mandated by the 1916 Migratory Bird Treaty with Canada. Tribes that desired special hunting regulations in the 1992-93 hunting season were requested in the May 8, 1992, **Federal Register** (57 FR 19863) to submit a proposal that included details on: (1) Requested season dates and other regulations to be observed; (2) harvest anticipated under the requested regulations; (3) methods that will be employed to measure or monitor harvest; (4) steps that will be taken to limit level of harvest, where it could be shown that failure to limit such harvest would impact seriously on the migratory bird resource; and (5) tribal capabilities to establish and enforce migratory bird hunting regulations. No action is required if a tribe wishes to observe the hunting regulations that are established by the State(s) in which an Indian reservation is located. The guidelines have been used successfully since the 1985-86 hunting season, and they were made final beginning with the 1988-89 hunting season (August 18, 1988; 53 FR 31612).

Although the August 7, 1992, proposed rule included generalized regulations for both early and late season hunting, this rulemaking addresses only the late season proposals. Early season hunting was addressed in the rulemaking published in the **Federal Register** on September 1, 1992 (57 FR 40032). As a general rule, early seasons begin during September each year and have a primary emphasis on such species as mourning and white-winged dove. Late seasons are those that begin October 1 or later each year and have a primary emphasis on waterfowl.

Also, in the August 7, 1992, proposed rule, the Service pointed out that duck hunting regulations likely would continue to be restrictive because of little overall improvement in duck population status from last year. Hunting regulations were restrictive last year for the same reason. Recently completed production surveys on the breeding ground and the projected fall flight forecast indicate that the continental fall flight of ducks in 1992, statistically, is unchanged from the low level of last year (62 million vs. 61 million in 1992 and 1991, respectively). Thus, the established frameworks are conservative and late season duck hunting regulations are restrictive again during the 1992-93 hunting season.

Comments and Issues Concerning Tribal Proposals

For the 1992-93 migratory bird hunting season, the Service received requests from 11 tribes and/or Indian groups that followed the June 4, 1985, guidelines and are appropriate for rulemaking. Some of the proposals submitted by the tribes have both early and late season elements. However, as noted earlier, only those with late season proposals are included in this final rulemaking; all 11 tribes have proposals with late seasons.

Comments and revised proposals received since publication of the early season final rule are addressed in the following section.

Great Lakes Indian Fish and Wildlife Commission

In a letter dated August 17, 1992, the Wisconsin Department of Natural Resources (WIDNR) generally concurred "* * * with the proposals of the Great Lakes Indian Fish and Wildlife Commission except for those items noted in our letter to you of 9 July 1992. Further, we do not support the 'no daily bag' limit proposed by the Commission for the Wisconsin/Minnesota Zone. We recognize that the harvest by member tribes of the Voight Intertribal Task Force is small. However, the proposed bag limit would be inconsistent with the season recommendations of your Office of Migratory Bird Management.

"Finally, we again note that the season framework for white-fronted geese exceeds the 70 days authorized in the Mississippi Flyway. In 1991, Wisconsin was denied a season length in excess of 70 days despite the fact that our state harvest is minimal."

In the July 9, 1992, letter referenced above, the WIDNR made "no objections" to the proposed opening dates of duck and goose season but reserved the right to modify their position pending breeding ground survey results. The State also made "no objections" to the earlier woodcock opening and requested that tribal members honor the State's noon opening of the shooting hours on the first day of the State's duck season and comply with open-water hunting restrictions.

The Service's response to the concerns in the August 17 letter is as follows: The bag limit issue was resolved in the early season final rule when the Service denied the Great Lakes Indian Fish and Wildlife Commission their request, and they were held to the same bag limit as last year. With regard to the slightly longer white-fronted goose season (79 days) than the 70 days accorded Mississippi Flyway States, the Commission request was approved because it falls within the limits of the guidelines established by the Service for approving tribal migratory bird hunting regulations. Also, the Service believes that the anticipated level of harvest by tribal members will have little biological significance as concerns white-fronted goose numbers. Indeed, the State advised the Service in 1991 that nontribal hunters had harvested only 65 white-fronted geese in Wisconsin in the previous 5 years.

White Mountain Apache Tribe

In the September 1, 1992, early season final rule, the Service noted that the White Mountain Apache Tribe had revised their proposed dove season dates to be in compliance with the early season framework for Arizona. The Service has since received a letter from the Arizona Game and Fish Department (AGFD), dated August 24, 1992, that calls the Service's attention to the earlier proposed mourning dove season/framework situation. However, as indicted above, this matter has been resolved by the tribe. In the August 24, 1992, letter, the AGFD also raised the issue that the Arizona band-tailed pigeon population appears to be showing a significant decline as indicated by harvest and hunter success rate data. The AGFD expressed a concern about the apparent population trend and stated that it had reduced its season from 30 to 10 days. The AGFD noted that both the Navajo and White Mountain Tribes have 30-day band-tailed pigeon seasons but did not know if the same populations trends are occurring in these areas. The Service response is that the number of hunters reportedly hunting band-tailed pigeons and the number of birds harvested on the reservations is not very great. For example, the Navajo Nation estimates less than 100 band-tailed pigeons harvested over a season. However, the Service will initiate dialogue with both the White Mountain Apache Tribe and the Navajo Nation to attempt to determine the health of the band-tailed pigeon populations and specific harvest in their respective areas.

Crow Creek Sioux Tribe, Crow Creek Indian Reservation, Fort Thompson, South Dakota, and the Yankton Sioux Tribe, Marty, South Dakota

In an August 24, 1992, letter to the Service, the State of South Dakota, Office of Attorney General, responded to the proposals for the Crow Creek and Yanton Sioux Tribes. In this letter, the State of South Dakota requests clarification for the tribal lands affected by the rulemaking as follows:

"Both the Crow Creek and Yankton proposals appear to apply only to lands held in trust. Assuming that this is the case, the State of South Dakota has no objection to adoption of the rule.

"Assuming, however, that any of the land affected by the rule is *not* trust land, the State objects to that part of the regulation which does affect non-trust land."

The Service's response is that the codified regulations for these two tribes contain language within the General Conditions sections that specifies the application is only to "tribal and trust lands within the external boundaries of the reservation."

It bears repeating, in the context of an overall fish and wildlife assistance and trust responsibility, that the Service deals with the tribes on a government-to-government basis. The tribes are not represented on the State-constituted Flyway Councils, which make framework and other regulatory recommendations to the Service. Migratory bird harvest by tribal members is generally insignificant, in terms of numbers. However, the tribes can and often do cooperate fully with the States in regulations established on reservation and other lands. The Service encourages the States and the tribes to cooperate with each other, and with the Service, to establish harvest regulations that are in the best interests of the migratory bird resource. The Service utilizes established guidelines for determining the reasonableness of tribal regulations requests given waterfowl population conditions in any given hunting year.

In summary, this rule amends § 20.110 of 50 CFR to make current for the late 1992–93 migratory bird hunting season the regulations that will apply on Federal Indian reservations, off-reservation trust lands and ceded lands. These regulations take into account the need to continue the reduced harvest of ducks.

Administrative Actions NEPA Consideration

Pursuant to the requirements of section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(C)), the "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES–75–74)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the Federal Register on June 13, 1975 (40 FR 25241). A supplement to the final environmental statement, the "Final Supplemental Environmental Impact Statement: Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (SEIS 88–14)" was filed on June 9, 1988, and a notice of availability was published in the Federal Register on June 16, 1988 (53 FR 22582), and June 17, 1988 (53 FR 22727). In addition, an August 1985 environmental assessment titled "Guidelines for Migratory Bird Hunting Regulations on Federal Indian Reservations and Ceded Lands" is available from the service.

Nontoxic Shot Regulations

On May 13, 1991 (56 FR 22100), the Service published the final rulemaking on nontoxic shot zoning for the 1991–92 hunting season and future years. This rule, titled "Nationwide Requirement To Use Nontoxic Shot for the Taking of Waterfowl, Coots and Certain Other Species Beginning in the 1991–92 Season," provides that all of the waterfowl harvest beginning in that year will occur in nontoxic shot zones. This final rule also reminded hunters that nontoxic shot use is required in all U.S. offshore territorial waters and for the taking of captive-reared mallards on shooting preserves, in field trials and for bona fide dog training activities. All of the final hunting regulations covered by this rulemaking are in compliance with the Service's nontoxic shot requirements.

Endangered Species Act Consideration

Section 7 of the Endangered Species Act provides that, "The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act" (and) shall "insure that any action

authorized, funded or carried out * * * is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of [critical] habitat * * *" Consequently, the Service initiated section 7 consultation under the Endangered Species Act for the 1992–93 migratory bird hunting season regulations, which includes those that apply on Federal Indian reservations and ceded lands.

In a July 2, 1992, biological opinion, the Division of Endangered Species advised the Office of Migratory Bird Management of its conclusions that the proposed action is not likely to jeopardize either listed species or critical habitat. The Service's biological opinions resulting from its consultation under section 7 of the Endangered Species Act may be inspected by the public in either the Division of Endangered Species or the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, room 634—Arlington Square Building, 4401 N. Fairfax Drive, Arlington, VA, or write Director/MBMO, U.S. Fish and Wildlife Service, 634 ARLSQ, Main Interior Building, Washington, DC 20240.

Regulatory Flexibility Act, Executive Orders 12291, 12612, and 12630, the Civil Justice Reform Executive Order (Executive Order 12778) and the Paperwork Reduction Act

In the May 8, 1992 **Federal Register** (57 FR 19865), the Service reported measures it had undertaken to comply with requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq.*) and Executive Order 12291, "Federal Regulation," of February 17, 1981. These included preparing a Determination of Effects and revising the Final Regulatory Impact Analysis, and publication of a summary of the latter. These regulations have been determined to be major under Executive Order 12291, and they have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act. It has been determined that this rule will not involve the taking of any property rights, as defined in Executive Order 12630, and will not have any significant federalism effects, under Executive Order 12612. These determinations are detailed in the aforementioned documents which, with other documentation, are available on request from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Room 634—Arlington Square, Washington, DC 20240. The Department of the Interior has certified to the Office of Management and Budget that these proposed regulations meet the applicable standards provided in sections 2(a) and 2(b)(2) of Executive Order 12778. These regulations contain no collection of information subject to Office of Management and Budget review under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*).

Memorandum of Law

The Service's Memorandum of Law, required by section 4 of Executive Order 12291, was published in the **Federal Register** on August 21, 1992 (57 FR 38202).

Authorship

The primary author of this final rule is Dr. Keith A. Morehouse, Office of Migratory Bird Management, working under the direction of Thomas J. Dwyer, Chief.

Regulations Promulgation

The rulemaking process for migratory bird hunting must, by its very nature, operate under severe time constraints. However, the Service is of the view that every attempt should be made to give the public the greatest possible opportunity to comment on the regulations. Thus, when the proposed hunting regulations for certain tribes were published on August 7, 1992, the Service established the longest possible period for public comments. In doing this, the Service recognized that time would be of the essence. However, the comment period provided the maximum amount of time possible while ensuring that this final rule would be published before the late hunting season beginning on September 26, 1992.

Under the authority of the Migratory Bird Treaty Act of July 3, 1918, as amended (40 Stat. 755; 16 U.S.C. 703 *et seq.*), the Service prescribes final hunting regulations for certain tribes on Federal Indian reservations (including off-reservation trust lands), and ceded lands. The regulations specify the species to be hunted and establish season dates, bag and possession limits, season length, and shooting hours for migratory game birds other than waterfowl.

Therefore, for the reasons set out above, the Service finds that "good cause" exists, within the terms of 5 U.S.C. 553(d)(3) of the Administrative Procedure Act, and this final rule will take effect on September 26, 1992.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

Accordingly, part 20, subchapter B, chapter I of title 50 of the Code of Federal Regulations is amended as follows:

PART 20—[AMENDED]

1. The authority citation for part 20 continues to read as follows:

Authority: Migratory Bird Treaty Act, as amended (16 U.S.C. 703 *et seq.*).

Editorial Note: The following annual hunting regulations provided for by § 20.110 of 50 CFR Part 20 will not appear in the Code of Federal Regulations because of their seasonal nature.

2. Section 20.110 is revised to read as follows:

§ 20.110 Seasons, limits and other regulations for certain Federal Indian reservations, Indian Territory, and ceded lands.

(a) Crow Creek Sioux Tribe, Crow Creek Indian Reservation, Fort Thompson, South Dakota (Tribal Members and Nonmembers)

Ducks

Season Dates: Begin October 17, end November 29, 1992.

Daily Bag and Possession Limits: The daily bag limit is 3, of which: no more than 2 may be mallards (of which only 1 may be a female mallard); only 1 may be a redhead; only 1 may be a pintail; only 2 may be wood ducks; and only 1 may be a hooded merganser. The possession limit is 6, the makeup of which may be no more than twice each of the above.

Dark Geese

Canada, Brant and White-fronted Geese:

Season Dates: Begin October 10, 1992, end January 3, 1993.

Daily Bag and Possession Limits: The daily bag limit is 1 Canada goose and 1 white-fronted goose (or brant), except in Canada Goose Unit 2 the daily bag beginning November 7 may include 2 Canada geese or 1 Canada goose and 1 white-fronted goose (or brant). The possession limit is twice what is provided for in the daily bag limit.

Light Geese

Season Dates: Begin October 10, 1992, end January 3, 1993.

Daily Bag and Possession Limits: The daily bag limit is 7, and the possession limit is 14.

General Conditions: The waterfowl hunting regulations established by this final rule apply only to tribal and trust lands within the external boundaries of the reservation. Tribal and nontribal hunters will comply with basic Federal migratory bird hunting regulations in 50 CFR Part 20 regarding shooting hours

and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Special regulations established by the Crow Creek Sioux Tribe also apply on the reservation.

(b) Great Lakes Indian Fish and Wildlife Commission, Odanah, Wisconsin (Tribal Members Only)

Ducks

Michigan, 1842 Treaty Zone

Season Dates: Begin October 3, end November 1, 1992.

Daily Bag Limit: The daily bag limit is 3.

Michigan, 1836 Treaty Zone

Season Dates: North Zone, begin October 3 and end November 1, 1992; Middle Zone, begin October 10 and end November 8; South Zone, begin October 17 and end November 12, 1992, then begin November 27 and end November 29, 1992.

Daily Bag Limit: The daily bag limit is 3.

Mergansers

Michigan, 1842 Treaty Zone

Season Dates: Begin October 3, end November 1, 1992.

Daily Bag Limit: The daily bag limit is 5, including no more than 1 hooded merganser.

Michigan, 1836 Treaty Zone

Season Dates: North Zone, begin October 3 and end November 1, 1992; Middle Zone, begin October 10 and end November 8, 1992; South Zone, begin October 17 and end November 12, and then begin November 27 and end November 29, 1992.

Daily Bag Limit: The daily bag limit is 5, including no more than 1 hooded merganser.

Canada Geese

Michigan, 1842 Treaty Zone

Season Dates: Begin September 26, end November 14, 1992.

Daily Bag Limit: The daily bag limit is 5.

Michigan, 1836 Treaty Zone

Season Dates: Same season dates and length selected by the State of Michigan for each zone in this area.

Daily Bag Limit: The daily bag limit is 1 or 2, depending upon the State hunting zone in which the Treaty Zone is located; see State/tribal regulations.

Other Geese (Blue, Snow, and White-fronted)

Michigan, 1842 Treaty Zone

Season Dates: Same season dates and length selected by the State of Michigan for each zone in this area.

Daily Bag Limit: The daily bag limit is 7 minus the number of Canada geese taken, including no more than 2 white-fronted.

Michigan, 1836 Treaty Zone

Season Dates: Same season dates and length selected by the State of Michigan for each zone in this area.

Daily Bag Limit: The daily bag limit is 7 minus the number of Canada geese taken, including no more than 2 white-fronted.

Coots and Common Moorhens (Gallinule)

Michigan, 1842 Treaty Zone

Season Dates: North Zone, begin October 3 and end November 1, 1992; Middle Zone, begin October 10 and end November 8, 1992; South Zone, begin October 17 and end November 12, then begin November 27 and end November 29, 1992.

Daily Bag Limit: The daily bag limit is 20, singly or in the aggregate.

Michigan, 1836 Treaty Zone

Season Dates: North Zone, begin October 3 and end November 1, 1992; Middle Zone, begin October 10 and end November 8, 1992; South Zone, begin October 17 and end November 12, then begin November 27 and end November 29, 1992.

Daily Bag Limit: The daily bag limit is 15.

General Conditions: (1) While hunting waterfowl, a tribal member must carry on his/her person a valid tribal waterfowl hunting permit.

(2) Except as otherwise noted, tribal members will be required to comply with tribal codes that will be no less restrictive than the provisions of Chapter 10 of the Model Off-Reservation Code. This Model Code was the subject of the stipulation in *Lac Courte Oreilles* v. *State of Wisconsin* regarding migratory bird hunting. Except as modified herein, these migratory bird hunting. Except as modified herein, these amended regulations parallel Federal requirements, 50 CFR Part 20, and shooting hour regulations in 50 CFR Part 20, subpart K, as to hunting methods, transportation, sale, exportation and other conditions generally applicable to migratory bird hunting.

(3) Tribal members in each zone will comply with State regulations providing for closed and restricted waterfowl hunting areas.

(4) Minnesota and Michigan—Duck Blinds and Decoys. Tribal members hunting in Minnesota will comply with tribal codes that contain provisions parallel to M.S. 100.29, Subd. 18 (duck blinds and decoys). Tribal members hunting in Michigan will comply with tribal codes that contain provisions parallel to Michigan law regarding duck blinds and decoys.

(5) Possession limits for each species are double the daily bag limit, except on the opening day of the season, when the possession limit equals the daily bag limit, *unless otherwise specified.*

(6) Possession limits are applicable only to transportation and do not include birds which are cleaned, dressed, and at a member's primary residence. For purposes of enforcing bag and possession limits, all migratory birds in the possession or custody of tribal members on ceded lands will be considered to have been taken on those lands unless tagged by a tribal or State conservation warden as having been taken on-reservation. In Wisconsin, such tagging will comply with Sec. NR 19.12, Wis. Adm. Code. All migratory birds which fall on reservation lands will not count as part of any off-reservation bag or possession limit.

(c) Jicarilla Apache Tribe, Jicarilla Indian Reservation, Dulce, New Mexico (Tribal Members and Nonmembers)

Ducks, (Including Mergansers)

Season Dates: Begin October 3, end November 30, 1992.

Daily Bag and Possession Limits: The daily bag limit is 4, and the possession limit is 8. No canvasbacks are allowed in the bag.

Geese. The 1992–93 goose season is closed.

General Conditions. Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR Part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or older must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Special regulations established by the Jicarilla Tribe also apply on the reservation.

(d) Navajo Indian Reservation, Window Rock, Arizona (Tribal Members and Nonmembers)

Ducks

Season Dates: Begin October 1, end November 28, 1992.

Daily Bag and Possession Limits: The bag limit is 4. Of this number: no more than 1 may be a pintail; no more than 2 may be canvasbacks or 2 may be redheads, or one of each of these species; and may include up to 3 mallards, only one of which may be a female or Mexican duck. The possession limit is twice the daily bag limit for each species.

Canada Geese

Season Dates: Begin October 3, 1992, end January 3, 1993.

Daily Bag and Possession Limits: The bag limit is 2, and the possession limit is restricted to the daily bag (2).

Coots and Common Moorhens

Season Dates: Begin October 1, end November 28, 1992.

Daily Bag and Possession Limits: The daily bag limit is 25 singly or in the aggregate, and the possession limit is restricted to the daily bag limit (25).

General Conditions: Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20, regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or over must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (duck stamp) signed in ink cross the face. Special regulations established by the Navajo Nation also apply on the reservation.

(e) Oneida Tribe of Indians of Wisconsin, Oneida, Wisconsin, Oneida, Wisconsin (Tribal Members)

Ducks

Season Dates: Begin October 3, end October 11, 1992; begin October 17, end November 6, 1992.

Daily Bag and Possession Limits: The daily bag limit is 3, and the possession limit is 6.

General Conditions: Tribal members are required to have their tribal Identification Card and Sportsman License on their person while hunting on the reservation. Other regulations are enforced by the Oneida Conservation Department within the original reservation boundaries.

(f) Penobscot Indian Nation, Old Town, Maine (Tribal Members and Non-Tribal Hunters)

Ducks

Season Dates: (North Zone) Begin October 5, end October 23, 1992; begin November 11, end November 21, 1992.

Daily Bag and Possession Limits: The daily bag limit is 3, and the possession limit is 6.

Geese

Canada

Season Dates: Begin October 1, end November 21, 1992; begin November 25, end December 12, 1992.

Daily Bag and Possession Limits: The daily bag limit is 3, and the possession limit is 6.

White

Season Dates: Begin October 1, 1992, end January 15, 1993.

Daily Bag and Possession Limits: The daily bag limit is 5, and the possession limit is 10.

General Conditions: (1) When the sustenance and Maine's general waterfowl season overlap, the daily bag limit for tribal members is the smaller of the two daily bag limits.

(2) Tribal members shall comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20, except that when sustenance hunting tribal members shall be permitted to hunt one-half hour before sunrise to one-half hour after sunset.

(3) Each tribal waterfowl hunter 16 years of age or over must possess and carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp), signed in ink across the face.

(4) Special regulations established by the Penobscot Indian Nation also apply in Penobscot Indian Territory.

(g) Confederated Salish and Kootenai Tribes, Flathead Indian Reservation, Pablo, Montana (Nontribal Members)

Ducks (Including Mergansers)

Season Dates: Begin October 3, end October 18; begin November 3, end November 29, 1992; and begin December 19, end January 3, 1993.

Daily Bag and Possession Limits: The daily bag limit is 4, and the possession limit is 8.

Coots

Season Dates: Begin October 3, end October 18; begin November 3, end November 29, 1992; and begin December 19, end January 3, 1993.

Daily Bag and Possession Limits: The daily bag limit is 25, and the possession limit is limited to the daily bag (25).

Geese

Dark

Season Dates: Begin September 28, end December 29, 1992.

Daily Bag and Possession Limits: The daily bag limit is 2, and the possession limit is 4.

White

Season dates: Begin September 28, end December 29, 1992.

Daily Bag and Possession Limits: The daily bag limit is 3, and the possession limit is 6.

Special Exception For Geese: A special early closure for goose hunting may begin at sunset, November 29, 1992, within the following area or some portion therein: Beginning at Polson, thence north along U.S. Highway 93 to Irvine Flats Road, thence west along Irvine Flats Road to Irvine Divide, thence south along the crest of the Salish Mountains Divide to its intersection with the Ronan-Hot Springs Road, thence east to Sloan's Bridge, thence east along Sloan Road to its intersection with Round Butte Road, thence east along Round Butte Road to Valley View Road, thence north along Valley View Road to its intersection with Kerr Dam Road, thence north and east to Polson, the point of beginning. Lands outside those boundaries will close to Canada goose hunting at sunset on January 3, 1993.

General Conditions: Nontribal hunters will comply with all basic Federal migratory bird hunting regulations contained in 50 CFR Part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or older must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Special regulations established by the Confederated Salish and Kootenai Tribes also apply on the reservation.

(h) Shoshone-Bannock Tribes, Fort Hall Indian Reservation, Fort Hall, Idaho (Nontribal Members)

Ducks

Season Dates: Begin October 24, end December 21, 1992.

Daily Bag and Possession Limits: The daily bag limit is 4, and the possession limit is 8.

Mergansers

Season Dates: Begin October 24, end December 21, 1992.

Daily Bag and Possession Limits: The daily bag limit is 5, and the possession limit is 10.

Coots

Season Dates: Begin October 24, end December 21, 1992.

Daily Bag and Possession Limits: The daily bag limit is 25, and the possession limit is limited to the daily bag (25).

Geese

Season Dates: Begin October 10, 1992, end January 10, 1993.

Daily Bag and Possession Limits: The bag limit is 3 in the aggregate of all species, and the possession limit is 6.

Common Snipe

Season Dates: Begin October 24, end December 21, 1992.

Daily Bag and Possession Limits: The daily bag limit is 8, and the possession limit is 16.

General Conditions: Nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR Part 20 regarding shooting hours and manner of taking. In addition, each waterfowl hunter 16 years of age or older must carry on his/her possession a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Other regulations established by the Shoshone-Bannock Tribes also apply on the reservation.

(i) Tulalip Tribes of Washington, Tulalip Indian Reservation, Marysville, Washington (Non-Tribal Hunters)

Ducks

Season Dates: Begin November 23, 1992, end January 20, 1993.

Daily Bag and Possession Limits: The daily bag limit is 4, and the possession limit is 8.

Coots

Season Dates: Begin November 23, 1992, end January 20, 1993.

Daily Bag and Possession Limits: The daily bag limit is 25, and the possession limit is restricted to the daily bag limit (25).

Geese

Season Dates: Begin October 17, 1992, end January 17, 1993.

Daily Bag and Possession Limits: The daily bag limit is 3, and the possession limit is 6.

Brant

Season Dates: Begin December 2, 1992, end January 17, 1993.

Daily Bag and Possession Limits: The daily bag limit is 2, and the possession limit is 4.

Snipe

Season Dates: Begin November 14, 1992, end February 28, 1993.

Daily Bag and Possession Limits: The daily bag limit is 8, and the possession limit is 16.

General Conditions: All hunters are required to adhere to shooting hour regulations of one-half hour before sunrise to sunset, and a number of other special regulations enforced by the tribes.

(j) Fort Apache Indian Reservation, Whiteriver, Arizona (Tribal Members and Nonmembers)

Ducks, (Including Mergansers)

Season Dates: Begin November 14, 1992, end January 3, 1993.

Daily Bag and Possession Limits: The daily bag limit is 4, of which: no more than 2 may be redheads or 2 may be canvasbacks (or 1 of each); no more than 1 of which may be pintail; and no more than 3 of which may be mallards, including no more than 1 hen mallard. The possession limit is twice the daily bag limit, but may not include more than 1 daily bag limit that has been taken in any 1 day.

Coots, Moorhens and Gallinules

Season Dates: Begin November 14, 1992, end January 3, 1993.

Daily Bag and Possession limits: The daily bag limit is 25, singly or in the aggregate. The possession limit is twice the daily bag limit, but may not include more than 1 daily bag limit that has been taken in any 1 day.

Canada Geese

Season Dates: Begin November 14, 1992, end January 3, 1993.

Bag and Possession Limits: The daily bag limit is 2, and the possession limit is 4 after the first day.

General Conditions: (1) The area open to hunting in the above seasons consists of: The entire length of the Black and Salt Rivers forming the southern boundary of the reservation; the Whiteriver, extending from the Canyon Day Stockman Station to the Salt River; and all stock ponds located within Wildlife Management Units 4, 6 and 7. The remaining reservation waters will be closed to waterfowl hunting during the 1992–93 hunting.

(2) Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking.

(3) See other special regulations established by the White Mountain Apache Tribe that apply on the reservation, available from the reservation Game and Fish Department.

(k) Yankton Sioux Tribe, Marty, South Dakota (Tribal Members and Nonmembers)

Ducks, Including Mergansers

Season Dates: Low Plains South Zone, begin October 24, end December 1, 1992; Low Plains Middle Zone, begin October 10, end November 17, 1992.

Daily Bag and Possession Limits: The daily bag limit is 3, of which: No more than 2 may be mallards (only 1 of which may be a female mallard); only 1 may be a redhead; only 1 may be a pintail; only 2 may be wood ducks; and only 1 may be hooded merganser. The possession limit is 6, the makeup of which may be no more than double each of the above restrictions.

Coots

Season Dates: Low Plains South Zone, begin October 24, end December 1, 1992; Low Plains Middle Zone, begin October 10, end November 17, 1992.

Daily Bag and Possession Limits: The daily bag limit is 15, and the possession limit is 30.

Swans: The swan season and bag limits are in accordance with those set by the State of South Dakota, for both tribal and nontribal hunters.

Dark Geese (Tribal and Nontribal)

Season Dates: Begin October 3, end December 20, 1992.

Daily Bag and Possession Limits: The daily bag limit is 1 Canada goose and 1 white-fronted goose (or brant), except in Canada Goose Unit 2 the daily bag beginning November 7 may include 2 Canada geese or 1 Canada goose and 1 white-fronted goose (or brant). The possession limit is twice the daily bag limit.

White Geese (Tribal and Nontribal)

Season Dates: Begin October 3, end December 20, 1992.

Daily Bag and Possession Limits: The daily bag limit is 7, and the possession limit is 14.

Special Season: For tribal and nontribal hunters, a special extended goose season will be held in the Chalk Rock Colony area of the Yankton Sioux Reservation. This season begins at the close of the regular goose season, December 21, 1992, in Goose Hunting Unit 2 and extends through January 10, 1993. Information on this special season, including bag limits and other regulations, may be obtained from the Bureau of Indian Affairs Office in Wagner, South Dakota.

General Conditions: (1) The waterfowl hunting regulations established by this final rule apply to tribal and trust lands within the external boundaries of the reservation.

(2) Tribal and nontribal hunters will comply with all basic Federal migratory bird hunting regulations in 50 CFR part 20 regarding shooting hours and manner of taking. In addition, each waterfowl

hunter 16 years of age or older must carry on his/her person a valid Migratory Bird Hunting and Conservation Stamp (Duck Stamp) signed in ink across the face. Special regulations established by the Yankton Sioux Tribe also apply on the reservation.

Dated: September 17, 1992.

Bruce Blanchard,

Acting Director, Fish and Wildlife Service.

Public Laws

102d Congress, 2nd Session, 1992

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 102d Congress, 2nd Session, 1992.

(Individual laws also may be purchased from the Superintendent of Documents, Washington, DC 20402-9328. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws and prices).

Guide to Record Retention Requirements

in the Code of Federal Regulations (CFR)

GUIDE: Revised January 1, 1992

The GUIDE to record retention is a useful reference tool, compiled from agency regulations, designed to assist anyone with Federal recordkeeping obligations.

The various abstracts in the GUIDE tell the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept.

The GUIDE is formatted and numbered to parallel the CODE OF FEDERAL REGULATIONS (CFR) for uniformity of citation and easy reference to the source document.

Compiled by the Office of the Federal Register, National Archives and Records Administration.

September 28, 1992

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** will be furnished by mail to subscribers for $340 per year in paper form; $195 per year in microfiche form; or $37,500 per year for the magnetic tape. Six-month subscriptions are also available at one-half the annual rate. The charge for individual copies in paper or microfiche form is $1.50 for each issue, or $1.50 for each group of pages as actually bound, or $3.75.00 per magnetic tape. Remit check or money order, made payable to the Superintendent of Documents. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954, or charge to your GPO Deposit Account or VISA or Mastercard.

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 57 FR 12345.

[Amdt No. 327]

Food Stamp Program: Good Cause Relief From Quality Control Error Rate Liabilities

AGENCY: Food and Nutrition Service, USDA.

ACTION: Final rule.

SUMMARY: This action amends the current provisions for good cause relief from potential quality control liabilities against State agencies. These changes were required by section 604 of title VI of the Hunger Prevention Act of 1988, enacted September 19, 1988.

Proposed regulations were published in the **Federal Register** of January 16, 1991 at 56 FR 1578. Comments on the proposal were accepted through March 18, 1991. This final action takes the comments received into account. Readers are referred to the proposed regulation for a more complete understanding of the proposed rule and this final action.

DATES: The provision in § 275.23(e)(6)(v) regarding the finality of good cause determinations of the Secretary was effective October 1, 1985. The remaining provisions of the rule are effective October 28, 1992.

FOR FURTHER INFORMATION CONTACT: John Knaus, Chief, Quality Control Branch, Program Accountability Division, Food Stamp Program, Food and Nutrition Service, USDA, 3101 Park Center Drive, room 905, Alexandria, Virginia 22302, (703) 305–2474.

SUPPLEMENTARY INFORMATION:

Classification

Executive Order 12291/Secretary's Memorandum 1512–1

This action has been reviewed under Executive Order 12291 and Secretary's Memorandum No. 1512–1. Betty Jo Nelsen, Administrator of the Food and Nutrition Service, has classified this rule as non-major. The rule's effect on the economy will be less than $100 million. The rule will have no effect on costs or prices for consumers, individual industries, Federal, State or local government agencies, or geographic regions. It will not have significant adverse effect on competition, employment, investment, productivity, innovation, or the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

Executive Order 12372

The Food Stamp Program is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule at 7 CFR part 3015, subpart V and related Notice (48 FR 29,115, June 24, 1983), this Program is excluded from the scope of Executive Order 12372 which requires intergovernmental consultation with State and local officials.

Executive Order 12778

This final rule has been reviewed under Executive Order 12778, Civil Justice Reform. This rule is intended to have preemptive effect with respect to any State or local laws, regulations or policies which conflict with its provisions or which would otherwise impede its full implementation. This rule is not intended to have retroactive effect unless so specified in the "**EFFECTIVE DATE**" paragraph of this preamble. Prior to any judicial challenge to the provisions of this rule or the application of its provisions all applicable administrative procedures must be exhausted. In the Food Stamp Program the administrative procedures are as follows: (1) For program benefit recipients—state administrative procedures issued pursuant to 7 U.S.C. 2020(e)(10) and 7 CFR 273.15; (2) for State agencies—administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 276.7 (for rules related to non-quality control (QC) liabilities) or part 284 (for rules related to QC liabilities); (3) for program retailers and wholesalers—administrative procedures issued pursuant to 7 U.S.C. 2023 set out at 7 CFR 278.8.

Regulatory Flexibility Act

This action has also been reviewed in relation to the requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. 601 *et seq*). Betty Jo Nelsen, Administrator of the Food and Nutrition Service, has certified that this rule does not have a significant economic impact on a substantial number of small entities. The requirements will affect State and local agencies which administer the Food Stamp Program.

Paperwork Reduction Act

This final rule contains information collections that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1980 (44 U.S.C. 3501–3520). The title, description, and respondent description of the information collections are shown below with an estimate of the annual reporting burden. Included in the estimate is the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Title: Waiver Requests for Relief From Quality Control Error Rate Liabilities

Description: The burden associated with a State agency's food cause request, contained in 7 CFR 275.23(e)(6), is in the submission of information and documentation of the uncontrollable events and their effect on a State's payment error rate which provides the Secretary with the basis for determining whether to grant relief. Over the past three years an average of 10 letters annually were sent to State agencies notifying them of potential quality control liabilities. It is expected that all of those State agencies will submit waivers requesting that they be excused from the liabilities. The Department estimates that it would take 160 hours to collect, assemble and submit one good cause waiver request.

Description of Respondents: State welfare agencies which administer the Food Stamp Program.

Estimated Annual Reporting Burden

	No. of respondents	No. of annual responses	No. of man-hours per response	Estimated total man-hours
10		1	160	1600

Estimated Recordkeeping Burden

There is no separate recordkeeping associated with this submission. Information is collected, assembled and submitted to the Department from existing Federal or normal State operation records. Recordkeeping burden associated with maintaining the Federal records involved is approved by OMB Nos. 0584–0081 and 0584–0299.

Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to Department of Agriculture, Clearance Officer, OIRM, room 404–W, Washington, DC 20250; and to the Office of Management and Budget, Paperwork Reduction Project, Washington, DC 20503.

Background

On January 16, 1991, the Department issued a proposed rule at 56 FR 1578 to implement Section 604 of the Hunger Prevention Act of 1988 (Pub. L. 100–435 enacted September 19, 1988), regarding good cause determinations. A total of 29 comment letters were received on the proposed rule—the majority from State agencies. The major concerns raised by the commenters are discussed below. For a full understanding of this discussion and the provisions of this final rule, the reader should also refer to the proposed rule.

The Authority To Grant Good Cause Relief

The preamble to the proposed rule explained that the Secretary could not find good cause to waive liability for excessive quality control (QC) error rates unless a State agency specifically requested relief and provided justification. If a State agency failed to request and justify such relief under the provisions of this rule, the Secretary would have to conclude that the State agency did not have good cause.

One commenter questioned the Department's authority to arbitrarily make a decision that there was not good cause for an excessive error rate, if a State for whatever reason does not include a criterion in its request for good cause relief. In response to the comment, the Department wishes to clarify that it is the responsibility of the State to ensure that its good cause request is submitted in a timely fashion and that any and all good cause arguments are completely addressed and supported in that request. If a State fails to request good cause relative to a particular criterion or event within the required time frames, the Department must determine that there is no basis for good cause relief in relation to that criterion or event.

In addition, the Department wishes to establish that if a State agency fails to submit its request for a good cause waiver for a particular fiscal year within the required time period, the Department will make a determination that there was no basis for such relief. The Department will communicate this determination to the State. If the State then submits a fully documented good cause request within 30 days of receipt of the Department's determination, and provides reasonable justification for failure to submit its good cause request within the required time frame, the Department will review the State's good cause request. Any State that fails, for any reason, to submit a good cause request or provide reasonable justification for that failure within the above time frames will be determined not to have a basis for good cause relief for its excessive error rate.

Good cause relief may only be granted by the Secretary of Agriculture or his designee. The Secretary's determination with respect to a request for good cause relief or a determination that no basis for good cause exists because the State failed to request a good cause waiver within the required period, as well as whether there exist circumstances which would justify the failure to submit a timely request are final and not subject to administrative or judicial review.

Events and Conditions FNS Does Not Intend to Consider as Basis for Good Cause Relief

The preamble to the proposed rule listed the following four situations as inappropriate bases for good cause relief: (1) Lack of resources; (2) normal administrative difficulties; (3) technical features of the error rate measurement and the liability system that have been properly implemented by regulation; and (4) successful or unsuccessful efforts to lower the error rate after the review period. The preamble to the proposed rule also stated that the good cause process was not a proper vehicle for challenging features of the Quality Control System which Congress has explicitly adopted in the Hunger Prevention Act of 1988. Twenty-two commenters disagreed and felt that the above factors were appropriate circumstances for good cause relief from quality control liabilities and presented arguments to support their beliefs. States were particularly concerned about resource issues; for example, one commenter stated that it is unrealistic to expect States to be able to rapidly adjust resources targeted specifically at the Food Stamp Program given the complexity and inter-dependence of State revenue processes. The Department has carefully considered this and other comments as well as the legislative history of Public Law 100–435. Key guidance also comes from the 1980 legislative history of good cause: "Good cause would not encompass any State failure to act upon necessary legislative changes or to obtain budget authorization for needed staff or other resources, since those failures are clearly within State control" (Food Stamp Act Amendments of 1980, House Report 96–788, page 74.) Although the Department understands that many States face severe budget restraints from time to time, the Department concludes that Congress intended overall relief to come from higher tolerance levels but did not intend to make changes in the basic structure of good cause.

Seven commenters argued for retention of "Incorrect Federal Policy" as a basis for good cause relief. They felt that while Congress properly acted to exclude errors attributable to incorrect Federal guidance from error rates, there may be instances where FNS and State agencies disagree as to whether this occurred and that when differences regarding the Federal instructions cannot be satisfactorily resolved at the regional level, there must be some recourse through the good cause process. The commenters also expressed concern that it may not be discovered that incorrect Federal

guidance had been given until a later date or during preparation of a good cause waiver request. The Department agrees that there may be differences of opinion as to whether or not incorrect Federal policy was given and that it is possible that this may not be discovered until later in the quality control liability process. Therefore, based upon State agency documentation, the Department will adjust its Federal findings, error rates, and liabilities whenever it determines that a State agency was provided with incorrect Federal guidelines and that the resulting errors remain as part of the State agency's payment error rate. The process of adjusting the State agency's error rates will be separate from the good cause process.

Content of State Requests for Good Cause Relief

The proposed rule stated that State agencies should explain what portion of the observed error rates are due to the uncontrollable negative effects of unusual events when such events may mask the effects of successful efforts to decrease error rates.

Two commenters suggested that it should be sufficient to demonstrate that an increase in the error rate occurred and that the error rate increased during the period subsequent to the event in order to qualify for a food cause waiver. Another commenter stated that the factors that determine error rates are numerous and changing and that no method has ever been developed (either by FNS or anyone else) to determine whether one particular factor (uncontrollable or otherwise) produced a given increase in the error rate. The Department wishes to clarify that it was not the intent of the proposed rule that State agencies provide an individual error analysis on a case-by-case basis. While the Department understands that it may sometimes be difficult for States to document the uncontrollable impact of an unusual event on the error rate when the impact is minimal, States that experience a large impact should have less difficulty. If a State agency is unable to successfully demonstrate the relationship between an unusual event and an uncontrollable impact upon its error rate, the Secretary will apply the alternate method of evaluation discussed below to determine if good cause relief is appropriate. States may also seek to demonstrate the uncontrollable impact of an unusual event upon the error rate where the error rate remains unchanged or decreases but was expected to decrease substantially due to a State program designed to reduce errors.

FNS Review of Good Cause Waiver Requests

The preamble to the proposed rule stated that FNS would evaluate each State agency's good cause waiver request based on the information provided by the State agency and any other sources FNS finds useful to the review process. Seven comments were received which expressed strong oppositions to FNS' use of information which the State agency did not submit because the State agency should be given an opportunity to examine and refute the information. One commenter also pointed out that the inconsistency of not wanting the States to submit voluminous documentation and then penalizing them if they do not provide enough documentation denigrates the entire good cause process and provides USDA with the opportunity for reducing the amount of relief if a request is poorly documented. Based on the comments received, the Department has reconsidered its position regarding the evaluation of a State agency's request based on information not submitted by the State agency. In those instances in which FNS uses information other than that submitted by the State agency or corrects information submitted by the State agency, FNS will issue a preliminary determination on the good cause waiver request. The preliminary determination will identify information used in the evaluation process which was not submitted by the State or information FNS has corrected, and allow the State agency 30 days to comment on the supplemental and/or corrected information before a final decision is rendered. FNS will limit its examination of States' responses to comments regarding the additional or corrected information used by FNS. Since the State agency has been provided an opportunity to raise any and all issues relevant to good cause in its initial request, no new issues for good cause relief will be accepted following expiration of the time period for filing the State agency's request for good cause relief.

Comparison to Past Methods of Evaluating Good Cause Requests

The proposed rule stated that if State agencies did not provide the type or amount of information required for a complete factual analysis and such information was not otherwise available in the Department, the Secretary would have to exercise some judgment in reaching a determination on good cause relief from QC liabilities. The Department proposed the same formula it used in the past to determine waiver amounts. That methodology consisted of evaluating the uncontrollable effects of a natural disaster, strikes or unusual caseload growth that occurred during an eighteen-month period. That period covered the twelve months of the review period and the six months prior to the beginning of the review period. The State agency received a one-eighteenth waiver for each month during that period that the unusual event took place. State agencies commenting on the methodology noted that since the liability is based on a twelve-month period, the methodology for determining the waiver amount should be one-twelfth to make the methodology comparable to the length of the review period subject to the liability. The Department accepts the commenters' rationale and has modified the proposed methodology. Under the modifications, States which experience an unusual event during the subject fiscal year may qualify for a one-twelfth waiver for each month that the State experienced the unusual event. States which experience an unusual event both prior to and during the fiscal year may qualify for a one-eighteenth waiver for each month for that portion of the unusual event which occurred during the prior fiscal year and a one-twelfth waiver for each month for that portion of the unusual event which occurred during the fiscal year which is the subject of the potential liability. The modified methodology enables the Department to fulfill its objective stated in the proposed rule that relief based upon good cause be more closely related to the uncontrollable effects of the unusual event on error rates. Under the formula, the Secretary shall determine a preliminary waiver amount by: (1) Determining, from the State agency's request, the number of months during the eighteen month period that begins six months before the subject review period that an unusual event uncontrollably impaired Food Stamp Program certification operations; (2) calculating an amount equal to one-eighteenth of the liability for each month that such an event uncontrollably impaired operations during the period six months prior to the fiscal year; (3) calculating an amount equal to one-twelfth of the liability for each month that such an event uncontrollably impaired operations during the fiscal year; and (4) adjusting the preliminary amount, as necessary, to take into account the State agency's otherwise effective administration of the program based upon recent error rate history. For example, a reduction in the formula derived amount would be made when a

State agency's recent error rate history indicates that even absent the unusual event the State agency would have exceeded the payment error tolerance in the review period.

One commenter suggested that FNS consider the State's error rate history for at least five years prior to the subject review period and any available information on a State's error rate experienced after the penalty period. Another commenter suggested that FNS examine the factors that affected the error rates of more recent years before making a blanket determination that unusual events had no effect just because the error rate did not decrease. As pointed out in the preamble to the proposed rule, the legislative history states that "[T]he purpose of good cause under the new system is to allow the Secretary the discretion to provide relief when a State with otherwise effective administration has faced an unusual event with a large uncontrollable impact on errors." A good point for measuring a State agency's administration of the program is a State's error rate immediately prior to the unusual event. Therefore, each State agency requesting good cause is asked to provide information on what its reported combined payment error rate was in the twelve-month period immediately prior to the event and its reported payment error rate during the remainder of the subject Fiscal Year. FNS will examine the State's error rate before and after the unusual event together with any other available error rate data to determine whether the State was administering the program effectively prior to the event and examine the impact of the unusual event on that administration. While the Department recognizes that the formula could now mathematically result in a waiver of more than 100 percent liability, clearly no more than 100 percent of a State's liability can be waived for any one fiscal year.

Relationship to Warning Process and Disallowance of Funds

One commenter noted that the good cause regulations should provide for QC error rate adjustments due to recovery of improperly issued coupons. In response to this comment, the Department wishes to clarify that if a State agency is billed for negligence as a result of improperly issued coupons and is held liable for exceeding the QC error rate tolerance for the same time period, FNS shall adjust either the negligence billing or the QC liability billing to ensure that two claims are not made against the State for the same dollar loss. The final rule has been revised to reflect this change.

Events that May Serve as the Basis of Good Cause Relief

1. Natural Disasters or Civil Disorders

One commenter suggested that the regulations be modified to clarify that a Presidential declaration is not a prerequisite for good cause relief. Another commenter stated that although natural disasters are defined as those under the authority of the Stafford Act of 1988 (Pub. L. 1020–707), the proposed regulations cited a "fire in a certification office" as a type of natural disaster. The commenter suggested that this situation may not warrant a Presidential disaster declaration request but may be serious enough to have an uncontrollable effect on error rates.

While good cause relief will be evaluated under the disaster criterion based only on Federally-declared disasters, the final regulations provide for consideration of non-Federally-declared disasters, such as a fire in a certification office, under the "Other Unusual Circumstances" criterion. A fire in a certification office is being addressed in this fashion because the Disaster Relief Act implies that an event would have a greater geographic impact than on just one office. A fire in a certification office would only affect the cases and error rates of that particular office.

One commenter remarked that assigning an eighteen month period for granting approval of a waiver is not the best or fairest method of calculation and that to apply the standard across the board could work to a State agency's disadvantage depending on the timeframe of a disaster. It is the Department's position that States are responsible for reacting to events and dealing with them within a reasonable period of time. Generally, an unusual event which occurred and ended during the first six months of the prior fiscal year should not have an uncontrollable impact on the State's error rate during the subsequent fiscal year because the State should have had time to control the situation. Therefore, when State agencies do not provide a sufficient explanation on the uncontrollable effect of an unusual event on the error rate, the Department will maintain eighteen months as the appropriate length of time for determining whether the State agency had good cause for an excessive error rate. However, in those unusual cases where the Secretary determines that a State agency has provided information sufficient to document the continuing uncontrollable impact of the event beyond eighteen months, good cause relief will be granted from the point in time when the unusual event occurred.

2. Strikes by State Agency Staff Necessary to Determine Food Stamp Program Eligibility and Process Case Changes

The Department wishes to clarify that under this provision, the Department would consider good cause requests from those States whose employees are prohibited by law from striking but which might experience various kinds of work stoppages including work slowdowns. This clarification will insure that all States may benefit from this good cause basis.

As described above, the Department has modified the proposed methodology that will be used when the Secretary determines that insufficient information has been provided or that needed information is otherwise not available from existing Department records to determine a request for waiver using factual analysis. Therefore, if the Secretary determines that a State agency has provided insufficient information to determine a waiver amount for the uncontrollable effects of a strike or similar work stoppage using factual analysis, the Secretary shall determine a waiver amount based on the revised formula.

3. Caseload Growth

One commenter suggested that the regulations should specify that caseload growth in a single project area may be sufficient to warrant good cause relief since one project area can drive up the Statewide error rate. State agencies which submit documentation that clearly demonstrates an uncontrollable impact due to increases in applications and caseload growth on error rates could qualify for good cause relief regardless of the size of the State or the geographic area experiencing the growth. The Department will consider State agencies' arguments concerning increases in applications as well as participation or other workload increases. State agencies which submit documentation that clearly demonstrates the uncontrollable impact of workload increases and caseload growth on their error rates could qualify for good cause relief. However, in those instances in which the State agency submits insufficient information, the formula described earlier will be used.

One commenter suggested that the Secretary look at the circumstances in each individual State as presented in the good cause waiver to determine whether

or not events such as seasonal changes in caseload growth had a large, uncontrollable impact on the State's error rate. The proposed rule addressed unusual events and the Department maintains its position that seasonal increases/changes will not be considered unusual events since State agencies should anticipate these fluctuations and develop a plan to deal with such situations.

Another commenter stated that when events such as substantial layoffs at a major employer or the closing of a military base occur, there is a single one-time increase in participation which persists. The State felt that if events like these occur with little advance notice, State agencies may not be staffed to handle the increase in workload. Based on this comment, the Department has reconsidered the proposed provision dealing with caseload sizes that fluctuate widely and a single increase in participation that persists. These situations of unusual caseload growth will be given consideration on a case-by-case basis.

Ten commenters expressed concern over the Department's use of a threshold of 15 percent growth in caseload as a basis for good cause relief. The Department wishes to clarify that if a State agency can document that unusual caseload growth had an uncontrollable impact on its cumulative payment error rate, it does not necessarily have to experience a 15 percent growth in its caseload before a waiver can be granted. However, when the Department finds that a State agency has submitted documentation insufficient to support a finding of uncontrollable impact on payment error, the State agency shall be restricted to the definition of 15 percent growth used in the formula described. State agencies are being held to this definition because absent sufficient information, there is no better way to prove that unusual caseload growth of less than 15 percent had an uncontrollable impact on error rates.

As described above, the Department modified the proposed methodology that will be used to determine a waiver amount when the Secretary determines that insufficient information has been provided or that needed information is otherwise not available from existing Department records.

4. Changes in the Food Stamp Program or other Federal or State Programs

The proposed rule stated that the Secretary shall evaluate the State agency's request and waive any portion of the liability which the Secretary attributes to the uncontrollable effects of unusual changes in the Food Stamp Program or other Federal and State programs. One commenter felt that the word "substantial" should be removed from this provision because size or extent has no bearing in an appeal based on good cause. The Department wishes to clarify that, as a general matter, in accordance with the legislative history good cause relief will be provided when a State agency with otherwise effective administration has faced an unusual event with a "large" uncontrollable impact on errors. (House Report 100–828, part 1, page 34.) Due to the fact that the word "substantial" may be unclear, it has been removed from the final rule; however, the legislative history will be given weight as to the intent of Congress when reviewing arguments provided by State agencies in support of requests for good cause waivers. Accordingly, the word "large" has been inserted in § 275.23(e)(6)(i) and is applicable to all bases for good cause relief. The Department also wishes to clarify that it will look at the demonstrated impact on the food stamp error rate on a case-by-case basis taking into account any uncontrollable impact for which the State agency is able to provide documentation. The Secretary will make a case-by-case determination as to what constitutes a "large" uncontrollable impact on errors.

5. Other Circumstances Beyond the Control of the Sate Agency

One commenter suggested that the regulations should include examples of other circumstances beyond the control of the State agency that would warrant good cause. The Department will take into consideration any unusual events submitted by State agencies as part of their good cause request which have a demonstrated uncontrollable impact on the food stamp error rate. In recognition of comments received on the disaster criterion and as mentioned above, the Department has changed the provision from the proposed regulations in the final regulations to provide for consideration of non-Federally declared disasters, such as a fire in a certification office, under this criterion.

Timeframes

State agencies have 60 days from the date of notification by FNS (certified mail, return receipt requested) of its final error rate and potential liability to submit requests for good cause waivers. Therefore, requests for good cause or requests for extension shall be post-marked no later than 60 days from the date of receipt of FNS' letter of notification. The date of receipt shall be the date indicated on the certified mail return receipt. In the event the Department does not receive the return receipt, the date of receipt will be the date seven calendar days from the date on the letter of notification. Requests for extension will be evaluated on a case-by-case basis and only in the most unusual situations shall such requests be granted. For example, an occurrence that precludes a State agency from conducting normal business during the 60-day period shall be considered an unusual situation.

Implementation

The Department is requiring implementation of this rulemaking effective 30 days after publication in the **Federal Register**. For Fiscal Years 1986 through 1990, State Agencies must submit good cause waiver requests no later than 120 days (60 days as allowed in the regulations plus an automatic 60-day extension) from the date of receipt of notification of the official payment error rate and liability. For Fiscal Year 1991 and thereafter, State agencies shall submit good cause waiver requests no later than 60 days from the date of receipt of notification of the official payment error rate and liability. Therefore, requests shall be post-marked no later than 120 days or 60 days from the date of receipt of notification based on the year for which good cause is being requested.

Interim rules regarding the variance exclusion provisions were published November 2, 1988 (53 FR 44171) and were effective with Fiscal Year 1989. These rules contain a provision which excludes from the quality control payment error rate any variance resulting from incorrect written policy that a State agency acts on that is provided by a Departmental employee authorized to issue Food Stamp Program policy and that the State agency correctly applies.

List of Subjects

7 CFR Part 272

Alaska, Civil rights, Food stamps, Grant programs—social programs, Reporting and recordkeeping requirements.

7 CFR Part 275

Administative practice and procedure, Food stamps, Reporting, and Recordkeeping requirements.

For the reasons set out in the preamble, 7 CFR parts 272 and 275 are amended as follows:

PART 272—REQUIREMENTS FOR PARTICIPATING STATE AGENCIES

1. The authority citation for part 272 continues to read as follows:

Authority: 7 U.S.C. 2011–2031.

2. In § 272.1, a new paragraph (g)(126) is added in numerical order to read as follows:

§ 272.1 General terms and conditions.

* * * * *

(g) *Implementation.* * * *

(126) *Amendment No. 327.* (i) The statutory provision reflected in § 275.23(e)(6)(v) of Amendment No. 327 was effective October 1, 1985 pursuant to Pub. L. 100–435.

(ii) The remaining provisions are effective October 28, 1992.

PART 275—PERFORMANCE REPORTING SYSTEM

3. The authority citation for part 275 continues to read as follows:

Authority: 7 U.S.C. 2011–2031.

4. In § 275.23

a. Paragraph (e)(5) is revised in its entirety.

b. Paragraph (e)(6) is revised in its entirety.

The revision and additions read as follows:

§ 275.23 Determination of State agency program performance.

* * * * *

(e) *State agencies' liabilities for payment error rates.* * * *

(5) *Relationship to warning process and negligence.*

(i) States' liability for payment error rates as determined above are not subject to the warning process of § 276.4(d). However, State agencies shall be notified by certified mail, return receipt requested, at least sixty days before any billing and shall have sixty days following such notice to request a good cause waiver of part or all of their potential liability. The billing will not occur until after the expiration of the sixty days and the Secretary's determination of good cause when it is timely requested. If a determination is made that good cause did not exist, FNS shall promptly issue the billing. While the amount of a State's liability may be recovered through offsets to their letter of credit as identified in § 277.16(c), FNS shall also have the option of billing a State directly or using other claims collection mechanisms authorized under the Federal Claims Collection Act, depending upon the amount of the State's liability.

(ii) FNS shall not determine negligence (as described in § 276.3) based on the overall payment error rate for issuances to ineligible households and overissuances to eligible households in a State or political subdivision thereof. FNS may only establish a claim under § 276.3 for dollar losses from failure to comply, due to negligence on the part of the State agency (as defined under § 276.3), with specific certification requirements. Thus, FNS will not use the results of States' QC reviews to determine negligence.

(iii) While FNS may determine a State to be liable for dollar loss under the provisions of this section and the negligence provisions of § 276.3 for the same period of time, FNS shall not bill a State for the same dollar loss under both provisions. If FNS finds a State liable under both the QC liability system and the negligence provisions, FNS shall adjust the billings to ensure that two claims are not made against the State for the same dollar loss.

(6) *Good cause*—(i) *Events.* When a State agency with otherwise effective administration exceeds the allowable level for payment errors as described in this section, FNS may determine that the State agency had good cause for not achieving the payment error rate tolerance if the State agency documents that an unusual event or events had a large uncontrollable effect upon error rates, and grant relief from quality control liabilities that would otherwise be levied under this section of the regulations. States desiring such relief must submit a request in writing within 60 days from the date of receipt of notification of the official payment error rate and potential liability. If no request for a good cause waiver is received by the Secretary within the required time, the Secretary shall make a determination that there was no basis for good cause relief. Within 30 days from the date of receipt of this determination, the State may submit a fully documented good cause request and provide reasonable justification for failure to submit the good cause request within the required time frame. If the State can demonstrate good reason why the request for a good cause waiver was not timely made, the Secretary will review the State's good cause request. If a State fails to demonstrate good reason for failure to timely request a good cause waiver, the initial determination will stand. The following are unusual events which State agencies may use as a basis for requesting good cause relief and specific information that FNS expects State agencies to submit to justify such requests for relief:

(A) Natural disasters such as those under the authority of the Stafford Act of 1988 (Pub. L. 1020–707), which amended the Disaster Relief Act of 1974 (Pub. L. 93–288) or civil disorders that adversely affect program operations. For disasters prior to November 23, 1988 see the Disaster Relief Act of 1974, as amended (42 U.S.C. 5121 *et seq.*, Pub. L. 93–288). When submitting a request for good cause relief based on this example, the State agency shall provide the following information:

(*1*) The nature of the disaster(s) (e.g. a tornado, hurricane, earthquake, flood, etc.) or civil disorder(s)) and evidence that the President has declared a disaster;

(*2*) The date(s) of the occurrence;

(*3*) The date(s) after the occurrence when program operations were affected;

(*4*) The geographic extent of the occurrence (i.e. the county or counties where the disaster occurred);

(*5*) The proportion of the food stamp caseload whose management was affected;

(*6*) The reason(s) why the State agency was unable to control the effects of the disaster on program administration and errors;

(*7*) The Identification and explanation of the uncontrollable nature of errors caused by the event (types of errors, geographic location of the errors, time period during which the errors occurred, etc.);

(*8*) The percentage of the reported payment error rate that resulted from the occurrence and how this figure was derived; and

(*9*) The reported payment error rate in the twelve-month period immediately prior to the event and reported payment error rate during the remainder of the subject fiscal year.

The Secretary shall evaluate the State agency's request and waive any portion of the liability which the Secretary attributes to the uncontrollable effects of a disaster or civil disorder. In this evaluation, the Secretary will consider the following factors: Geographical impact of the disaster; State efforts to control impact on program operations; the proportion of food stamp caseload affected; and/or the duration of the disaster and its impact on program operations. Adjustments for these factors may result in a waiver of all, part, or none of the error rate liabilities for the applicable period. If the Secretary determines that a State agency has provided insufficient information or that sufficient information is not otherwise available from existing Department records to determine a waiver amount for the uncontrollable effects of a natural disaster or civil disorder using factual analysis, the Secretary shall determine a

formula derived waiver amount by: Determining the number of months during the eighteen months that begins six months before the subject review period during which a civil disorder of Federally-declared disaster impaired Food Stamp Program operations; determining an amount equal to one-eighteenth of the liability for each month for the portion of the unusual event which occurred during the period six months prior to the fiscal year; determining an amount equal to one-twelfth of the liability for each month for the portion of the unusual event which occurred during the fiscal year; and as appropriate, adjust the waiver amount to reflect States' otherwise effective administration of the program based upon recent error rate history. For example, a reduction in the amount may be made when a State agency's recent error rate history indicates that even absent the events described, the State agency would have exceeded error rate tolerances in the review period. Under this approach, unless the State agency can demonstrate a direct uncontrollable impact on the error rate, FNS will not grant relief for the effects of disasters or civil disorders that ended prior to the second half of the prior fiscal year.

(B) Strikes by state agency staff necessary to determine Food Stamp Program eligibility and process case changes. When submitting a request for good cause relief based on this example, the State agency shall provide the following information:

(*1*) Which workers (i.e. eligibility workers, clerks data input staff, etc.) and how many (number and percentage of total staff) were on strike or refused to cross picket lines;

(*2*) The date(s) and nature of the strike (i.e. the issues surrounding the strike);

(*3*) The date(s) after the occurrence when program operations were affected;

(*4*) The geographic extent of the strike (i.e. the county or counties where the strike occurred);

(*5*) The proportion of the food stamp caseload whose management was affected;

(*6*) The reason(s) why the State agency was unable to control the effects of the strike on program administration and errors;

(*7*) Identification and explanation of the uncontrollable nature of errors caused by the event (types of errors, geographic location of the errors, time period during which the errors occurred, etc.);

(*8*) The percentage of the reported payment error rate that resulted from the strike and how this figure was derived; and

(*9*) The reported payment error rate in the twelve-month period immediately prior to the event and the payment error rate during the remainder of the subject fiscal year.

The Secretary shall evaluate the State agency's request and waive any portion of the liability which the Secretary attributes to the uncontrollable effects of the strike. In this evaluation, the Secretary will consider the following factors: Geographical impact of the strike; State efforts to control impact on program operations; the proportion of food stamp caseload affected; and/or the duration of the strike and its impact on program operations. Adjustments for these factors may result in a waiver of all, part, or none of the error rate liabilities for the applicable period. If the Secretary determines that a State agency has provided insufficient information or that sufficient information is not otherwise available from existing Department records to determine a waiver amount for the uncontrollable effects of a strike using factual analysis, the Secretary shall determine a waiver amount by using the formula described in paragraph (e)(6)(i)(A) of this section. The amount of the waiver might be reduced for a strike that was limited to a small area of the State.

(C) Unusual Food Stamp Program caseload growth (for example 15 percent increase may constitute unusual caseload growth). Caseload growth which historically increases during certain periods of the year will not be considered unusual or beyond the State agency's control. When submitting a request for good cause relief based on this example, the State agency shall provide the following information:

(*1*) The amount of growth (both actual and percentage);

(*2*) The time the growth occurred (what month(s)/year);

(*3*) The date(s) after the occurrence when program operations were affected;

(*4*) The geographic extent of the caseload growth (i.e. Statewide or in which particular counties);

(*5*) The impact of caseload growth;

(*6*) The reason(s) why the State agency was unable to control the effects of caseload growth on program administration and errors;

(*7*) The percentage of the reported payment error rate that resulted from the caseload growth and how this figure was derived; and

(*8*) The reported payment error rate in the twelve-month period immediately prior to the event and the payment error rate during the remainder of the subject fiscal year.

The Secretary shall evaluate the State agency's request and waive any portion of the liability which the Secretary attributes to the uncontrollable effects of unusual caseload growth. In this evaluation, the Secretary will consider the following factors: Geographical impact of the caseload growth; State efforts to control impact on program operations; the proportion of food stamp caseload affected; and/or the duration of the caseload growth and its impact on program operations. Adjustments for these factors may result in a waiver of all, part, or none of the error rate liabilities for the applicable period. If the Secretary determines that the State agency has provided insufficient information or that needed information is otherwise not available from existing Department records to determine a waiver amount for the uncontrollable effects of caseload growth using factual analysis, the Secretary shall determine a formula derived waiver amount by: Counting the number of months out of the six months beginning in April immediately prior to the subject review period in which the State agency's Food Stamp Program caseloads were 15 percent or more above caseloads in March immediately prior to the review period; counting the number of months during the twelve months of the review period in which the State agency's Food Stamp Program caseloads were 15 percent or more above caseloads in September prior to the review period; determining a waiver amount equal to one eighteenth of the liability for each month for the portion of the caseload growth which occurred during the six months prior to the fiscal year and one twelfth of the liability for each month for the portion of the caseload growth which occurred during the fiscal year; and as appropriate, adjust the preliminary waiver amount to reflect States' otherwise effective administration of the program based upon recent error rate history. For example, a reduction in the amount may be made when a State agency's recent error rate history indicates that even absent the uncontrollable events described, the State agency would have exceeded the error rate tolerance for the review period. Under this approach, unless the State agency can demonstrate a direct uncontrollable impact on the error rate, FNS will not grant relief for the effects of caseload growth that ended prior to the second half of the prior fiscal year.

(D) Unusual changes in the Food Stamp or other Federal or State programs that have an uncontrollable effect on the QC payment error rate.

Requests for relief from errors caused by the uncontrollable effects of unusual program changes other than those variances already excluded by § 275.12(d)(2)(vii) will be considered. When submitting a request for good cause relief based on unusual changes in the Food Stamp or other Federal or State programs, the State agency shall provide the following information:

(*1*) The type of change(s) that occurred;

(*2*) When the change(s) occurred;

(*3*) The nature of the adverse effect of the changes on program operations and the State agency's efforts to mitigate these effects;

(*4*) Reason(s) the State agency was unable to adequately handle the change(s);

(*5*) Identification and explanation of the uncontrollable errors caused by the changes (types of errors, geographic location of the errors, time period during which the errors occurred, etc.);

(*6*) The percentage of the reported payment error rate that resulted from the adverse impact of the change(s) and how this figure was derived; and

(*7*) The reported payment error rate in the twelve-month period immediately prior to the event and reported payment error rate during the remainder of the subject fiscal year.

The Secretary shall evaluate the State agency's request and waive any portion of the liability which the Secretary attributes to the uncontrollable effects of unusual changes in the Food Stamp Program or other Federal and State programs. In this evaluation, the Secretary will consider the following factors: Geographical impact of the unusual changes in the Food Stamp Program or other Federal and State programs; State efforts to control impact on program operations; the proportion of food stamp caseload affected; and/or the duration of the unusual changes in the Food Stamp Program or other Federal and State programs and the impact on program operations. Adjustments for these factors may result in a waiver of all, part, or none of the error rate liabilities for the applicable period.

(E) Other unusual circumstances. When submitting a request for good cause relief based on unusual circumstances other than those specifically set forth in this paragraph (e)(6)(i)(E), such as a fire in a certification office, the State agency shall provide the following information:

(*1*) The unusual circumstances that the State agency believes uncontrollably and adversely affected the payment error rate for the fiscal year in question;

(*2*) Why the State agency had no control over the unusual circumstances;

(*3*) How the unusual circumstances had an uncontrollable and adverse impact on the State agency's error rate;

(*4*) Where the unusual circumstances existed (i.e. Statewide or in particular counties);

(*5*) When the unusual circumstances existed (give as nearly exact dates as possible);

(*6*) The proportion of the food stamp caseload whose management was affected;

(*7*) Identification and explanation of the uncontrollable errors caused by the event (types of errors, geographic location of the errors, time period during which the errors occurred, etc.);

(*8*) The percentage of the reported payment error rate that was caused by the unusual circumstances and how this figure was derived; and

(*9*) The reported payment error rate in the twelve-month period immediately prior to the event and reported payment error rate during the remainder of the subject fiscal year.

The Secretary shall evaluate the State agency's request and waive any portion of the liability which the Secretary attributes to the uncontrollable effects of unusual circumstances other than those set forth earlier in this paragraph (e)(6)(i)(E). In this evaluation, the Secretary will consider the following factors: Geographical impact of the unusual circumstances; State efforts to control impact on program operations; the proportion of food stamp caseload affected; and/or the duration of the unusual circumstances and the impact on program operations. Adjustments for these factors may result in a waiver of all, part, or none of the error rate liabilities for the applicable period.

(ii) *Adjustments.* When good cause is found under the criteria in paragraphs (e)(6)(i)(A) through (E) of this section, the Secretary may adjust the waiver amount to reflect States' otherwise effective administration of the program based upon recent error rate history.

(iii) *Timeframes.* State agencies have 60 days from the date of receipt of notification by FNS (certified mail, return receipt requested) of its final error rate and potential liability to submit requests for good cause. In those instances in which FNS uses information not submitted by the State agency to make a waiver determination or corrects information submitted by the State agency, the State agency shall be provided a copy of such information or corrected information as set forth in paragraph (e)(6)(iv) of this section and shall have 30 days to comment on the supplemental information and/or the corrected information before a final decision is rendered. Requests for extensions shall be evaluated on a case-by-case basis and only in the most unusual situations shall such requests be granted. In computing any period of time prescribed or allowed under these procedures, the day of delivery of any notice of action, acknowledgment, or reply shall not be included unless it is a Saturday, Sunday or Federal or State holiday. In that case, the period runs until the end of the next day which is not a Saturday, Sunday or Federal or State holiday. Requests for good cause or an extension of time shall be post-marked prior to the expiration of the original due date.

(iv) *Evidence.* When submitting a request for good cause relief, the State agency shall include such data and documentation as is necessary to support and verify the information submitted in accordance with the requirements of paragraph (e)(6) of this section so as to fully explain how a particular unusual circumstance(s) uncontrollably affected its payment error rate.

(v) *Determination.* When the Secretary determines that good cause exists for a State agency's failure to meet the payment error rate tolerance for the fiscal year, the Secretary shall reduce or eliminate the State agency's liability as the Secretary deems is appropriate under the circumstances. When a determination is based on information not submitted by a State agency, FNS shall issue a preliminary determination (certified mail, return receipt requested) on the good cause waiver request. The preliminary determination shall identify information used in the evaluation process which was not submitted by the State agency or information corrected by FNS. State agencies are allowed 30 days from the date of receipt of the preliminary determination in which to comment on the supplemental information and/or the corrected information. The State agency's response shall be limited to the additional information or the corrected information used by FNS.

(vi) *Finality.* The determinations of the Secretary concerning good cause are

final and not subject to further administrative or judicial review.

* * * * *

Dated: September 22, 1992.

Betty Jo Nelsen,

Administrator.

[FR Doc. 92-23315 Filed 9-25-92; 8:45 am]

BILLING CODE 3410-30-M

FARM CREDIT ADMINISTRATION

12 CFR Part 614

RIN 3052-AB13

Loan Policies and Operations; Definitions; Lending Authorities and Purchase and Sale of Interests in Loans; Correction

AGENCY: Farm Credit Administration.

ACTION: Final rule; correction.

SUMMARY: The Farm Credit Administration (FCA) published a final rule (57 FR 38237, August 24, 1992) that amended the regulations governing the lending, loan sale and purchase, and loan participation authorities of Farm Credit System institutions. This document corrects a typographical error in the final rule.

EFFECTIVE DATE: The regulations shall become effective upon the expiration of 30 days after publication during which either or both Houses of Congress are in session. Notice of the effective date will be published in the **Federal Register.**

FOR FURTHER INFORMATION CONTACT: Cindy R. Nicholson, Paralegal Specialist, Office of General Counsel, Farm Credit Administration, McLean, VA 22102-5090, (703) 883-4020, TDD (703) 883-4444.

SUPPLEMENTARY INFORMATION: In preparing the final rule for publication in the **Federal Register,** a typographical error was inadvertently made in the second sentence of § 614.4336(a)(2)(ii). Accordingly, FR Doc. 92-20153, published August 24, 1992, is amended as follows.

§ 614.4336 [Corrected]

1. On page 38249, third column, thirteenth line from the bottom, paragraph (a)(2)(ii) of § 614.4336 is corrected by removing the words "in effect" and adding in their place, the word "ineffective."

Dated: September 22, 1992.

Curtis M. Anderson,

Secretary, Farm Credit Administration Board.

[FR Doc. 92-23465 Filed 9-25-92; 8:45 am]

BILLING CODE 6705-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 92-CE-09-AD; Amendment 39-8366; AD 92-19-08]

Airworthiness Directives; Fairchild Aircraft (Formerly Swearingen Aviation Corporation) SA226 and SA227 Series Airplanes; Correction

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; correction.

SUMMARY: This action makes a correction to Airworthiness Directive (AD) 92-19-08 concerning certain Fairchild Aircraft (Fairchild) SA226 and SA227 series airplanes, which was published in the **Federal Register** on Thursday, August 27, 1992 (57 FR 38760). That document incorrectly references Fairchild Service Bulletin (SB) 227-27-029 as Fairchild SB 27-09. This action incorporates the correct reference to the applicable service information into the AD.

EFFECTIVE DATE: October 16, 1992.

FOR FURTHER INFORMATION CONTACT: Mr. Bob D. May, Aerospace Engineer, Airplane Certification Office, FAA, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas 76193-0150; Telephone (817) 624-5156.

SUPPLEMENTARY INFORMATION: On August 20, 1992, the Federal Aviation Administration (FAA) issued AD 92-19-08, Amendment 39-8366 (57 FR 38760, August 27, 1992), which was applicable to certain Fairchild SA226 and SA227 airplanes. The AD supersedes AD 81-02-01, Amendment 39-4009 (46 FR 867, January 5, 1981), with a new AD that (1) retains the inspection and modification of the rudder cable to rudder pedal link attachments, which was required by AD 81-02-01 on Fairchild SA226 series airplanes; and (2) extends the effectivity of to include certain Fairchild SA227 series airplanes. The required actions are accomplished in accordance with the instructions in either Swearingen Aviation Corporation Service Bulletin (SB) 27-027, issued: July 17, 1980; or Fairchild SB 227-27-029, issued: June 6, 1991, whichever is applicable.

That document incorrectly references Fairchild SB 227-27-029 as Fairchild SB 27-09.

Need for Correction

As published, the final regulations contain an incorrect service bulletin reference for the Fairchild SA227 series airplanes, which could prevent operators from complying with the actions of AD 92-19-08.

Correction of Publication

Accordingly, the publication of Friday, August 27, 1992 (57 FR 38760) of Amendment 39-8366; AD 92-19-08, which was the subject of FR Doc. 92-20525, is corrected as follows:

§ 39.13 [Corrected]

On page 38761, in the second column, in section 39.13, in line 8 of paragraph (a) of AD 92-19-08, replace "27-09," with "227-27-029,".

On page 38761, in the second column, in section 39.13, in lines 5 and 6 of paragraph (d) of AD 92-19-08, replace "27-09," with "227-27-029,".

Issued in Kansas City, Missouri, on September 21, 1992.

Dwight A. Young,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 92-23466 Filed 9-25-92; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 95

[Docket No. 26979; Amdt. No. 372]

IFR Altitudes; Miscellaneous Amendments

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts miscellaneous amendments to the required IFR (instrument flight rules) altitudes and changeover points for certain Federal airways, jet routes, or direct routes for which a minimum or maximum en route authorized IFR altitude is prescribed. These regulatory actions are needed because of changes occurring in the National Airspace System. These changes are designed to provide for the safe and efficient use of the navigable airspace under instrument conditions in the affected areas.

EFFECTIVE DATE: October 15, 1992.

FOR FURTHER INFORMATION CONTACT: Paul J. Best, Flight Procedures Standards Branch (AFS-420), Technical Programs Division, Flight Standards Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-8277.

SUPPLEMENTARY INFORMATION: This amendment to part 95 of the Federal Aviation Regulations (14 CFR part 95) amends, suspends, or revokes IFR altitudes governing the operation of all aircraft in flight over a specified route or any portion of that route, as well as the changeover points (COPs) for Federal airways, jet routes, or direct routes as

prescribed in part 95. The specified IFR altitudes, when used in conjunction with the prescribed changeover points for those routes, ensure navigation aid coverage that is adequate for safe flight operations and free of frequency interference. The reasons and circumstances which create the need for this amendment involve matters of flight safety, operational efficiency in the National Airspace System, and are related to published aeronautical charts that are essential to the user and provide for the safe and efficient use of the navigable airspace. In addition, those various reasons or circumstances require making this amendment effective before the next scheduled charting and publication date of the flight information to assure its timely availability to the user. The effective date of this amendment reflects those considerations. In view of the close and immediate relationship between these regulatory changes and safety in air commerce, I find that notice and public procedure before adopting this amendment are unnecessary, impracticable, and contrary to the public interest and that good cause exists for making the amendment effective in less than 30 days.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore—(1) is not a "major rule" under Executive Order 12291; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. For the same reason, the FAA certifies that this amendment will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 95

Aircraft, Airspace.

Issued in Washington, DC on September 18, 1992.

Thomas C. Accardi,

Director, Flight Standards Service.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, part 95 of the Federal Aviation Regulations (14 CFR part 95) is amended as follows effective at 0901 g.m.t.:

PART 95—[AMENDED]

1. The authority citation for part 95 continues to read as follows:

Authority: 49 U.S.C. 1348, 1354, and 1510; 49 U.S.C. 106(g) (Revised Pub. L. 97–449, January 12, 1983); and 14 CFR 11.49(b)(2).

2. Part 95 is amended to read as follows:

REVISIONS TO MINIMUM EN ROUTE IFR ALTITUDES and CHANGEOVER POINTS

BILLING CODE 4910–13–M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Part 150

Exemption From Speculative Position Limits for Positions Which Have a Common Owner, But Which Are Independently Controlled

AGENCY: Commodity Futures Trading Commission.

ACTION: Final rule.

SUMMARY: The Commodity Futures Trading Commission ("CFTC" or "Commission") is adopting rule amendments to eliminate the application requirement for the exemption from speculative position limits for positions which have a common owner but which are independently controlled. This change will significantly reduce paperwork associated with filing for these exemptions. Under the amended rule, the standards for eligibility remain the same, but the exemption will now be self-executing. As proposed and adopted, the amendments include a provision requiring entities exempt from speculative position limits under Commission Rule 150.3 to provide specified information related to that exemption upon a call by the Commission.

EFFECTIVE DATE: October 28, 1992.

FOR FURTHER INFORMATION CONTACT: John F. Fenton, Industry Economist, Division of Economic Analysis, Commodity Futures Trading Commission, 2033 K Street NW., Washington, DC 20581, (202) 254–3310.

SUPPLEMENTARY INFORMATION:

I. Background

A. Statutory and Regulatory Framework

Speculative position limits have been a tool for the regulation of futures markets for over half a century. *See,* Section 4a(1) of the Commodity Exchange Act ("Act"), 7 U.S.C. 6a(1) (1988). Generally, there are three elements to the Commission's regulatory framework of speculative position limits. They are the levels of the limits, the exemptions from them (in particular, for hedgers), and the policy on aggregating accounts. Since its creation, the Commission periodically has reviewed each of these policies pertaining to speculative position limits. The **Federal Register** notice announcing the proposal of these amendments to § 150.3 details the statutory and regulatory background of this rulemaking (57 FR 31674 (July 17, 1992)).

II. The Proposed Rule

After observing the application process for exemptive relief from speculative position limits for eligible entities for more than three years, and the operation of the revised filing requirements for approximately one year, the Commission concluded that it was appropriate to amend Commission Rule 150.3(a)(4) to make this exemption self-executing by placing the responsibility for assuring that an entity meets the standards to be eligible for this exemption on the entity itself. Under the proposed rule, the treatment of entities eligible for exemption from speculative position limits is closely analogous to that afforded to commodity trading advisors of futures commission merchants under the 1979 Aggregation Policy.[1]

Specifically, the Commission proposed to amend § 150.3(a)(4) to eliminate the requirements that entities eligible for the exemption file an application with the Commission and receive prior Commission approval before being permitted to exceed speculative position limits. Under this proposal, the entities eligible for, and the standards for, relief would remain the same, but the eligible entities would themselves be responsible for ascertaining whether or not they qualify for the exemption and for monitoring continued compliance. No filing, other than a standard CFTC Form 40 which accurately reflected the control relationship, would be required with the Commission.

The effect of the proposed rule would be to apply the speculative limit only to each independent account controller trading for the eligible entity and to permit the eligible entity to exceed the speculative position limit in an amount proportional to the number of independent account controllers trading on its behalf. Currently, the Commission, in granting the exemption on a case-by-case basis, has determined maximum exemption levels for eligible entities, as a whole, which were sometimes less than the multiple of the speculative position limit based on the total number of independent account controllers. These overall levels were determined based on market conditions in each particular futures contract market. It appears, however, that the positions of eligible entities have been well below their overall maximum levels. The overall maximum limits, therefore, in practice have not been a constraining factor. In addition, as the Commission pointed out in the **Federal Register** notice of its proposed rulemaking eligible entities must be registrants and the exemption applies only to positions outside the spot month. Therefore, the Commission believed that the proposed change with regard to the maximum permissible position levels would not be detrimental to the market.

In addition, the Commission also proposed to add Section 150.3(b) which provides that, upon call by the Commission, the Director of the Division of Economic Analysis, or the Director's delegee, any entity exempt from speculative position limits under Commission Rule 150.3(a) must provide to the Commission such information as specified in the call, relating to the positions owned or controlled by that person, trading done pursuant to the claimed exemption, the futures, options, or cash market position which support the claim of exemption, and the relevant business relationships, supporting a claim of exemption.

B. Comments Received

The Commission received four comments in response to its proposed rulemaking to eliminate the application and approval requirements for the exemption. The four commenters included a futures exchange, an industry association, a commodity trading advisor, and an introducing broker on behalf of a commodity trading advisor.

The commenters uniformly supported the proposal to eliminate the application and approval procedure and agreed that this would reduce the costs of qualifying for the exemption. Several commenters suggested, however, that for the exemption to be truly self-executing, and to significantly reduce the costs associated with the exemption, exchanges need to conform their requirements for the exemption with that of the Commission.

One commenter noted that the costs savings of not having to monitor an overall exemption level for the eligible entity as a whole would, in fact, be greater than the savings for the elimination of the application procedure. Another commenter noted, however, that by retaining the spot month aggregation requirement, the daily compliance burden for the eligible entity would be virtually unchanged, since the eligible entity would still be required to monitor the positions of independent account controllers on a daily basis.

III. The Final Rules

In light of the generally favorable comments, the Commission has decided to adopt as final the proposed rule eliminating the application and approval requirements for the exemption. The Commission believes that this will significantly reduce the costs on those qualifying for this exemption.

The Commission has carefully considered the views expressed by the commenters with regard to additional ways to lower the burden on those qualifying for this exemption. Several commenters noted that the potential cost savings cannot be fully realized unless the exchanges harmonize their rules with regard to this exemption with that of the Commission. The Commission understands the potential benefits of harmonized rules in this regard, and Commission staff are currently involved in discussions with the staffs of the various exchanges in an effort to have the most feasible coordinated approach, within the regulatory framework each exchange believes necessary to administer trading.

One commenter expressed concern that unless the exemption applied to positions in the spot month of futures contracts the daily compliance burden on eligible entities would be virtually unchanged. The Commission has historically been concerned about position concentration in futures contracts during the spot month, and has, therefore, been cautious in allowing exemptions to position limits in the spot month. For example, exemptions for spread or arbitrage positions between futures and option contracts and between single months of a futures contract, permitted under Commission Rules 150.3(a)(2) and 150.3(a)(3), respectively, apply only outside of the spot month. The Commission continues to believe a cautious approach is warranted with regard to positions in the spot month. In any event, the Commission has observed that entities eligible for this exemption rarely hold significant positions in the spot month, and therefore the exclusion of the spot month from the exemption should place no undue burden on these entities.

The Commission stresses that under the amended rule entities must assume responsibility for assuring themselves that the appropriate documentary and other factual evidence supports their

---

[1] The 1979 Aggregation Policy, in effect, disaggregated, for reporting and speculative limit purposes, positions of independent account controllers of futures commission merchants in any futures contract month. The current rule provides an exemption to speculative position limits, for independent account controllers of eligible entities, but not in the spot futures month if there is a position limit which applies to individual trading months during their expiration. Therefore, while generally in harmony, the 1979 Aggregation policy and proposed § 150.3(a)(4) would result in differing treatment with regard to positions in the spot month if there is a position limit which applies to individual trading months during their expiration.

eligibility for this exemption. These standards are not being changed by these rule amendments.[2] In particular, both the eligible entities and affiliated account controllers must continue to have in place procedures to assure the independence of the account controllers in order to meet the requirements of the exemption.

Although, under the amended rule, the exemption will be self-executing, the Commission cautions that, to the extent market surveillance uncovers trading patterns between such independent account controllers which suggest actual trading together or otherwise lack of independence on the part of various account controllers, the Commission will take those regulatory or enforcement actions which are appropriate and warranted.

IV. Related Matters

A. Regulatory Flexibility Act

The Regulatory Flexibility Act ("RFA"), 5 U.S.C. 601 et seq. requires that agencies, in proposing rules, consider the impact of these rules on small entities. The Commission has previously determined that "large traders" are not "small entities" for purposes of the RFA. 47 FR 18618 (April 30, 1982). These rules contain exemptions from limits on the size of speculative positions which typically may be held by the largest traders in these markets. Accordingly, these rules will have no significant impact on a substantial number of small entities. Moreover, the Commission invited comments from any firms or other persons which believed that the promulgation of these rules might have significant impact upon their activities. No such comments were received. For the above reason, and pursuant to Section 3(a) of the RFA, 5 U.S.C. 605(b), the Chairman, on behalf of the Commission, hereby certifies that these regulations will not have a significant economic impact on a substantial number of small entities.

B. Paperwork Reduction Act

The Paperwork Reduction Act of 1980 ("PRA"), 44 U.S.C. 3501 et seq., imposes certain requirements on federal agencies (including the Commission) in connection with their conducting or sponsoring any collection of information as defined by the PRA. In compliance with the PRA, the Commission previously submitted these rules in proposed firm and their associated information collection requirements to the Office of Management and Budget ("OMB"). OMB approved the collection of information associated with the rule on July 9, 1992 and assigned OMB control No. 3038–0013 to the rule. The burden associated with this entire collection including this proposed rule is as follows:

Average Burden Hours Per Response.	3.00
Number of Respondents	12
Frequency of Response	Annually

The burden associated with this specific final rule is as follows:

Average Burden Hours Per Response.	3.00
Number of Respondents	2
Frequency of Response	Annually

Copies of the OMB approved information collection package associated with this rule may be obtained from Gary Waxman, Office of Management and Budget, room 3228, NEOB, Washington, DC 20503, (202) 395–7340.

List of Subjects in 17 CFR Part 150

Agricultural commodities, Commodity futures, Cotton, Grains.

In consideration of the foregoing and pursuant to the authority contained in the Act and, in particular, sections 2(a)(11), 4a, and 8a(5) of the Act, 7 U.S.C. 4a(j), 6a, and 12a(5), the Commodity Futures Trading Commission hereby amends part 150 of chapter I of title 17 of the Code of Federal Regulations as follows:

PART 150—LIMITS ON POSITIONS

1. The authority citation for part 150 is revised to read as follows:

Authority: 7 U.S.C. 6a and 12a(5).

2. Section 150.1 is amended by revising paragraph (e)(3), by redesignating current paragraph (e)(4) as paragraph (e)(5), and by adding a new paragraph (e)(4) to read as follows:

§ 150.1 Definitions.

* * * * *

(e) *Independent account controller* means a person—

* * * * *

(3) Who trades independently of the eligible entity and of any other independent account controller trading for the eligible entity;

(4) Who has no knowledge of trading decisions by any other independent account controller; and

* * * * *

3. Section 150.3 is amended by revising paragraphs (a)(4) introductory text, (a)(4)(i) and (b) to read as follows:

§ 150.3 Exemptions.

(a) * * *

(4) Carried for an eligible entity as defined in § 150.1(d), in the separate account or accounts of an independent account controller, as defined in § 150.1(e), and not in the spot month if there is a position limit which applies to individual trading months during their expiration; *Provided, however,* That the overall positions held or controlled by each such independent account controller may not exceed the limits specified in § 150.2.

(i) Additional Requirements for Exemption of Affiliated Entities. If the independent account controller is affiliated with the eligible entity or another independent account controller, each of the affiliated entities must:

(A) Have, and enforce, written procedures to preclude the affiliated entities from having knowledge of, gaining access to, or receiving data about, trades of the other. Such procedures must include document routing and other procedures or security arrangements, including separate physical locations, which would maintain the independence of their activities; *provided, however,* That such procedures may provide for the disclosure of information which is reasonably necessary for an eligible entity to maintain the level of control consistent with its fiduciary responsibilities and necessary to fulfill its duty to supervise diligently the trading done on its behalf;

(B) Trade such accounts pursuant to separately-developed and independent trading systems;

(C) Market such trading systems separately; and

(D) Solicit funds for such trading by separate Disclosure Documents that meet the standards of § 4.21 or § 4.31 of this chapter, as applicable, where such Disclosure Documents are required under part 4 of this chapter.

* * * * *

[2] It should be noted, however, that § 150.3(a)(4)(i), as adopted, contains a technical amendment not included as part of the proposed rulemaking, in order to conform to Commission Rule 4.7. Commission Rule 4.7 provides, under certain conditions, exemptive relief to CPOs and CTAs from the requirement to provide disclosure documents to their clients. 57 FR 34853 (August 7, 1992). The intent of the technical amendment to § 150.3(a)(4)(i) is to make clear that disclosure documents are not required under this section from those who are exempt from this requirement under § 4.7.

(b) *Call for information.* Upon call by the Commission, the Director of the Division of Economic Analysis or the Director's delegee, any person claiming an exemption from speculative position limits under this section must provide to the Commission such information as specified in the call relating to the positions owned or controlled by that person; trading done pursuant to the claimed exemption; the futures, options or cash market positions which support the claim of exemption; and the relevant business relationships supporting a claim of exemption.

Issued in Washington, DC, this 18th day of September 1992, by the Commission.

Jean A. Webb,

Secretary of the Commission.

BILLING CODE 6351-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 358

[Docket No. 81N-0122]

RIN 0905-AA06

Corn and Callus Remover Drug Products for Over-the-Counter Human Use; Final Monograph; Updating and Technical Changes

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule amending the regulations that establish conditions under which over-the-counter (OTC) corn and callus remover drug products are generally recognized as safe and effective and not misbranded. These amendments will update the regulations, by making noncontroversial technical changes in the labeling of those products, to clarify that products contained in a collodion-like vehicle may be applied to the corn and callus with an applicator or a brush. This final rule is part of the ongoing review of OTC drug products conducted by FDA.

DATES: Effective on October 28, 1992; written comments by November 27, 1992; written comments on the agency's economic impact determination by November 27, 1992.

ADDRESSES: Written comments to the Dockets Management Branch (HFA-305), Food and Drug Administration, rm. 1-23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Center for Drug Evaluation and Research (HFD-810), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857; 301-295-8000.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 14, 1990 (55 FR 33258), FDA issued a final rule for OTC corn and callus remover drug products (21 CFR part 358) that specified the following directions statement for these drug products in a collodion-like vehicle under § 358.550(d)(2) (21 CFR 358.550 (d)(2)):

For products containing salicylic acid identified in § 358.510(b). "Wash affected area and dry thoroughly. Apply one drop at a time to sufficiently cover each corn/callus. Let dry. Repeat this procedure once or twice daily as needed for up to 14 days (until corn/callus is removed)." (Optional: "May soak corn/callus in warm water for 5 minutes to assist in removal.")

This final rule revises the wording in these directions to provide for the use of an applicator or a brush, if appropriate, in applying the product. Gelled or highly viscous collodion-like formulations may be more appropriately applied by a brush than an applicator such as a dropper or glass rod. This provision allows for appropriate labeling of OTC corn and callus remover drug products based on the physical characteristics of the product. Also, clinical studies have been conducted in which a brush applicator was used to apply the salicylic acid in a collodion-like vehicle to the affected area (Refs. 1 and 2). The revised directions for using OTC corn and callus remover drug products in a collodion-like vehicle in § 358.550(d)(2) now read:

For products containing salicylic acid identified in § 358.510(b). "Wash affected area and dry thoroughly. Apply" (select one of the following, as appropriate: "one drop" or "small amount") "at a time with" (select one of the following, as appropriate: "applicator" or "brush") "to sufficiently cover each corn/callus. Let dry. Repeat this procedure once or twice daily as needed for up to 14 days (until corn/callus is removed)." (Optional: "May soak corn/callus in warm water for 5 minutes to assist in removal.")

This labeling revision represents a minor clarifying change that does not change the substance of the labeling requirements contained in the final regulations. Therefore, the agency has determined that this labeling revision does not need to be implemented on the effective date of this final rule. Manufacturers may implement the revision at the next printing of labels for affected products.

The agency has examined the economic consequences of this final rule in conjunction with other rules resulting from the OTC drug review. In a notice published in the **Federal Register** of February 8, 1983 (48 FR 5806), the agency announced the availability of an assessment of these economic impacts. The assessment determined that the combined impacts of all the rules resulting from the OTC drug review do not constitute a major rule according to the criteria established by Executive Order 12291. The agency therefore concludes that no one of these rules, including this final rule amending the final monograph for OTC corn and callus remover drug products, is a major rule.

The economic assessment also concluded that the overall OTC drug review was not likely to have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (Pub. L. 96-354). That assessment included a discretionary regulatory flexibility analysis in the event that an individual rule might impose an unusual or disproportionate impact on small entities. However, this particular rulemaking for OTC corn and callus remover drug products is not expected to pose such an impact on small business. The only requirement is a minor optional labeling revision if desired, and the agency is allowing this revision to be made at the manufacturer's next printing of labels for affected products. Therefore, the agency certifies that this final rule will not have a significant economic impact on a substantial number of small entities.

The agency has determined under 21 CFR 25.24(c)(6) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

As noted previously, this final rule institutes a change that is nonsubstantive in nature. Because the revision is not controversial and because, when effective, it provides clarification of a final OTC drug monograph, FDA finds that the usual notice and comment procedures are unnecessary and not in the public interest. The final rule, therefore, shall become effective on October 28, 1992. However, interested persons may, on or before November 27, 1992, submit written comments on this final rule, including the agency's economic impact determination, to the Dockets

Management Branch (address above). Three copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

RIN 0905–AA06

Wart Remover Drug Products for Over-the-Counter Human Use; Final Monograph; Updating and Technical Changes

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is issuing a final rule amending the regulations that establish conditions under which over-the-counter (OTC) wart remover drug products are generally recognized as safe and effective and not misbranded. These amendments will update the regulations, by making noncontroversial technical changes in the labeling of those products, to clarify that products contained in a collodion-like vehicle may be applied to the wart with an applicator or a brush. This final rule is part of the ongoing review of OTC drug products conducted by FDA.

DATES: Effective on October 28, 1992; written comments by November 27, 1992; written comments on the agency's economic impact determination by November 27, 1992.

ADDRESSES: Written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: William E. Gilbertson, Center for Drug Evaluation and Research (HFD–810), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–295–8000.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of August 14, 1990 (55 FR 33246), FDA issued a final rule for OTC wart remover drug products (21 CFR part 358) that specified the following directions statement for these drug products marketed in a collodion-type vehicle under § 358.150(d)(2) (21 CFR 358.150 (d)(2)):

For products containing salicylic acid identified in § 358.110(b). "Wash affected area." (Optional: "May soak wart in warm water for 5 minutes.") "Dry area thoroughly." Apply one drop at a time to sufficiently cover each wart. Let dry. Repeat this procedure once or twice daily as needed (until wart is removed) for up to 12 weeks."

This final rule revises the wording in these directions to provide for the use of an applicator or a brush, as appropriate, in applying the product. Gelled or highly viscous collodion-like formulations may be more appropriately applied by a brush than an applicator such as a dropper or glass rod. This provision allows for appropriate labeling of OTC wart remover drug products based on the physical characteristics of the product. Also, clinical studies have been conducted in which a brush applicator was used to apply the salicylic acid in a collodion-like vehicle to the affected area (Refs. 1 and 2). The revised directions for use for OTC wart remover drug products in a collodion-like vehicle in § 358.150(d)(2) now read:

For products containing salicylic acid identified in § 358.110(b). "Wash affected area." (Optional: "May soak wart in warm water for 5 minutes.") "Dry area thoroughly Apply" (select one of the following, as appropriate: "one drop" or "small amount") "at a time with" (select one of the following, as appropriate: "applicator" or "brush") "to sufficiently cover each wart. Let dry Repeat this procedure once or twice daily as needed (until wart is removed) for up to 12 weeks."

This labeling revision represents a minor clarifying change that does not change the substance of the labeling requirements contained in the final regulations. Therefore, the agency has determined that this labeling revision does not need to be implemented on the effective date of this final rule. Manufacturers may implement the revision at the next printing of labels for affected products.

The agency has examined the economic consequences of this final rule in conjunction with other rules resulting from the OTC drug review. In a notice published in the **Federal Register** of February 8, 1983 (48 FR 5806), the agency announced the availability of an assessment of these economic impacts. The assessment determined that the combined impacts of all the rules resulting from the OTC drug review do not constitute a major rule according to the criteria established by Executive Order 12291. The agency therefore concludes that no one of these rules, including this final rule amending the final monograph for OTC wart remover drug products, is a major rule.

The economic assessment also concluded that the overall OTC drug review was not likely to have a significant economic impact on a substantial number of small entities as defined in the Regulatory Flexibility Act (Pub. L. 96–354). That assessment included a discretionary regulatory flexibility analysis in the event that an individual rule might impose an unusual or disproportionate impact on small entities. However, this particular rulemaking for OTC wart remover drug products is not expected to pose such an impact on small business. The only requirement is a minor optimal labeling

revision, if desired, and the agency is allowing this revision to be made at the manufacturer's next printing of labels for affected products. Therefore, the agency certifies that this final rule will not have a significant economic impact on a substantial number of small entities.

The agency has determined under 21 CFR 25.24(c)(6) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

As noted previously, this final rule institutes a change that is nonsubstantive in nature. Because the revision is not controversial and because, when effective, it provides clarification of a final OTC drug monograph, FDA finds that the usual notice and comment procedures are unnecessary and not in the public interest. The final rule, therefore, shall become effective on October 28, 1992. However, interested persons may, on or before November 27, 1992, submit written comments on this final rule, including the agency's economic impact determination, to the Dockets Management Branch (address above). Three copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

BILLING CODE 4160-01-F

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 58

[MI12-5586; FRL-4513-3]

Modification of the Ozone Monitoring Season; Michigan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: Ozone (O_3) is required to be monitored at National Air Monitoring Stations (NAMS) and State and Local Air Monitoring Stations (SLAMS) only during the "ozone season" as designated in the Aerometric Information Retrieval System (AIRS) files on a state by state basis. Previously, the ozone season for Michigan had been designated as April 1 through October 31. A review of monitoring data for the past 5 years revealed that high ozone concentrations do not occur during the month of October in Michigan. Therefore, pursuant to 40 CFR 58.13(a)(3), USEPA agreed with the State's request to modify its ozone season and has determined that Michigan is now subject to an April-September monitoring timeframe. The modified ozone season will apply to 1992 ozone monitoring data and future monitoring efforts unless otherwise revised.

EFFECTIVE DATE: This action will be effective November 27, 1992 unless notice is received within 30 days that someone wishes to submit adverse or critical comments. If the effective date is delayed, timely notice will be published in the **Federal Register.**

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Camille Szematowicz, Air Toxics and Radiation Branch, Regulation Development Section, U.S. Environmental Protection Agency, Region 5, Chicago, Illinois 60604, (312) 886-6081.

SUPPLEMENTARY INFORMATION: The State of Michigan monitors for ozone and submits data to AIRS as required to determine the air quality and attainment status of metropolitan areas, and to recognize trends in air quality. 40 CFR 58.13(a)(3) provides that the Regional Administrator may exempt periods or seasons from consecutive hourly averages for continuous State and Local Air Monitoring Station (SLAMS) analyzers. Part 58 appendix D, lists the current ozone season on a state by state basis. The Michigan season is listed as April through October.

On February 28, 1992, the Michigan Department of Natural Resources (MDNR) requested that USEPA modify the State's current ozone season to the period April 1 through September 30. In order to support its position the State submitted 5 years of air monitoring data for the month of October. USEPA has reviewed the State's submittal in accordance with the Office of Air Quality Planning and Standards (OAQPS) document "Guideline on Modification to Monitoring Seasons for Ozone" (March 1990). Consistent with the guidelines, Michigan's air monitoring data indicates that for the five most recent years (1987-1991), there have been no recorded ozone concentrations above the 0.100 ppm guideline during the month of October. USEPA approved Michigan's request to eliminate the month of October from its official monitoring season, and as required by the above mentioned guidance document, OAQPS concurred on this approval on May 29, 1992. Valdas V. Adamkus, Regional Administrator.

Region 5, notified Robert P. Miller, Chief, Air Quality Division, MDNR, of USEPA's approval of Michigan's request on August 18, 1992.

The USEPA has determined that this change to the ozone monitoring season in Michigan complies with all applicable requirements of the Clean Air Act and USEPA policy and regulations concerning such revisions. Due to the minor nature of this revision, USEPA concluded that conducting notice and comment rulemaking prior to approving the revision would have been "unnecessary and contrary to the public interest," and hence was not required by the Administrative Procedure Act, 5 U.S.C. 553(b). This action became final and effective on August 18, 1992, the date of USEPA approval of the States's request.

This action has been classified as a Table 3 action by the Regional Administrator under the procedures published in the **Federal Register** on January 19, 1989 (54 FR 2214–2225). On January 6, 1989, the Office of Management and Budget waived Table 2 and 3 State Implementation Plan (SIP) revisions (54 FR 2222) from the requirements of Section 3 of Executive Order 12291 for a period of 2 years. USEPA has submitted a request for a permanent waiver for Table 2 and Table 3 SIP revisions. The OMB has agreed to continue the temporary waiver until such time as it rules on USEPA's request.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 27, 1992. This action may not be challenged later in proceedings to enforce its requirements (see 307(b)(2)).

Standards of Performance for New Stationary Sources; Calciners and Dryers in Mineral Industries

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: Standards of performance for calciners and dryers in mineral industries were proposed in the **Federal Register** on April 23, 1986. This action promulgates standards of performance for calciners and dryers in the mineral industries. These standards implement Section 111 of the Clean Air Act and are based on the Administrator's determination that calciners and dryers in the mineral industries cause or contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. The intended effect of these standards is to require all new, modified, or reconstructed calciners and dryers to achieve emission levels that reflect the best demonstrated system of continuous emission reduction, considering costs, nonair quality health, and environmental and energy impacts.

DATES: *Effective Date.* September 28, 1992.

Judicial Review. Under section 307(b)(1) of the Clean Air Act, judicial review of this new source performance standard (NSPS) is available only by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of today's publication of this rule. Under section 307(b)(2) of the Clean Air Act, the requirements that are the subject of today's notice may not be challenged later in civil or criminal proceedings brought by EPA to enforce these requirements.

ADDRESSES: *Background Information Document.* The background information document (BID) for the promulgated standards may be obtained from the U.S. EPA Library (MD–35), Research Triangle Park, North Carolina 27711, telephone number (919) 541–2777. Please refer to "Calciners and Dryers in Mineral Industries—Background Information for the Promulgated Standards," EPA 450/3–85–025b. The BID contains (1) a summary of all the public comments made on the proposed standards and the Administrator's response to comments; (2) a summary of the changes made to the regulation since proposal; and (3) the final Environmental Impact Statement which summarizes the impacts of the standards.

Docket. A docket, number A–82–39, containing information considered by EPA in development of the promulgated standards is available for public inspection between 8:30 a.m. and 3:30 p.m., Monday through Friday, at EPA's Air Docket Section (LE–131), Waterside Mall, room M1500, 1st Floor, 401 M Street, SW., Washington, DC 20460. A reasonable fee may be charged for copying.

FOR FURTHER INFORMATION CONTACT: Ms. Linda Herring, telephone (919) 541–5358, concerning regulatory decisions; Mr. Bill Neuffer, telephone (919) 541–5435, concerning technical aspects of the industry and control technologies. The address for the above contacts is Emission Standards Division (MD–13), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

SUPPLEMENTARY INFORMATION:

I. The Standards

Standards of performance for new sources established under section 111 of the Clean Air Act reflect:

> * * * application of the best technological system of continuous emission reduction which (taking into consideration the cost of achieving such emission reduction, any nonair quality health and environmental impact and energy requirements) the Administrator determines has been adequately demonstrated [section 111(a)(1)].

For convenience, this will be referred to as "best demonstrated technology" or "BDT."

The promulgated standards apply to new, modified, and reconstructed calciners and dryers at plants that process or produce any of the following minerals or their concentrates: Alumina, ball clay, bentonite, diatomite, feldspar, fire clay, fuller's earth, gypsum, industrial sand, kaolin, lightweight aggregate, magnesium compounds, perlite, roofing granules, talc, titanium dioxide, and vermiculite.

The affected facility for mineral processing plants in each of the industries listed above would be each

new, modified or reconstructed calciner or dryer. The types of dryers to which the standards apply include: rotary (direct), rotary (indirect), fluid bed, vibrating grate, flash, and spray dryers. The types of calciners to which the standards apply include: Rotary, flash, and kettle calciners; multiple hearth furnaces; and expansion furnaces.

The following processes and process units used at mineral processing plants would not be regulated under this NSPS: Vertical shaft kilns in the magnesium compounds industry; the chlorination-oxidation process in the titanium dioxide industry; coating kilns, mixers, and aerators in the roofing granules industry; and tunnel kilns, tunnel dryers, apron dryers, and grinding equipment that also dries the process material used in any of the 17 mineral industries. In addition, for the brick and related clay products industry, only the calcining and drying of raw materials prior to firing of the brick are covered because these are the only major sources of air pollution in that industry that fall under this generic source category.

The standards are based on emission levels achievable using well-designed and operated fabric filters, wet scrubbers or electrostatic precipitators (ESP's). All of these systems are considered BDT for controlling emissions from calciners and dryers in this source category, depending on the type of calciner and dryer and mineral industry. The promulgated standards limit stack emissions of particulate matter from affected facilities. The standards for stack emissions limit the concentration of particulate matter to 0.092 gram per dry standard cubic meter (g/dscm) [0.040 grain per dry standard cubic foot (gr/dscf)] for calciners and for calciners and dryers installed in series. For dryers, the concentration of particulate matter is limited to 0.057 g/dscm (0.025 gr/dscf).

Stack emissions would also be limited to 10 percent opacity for process units controlled with dry control devices. The visible emissions standard would not apply to affected facilities that use wet scrubbers to control emissions. Instead, monitoring and reporting of the operating parameters of wet scrubbers (pressure drop and liquid flow rate) would be required to indicate that the control device is properly operated and maintained on a routine basis.

When a dry control device (e.g., baghouse or ESP) is used to comply with the calciner or dryer mass emission standard, the owners or operators of the units are required to install a Continuous Opacity Monitoring System (COMS), except as noted below.

Owners or operators of ball clay vibrating grate dryers, bentonite rotary dryers, diatomite flash dryers, diatomite rotary calciners, feldspar rotary dryers, fire clay rotary dryers, industrial sand fluid bed dryers, kaolin rotary calciners, perlite rotary dryers, roofing granules fluid bed dryers, roofing granules rotary dryers, talc rotary calciners, titanium dioxide fluid bed dryers, titanium dioxide spray dryers, vermiculite fluid bed dryers, or vermiculite rotary dryers who use a dry control device may have a certified visible emissions observer measure and record the opacity of the visible emissions daily in lieu of using a COMS. Owners or operators of ball clay rotary dryers, diatomite rotary dryers, feldspar fluid bed dryers, fuller's earth rotary dryers, gypsum rotary dryers, gypsum flash calciners, gypsum kettle calciners, industrial sand rotary dryers, kaolin rotary dryers, kaolin multiple hearth furnaces, perlite expansion furnaces, talc flash dryers, talc rotary dryers, titanium dioxide direct or indirect rotary dryers or vermiculite expansion furnaces who use a dry control device are exempt from the monitoring requirements.

When a wet scrubber is used to comply with the calciner or dryer mass emission standard, the owner or operator would be required to install, calibrate, maintain, and operate monitoring devices that continuously measure and record the pressure loss of the gas stream through the scrubber and the scrubbing liquid flow rate to the scrubber. The pressure loss monitoring device must be certified by the manufacturer to be accurate within 1 inch of water column (in. W.C.) gauge pressure. The liquid flow rate monitoring device must be certified by the manufacturer to be accurate within 5 percent of design scrubbing liquid flow rate.

Method 5 of appendix A, 40 CFR part 60, will be used to determine compliance with the stack concentration standard. Method 9 of Appendix A and the procedures in 40 CFR 60.11 will be used to measure the opacity of stack emissions from dry control devices.

II. Environmental Impacts

The standards will reduce projected nationwide particulate emissions from new, modified, and reconstructed calciners and dryers in the mineral industries in the fifth year following promulgation of the standards by 7,900 megagrams (Mg) (8,800 tons) compared to emissions allowed under typical State process weight regulations. This represents a 78 percent reduction in particulate matter emissions from these sources.

The nationwide increase in solid waste (as a sludge containing 70 percent moisture) in the fifth year would be 7,500 Mg (8,300 tons) compared to the State Implementation Plan (SIP) level. The only solid waste impacts would be from the solids in the sludge produced by wet scrubbers. Typically, a particulate-contaminated water stream is pumped to a settling pond on the site. The solids settle in the pond, and the water is recirculated to the scrubber. When solids fill the pond, the pond could be dredged and the solids could be landfilled, or a new pond could be constructed. Solid wastes from wet scrubbers used to control emissions from dryers and calciners are not classified as hazardous wastes under the regulations adopted to implement the Resource Conservation and Recovery Act. The standards would result in negligible adverse water, noise, and radiation impacts.

III. Energy Impacts

In the fifth year after the NSPS would become applicable, the maximum increase in energy consumption for mineral calciner and dryer control devices would be 17,000 megawatt-hours (MWh) compared to the SIP level of control for typical facilities. This incremental energy requirement of the NSPS to operate control equipment would be less than 1 percent of the energy demands to operate the calciner and dryer process units.

IV. Economic Impacts

Based on industry growth projections, it is estimated that 62 new claciners and 32 new dryers will be installed in the first 5 years that the NSPS is in effect. In addition, during this same time period it is expected that 60 calciners and 44 dryers will be replaced at existing facilities at the end of their useful lives.

The total nationwide incremental capital cost of pollution control equipment in the fifth year would range from $2.2 to $3.0 million under the standards compared to the SIP level. The variation in costs is due to those process units for which either a fabric filter or a wet scrubber could be installed. If only wet scrubbers were installed, the capital cost of installation would be lower than if only fabric filters were installed. For the 104 new process units that are projected in the first 5 years of the NSPS to replace existing units at the end of their useful lives, capital control device costs would increase over baseline levels in 23 percent of the cases as a result of upgrading the design of the control devices (e.g., increased pressure drop for

a wet scrubber). In 11 percent of the cases, the existing wet scrubber control devices are operated at pressure drops that achieve both the SIP and NSPS emission limits and, therefore, no incremental capital costs would be incurred as a result of the NSPS. In 66 percent of the cases, fabric filters installed to meet SIP emission limits would achieve the NSPS emission limit with improved operation and maintenance. Therefore, there is no capital cost increase for fabric filter control devices.

The total nationwide incremental annualized cost of pollution control equipment in the fifth year would range from $0.7 to $1.0 million. If only wet scrubbers were installed where an option exists, the annualized costs would be higher than if only fabric filters were installed because of the additional energy costs associated with operating a scrubber and the product recovery credits associated with operating a fabric filter.

The annualized control device costs for the 104 projected process units would increase as a result of improved operation and maintenance of fabric filters (66 percent of the cases) or as a result of upgrading the design of a wet scrubber or ESP (23 percent of the cases). As with the capital costs, annualized control costs would not change in 11 percent of the cases where wet scrubbers achieve both the SIP and NSPS emission limits.

The projected growth and profitability of the 17 mineral industries are not expected to be affected adversely by implementation of the NSPS. For 15 of the 17 industries included in the analysis, the product price increases that would be required as a result of the NSPS would typically be less than 0.5 percent. Typical size facilities in the fire clay and lightweight aggregate industries would experience product price increases of 1.00 and 1.75 percent, respectively, as a result of implementation of the NSPS.

A detailed discussion of the costs and economic impacts associated with the NSPS is contained in the preamble (51 FR 15438; April 23, 1986) and BID (EPA 450/3–85–025a) for the proposed standards.

V. Public Participation

Prior to proposal of the standards, interested parties were advised by public notice in the **Federal Register** (50 FR 31025; July 31, 1985) of a meeting of the National Air Pollution Control Techniques Advisory Committee to discuss the standards for calciners and dryers in mineral industries recommended for proposal. The meeting was held on September 17, 1985. The meeting was open to the public and each attendee was given an opportunity to comment on the standards recommended for proposal. The proposed standards were published in the **Federal Register** on April 23, 1986 (51 FR 15438).

The preamble to the proposed standards discussed the availability of the BID, "Calciners and Dryers in Mineral Industries—Background Information for Proposed Standards" (EPA–450/3–85–025a), which described in detail the regulatory alternatives considered and the impacts of those alternatives. Public comments were solicited at the time of proposal and, when requested, copies of the BID were distributed to interested parties. To provide interested persons the opportunity for oral presentation of data, views, or arguments concerning the proposed standards, a public hearing was held on June 9, 1986, at Research Triangle Park, North Carolina. The hearing was open to the public and each attendee was given an opportunity to comment on the proposed standards. The public comment period was from April 23, 1986, to July 7, 1986.

Fourteen comment letters were received and 12 interested parties testified at the public hearing concerning issues relative to the proposed standards. The comments have been carefully considered and, where determined to be appropriate by the Administrator, changes have been made in the proposed standards.

VI. Significant Comments and Changes to the Proposed Standards

Comments on the proposed standards were received from industry, trade associations, and State air pollution control agencies. A detailed discussion of these comments and responses can be found in the BID, which is referred to in the **ADDRESSES** section of this preamble. The summary of comments and responses in the BID serves as the basis for the revisions which have been made to the standards between proposal and promulgation.

In response to the public comments and as a result of EPA's reevaluation, several changes have been made to the standards since proposal. The definition of "mineral processing plant" in the standards was revised to provide that a new, modified, or reconstructed dryer or calciner which processes a mixture of minerals is covered by the standards if the majority of the material being processed (greater than 50 percent) is any of the following minerals or a combination of these minerals: Alumina, ball clay, bentonite, diatomite, feldspar, fire clay, fuller's earth, gypsum, industrial sand, kaolin, lightweight aggregate, magnesium compounds, perlite, roofing granules, talc, titanium dioxide, and vermiculite.

Also, changes have been made with regard to the opacity monitoring requirements. The owners or operators of certain units that use a dry control device to comply with the calciner or dryer mass emissions standard are required to install a COMS, except as discussed previously under Section I of this preamble. In addition, certain calciners and dryers as listed in Section I and in the regulation are exempt from the monitoring requirement.

A technical correction was made to the final standards to clarify the monitoring and recordkeeping requirements for facilities which are controlled by wet scrubbers. In addition, the semiannual recalibration requirements for monitoring devices in § 60.734, Monitoring of emissions and operations, have been deleted. The only requirement for COM's intended for operation and maintenance are daily zero and span checks.

In § 60.735, paragraph (b) was added to clarify that each owner or operator who uses a wet scrubber to comply with the standards must record daily the arithmetic average over a 2-hour period of both the change in pressure of the gas stream across the scrubber and the scrubbing liquid flowrate.

The major comments and responses are summarized in this preamble. Most of the comment letters contained multiple comments. The comments have been divided into the following areas: Need for Regulation of Source Category, Control Technology, Economic Impact, Selection of Emission Limits, and Monitoring Requirements.

A. Need for Regulation of Source Category

Several commenters questioned EPA's determination that calciners and dryers in mineral industries are sources of emissions that cause, or contribute significantly to, air pollution that may reasonably be anticipated to endanger public health and welfare.

There are six source categories currently listed on the NSPS priority list (August 21, 1979; 44 FR 49225; revised January 8, 1982; 47 FR 950) that include all 17 mineral industries being covered by this NSPS. Number 13 on the priority list is Nonmetallic Mineral Processing, which includes sand and gravel, clay (ball clay, bentonite, fuller's earth, kaolin), talc, feldspar, diatomite, roofing granules, and vermiculite. Number 14 on the priority list, Metallic Mineral

Processing, includes aluminum, magnesium compounds, and titanium dioxide. The lightweight aggregate (LWA) industry (clay, shale, slate) is Number 32 on the NSPS priority list. Numbers 34, 46, and 54 on the list are gypsum, brick and related clay products (fire clay), and perlite, respectively. The priority list was promulgated under Section 111(f) of the Clean Air Act. Source categories were included on the list if, in the Administrator's judgment, they cause or significantly contribute to, air pollution which may reasonably be anticipated to endanger public health or welfare. Source categories were ranked in order of priority according to (1) quantity of emissions; (2) potential impact on health and welfare; and (3) mobility and competitive nature of the source category.

These industries were included on the NSPS priority list because of their emissions of particulate matter. Particulate matter is a criteria pollutant which has been determined to be an air pollutant that may endanger public health and welfare and for which a national ambient air quality standard (NAAQS) has been promulgated (40 CFR 50.6 and 50.7). Fuller's earth, alumina, ball clay, bentonite, fire clay, kaolin, magnesite, and other dusts emitted by the industries covered by the NSPS are types of particulate matter. The basis for the Administrator's determination that particulate emissions may endanger public health and welfare is presented in the rulemaking for setting and revising the NAAQS for particulate matter (52 FR 24634; July 1, 1987).

The main purpose of standards of performance is to require new sources, wherever located, to reduce emissions to the level achievable by the best technological system of continuous emission reduction considering the cost of achieving such emission reduction, any nonair quality health and environmental impact, and energy requirements (BDT) [Section 111(a)(1)]. Congress recognized that establishing such standards would minimize increases in air pollution from new sources, thereby improving air quality as the nation's industrial base is replaced over the long term. An NSPS thereby serves as a distinct means of achieving the Act's goals, supplementing the role played by the requirements, including Reasonably Available Control Technology requirements for existing and new sources within State implementation plans developed for the purpose of attaining the NAAQS.

The existence of other environmental regulations was considered during selection of BDT, but their existence does not lead the EPA to conclude that standards reflecting better control technology cannot be applied at reasonable costs.

The EPA has considered the emission reductions, costs, and other impacts due to emission controls and has concluded that the controls underlying the standards are BDT. Under Section 111 of the Clean Air Act, EPA is therefore required to promulgate standards of performance that reflect BDT for this category of sources.

B. Control Technology

Several commenters perceived that the proposed standards did not allow for the use of low-energy wet scrubbers because control devices with greater energy consumption are required to achieve the NSPS limits. They felt that energy consumption is an important consideration in the selection of a control device and it is inappropriate to regulate against the use of energy-efficient devices.

The EPA does not necessarily recommend the use of a high pressure drop scrubber or any other emission control technology to attain and maintain compliance with the performance requirements of this standard. Compliance with the pollutant concentration limits of this standard can generally be achieved by application of one of many alternative emission control strategies and, for a specific case, EPA does not require that a particular control device be used.

In several industries, EPA has determined that low energy wet scrubbers (pressure drops less than 6 inches of water gauge) can achieve the standard based on emission test data presented in chapter 4 of the proposal BID. The pressure drops required for scrubbers to meet the standards were based on the most-difficult-to-control case for that particular process unit in each industry. Other process units in that industry that are less difficult to control should be able to comply with this NSPS using lower pressure drops. In all cases, the cost, energy, and economic impacts associated with any increased pressure drop were evaluated and determined to be reasonable by EPA.

C. Economic Impact

Seven commenters stated that the LWA industry is declining due to rising energy costs, environmental control costs, and impacts of product substitutes, in particular, pumice. Two of these commenters felt that the LWA industry would be destroyed by the proposed standards. One commenter stated that, due to the additional environmental control costs, many companies would continue to operate old, existing sources and eventually the industry would die of old age and lack of reinvestment. The commenters suggested that the LWA industry either be dropped because of economic reasons or that an alternative control level equal to current State regulations be selected.

One of the commenters stated that the incremental capital cost for a lightweight aggregate calciner would be 10 to 20 times higher than the cost for other industries based on data in the proposal BID. Also, the commenter calculated the annual incremental cost for this industry to be 4–9 times that estimated by EPA for other industries. He also stated that the costs and product price increases were underestimated by EPA and that these costs and price increases would be overly burdensome on the LWA industry considering that this industry accounted for only 5.8 percent of the emission reduction from this NSPS.

Another commenter believed that this NSPS would have a doubling effect in terms of costs on the LWA industry as the standards also apply to the refractory industry whose products are used by the LWA industry. This commenter also stated that this NSPS would have a similar cumulative economic impact on the fire clay industry as that industry uses both dryers and calciners. He also stated that other regulated minerals are used in the refractory products and, therefore, price increases could approach 3–4 percent and create a major burden on the refractory industry.

The EPA believes the costs and economic impacts associated with this NSPS are reasonable and would not have the disruptive impact on the LWA and refractory industries described by the commenters. Many factors such as obsolete machinery; newer, more efficient and competitive plants; changing market demands; and better substitute products influence a corporate decision as to whether it is prudent to invest in new equipment or to continue to operate old, existing equipment until operation is no longer possible. The product price increases attributable to the NSPS are quite small—less than 2 percent for all industries. It is possible that various forces external to the costs of NSPS would preclude investment in newer plants and equipment. The actual cost, however, resulting from this NSPS is very small, and it is unlikely that investment plans would be made based on a cost so small.

With regard to pumice, there is no doubt that pumice is a substitute for LWA, although in many cases pumice is an inferior substitute. The LWA industry has a far larger share of the total market (LWA plus pumice) than pumice. Pumice's share of the market has ranged from 9 to 19 percent of the total market, an average of 13 percent. The current levels of production of LWA are down from past levels. However, the losses in LWA production are due to other factors and not due to gains by pumice as pumice's recent share of the total market is similar to its historical position. Additionally, pumice production from domestic mines has declined, as well as pumice imports, signalling a downturn in the total market for both products. The EPA does not believe that the cost of this NSPS will lead to a competitive disadvantage for the LWA industry.

In regard to the incremental cost of an NSPS, it is important to establish a common basis. One basis used by EPA is the ratio of the incremental cost of the NSPS to the megagrams (Mg) of reduction in particulate emissions. The range of incremental cost using this approach for the LWA industry, depending on the type and size of the affected facility, is $240 to $1,100/Mg. This is within the range of incremental cost per megagram ratios determined for the other industries affected by the NSPS.

Another measure of the effect of incremental cost relates incremental cost to the selling price of the product. Based on a product price of $22/Mg for the LWA industry and allowing for the increased costs that the commenter felt EPA missed, the percent product price increase including electrical costs would be 0.4 to 2.4 percent depending on the type of control device. These impacts were considered reasonable and not burdensome by EPA.

Additive effects of the NSPS are possible where an industry utilizes both calciners and dryers. In the case of fire clay production, cumulative effects could be as high as 2 percent; although effects would typically be 1.6 percent using the least costly control device for a rotary dryer. The 2 percent estimate is based on the smallest plant size and resultant worst case.

In estimating the additive effects for refractory products manufacturing, the commenter simply added the price increase for LWA and the price increase for fire clay. This is an overstatement because refractories are only a portion of the cost components for LWA. In order to calculate the actual effect, one needs to know the percent of the LWA plant's total expenses that is attributable to refractory products. This can then be used to calculate how much the plant's total expenses will increase as a result of any increase in the price for refractory products. In any case, the increase will be less than the 3 to 4 percent estimated by the commenter. Therefore, EPA does not believe the NSPS will have a doubling effect in terms of cost on the LWA industry.

D. Selection of Emission Limits

One commenter recommended limiting emissions from both calciners and dryers to 0.092 g/dscm (0.040 gr/dscf). The commenter felt the proposed limit for dryers of 0.057 g/dscm would preclude the use of low energy scrubbers. Two commenters questioned the fairness and rationale of having a more stringent standard (0.057 g/dscm) for dryers alone compared with the standard (0.092 g/dscm) for dryers and calciners in series. One of the commenters stated that it did not seem equitable because producers without calciners but with dryers would be bound by a more stringent standard.

The NSPS emission limit for calciners and for dryers and calciners in series (0.092 g/dscm) is different than for dryers alone (0.057 g/dscm) because EPA's emission test data support these limits. As shown in chapter 4 of the proposal BID, all emission test data for dryers were less than 0.057 g/dscm except for four dryers controlled by wet scrubbers and one controlled by a baghouse which was not operating properly as there was leakage through a closed bypass damper. By using EPA's wet scrubber model, increases in pressure drop were calculated to ascertain what is required to achieve 0.057 g/dscm. All emission test data for calciners were less than 0.092 g/dscm except for three calciners controlled by wet scrubbers. Again, EPA's wet scrubber model was used to determine the pressure drop required to achieve 0.092 g/dscm. Also, emission test results for a flash dryer/rotary calciner installed in series were 0.092 g/dscm.

These limits are based on EPA's judgment of the technology which represents BDT considering the cost, any nonair quality health, environmental impact, and energy requirements. In this case, BDT is a baghouse or high energy scrubber, although in some instances low energy scrubbers may achieve comparable performance. A standard based on low energy scrubbers for all sources covered by this NSPS would not reflect BDT or reduce emissions to a level achievable by BDT.

E. Monitoring Requirements

Several commenters felt that the reasons used by EPA to justify continuous opacity monitoring and the associated recordkeeping and reporting are inadequate. Two of the commenters stated that broken bags in a collector are apparent without the need for a COMS and the increased capital and operating costs associated with it are not commensurate with the benefits. They felt that this requirement should apply only to major sources of pollution. Another commenter stated that his company's experience with these monitors has shown them to be expensive, difficult to install, very difficult to maintain, and inaccurate. He recommended dropping the requirements.

One commenter stated that the measured moisture content with the flue gases from their dryers vary from 7 to 22 percent by volume and during cold weather, plume moisture occurs with little or no plume stack separation. In addition, he stated that condensed water has appeared on the stack exterior in the vicinity of the sample ports at his plant. He felt these conditions were not conducive to in-stack opacity monitoring devices and, therefore, it would be more reasonable to require a certified observer to record opacities on a periodic basis. Another commenter felt that a COMS for an ESP controlling a dryer processing bentonite would continuously yield erroneous readings due to dripping water, falling clay-laden films, and clay film bridging. He cited problems his company has experienced with a bentonite dryer controlled by a dry ESP.

In regard to the commenters' concerns about the opacity monitoring requirements and the use of COMS's, section 114 of the CAA authorizes EPA to require such monitoring as is appropriate for enforcing NSPS. Also, Section 302(1) of the CAA defines "standards of performance" to include "any requirement relating to the operation and maintenance of a source to assure continuous emission reduction." The EPA's experience with control devices shows that regular maintenance, both remedial and preventive, greatly enhances control equipment efficiency. As stated in the preamble to the proposed standards (51 FR 15438; April 23, 1986), opacity monitoring can indicate when fabric filter bags are torn loose and when ESP electrodes are damaged or malfunctioning. The EPA's long-time experience with COMS's is that the devices operate accurately and with

minimum downtime with regular and reasonable maintenance.

The EPA agrees with the commenters that a sudden increase in emissions resulting from either broken bags in a baghouse or a sudden failure of a baghouse or ESP would be immediately apparent and require attention by the source operator. However, the purpose of a COMS or other monitoring alternatives such as daily visible emissions observations is to alert industry and enforcement personnel of potential violations of the mass emission standard and to ensure the proper operation and maintenance of particulate control equipment on a continuous basis; i.e., to alert the operator to more subtle and gradual deterioration of the control device efficiency that occurs over time and results in increased emissions unless corrected. The emission reduction performance of air pollution control equipment is dependent upon the proper operation of many components of the control systems. While certain parameters can provide information on the status of certain key components, it is generally not possible to determine overall control device performance by monitoring parameters other than emissions. Without COMS's, operators have essentially no tools that they can use to monitor the continued performance of ESP's or fabric filter systems or to ensure that necessary maintenance is performed. The broken rapper welds and bag deterioration are examples of items that affect emissions and that cannot be evaluated or detected except with COMS's. The reporting of excursions as recorded by COMS's also helps State and local enforcement programs identify sources which are having repeated maintenance problems with their control devices. Since plant inspections and testing are infrequent, gradual deterioration will not be detected until a major failure occurs unless opacity monitoring is required.

The benefits of using a COMS are documented in a recent study conducted at Portland cement plants (Docket A–82–39, Item II–A–130). The study concludes that COMS's installed on control equipment at these plants contributed significantly to lower emissions. The emission reduction benefits are derived from: (1) Indicating when repair and maintenance of control equipment are needed, (2) signalling the need for a change in operating and maintenance practices for the process and the air pollution control device, and (3) quantifying emission reductions after the installation of a COMS. Factors which contributed to the lower emissions from the facilities were: (1) An increased sensitivity of the plant operating personnel that changes in process operating conditions and flue gas characteristics affect stack emissions, and (2) the awareness by plant operators that increased stack opacities below the opacity limit can be indications of excess particulate emissions.

Nevertheless, as the amount of emissions from an individual source decreases, the benefits of monitoring also decrease and at some point it is no longer reasonable to require a COMS or other monitoring alternative. Therefore, as a result of the comments received, EPA evaluated four alternative monitoring requirements: The use of a COMS; the reading of visible emissions daily or weekly by a certified visible emissions observer; and no monitoring requirements (Docket No. A–82–39; Item IV–B–1).

As a result of the analysis, the Administrator has determined that it is reasonable to require the installation of COMS's on all dryers and calciners of a certain type within an industry where the typical size unit of that type has potential emissions after NSPS control equal to or greater than 22.7 Mg/yr (25 tons/yr). For typical size units with emissions less than 22.7 Mg/yr (25 tons/yr) but greater than or equal to 10.0 Mg/yr (11 tons/yr), the Administrator has determined that owners or operators may perform daily visible emission observations in lieu of installing a COMS. The Administrator has also determined that typical units with emissions less than 10.0 Mg/yr (11 tons/yr) should be exempt from any monitoring requirements. Because of the variation in emissions after NSPS control for each size and type of calciner or dryer and for each industry, the monitoring requirements are based on the typical size of a particular type of calciner or dryer in each industry. The specific monitoring requirements for each type of dryer or calciner in each industry are presented in Section 60.734 of the final standards.

The following discussion summarizes the basis for the specific monitoring requirements for each type of dryer or calciner. The EPA used 22.7 Mg/yr (25 tons/yr) as the cutoff level for particulate matter (PM) emissions in determining which facilities would be required to install COMS's if they use dry control devices. In the prevention of significant deterioration (PSD) rules, EPA set *de minimis* levels of emissions for various pollutants. For PM emissions, the level was selected by evaluating the potential effect of different emissions levels on an area's air quality and how that related to the National Ambient Air Quality Standard (NAAQS) for PM. The analysis was based on a source's potential to emit after application of all appropriate Federal regulations such as NSPS. The significance level for PM emissions was set at 22.7 Mg/yr (25 tons/yr). Therefore, the Administrator has determined that it is beneficial and reasonable to require the installation of COMS's on all calciners and dryers of a certain type within an industry where the typical size unit of that type has emissions after NSPS control equal to or greater than 22.7 Mg/yr (25 tons/yr).

As stated previously, however, as the amount of emissions from an individual source decreases, the expected benefits of monitoring decrease and at some point it is no longer reasonable to require a COMS or other monitoring alternative. As a result, for calciners and dryers with emissions of less than 22.7 Mg/yr (25 tons/yr) after NSPS controls, the EPA assessed alternatives other than the installation of a COMS. These alternatives included daily or weekly visible emissions observations and no monitoring requirements. In assessing the reasonableness of performing daily versus weekly visible emission observations, it was determined that the cost of either one would be similar but would not deliver the same benefits. In both cases, employees of the affected plant would need to be formally certified as opacity readers twice per year. The costs associated with the certification would be incurred regardless of whether a daily or weekly monitoring requirement was imposed. The other costs associated with these alternatives are the annual cost of performing the observations and recording the results. The annual cost of weekly readings of visible emissions would be reduced somewhat, but because of the fixed cost of certification, would cost approximately 40 percent of the cost of doing daily observations. Moreover, a daily observation program would be more effective at identifying gradual deterioration of the control device efficiency and allowing a plant operator time to correct the problem prior to a complete failure of the device. A weekly observation program would not identify the gradual deterioration of the control device as quickly and, in some cases, a failure of the control device could occur between two weekly observations. Because requiring daily observations would yield substantially greater benefits than weekly observations and the cost difference

was considered reasonable, the alternative of weekly observations was considered inferior for the sources with less than 22.7 Mg/yr (25 tons/yr) of emissions after NSPS control. Therefore, for typical size units with emissions less than 22.7 Mg/yr (25 tons/yr), but greater than or equal to 10.0 Mg/yr (11 tons/yr), the regulation has been revised to allow the owner or operator to perform daily visible emission observations in lieu of installing a COMS.

On the other hand, the Administrator has determined that typical size units with emissions less than 10.0 Mg/yr (11 tons/yr) should be exempt from any monitoring requirements. In making this determination, consideration was given to the size of the source in terms of the emissions after NSPS control is applied. In addition, the benefits associated with monitoring, such as identifying sources that are having control equipment problems for the appropriate enforcement agency so corrective action can be taken, were considered. For very small sources with small control devices, the benefits associated with a COMS or daily visible emission observations, in terms of reducing excess emissions, are smaller in comparison to larger sources. The cost of daily visible emission observations as a percent of the annualized cost of operating the control equipment was also considered. For these reasons, typical size units with emission less than 10.0 Mg/yr (11 tons/yr) are exempt from any monitoring requirements.

In regard to concerns raised about moisture on the exterior of a stack interfering with the operation or accuracy of a COMS, EPA does not believe this condition will have any effect on the measurement of opacity in the stack and the commenter had no data to support this claim. However, if high moisture content in the stack or other situations such as falling clay-laden films or clay-film bridging are interfering with the performance of a COMS, the owner or operator may petition the Administrator to approve an alternative monitoring procedure, requirement, or location according to 40 CFR 60.13(i).

VII. Administrative Requirements

A. Docket

The docket is an organized and complete file of all the information considered by EPA in the development of this rulemaking. The docketing system is intended to allow members of the public and industries involved to readily identify and locate documents so that they can intelligently and effectively participate in the rulemaking process. Along with the statement of basis and purpose of the proposed and promulgated standards and EPA responses to significant comments, the contents of the docket, except for interagency review materials, will serve as the record in case of judicial review (section 307(d)(7)(A)).

B. Paperwork Reduction Act

The information collection requirements contained in this rule have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 et seq. and have been assigned OMB control number 2063-_____.

The public reporting burden for this collection of information is estimated to average 492 hours per response, including time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Chief, Information Policy Branch (PM-223), U.S. Environmental Protection Agency, 401 M Street, SW., Washington, DC 20460; and to the Office of Information and Regulatory Affairs, Paperwork Reduction Project (2063-_____) Office of Management and Budget, Washington, DC 20503, marked "Attention: Desk Officer for EPA."

C. Executive Order 12291

Under Executive Order 12291, EPA is required to judge whether a regulation is a "major rule" and, therefore, subject to certain requirements of the Order. The EPA has determined that the regulation would result in none of the adverse economic effects set forth in Section 1 of the Order as grounds for finding a regulation to be major. The total nationwide incremental annualized costs in the fifth year after the standards would go into effect would range from $0.7 to $1.0 million, less than the $100 million established as the first criterion for a major regulation in the Order. The maximum estimated price increase of 1.75 percent associated with the standards would not be considered a "major increase in costs or prices" specified as the second criterion in the Order. The economic analysis of the standard's effect on the industry did not indicate any significant adverse effects on competition, investment, productivity, employment, innovation, or the ability of U.S. firms to compete with foreign firms which is the third criterion in the Order.

This regulation was submitted to OMB for review as required by Executive Order 12291. Any written comments from OMB to EPA and any EPA response to those comments are available for public inspection in Docket No. A-82-39, at EPA's Air Docket Section listed under the **ADDRESSES** section.

D. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) requires EPA to consider potentially adverse impacts of regulations on small business "entities." If a preliminary analysis indicates that a regulation would have a significant economic impact on 20 percent or more of small entities, then an RFA must be prepared. The EPA definition of significant effect involves four tests: (1) Prices for small entities rise 5 percent or more, assuming costs are passed on to consumers; or (2) annualized investment costs for pollution control are greater than control costs as a percentage of sales for large entities; or (3) control costs as a percentage of sales for small entities are 10 percent greater than control costs as a percentage of sales for large entities; or (4) the requirements of the regulation are likely to result in closures of small entities.

The Act's definition of "small business" is based on definitions developed by the Small Business Administration (SBA). The SBA's definitions are listed in 13 CFR part 121 by Standard Industrial Classification (SIC) categories. For most of the mineral dryer and calciner industries, the SBA defines a small business as one with 500 or fewer employees (the two exceptions are gypsum and titanium dioxide, each of which is 1,000 employees). Most of the mineral dryer and calciner industries do include small businesses according to the SBA definiton. The regulation would apply to all businesses (small and large) in the 17 industries, and as a result the test of a substantial number of small businesses is met.

Although there are a substantial number of small businesses, the measure of significant effects is not likely to be met. The absolute level of the percent product price increases is quite small for most of the industries, typically about 0.5 percent or less. Thus, the first test is never triggered. Neither are the second or fourth tests triggered. The third test is occasionally triggered, but the absolute sizes of the numbers are so small as to make this test inapplicable. For example, in the diatomite industry, a small flash dryer (4 Mg/h) has control costs as a percentage of sales that are 23 percent higher than

the corresponding percentage for a larger flash dryer (11 Mg/h). But the absolute levels of these two percentages are 0.16 percent and 0.13 percent, and the 23 percent difference between them is virtually meaningless. Thus, because the absolute levels of the percent product price increases are quite small for most of the industries, and because the tests are presented as guidelines, as interpretation of he spirit and purpose of the Act indicates that the industries do not exceed the Act's states. Because these standards impose no adverse economic impacts, Regulatory Flexibility Analysis has not be conducted.

Pursuant to the provisions of 5 U.S.C. 605(b), I hereby certify that this rule will not have a significant economic impact on a substantial number of small entities because the impact of the final rule is not significant.

E. Miscellaneous

The effective date of this regulation is September 28, 1992. Section 111 of the Clean Air Act provides that NSPS or revisions thereof become effective upon promulgation and apply to affected facilities, the construction or modification of which was commenced after the date of proposal, April 23, 1986.

As described in section 111, the promulgation of these standards was preceded by the Administrator's determination (40 CFR 60.16, 44 FR 49222, dated August 21, 1979) that calciners and dryers in use in the mineral processing industries contribute significantly to air pollution which may reasonably be anticipated to endanger public health or welfare. In accordance with section 117 of the Act, publication of these promulgated standards was preceded by consultation with appropriate advisory committees, independent experts, and Federal departments and agencies.

Section 317 of the Clean Air Act requires the Administrator to prepare an economic impact assessment for any NSPS promulgated under section 111(b) of the Act. An economic impact assessment was prepared for this regulation and for other regulatory alternatives. All aspects of the assessment were considered in determining BDT. The economic impact assessment is included in the BID for the proposed standards.

This regulation will be reviewed 4 years from the date of promulgation as required by the Clean Air Act. This review will include an assessment of such factors as the need for integration with other programs, the existence of alternative methods, enforceability, improvements in emission control technology, and recordkeeping and reporting requirements.

List of Subjects in 40 CFR Part 60

Air pollution control, Incorporation by reference, Intergovernmental relations, Metallic minerals, Nonmetallic minerals, Reporting and recordkeeping requirements.

Dated: September 19, 1992.

William K. Reilly,

Administrator.

40 CFR Part 60 is amended as follows:

PART 60—[AMENDED]

1. The authority citation for part 60 continues to read as follows:

Authority: Sections 101, 111, 114, 116, 301, Clean Air Act as amended (42 U.S.C. 7401, 7411, 7414, 7416, 7601).

2. By adding a new subpart UUU consisting of §§ 60.730 through 60.737 to read as follows:

Subpart UUU—Standards of Performance for Calciners and Dryers in Mineral Industries

Sec.

60.730 Applicability and designation of affected facility.
60.731 Definitions.
60.732 Standards for particulate matter.
60.733 Reconstruction.
60.734 Monitoring of emissions and operations.
60.735 Recordkeeping and reporting requirements.
60.736 Test methods and procedures.
60.737 Delegation of authority.

Subpart UUU—Standards of Performance for Calciners and Dryers in Mineral Industries

§ 60.730 Applicability and designation of affected facility.

(a) The affected facility to which the provisions of this subpart apply is each calciner and dryer at a mineral processing plant. Feed and product conveyors are not considered part of the affected facility. For the brick and related clay products industry, only the calcining and drying of raw materials prior to firing of the brick are covered.

(b) An affected facility that is subject to the provisions of subpart LL, Metallic Mineral Processing Plants, is not subject to the provisions of this subpart. Also, the following processes and process units used at mineral processing plants are not subject to the provisions of this subpart: vertical shaft kilns in the magnesium compounds industry; the chlorination-oxidation process in the titanium dioxide industry; coating kilns, mixers, and aerators in the roofing granules industry; and tunnel kilns, tunnel dryers, apron dryers, and grinding equipment that also dries the process material used in any of the 17 mineral industries (as defined in § 60.731, "Mineral processing plant").

(c) The owner or operator of any facility under paragraph (a) of this section that commences construction, modification, or reconstruction after April 23, 1986, is subject to the requirements of this subpart.

§ 60.731 Definitions.

As used in this subpart, all terms not defined herein shall have the meaning given them in the Clean Air Act and in subpart A of this part.

Calciner means the equipment used to remove combined (chemically bound) water and/or gases from mineral material through direct or indirect heating. This definition includes expansion furnaces and multiple hearth furnaces.

Control device means the air pollution control equipment used to reduce particulate matter emissions released to the atmosphere from one or more affected facilities.

Dryer means the equipment used to remove uncombined (free) water from mineral material through direct or indirect heating.

Installed in series means a calciner and dryer installed such that the exhaust gases from one flow through the other and then the combined exhaust gases are discharged to the atmosphere.

Mineral processing plant means any facility that processes or produces any of the following minerals, their concentrates or any mixture of which the majority (>50 percent) is any of the following minerals or a combination of these minerals: alumina, ball clay, bentonite, diatomite, feldspar, fire clay, fuller's earth, gypsum, industrial sand, kaolin, lightweight aggregate, magnesium compounds, perlite, roofing granules, talc, titanium dioxide, and vermiculite.

§ 60.732 Standards for particulate matter.

Each owner or operator of any affected facility that is subject to the requirements of this subpart shall comply with the emission limitations set forth in this section on and after the date on which the initial performance test required by § 60.8 is completed, but not later than 180 days after the initial startup, whichever date comes first. No emissions shall be discharged into the atmosphere from any affected facility that:

(a) Contains particulate matter in excess of 0.092 gram per dry standard cubic meter (g/dscm) [0.040 grain per dry standard cubic foot (gr/dscf)] for

calciners and for calciners and dryers installed in series and in excess of 0.057 g/dscm for dryers; and

(b) Exhibits greater than 10 percent opacity, unless the emissions are discharged from an affected facility using a wet scrubbing control device.

§ 60.733 Reconstruction.

The cost of replacement of equipment subject to high temperatures and abrasion on processing equipment shall not be considered in calculating either the "fixed capital cost of the new components" or the "fixed capital cost that would be required to construct a comparable new facility" under § 60.15. Calciner and dryer equipment subject to high temperatures and abrasion are: end seals, flights, and refractory lining.

§ 60.734 Monitoring of emissions and operations.

(a) With the exception of the process units described in paragraphs (b), (c), and (d) of this section, the owner or operator of an affected facility subject to the provisions of this subpart who uses a dry control device to comply with the mass emission standard shall install, calibrate, maintain, and operate a continuous monitoring system to measure and record the opacity of emissions discharged into the atmosphere from the control device.

(b) In lieu of a continuous opacity monitoring system, the owner or operator of a ball clay vibrating grate dryer, a bentonite rotary dryer, a diatomite flash dryer, a diatomite rotary calciner, a feldspar rotary dryer, a fire clay rotary dryer, an industrial sand fluid bed dryer, a kaolin rotary calciner, a perlite rotary dryer, a roofing granules fluid bed dryer, a roofing granules rotary dryer, a talc rotary calciner, a titanium dioxide spray dryer, a titanium dioxide fluid bed dryer, a vermiculite fluid bed dryer, or a vermiculite rotary dryer who uses a dry control device may have a certified visible emissions observer measure and record three 6-minute averages of the opacity of visible emissions to the atmosphere each day of operation in accordance with Method 9 of appendix A of part 60.

(c) The owner or operator of a ball clay rotary dryer, a diatomite rotary dryer, a feldspar fluid bed dryer, a fuller's earth rotary dryer, a gypsum rotary dryer, a gypsum flash calciner, gypsum kettle calciner, an industrial sand rotary dryer, a kaolin rotary dryer, a kaolin multiple hearth furnace, a perlite expansion furnace, a talc flash dryer, a talc rotary dryer, a titanium dioxide direct or indirect rotary dryer or a vermiculite expansion furnace who uses a dry control device is exempt from the monitoring requirements of this section.

(d) The owner or operator of an affected facility subject to the provisions of this subpart who uses a wet scrubber to comply with the mass emission standard for any affected facility shall install, calibrate, maintain, and operate monitoring devices that continuously measure and record the pressure loss of the gas stream through the scrubber and the scrubbing liquid flow rate to the scrubber. The pressure loss monitoring device must be certified by the manufacturer to be accurate within 5 percent of water column gauge pressure at the level of operation. The liquid flow rate monitoring device must be certified by the manufacturer to be accurate within 5 percent of design scrubbing liquid flow rate.

(Approved by the Office of Management and Budget under control number 2060–A999)

§ 60.735 Recordkeeping and reporting requirements.

(a) Records of the measurements required in § 60.734 of this subpart shall be retained for at least 2 years.

(b) Each owner or operator who uses a wet scrubber to comply with § 60.732 shall determine and record once each day, from the recordings of the monitoring devices in § 60.734(d), and arithmetic average over a 2-hour period of both the change in pressure of the gas stream across the scrubber and the flowrate of the scrubbing liquid.

(c) Each owner or operator shall submit written reports semiannually of exceedances of control device operating parameters required to be monitored by § 60.734 of this subpart. For the purpose of these reports, exceedances are defined as follows:

(1) All 6-minute periods during which the average opacity from dry control devices is greater than 10 percent; or

(2) Any daily 2-hour average of the wet scrubber pressure drop determined as described in § 60.735(b) that is within 10 percent of the average value recorded according to § 60.736(c) during the most recent performance test that demonstrated compliance with the particulate matter standard; or

(3) Each daily wet scrubber liquid flow rate recorded as described in § 60.735(b) that is within 20 percent of the average value recorded according to § 60.736(c) during the most recent performance test that demonstrated compliance with the particulate matter standard.

(d) The requirements of this section remain in force until and unless the Agency, in delegating enforcement authority to a State under section 111(c) of the Clean Air Act, approves reporting requirements or an alternative means of compliance surveillance adopted by such State. In that event, affected facilities within the State will be relieved of the obligation to comply with this section provided that they comply with the requirements established by the State.

(Approved by the Office of Management and Budget under control number 2060–A999)

§ 60.736 Test methods and procedures.

(a) In conducting the performance tests required in § 60.8, the owner or operator shall use the test methods in Appendix A of this part or other methods and procedures as specified in this section, except as provided in § 60.8(b).

(b) The owner or operator shall determine compliance with the particulate matter standards in § 60.732 as follows:

(1) Method 5 shall be used to determine the particulate matter concentration. The sampling time and volume for each test run shall be at least 2 hours and 1.70 dscm.

(2) Method 9 and the procedures in § 60.11 shall be used to determine opacity from stack emissions.

(c) During the initial performance test of a wet scrubber, the owner or operator shall use the monitoring devices of § 60.734(d) to determine the average change in pressure of the gas stream across the scrubber and the average flowrate of the scrubber liquid during each of the particulate matter runs. The arithmetic averages of the three runs shall be used as the baseline average values for the purposes of § 60.735(c).

§ 60.737 Delegation of authority.

(a) In delegating implementation and enforcement authority to a State under section 111(c) of the Act, the authorities contained in paragraph (b) of this section shall be retained by the Administrator and not transferred to a State.

(b) Authorities which will not be delegated to States: No restrictions.

[FR Doc. 92–23450 Filed 9–25–92; 8:45 am]
BILLING CODE 6560–50–M

FEDERAL MARITIME COMMISSION

46 CFR Parts 502, 514, and 550

[Docket No. 92–38]

Reduction of Notice Requirement for Tariff Increases in the Domestic Offshore Trades; Exemption Under Section 35 of the Shipping Act, 1916

AGENCY: Federal Maritime Commission.

ACTION: Final rule.

SUMMARY: The Federal Maritime Commission ("Commission" or "FMC") amends its regulations governing the publishing, filing and posting of tariffs in domestic offshore commerce and its rules governing protests and replies thereto. These amendments would reduce notice requirements for tariff increases by carriers providing port-to-port service in the domestic offshore trades and would amend the time for protesting such increases. The exemption would permit such carriers to publish, on not less than seven workdays' notice, any new or changed tariff matter which results in an increased cost to the shipper, but which does not meet the statutory definition of general rate increase, or the new definition of across-the-board increase incorporated in this rule. Protests to increases or changes filed on less than thirty days' notice could be filed not later than 9 a.m. of the last workday prior to the effective date of the increase or rule change.

EFFECTIVE DATE: October 28, 1992.

FOR FURTHER INFORMATION CONTACT: Seymour Glanzer, Director, Bureau of Hearing Counsel, Federal Maritime Commission, 800 North Capitol St., NW., Washington, DC 20573–0001; (202) 523–5783 (Phone), (202) 523–5785 (Fax).

SUPPLEMENTARY INFORMATION: Section 2 of the Intercoastal Shipping Act, 1933 ("1933 Act"), 46 U.S.C. app. 844, requires ocean carriers providing port-to-port service in the domestic offshore trades to file, on thirty days' notice, any new or changed tariff matter, except for general rate increases or decreases, which must be filed on sixty days' notice. On December 16, 1991, the Commission issued a final rule in Docket No. 91–42, *Tariff Filing Notice Requirements; Domestic Offshore Trades*, 26 S.R.R. 70 (1991), which creates an exemption under section 35 of the Shipping Act, 1916 ("1916 Act"), 46 U.S.C. app. 833a, for such carriers to file on one day's notice any new or changed tariff matter which does not increase the shipper's cost of transportation.[1] This action followed and superseded several earlier exemptions to the thirty days' notice requirement which were granted to particular carriers or trades pursuant to individual applications for such relief.[2] In granting these exemptions from statutory notice requirements, the Commission cited regulations of the Interstate Commerce Commission ("ICC"), at 49 CFR 1312.39(h), which permit new and reduced joint, single-factor, motor-water rates to be filed on one day's notice with that agency.

For more than a decade, regulatory jurisdiction in the domestic offshore trades has been split between this Commission and the ICC, depending on whether the form of transportation is port-to-port, or joint intermodal transportation with a segment taking place within a state or the District of Columbia. In the latter case, the entire transportation, including the ocean portion, is subject to ICC jurisdiction.[3]

Independent motor-water rates and charges in the domestic offshore trades filed at the ICC may be increased on not less than seven workdays' notice pursuant to ICC regulations at 49 CFR 1312.39(h) (2) and (4). Those same regulations permit changes on seven workdays' notice to rules or other provisions which effect reductions in the value of service or increases in rates or charges. Rates, rules and charges of ICC-regulated freight forwarders of household goods are governed by the same provisions.

Ocean carriers providing port-to-port services subject to FMC jurisdiction compete with carriers providing motor-water services subject to ICC jurisdiction.[4] Thus, to foster greater consistency in regulation and to permit carriers to compete more equally in the domestic offshore trades, the Commission proposed to reduce notice requirements for tariff increases in these trades from thirty days to seven workdays. The proposed change applied to both vessel-operating carriers and non-vessel operating common carrier ("NVOCCs") and governed commodity rate increases as well as other new or changed tariff filings which would result in an increase in the shippers' cost of transportation, but which would not meet the statutory definition of "general rate increase" ("GRI").[5]

In deciding to reduce the notice period for tariff increases, the Commission also noted that the shorter time period would give shipping lines the flexibility to respond more quickly to market changes and would remove a disincentive to establishing lower rates. As noted by Professor David A. Butz in an Addendum Report to the Advisory Commission on Conferences in Ocean Shipping, p. E–39 (1992), requiring a long notice period to increase individual rates introduces price rigidity and creates an incentive for a carrier not to cut rates.

Currently, the Commission's rules permit protests to proposed tariff changes made pursuant to the 1933 Act to be filed and served no later than twenty days prior to the proposed effective date of the change. 46 CFR 502.67(b)(2). The ICC permits protests of a tariff filed on less than ten days' notice (including motor-water tariffs filed pursuant to 49 CFR 1312.39(h) (2) and (4)) to be submitted not later than 9 a.m. on the last workday before the tariffs scheduled effective date. 49 CFR 1132.1(b). To be consistent with the ICC, and to give protestants the maximum amount of time for preparing protests and requests for investigation and suspension, we proposed a similar rule for challenging tariff increases before the FMC. In addition, the rule proposed to reduce the required contents of such protests to accommodate the shorter time for preparation.

In recognition of the vital interests of offshore states, territories and possessions in ocean transportation, the Commission also proposed that increases filed by carriers on less than 30 days' notice be transmitted by facsimile transmission, or by hand delivery, on the date of filing, to officials or offices designated by states, territories or possessions served by the carrier in order to provide several extra days for review now consumed by the process of mailing such tariff changes. Notice of the proposed rule was published in the **Federal Register** on June 16, 1992, 57 FR 26809.

Comments in support of the proposal were filed by American President Lines, Ltd. ("APL"), Coastal Transportation,

---

[1] This exemption does not extend to any "general decrease in rates" as that term is defined by section 1 of the 1933 Act, 46 U.S.C. app. 843. Such general decreases still require sixty days' notice.

[2] *Matson Navigation Co., Inc.—Application for Section 35 Exemption*, 24 S.R.R. 1518 (1989); *Tariff Filing Periods—Exemption*, 24 S.R.R. 1604 (1989); *Application of Sea-Land Service, Inc. For Exemption Under section 35 of the Shipping Act, 1916*, 25 S.R.R. 660 (1990); *Tropical Shipping & Construction Co., Ltd.—Application for Section 35 Exemption*, 25 S.R.R. 1471 (1991); *Application of Trailer Marine Transport Corporation Under Section 35 of the Shipping Act, 1916*, 25 S.R.R. 1660 (1991); *Puget Sound Tug & Barge Co.—Application for Section 35 Exemption: Hawaii and Alaska Trades*, 26 S.R.R. 61 (1991).

[3] *Puerto Rico Maritime Shipping Authority* v. *ICC*, 645 F. 2d 1102 (D.C. Cir. 1981); *Trailer Marine Transport Corp.* v. *FMC*, 602 F. 2d. 370 (D.C. Cir. 1979).

[4] There also may be competition in some of the domestic offshore trades from carriers offering rail-water services subject to ICC jurisdiction. In general, rates, rules and charges for rail services may be increased on 20 days' notice. 49 CFR 1312.39(h)(2) and 1312.4(e)(1)(i)(A). However, rail carriers also may provide intermodal service which is exempt from regulation under 49 CFR part 1090.

[5] General rate increases, as defined by section 1 of the 1933 Act, would continue to be filed on sixty days' notice, to permit the thorough analysis of these increases directed by Congress in the 1978 amendments to that statute. See H.R. Rep. No. 474, 95th Cong. 1st Sess. 9 (1977); S. Rep. No. 1240, 95th Cong. 2d Sess. 12 (1978).

Inc. ("Coastal"), Crowley Maritime Corporation ("Crowley"), Matson Navigation Company, Inc. ("Matson"), Puerto Rico Maritime Shipping Authority ("PRMSA"), Sea-Land Service, Inc. ("Sea-Land"), and Tropical Shipping and Construction Co., Ltd. ("Tropical"). Opposing comments were filed by the State of Hawaii ("Hawaii"), and Tobias E. Seaman/NASCCMA aka National Association of Shippers, Consignees and Consumers for Maritime Affairs ("Seaman").

Generally, the seven commenting carriers support the proposed rule, and agree the that FMC-regulated carriers will be able to compete more equally with ICC-regulated carriers should this proposal be implemented. Several of these comments, however, indicate a preference for other forms of regulation or relief. For example, APL states a belief that a requirement of thirty days' notice of increases is desirable because of the stability and opportunity for competitive equality such a notice provides to shippers. Nevertheless, APL supports this rule because of the availability of seven workdays' notice of increases for motor-water rates in these trades. Coastal would prefer seven calendars days', rather than seven workdays' notice of increases. Tropical would prefer that the Commission adopt a zone of reasonableness for rate increases up to ten percent and further zone of reasonableness for the U.S. Virgin Islands Trade, as suggested by its comments in Docket No. 91-51, Financial Reports of Common Carriers by Water in the Domestic Offshore Trades, advance notice of proposed rulemaking, 56 FR 57298 (Nov. 8, 1991).

In addition, clarification is sought by PRMSA as to whether the term "tariff matter" as used in § 550.2(b) 1) and (2) is intended to include all "rules, rates, charges and notes." PRMSA states that its experience in filing tariff matter that does not result in an increased cost to the shipper on one day's notice, as currently permitted by § 550.1(b)(1), has been that notes and footnotes have not been included within this definition.

Both APL and PRMSA suggest modifications to the provision requiring carriers to deliver short notice tariff increases by hand or facsimile transmission ("fax") to officials or offices of states, commonwealths or territories. APL urges that such a requirement be implemented without directing carriers to place a rule in their tariffs to that effect. PRMSA seeks clarification whether this requirement applies to all states served by the carrier, or just to offshore jurisdictions. PRMSA also urges clarification that the obligation rests upon individual states, commonwealths and territories to provide the name, address and fax number of each official or office designated to receive such tariff changes. Tropical suggests that the Commission solicit the views of the various offshore governments and allow them to decide if and when they want notice of rate increases, rather than assume that an offshore government desires to receive each and every change filed by a carrier.

Two of the carriers suggest modifications or clarifications to that part of the proposed rule which would permit protests to increases to be filed as late as 9 a.m. of the day prior to the effective date of the increases. APL and Sea-Land urge retention of the current rules for protests against increases that are filed (voluntarily) on at least thirty days' notice. Currently, protests are required to be filed and served no later than twenty days prior to the proposed effective date of the change. Sea-Land also argues that the proposed rule should not remove the current requirement that protests include a subscription and verification.

Hawaii opposes that portion of the proposed rule which would affect across-the-board rate increases of less than three percent. It argues that GRIs have become the exception, rather than the rule, and that the instant proposal would effectively remove non-GRIs, which can have significant impact, from regulatory oversight. While recognizing the problems which arise because the ICC and FMC apply different regulatory models to competitors, and sometimes to the same carrier, Hawaii argues that it is the FMC's model that should be preserved (with certain other modifications) and the ICC's which should be revisited. Hawaii also questions the Commission's authority to promulgate this rule and argues that neither the market, which is said to be distorted by cabotage laws and other government aids, nor the right to file a complaint seeking reparation, are satisfactory substitutes for effective regulation.

Seaman on behalf of himself and NASCCMA and its members,[6] describes the proposed rule as an attempt to deregulate the domestic offshore trades and lists nine reasons for opposing the Commission's proposed action.

Among the nine reasons, Seaman argues that the Commission is proposing to exceed its authority by amending section 2 of the 1933 Act, that the proposal is contrary to the language and legislative history of section 35 of the 1916 Act, and that the proposal would place an unfair burden on shippers and violate their due process rights as well as the 1916 Act and the Administrative Procedure Act 5 U.S.C. 551 et seq. Seaman also points to differences in statutes administered by the FMC and ICC as reasons for not adopting ICC regulations governing rate increases, and asserts that there is no need to conform to ICC regulations because any carrier may file tariffs with the ICC at any time. Seaman argues that the domestic offshore trades are not contestable markets, citing the recent decision of the U.S. Court of Appeals for the D.C. Circuit upholding the Commission's conclusion to that effect in FMC Docket No. 90-09,[7] and asserts that there is no basis in fact that carriers in these trades would be more likely to reduce their rates if they were permitted a shorter notice period for rate increases. In addition, Seaman suggests that the Commission has misread President Bush's memorandum of January 28, 1992 (Reducing the Burden of Government Regulation), and that it was not the President's intent to remove regulations where the result would be substantial cost increases to the consumer.

The Commission is persuaded by the comments of Hawaii and Seaman that the proposed exemption should not apply to across-the-board increases of less than 3 percent. Recent experience with such increases in the Hawaii trade and the similarity of such increases to GRIs warrants a distinction between these and other types of non-GRI increases.

As noted in Hawaii's comments, across-the-board increases of less than 3 percent have been a significant feature of recent domestic offshore ratemaking. In fact, a table introduced by Hawaii in Docket No. 90-09,[8] *supra*, listed twenty across-the-board rate increases in the Hawaii trade between 1983 and 1990, thirteen of which did not meet the GRI threshold of 3 percent. The Commission instituted two separate investigations into across-the-board rate increases of less than 3 percent in 1985, found one increase to be unreasonable [9] and

[6] Mr. Seaman has appeared and filed documents on behalf of NASCCMA in several FMC proceedings, but has never identified the membership of that organization.

[7] *Matson Navigation Company, Inc. Proposed General Rate Increase of 3.6 Percent Between U.S. Pacific Coast Ports and Hawaii Ports*, 25 S.R.R. 1102 (1990), *aff'd sub nom. Matson Navigation Company, Inc. v. FMC*, 959 F.2d 1039, 26 S.R.R. 283 (D.C. Cir. 1992).

[9] Docket No. 85-24, *Matson Navigation Company, Inc. Proposed Overall Rate Increase of 2.5 Percent*

Continued

discontinued the investigation of the other because of a deadlocked 2–2 vote.[10]

Therefore, the Commission is retaining the statutory notice period of 30 days for such across-the-board increases and retaining the current rules at 46 CFR 502.67(b)(2) which apply to protests of such increases. Other changes to these rules governing protests are being considered in response to Hawaii's Petition P1–92, Amendments to Rules Governing Rate Proceedings in the Domestic Offshore Trades, 57 FR 2702 (Jan. 23, 1992).

In order to distinguish across-the-board increases from other non-GRI increases, the Commission is adding the following definition to 46 CFR 550.2:

Across-the-board increase means any change in rates, fares, or charges which will: (1) result in an increase in not less than 50 percent of the total rate, fare or charge items in the tariffs per trade of any carrier, and (2) directly result in an increase in gross revenues of said carrier for the particular trade of less than 3 percent.[11]

Having excluded across-the-board increases from the scope of this rule, the new, seven workdays' notice period and accompanying adjustments to the Commissions rules governing protests will apply to all individual commodity rate increases and other non-GRI increases filed by domestic offshore carriers. These filings constitute the majority of tariff increases in the domestic offshore trades. Thus, the stated objectives for the proposed rule—greater consistency with ICC tariff regulations, and the removal of a possible disincentive for carriers to reduce rates—are essentially satisfied.

We are confident that this rule, as amended, will not substantially impair effective regulation, be unjustly discriminatory or be detrimental to commerce. Since at least 1981, the Commission has not investigated any of the types of increases that could be filed on seven workdays' notice pursuant to the final rule.[12] Moreover, the rule will not prevent the Commission from investigating any such increases under either section 3 of the 1933 Act, 46 U.S.C. app. 845, or under section 18(a) of the 1916 Act, 46 U.S.C. app. 817(a). Thus, effective regulation will not be impaired.

Because the reduced notice period will be available to all vessel operating common carriers as well as NVOCCS, it will not be unjustly discriminatory among carriers. To the contrary, it will remove a significant difference in notice periods available to ICC-regulated and FMC-regulated carriers.

Nor can the Commission perceive any unjust discriminatory among shippers or other entities which might result from this reduction in tariff filing notice. Shippers which utilize FMC-regulated services will receive the same notice of most tariff increases as shippers which utilize ICC-regulated services.

By bringing FMC regulations closer to ICC regulations, and by removing a possible disincentive to establishing and maintaining lower rates, this rule will have a positive, rather than detrimental, effect upon commerce in the domestic offshore trades. This regulatory consistency is achieved without significant impact on the Commission's ability to control the level of rates in these trades.

The Commission has considered each of the clarifications and technical modifications suggested in the carriers' comments and has accommodated most of those suggestions as follows.

In response to PRMSA's comments, the term "tariff matter" as used in § 550.1(b) (1) and (2) is intended to include all rules, rates, charges and notes as well as any other matter properly filed in domestic offshore tariffs. The experience that PRMSA refers to in connection with notes and footnotes effecting short notice decreases was apparently the result of unrelated technical problems, which has since been corrected.

We concur with APL's suggestion that the requirement to deliver short notice tariff increases by hand or by fax to officials or offices of states, commonwealth or territories should be implemented without directing carriers to place a rule in their tariffs to that effect. Placing this provision in the Commission's rules will be sufficient to accomplish the purpose, without encumbering the carriers' tariffs with another required rule. Failure to serve copies of such increases on designated offices or officials could still result in rejection of the increases by the Commission. The final rule reflects this change in § 550.3(h)(2).

PRMSA's suggestions is also well taken that we clarify whether the requirement to serve copies of short notice increases applies to all states served by the carrier or just to offshore jurisdictions. The rule itself is clear, as is the existing language of § 550.3(h)(2), in that the governor of any state, commonwealth or territory served by a carrier may request that carrier to furnish copies of any filed tariff matter which affects that jurisdiction. The confusion to which PRMSA refers was generated by the Supplementary Information of the proposed rule, which stressed the vital interests of offshore jurisdictions in ocean transportation. The Commission intends that this requirement continue to be applicable with respect to any state, commonwealth, or territory served by a domestic offshore carrier.

We have also accommodated PRMSA's related suggestion for clarification of the carrier's obligations under § 550.3(h)(2). The language of that section in the proposed rule, as well as in the existing regulations, is clear that the carrier's obligation to provide copies of tariffs and tariff changes to officials or offices of states, commonwealths or territories arises only upon the written request of the governor of that jurisdiction and the designation by that governor of the official or office to receive such tariff matter. The carrier has no obligation to provide such tariff matter or to serve copies of short notice increases by fax or hand delivery until the governor has made such a request and the related designation. However, because the Commission is adopting APL's suggestion to delete the requirement for carriers to place a rule in their tariffs to implement the new service requirements for short notice increases, we are specifying in § 550.3(h)(2) that the name, address and fax number of the designated official or

between United States Pacific Coast Ports and Hawaii Ports, Order Partially adopting Initial Decision, 23 S.R.R. 1216 (1986), Report on Remand, 25 S.R.R. 83 (1989); *Aff'd per curiam sub nom. Tobias E. Seaman v. Federal Maritime Commission*, Docket No. 89–1407 (D.C. Cir. March 23, 1990).

[10] Docket No. 85–3, *Matson Navigation Company, Inc. Proposed Overall Rate Increase of 2.5 Percent Between United States Pacific Coast Ports and Hawaii Ports*, Order Discontinuing Proceeding, 23 S.R.R. 662 (December 27, 1985). The rate level that resulted from the across-the-board increase that was investigated in Docket No. 85–3 was later investigated as part of Docket No. 85–24 and was found unreasonable. The Commission ordered a roll-back of 1.5 percent.

[11] This definition, like the current definition of general increase contained at 46 CFR 550.2(k), would include surcharges, as well as other types of across-the-board increases. In its comments, Coastal noted a particular interest in how the proposed rule would affect filing of fuel surcharges and asserted that the proposed rule would have allowed surcharges to be increased on seven workdays' notice. This only would have been true under the proposed rule if the surcharge were less than 3 percent. Otherwise, it would likely meet the definition of GRI and require 60 days' notice, unless special permission were obtained to file on shorter notice. Carriers in these trades frequently seek and obtain special permission to file cost pass-through surcharges on short notice and accompanied by abbreviated, alternative data under 46 CFR part 552.

[12] In 1981, the Commission investigated tariff amendments filed by PRMSA which increased approximately 300 commodity items by 2.9 percent. Docket No. 81–70, *Puerto Rico Maritime Shipping Authority-Proposed 2.9% Rate Increase Affecting Major Commodities in the U.S. Atlantic and Gulf/Puerto Rico and Virgin Islands Trades*, Order of Investigation and Suspension, November 19, 1981, Order of Discontinuance, December 30, 1981 (unreported).

office must also be furnished by the governor before this new service requirement must be implemented by a carrier.

We find it unnecessary to act upon Tropical's suggestion that the Commission solicit the views of these governments rather than assume that they desire to receive each and every short notice rate increase. No such assumption is contained in the proposal or in the existing rule. The governor of each such state, commonwealth or territory must make a written request, designate an official or office, and provide the address and fax number to which such increases must be sent.

The Commission is adopting the suggestion made by both APL and Sea-Land to require that protests of increases filed on at least thirty days' notice continue to be submitted no later than twenty days prior to the effective date of the pertinent increase. This is particularly appropriate in view of the Commission's retention of thirty days' notice for across-the-board increases, as discussed above. The requirement to file protests no later than twenty days prior to the effective date of a tariff change will also be applicable to other, non-GRI tariff increases filed voluntarily on at least thirty days' notice.[13] Thus, the ability to file streamlined protests as late as 9 a.m. on the day prior to the effective date of a tariff increase will be limited to new or amendatory tariff matter filed on less than thirty days' notice.

Finally, we believe that Sea-Land's suggestion to retain the requirement that protests include a subscription and verification is unnecessary. New § 502.67(b)(3) requires that protests shall be filed and served in accordance with subpart H of 46 CFR part 502. That subpart, at § 502.112, contains the Commission's requirements for subscription and verification of documents.

In addition to these clarifications and modifications in response to carrier comments, the Commission has made other technical changes in the final rule which are necessitated by the distinction, discussed above, between across-the-board increases and other, non-GRI increases. Further, for clarification, we have added a new definition of "workday" to § 550.2, which is identical to that set forth in ICC regulations at 49 CFR 1314.5(c).

As mentioned in the Supplementary Information of the proposed rule, the actions taken here also will impact the interim rule in Docket No. 90–23, Tariffs and Service Contracts, published on August 12, 1992 (57 FR 36248). Accordingly, appropriate amendments are herein made to that interim rule, published at 46 CFR part 514.

Although the Commission, as an independent regulatory agency, is not subject to Executive Order 12291, dated February 17, 1981, it nonetheless has reviewed the rule in terms of this Order and has determined that this rule is not a "major rule" as defined in Executive Order 12291 because it will not result in:

(1) An annual effect on the economy of $100 million or more;

(2) A major increase in costs or prices for consumers, individual industries, Federal, State or local government agencies or geographic regions; or

(3) Significant adverse effects on competition, employment, investment, productivity, innovations, or on the ability of United States-based enterprises to compete with foreign-based enterprises in domestic or export markets.

The Federal Maritime Commission certifies, pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(n), that this rule will not have a significant economic impact on a substantial number of small entities, including small businesses, small organizational units and small government jurisdictions. The rule only will adjust the notice period and the protest period for a class of rate increases which the Commission has found no reason to investigate since at least 1981. Moreover, the ability to raise such rates on shorter notice may encourage carriers to establish and maintain lower rates.

The collection of information requirements contained in this regulation have been approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act of 1980, as amended, and have been assigned OMB control number 3072–0005. Public reporting burden for this collection of information is estimated to average 20 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to Norman W. Littlejohn, Director, Bureau of Administration, Federal Maritime Commission, Washington, DC 20573; and to the Office of Information and Regulatory Affairs, Attention: Desk Officer for the Federal Maritime Commission, Office of Management and Budget, Washington, DC 20573.

Therefore, pursuant to 5 U.S.C. 553, section 18, 35 and 43 of the Shipping Act, 1916, 46 U.S.C. app. 817, 833a and 841a, and section 2 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 844, parts 502, 514, and 550 of title 46, Code of Federal Regulations are amended as follows:

PART 502—RULES OF PRACTICE AND PROCEDURE

1. The authority citation for part 502 continues to read as follows:

Authority: 5 U.S.C. 504, 551, 552, 553, 559; 12 U.S.C. 1141j(a); 18 U.S.C. 207; 26 U.S.C. 501(c)(3); 28 U.S.C. 2112(a); 46 U.S.C. app. 817, 820, 821, 826, 841a, 1114(b), 1705, 1707–1711, 1713–1716; E.O. 11222 of May 8, 1965 (30 FR 6569); and 21 U.S.C. 853a.

2. In § 502.67, paragraph (b)(2) is revised and a new paragraph (b)(3) is added to read as follows:

§ 502.67 Proceedings under section 3(a) of the Intercoastal Shipping Act, 1933.

* * * * *

(b) (1) * * *

(2) Protests against across-the-board increases, as defined in § 550.2 of this chapter, and against other proposed changes in tariffs filed on at least thirty (30) days' notice, shall be filed and served no later than twenty (20) days prior to the proposed effective date of the change. The provisions of paragraph (b)(1) of this section relating to the form and manner of filing protests against a proposed general rate increase or decrease shall be applicable to protests against across-the-board increases and

[13] The content of protests against non-GRI increases filed on at least thirty days' notice is being considered in connection with Hawaii's Petition P1–92, *supra*.

other proposed changes in tariffs filed on at least thirty (30) days' notice. A protest is deemed filed on the date it is received by the Commission.

(3) Protests against other proposed changes in tariffs filed on less than thirty (30) days' notice shall be filed and served not later than 9 a.m. on the last workday before the scheduled effective date of the change. any protest may be made by letter and shall be filed with the Director, Bureau of Tariffs, Certification and Licensing, and served upon the tariff publishing officer of the carrier in accordance with subpart H of this part. Such protest shall identify the tariff in question and the grounds for opposition to the change as well as the relief sought by the protestant. A protest is deemed filed on the date it is received by the Commission.

* * * * *

PART 514—TARIFFS AND SERVICE CONTRACTS

3. The authority citation for part 514d continues to read as follows:

Authority: 5 U.S.C. 552 and 553; 31 U.S.C. 9701; 46 U.S.C. app. 804, 812, 814–817(a), 820, 833a, 841a, 843, 844, 845, 845a, 845b, 847, 1702–1705, 1707–1709, 1712, 1714–1716, 1718 and 1722; and sec. 2(b) of Pub. L. 101–92, 103 Stat. 601.

4. In § 514.2, add the following definitions in alphabetical order:

§ 514.2 Definitions.

* * * * *

Across-the-board increase (domestic offshore commerce) means any change in rates, fares, or charges in domestic offshore commerce which will: (1) Result in an increase in not less than 50 percent of the total rate, fare or charge items in the tariffs per trade of any carrier, and (2) directly result in an increase in gross revenues of said carrier for the particular trade of less than 3 percent. See § 514.9(b)(1).

Workdays (domestic offshore commerce) means all days except Saturdays, Sundays, and all federal holidays observed in the District of Columbia. See § 514.9(b)(24)(ii).

* * * * *

5. In § 514.3, paragraph (d)(1) is revised to read as follows:

§ 514.3 Exemptions and exclusions.

* * * * *

(d) *Domestic offshore commerce—(1) Notice requirements; general.* Carriers engaged in the transportation by water of passengers or property on the high seas or the Great Lakes on regular routes from port to port between Alaska, Hawaii, a Territory, District or possession of the United States and any other State, Territory, District or possession of the United States, or between places in the same Territory, District, or possession, may publish:

(i) On one day's notice, any new or amendatory tariff matter that does not result in an increased cost to the shipper. This exemption may not apply to any decrease which is part of a "general decrease in rates" as defined by section 1 of the 1933 Act. See § 514.2; and

(ii) On seven workdays' notice, any new or amendatory tariff matter that results in an increased cost to the shipper. This exemption may not apply to any increase which is part of a "general increase in rates" as defined by section 1 of the 1933 Act (see § 514.2), or any increase which is part of an "across-the-board" increase in rates as defined in § 514.2.

(2) * * *

* * * * *

6. In § 514.4, paragraph (a) is revised to read as follows:

§ 514.4 Content, filing and cancellation of tariff material; general.

(a) *Effectiveness of new or initial and conference tariffs in the domestic offshore and foreign trades.* Unless otherwise provided by the Commission or this part, all conference and carrier tariff material tendered for filing (including the tariffs of carriers entering a trade for the first time), shall bear an effective date which complies with the appropriate notice period(s) prescribed in § 514.9 or in other sections of this part. The notice period between filing and effective date shall commence at 12:01 a.m. of the day of filing, as evidenced by the Commission's receipt notation. The tariff may take effect at 12:01 a.m. of the day after the notice period expires.

* * * * *

7. In § 514.8, paragraphs (k)(1)(i) and (k)(1)(ii) are revised to read as follows:

§ 514.8 Electronic filing.

* * * * *

(k) *Publication; paper copies of tariff materials—(1) Publication—(i) Availability for public inspection.* (A) During normal business hours, every carrier, conference and terminal operator shall promptly make available to the public in paper or electronic form and at a reasonable charge (such as for a regular subscription under § 514.15(b)(30)) all tariff material required by this part to be filed by the carrier, conference or marine terminal operator, as well as all Commission actions affecting such tariff material, such as rejections, suspensions, etc.

(B) In addition to the requirements of paragraph (k)(1)(i)(A) of this section, every domestic offshore carrier shall make available to the public at each facility at which it receives freight or passengers for transportation, or at which it employs a general or sales agent, all tariff material governing transportation to and from the facility in question.

(ii) *Availability of domestic offshore tariff materials to government officials.* The governor of any state, commonwealth or territory served by a domestic offshore carrier may request a carrier in writing to furnish to a designated government official or office tariff matter filed by the carrier which pertains to trades affecting the state, commonwealth or territory in question. Such request may be for the tariff matter either to be made available in electronic format, or to be furnished in no more than two (2) paper copies. Upon receipt of such a request, which shall include the name, address and facsimile transmission number(s) of the designated official or office, the carrier shall promptly provide to the designated official or office the requested tariff material and add the official or office to its list of tariff subscribers. No charge shall be made for the service, but such officials and offices shall be treated in the same fashion as paid subscribers in all other respects. See § 514.15(b)(30). In addition, a copy of any new or amendatory tariff matter that results in an increased cost to the shipper and that is filed on less than 30 days' notice pursuant to § 514.9(b)(24)(ii), shall be provided to the designated Government officials or offices, on the same day that such tariff matter is filed with the Federal Maritime Commission, by hand delivery or facsimile transmission of one paper copy, or by electronic transmission, if available.

* * * * *

8. In § 514.9, paragraphs (b)(1) and (b)(24)(ii) are revised to read as follows:

§ 514.9 Filing/Amendment codes and required notice periods.

(a) * * *

(b) * * *

(1) *"A" Increase (Foreign commerce and across-the-board increase which is not a general rate increase in domestic offshore commerce under paragraph (b)(7) of this section ["G"]: 30 days' notice.* (i)(A) Except for a general rate increase in domestic offshore commerce, amendments which provide for changes in rates, charges, rules, or other tariff provisions (including fares in domestic offshore commerce), which constitute a cost increase in foreign commerce or an

across-the-board increase in domestic offshore commerce, shall use the symbol "A" and be filed to become effective not earlier than 30 days' after the date of filing, unless an exemption or special permission to become effective on less than said 30 days' notice has been granted by the Commission. See paragraph (b)(24)(ii) of this section for domestic offshore increases which may be filed on seven workdays' notice.

(B) With the filing of tariff material under this paragraph (b)(1)(i), domestic offshore carriers shall simultaneously submit in paper format any supporting data required by part 552 of this chapter.

(ii) An amendment which deletes a specific commodity and rate applicable thereto from a tariff, thereby resulting in the application of a higher "cargo n.o.s." or similar general cargo rate, is a rate increase requiring the appropriate notice period and corresponding symbol under this section.

* * * * *

(24) * * *

(i) * * *

(ii) *Domestic offshore tariff increases not general or across-the-board increases (7 workdays' notice).* (A) Except for an across-the-board increase ("A") or a general rate increase ("G") in domestic offshore commerce, an amendment which provides for changes in rates, fares, charges, rules, or other tariff provisions, which constitutes a cost increase in domestic offshore commerce, shall use the symbol "X" and be filed to become effective not earlier than 7 workdays' after the date of filing, unless an exemption or special permission to become effective on less than said 7 workdays' notice has been granted by the Commission. See paragraphs (b)(1) and (b)(7) of this section.

(B) With the filing of tariff material under this paragraph (b)(24)(ii), domestic offshore carriers shall simultaneously submit in paper format any supporting data required by part 552 of this chapter.

(C) An amendment which deletes a specific commodity and rate applicable thereto from a tariff, thereby resulting in the application of a higher "cargo n.o.s." or similar general cargo rate, is a rate increase requiring the appropriate notice period and corresponding symbol under this section.

* * * * *

PART 550—PUBLISHING, FILING AND POSTING OF TARIFFS IN DOMESTIC OFFSHORE COMMERCE

9. The authority citation for part 550 continues to read as follows:

Authority: 5 U.S.C. 553; 46 U.S.C. app. 812, 814, 815, 817, 820, 833a, 841a, 843, 844, 845, 845a, 845b, and 847.

10. In § 550.1, paragraph (b) is revised to read as follows:

§ 550.1 Exemptions.

* * * * *

(b) Carriers engaged in the transportation by water of passengers or property on the high seas or the Great Lakes on regular routes from port to port between Alaska, Hawaii, a Territory, District or possession of the United States and any other State, Territory, District or possession of the United States, or between places in the same Territory, District, or possession, may publish:

(1) On one day's notice, any new or amendatory tariff matter that does not result in an increased cost to the shipper. This exemption shall not apply to any decrease which is part of a "general decrease in rates" as defined by section 1 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 843; and

(2) On seven workdays' notice, any new or amendatory tariff matter that results in an increased cost to the shipper. This exemption shall not apply to any increase which is part of a "general increase in rates" as defined by section 1 of the Intercoastal Shipping Act, 1933, 46 U.S.C. app. 843, or any increase which is part of an "across-the-board" increase in rates as defined in § 550.2.

11. In § 550.2, paragraphs (a) through (z) are redesignated paragraphs (b) through (aa), and new paragraphs (a) and (bb) are added to read as follows:

§ 550.2 Definitions.

* * * * *

(a) *Across-the-board increase* means any change in rates, fares, or charges which will:

(1) Result in an increase in not less than 50 percent of the total rate, fare or charge items in the tariffs per trade of any carrier; and

(2) Directly result in an increase in gross revenues of said carrier for the particular trade of less than 3 percent.

* * * * *

(bb) *Workdays* means all days except Saturdays, Sundays, and all federal holidays observed in the District of Columbia.

12. In § 550.3, paragraphs (f) and (h)(2) are revised to read as follows:

§ 550.3 Filing of tariffs; general.

* * * * *

(f) All tariff matter tendered for filing shall bear an effective date which complies with the notice periods prescribed in § 550.10 or in other sections of this part. The notice period between filing and effective date shall commence at 12:01 a.m. of the day of filing, as evidenced by the Commission's receipt notation. The tariff may take effect at 12:01 a.m. of the day after the notice period expires.

* * * * *

(h) * * *

(2) The governor of any state, commonwealth or territory served by a domestic offshore carrier may request a carrier in writing to furnish a designated government official or office no more than two (2) copies of any tariff matter filed by the carrier which pertains to trades affecting the state, commonwealth or territory in question. Upon receipt of such a request, which shall include the name, address and facsimile transmission number of the designated official or office, the carrier shall provide promptly to the designated officer or office the requested copies of its tariff(s) and add the official or office to its list of tariff subscribers. No charge shall be made for the service, but such officials and officers shall be treated in the same fashion as paid subscribers in all other respects. In addition, a copy of any new or amendatory tariff matter that results in an increased cost to the shipper and that is filed on less than 30 days' notice pursuant to 46 CFR 550.1(b)(2), shall be provided to the designated government officials or offices by facsimile transmission, or hand delivery, on the same day that such tariff matter is filed with the Federal Maritime Commission.

* * * * *

13. In § 550.10, paragraph (b) is revised to read as follows:

§ 550.10 Amendments to tariffs.

* * * * *

(b) Amendments establishing new or initial rates, or changing rates, fares, charges, rules, or other tariff provisions, which do not constitute a general increase or decrease in rates, shall be posted and filed, together with any supporting material required by 46 CFR part 552 of this chapter, as follows:

(1) Amendments extending actual service to additional ports at rates or fares already in effect for similar service at the ports being added may take effect on the same day they are filed and posted;

(2) Amendments adopting a tariff pursuant to § 550.17 may take effect on the same day they are filed and posted;

(3) Amendments completely canceling a tariff pursuant to § 550.12(a)(2) due to a cessation of all service by the publishing carrier between the ports or points listed in the canceled tariff, may

take effect on the same day they are filed and posted;

(4) Amendments which do not result in an increased cost to the shipper, except for general rate decreases, may be posted and filed on not less than one day's notice;

(5) Amendments which result in an increased cost to the shipper, except for general rate increases and across-the-board increases, may be posted and filed on not less than seven workdays' notice;

(6) Amendments changing rates, fares, charges, rules, or other tariff provisions, which constitute an across-the-board increase, shall be posted and filed at least 30 days prior to their effective date.

* * * * *

14. In § 550.3(o)(3) remove the words "30 days" and add, in their place, the words "7 workdays".

§ 550.17 [Amended]

15. In 46 CFR Part 550, remove the words "30 days' notice" and add, in their place, the words "7 workdays' notice" in the following places:

(a) Section 550.17(b)(2).

(b) Section 550.17(c).

(c) Section 550.17(e).

By the Commission.

Joseph C. Polking,

Secretary.

BILLING CODE 6730-01-M

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 92-112; RM-7982]

Radio Broadcasting Services; Hawkinsville, GA

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This document substitutes Channel 280C3 for Channel 280A at Hawkinsville, Georgia, and modifies the license for Station WCEH (FM) to specify the higher powered channel at the request of Tri-County Broadcasting Co. See 57 FR 21919, May 26, 1992. Channel 280C3 can be allotted to Hawkinsville in compliance with the Commission's minimum distance separation requirements with a site restriction 20.9 kilometers (13 miles) southwest to accommodate the petitioner's desired transmitter site. The coordinates are North Latitude 32-10-32 and West Longitude 83-39-11. With this action, this proceeding is terminated.

EFFECTIVE DATE: November 6, 1992.

FOR FURTHER INFORMATION CONTACT: Nancy J. Walls, Mass Media Bureau, (202) 634-6530.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 92-112, adopted August 21, 1992, and released September 22, 1992. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Dockets Branch (room 230), 1919 M Street NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractors, Downtown Copy Center, (202) 452-1422, 1990 M Street NW., suite 640, Washington, DC 20036.

List of Subjects in 47 CFR Part 73

Radio broadcasting.

PART 73—[AMENDED]

1. The authority citation for part 73 continues to read as follows:

Authority: 47 U.S.C. 154, 303.

§ 73.202 [Amended]

2. Section 73.202(b), the Table of FM Allotments under Georgia, is amended by removing Channel 280A and adding Channel 280C3 at Hawkinsville.

Federal Communications Commission.

Michael C. Ruger,

Chief, Allocations Branch, Policy and Rules Division, Mass Media Bureau.

[FR Doc. 92-23407 Filed 9-25-92; 8:45 am]

BILLING CODE 6712-01-M

Proposed Rules

Federal Register
Vol. 57, No. 188
Monday, September 28, 1992

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1413

1993 Rice Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Proposed rule.

SUMMARY: This proposed rule would amend the regulations to set forth the acreage reduction percentage, if any, for the 1993 crop of rice. This action is required by section 101B of the Agricultural Act of 1949, as amended (the 1949 Act). This proposed rule outlines a range of acreage reduction percentage options proposed for the 1993 crop of rice.

DATES: Comments must be received on or before October 20, 1992, in order to be assured of consideration.

ADDRESSES: Comments must be mailed to: Deputy Administrator, Policy Analysis, Agricultural Stabilization and Conservation Service (ASCS), U.S. Department of Agriculture (USDA), P.O. Box 2415, room 3090–S, Washington, DC 20013–2415.

FOR FURTHER INFORMATION CONTACT: Cene S. Rosera, Agricultural Economist, Fibers and Rice Analysis Division, USDA, ASCS, room 3758–S, P.O. Box 2415, Washington, DC 20013–2415 or call 202–720–6734.

SUPPLEMENTARY INFORMATION: This rule has been reviewed under USDA procedures established in accordance with provisions of Departmental Regulation 1512–1 and Executive Order 12291 and has been classified as "major." It has been determined that an annual effect on the economy of $100 million or more may result from implementation of the provisions of this proposed rule.

It has been determined that the Regulatory Flexibility Act is applicable to this proposed rule since the Commodity Credit Corporation (CCC) is required by section 105b(o) of the 1949 Act to request comments with respect to the subject matter of this rule.

A Preliminary Regulatory Impact Analysis was prepared, which determined that this regulation will have no significant impact on a substantial number of small entities because the particular acreage reduction percentages considered will not affect the paperwork, reporting, or compliance burdens of the small entities in the program. Accordingly, CCC certifies that the rule will have no significant impact on a substantial number of small entities. The Preliminary Regulatory Impact Analysis describing the options considered in developing this proposed rule and the impact of the implementation of each option is available on request from the above-named individual.

It has been determined by an environmental evaluation that this action will have no significant impact on the quality of the human environment. Therefore, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

The title and number of the Federal assistance program, as found in the catalog of Federal Domestic Assistance, to which this proposed rule applies, are: Rice Production Stabilization—10.065.

This proposed rule has been reviewed in accordance with Executive Order 12778. The provisions of this proposed rule do not preempt State laws, are not retroactive, and do not require the exhaustion of any administrative appeal remedies.

This program/activity is not subject to the provisions of Executive Order 12372, which requires intergovernmental consultation with State and local officials. See the notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

The amendments to 7 CFR part 1413 set forth in this proposed rule do not contain information collections that require clearance by the Office of Management and Budget under the provisions of 44 U.S.C. 35.

Comments are requested with respect to this proposed rule and such comments shall be considered in developing the final rule.

Background

In accordance with section 101B of the 1949 Act, an acreage reduction program (ARP) may be implemented for the 1993 rice crop if it is determined that the total supply of rice, in the absence of such a program, would be excessive taking into account the need for an adequate carryover to maintain reasonable and stable supplies and prices and to meet a national emergency.

Land diversion payments also may be made to producers if needed to adjust the total national acreage of rice to desirable goals. A paid land diversion program is not considered because, given the considered program options, it is not needed to achieve the statutory stocks-to-use levels of rice.

If an ARP is announced, the reduction shall be achieved by applying a uniform percentage reduction (from 0 to 35 percent) to the rice crop acreage base for the crop for each rice producing farm. In making such a determination, the number of acres placed into the agricultural resources conservation program established under subtitle D of title XII of the Food Security Act of 1985, as amended, must be taken into consideration.

Producers who knowingly produce rice in excess of the permitted acreage for the farm plus any rice acreage planted in accordance with the flexibility provisions are ineligible for loans and purchases and all payments with respect to that crop on the farm.

The Secretary is required to carry out an acreage limitation program in a manner that will result in carry-over stocks equal to 16.5 to 20.0 percent of the simple average of the total disappearance (including domestic, export, and residual disappearance) of rice for each of the 3 marketing years preceding the year for which the announcement is made. The 1993-crop options considered are:

Option 1. 0-percent ARP.

Option 2. 2.5-percent ARP.

Option 3. 5.0-percent ARP.

Option 4. 7.5-percent ARP.

Option 5. 10.0-percent ARP.

The estimated impacts of these options are shown in Table 1.

TABLE 1.—ESTIMATED IMPACTS OF 1993 ARP OPTIONS

	Options				
	1	2	3	4	5
ARP (%)	0.0	2.5	5.0	7.5	10.0
Participation (%)	94	94	94	94	94
Planted Acres (1000 Ac.)	3003	2920	2835	2751	2667
Production (Mil cwt)	165.6	161.2	156.8	152.4	147.9
Domestic/Residual Use (Mil cwt)	97.6	97.2	89.8	89.4	89.0
Exports (Mil cwt)	76.0	74.0	72.0	70.0	68.0
Ending Stocks (mil cwt)	32.9	31.0	28.9	26.9	24.9
Stocks/Use Ratio (%) Prior 3 Years	20.5	19.3	18.0	16.8	15.5
Season Avg. Price ($/cwt)	6.70	6.85	7.00	7.20	7.35
Net Outlays (Mil $)	736	707	665	611	572

Accordingly, comments are requested whether to establish an ARP for the 1993 rice crop, and if so, at what reduction percentage.

The final determination of this percentage will be set forth at 7 CFR part 1413.54(a)(4).

List of Subjects in 7 CFR Part 1413

Cotton, Feed grain, Related programs, Rice, Wheat.

Accordingly, it is proposed that 7 CFR part 1413 be amended as follows:

PART 1413—FEED GRAIN, RICE, UPLAND AND EXTRA LONG STAPLE COTTON, WHEAT AND RELATED PROGRAMS

1. The authority citation for 7 CFR part 1413 continues to read as follows:

Authority: 7 U.S.C. 1308, 1308a, 1309, 1441–2, 1444–2, 1444f, 1445b–3a, 1461–1469; 15 U.S.C. 714b and 714c.

2. In § 1413.54, paragraphs (a)(4) (ii) and (iii) and (d)(3) are revised to read as follows:

§ 1413.54 Acreage reduction program provisions.

(a) * * *

(4)(i) * * *

(ii) * * * 1992 rice, 0 percent.

(iii) 1993 rice, within the range of 0 to 35 percent, if supplies are excessive, as determined and announced by CCC with no paid land diversion.

* * * * *

(d) * * *

(3) Shall not be made available to producers of the 1993 crops of wheat, feed grains and rice, as determined and announced by CCC.

* * * * *

Signed on September 22, 1992, at Washington, DC.

Keith D. Bjerke,

Executive Vice President, Commodity Credit Corporation.

BILLING CODE 3410–05–M

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

RIN 3150–AE38

Acceptability of Plant Performance for Severe Accidents; Scope of Consideration in Safety Regulations

AGENCY: Nuclear Regulatory Commission.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The Nuclear Regulatory Commission (NRC) is considering an amendment to its regulations for future light water reactors (LWRs). The amendment would add provisions for the design of the plant structures to withstand certain challenges from phenomena associated with severe core damage accidents beyond the current "design basis accidents." The NRC is issuing this notice to invite advice and recommendations from interested parties on the proper scope and method to incorporate these provisions into safety regulations.

DATES: Comment period expires December 28, 1992. The NRC will consider comments received after this date only if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: Send written comments to: The Secretary of the Commission, U. S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Docketing and Service Branch. Deliver comments to: 11555 Rockville Pike, Rockville, MD, between 7:45 am and 4:15 pm on Federal workdays. Copies of comments received may be examined at the NRC Public Document Room, 2120 L Street NW (Lower Level), Washington, DC.

FOR FURTHER INFORMATION CONTACT: Thomas King, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555, telephone (301) 492–3980.

SUPPLEMENTARY INFORMATION:

Background

The Nuclear Regulatory Commission (NRC) is considering developing regulations under 10 CFR part 50 for future LWRs to address the ability of the plant to withstand challenges from phenomena associated with severe core damage accidents. Severe core damage accidents are low probability events beyond the design basis established in 10 CFR part 50 that can lead to significant core damage and radioactive material release from the reactor fuel pins. The NRC believes that research and engineering on the significant severe accident phenomena, event sequences, and cost effective methods to mitigate them, coupled with its understanding of the details of future plant designs, have sufficiently matured to allow the development of plant performance criteria for future LWRs. This advance notice of proposed rulemaking (ANPRM) requests from interested parties advice and recommendations on the proper scope and method to incorporate these considerations into the NRC's regulations.

This ANPRM reflects consideration of the extensive work accomplished in the severe accident area. Specifically, the NRC has already taken various actions in response to severe accident concerns. On October 2, 1980, the Commission issued (45 FR 65474) an ANPRM that invited advice and recommendations on the consideration of degraded or molten cores in safety regulation. Based on recommendations received from that ANPRM, the Commission developed a policy statement that addressed severe accident considerations and withdrew the ANPRM (August 8, 1985; 50 FR 32151). In its "Policy Statement on Severe Reactor Accidents Regarding Future Designs and Existing Plants" published August 8, 1985 (50 FR 32133),

the Commission stated its intentions for rulemakings and other regulatory actions for resolving severe accident safety issues. For existing plants, the Commission concluded that these plants posed no undue risk to public health and safety. Therefore, it did not see a need for immediate action on generic rulemaking for these plants because of the low severe accident risk. The Commission has continued to take all reasonable steps to further reduce the risk from severe accidents at existing plants through its regulatory programs. For example, the Commission completed rulemakings on several key issues related to severe accidents (i.e., station blackout, anticipated transients without scram, hydrogen generation and control), has implemented a containment performance improvement program based upon insights regarding containment performance under severe accident conditions, and has initiated a program for individual plant examination (IPE) for severe accident vulnerabilities.

For future plants, the Severe Accident Policy Statement established the criteria and procedural steps under which a new design for a nuclear power plant could be acceptable for meeting severe accident concerns. The NRC recognized the need to strike a balance between accident prevention and consequence mitigation in exploring the need for additional design features in the next generation of plants. Also, the NRC expected that these new plants would achieve a higher standard of severe accident safety performance than prior designs. The Commission stated that a "clarification of containment performance will be made including a decision on whether to establish new performance criteria for containment systems and, if so, what these should be."
